Provide bilingual programs for pupils whose dominant language is not English, pursuant to law and regulation;

Provide compensatory education programs for pupils, pursuant to law and regulation;

Provide all pupils equal educational opportunity, pursuant to law and regulation;

Provide career awareness and vocational education, pursuant to law and regulation; and

Provide educational opportunities for exceptionally gifted and talented pupils.

§6:27-1.3

The curriculum shall comply with statutory requirements and shall be that which has been adopted by the local board of education and approved by the State Board of Education.

A copy of the program of studies together with the regulations governing its administration as formulated locally and approved by the State Department of Education shall be kept on file in the principal's office of each high school.

The subject offerings shall be sufficiently varied to provide for the educational needs of normal youth of high school age living in the community which the school is intended to serve.

The educational program shall be designed to stimulate each pupil to achieve the highest level of attainment of which he is capable.

The school shall maintain a program for the promotion of character and citizenship and for the development of mental and physical vigor.

Guidance service shall be provided to assist each pupil and his parents to make suitable choice in the use of all available educational resources of the school.

The school shall maintain a plan for curriculum development and for the advancement of instructional efficiency.

Statutes

§64-35-6; 64-35-9

"The state department of education may prescribe the forms and procedures necessary for the making of applications and the licensing of driver training schools and driver training instructors . . . The state department of education shall prescribe minimum motorcycle driver-training program standards. Such standards shall be at least equivalent to those of regular programs of motorcycle driver training conducted by the public high schools . . . ."

DRIVER EDUCATION

MOTORCYCLE DRIVER EDUCATION

§77-11-1

"The state board shall, by regulation, prescribe courses of instruction to be taught in all public schools in the state, including courses in the history of New Mexico.

NEW MEXICO HISTORY

§77-11 - 1.1

"The public schools . . . shall provide a course of instruction in drug abuse education for grades 7 through 12." The state board shall prescribe the courses of instruction and textbooks.

DRUG ABUSE EDUCATION

§77-11-7

"The state board or its designated representative shall adopt and promulgate minimum standards subject to certification by the state superintendent for approved driver-education and motorcycle driver-education courses. Such courses shall provide behind the wheel or on the motorcycle training to students legally entitled to operate such vehicles.

DRIVER EDUCATION

§77-11-14

Up to the equivalent of 10% of the instructional employees in a school district may be employed under the educational enrichment program. Persons will be hired by the local school administration and may work a 220

EDUCATION ENRICHMENT

day contract rather than the usual 180 day contract. Applicants must have three years experience, and a valid certificate and college major in the area they are employed to teach in.

§77-11-15

Personnel selected for the education enrichment program shall work during a given summer in two evenly divided groups. One group will instruct a maximum of 15 students in 1 1/2 hours a day of classroom work. The other group will be involved in in-service training, curriculum planning, development and coordination. Teachers may not serve in one group twice without first serving in the other group.

REGULATIONS

Reg. Nos. 73-32; 73-33

MOTORCYCLE DRIVER EDUCATION

Approved motorcycle driver-education courses taught in the public schools or in commercial driving schools must meet these requirements.

No student is eligible to receive motorcycle driver instruction unless he/she is legally entitled to operate a motorcycle.

The teacher must: either hold a Secondary Teaching Certificate with endorsement in driver training and have completed at least one course in motorcycle safety or an in-service workshop; or be an experienced motorcycle dirver, at least 21 years of age, who has completed an acceptable motorcycle safety education course, has adequate knowledge of motorcycles, and has demonstrated an aptitude to instruct students and to maintain discipline and follow proper safety procedures.

In the program:

Classloads shall not exceed 12 students per instructor for on-cycle instruction and 35 students per instructor for classroom instruction.

Instruction shall consist of 6 hours classroom instruction, 4 hours on-cycle instruction and 2 hours observation of on-cycle instruction.

Each student shall be exposed during classroom instruction to materials approved by the Driver and Safety Education Unit of the State Department of Education.

I.School Staff; Statute §77-8-3

I.State Board of Education; Statute §77-2-2

1. Basic Curriculum

Statutes

§801;802

In order to "promote a spirit of patriotic and civic service" and "to foster . . . moral and intellectual qualities" necessary for the responsibilities of citizenship, boards of education shall require all children over the age of eight to attend "instruction in patriotism and citizenship". "Similar courses" shall be maintained in private schools. All children attending the eighth and higher grades shall attend courses in instruction in the U.S. Constitution, Declaration of Independence and the New York state constitution. The regents shall designate a week during each year and "prescribe a uniform course of exercises in the public schools" to "instill . . . the purpose, meaning and importance of the bill of rights articles in the federal and state constitutions."

PATRIOTISM

CITIZENSHIP

U.S. CONSTITUTION

Military instruction or drill is not authorized, but a board of education may offer a voluntary junior reserve officer training program in conjunction with the Department of Defense.

MILITARY INSTRUCTION

§803

Pupils above the age of eight are required to attend physical education courses. School districts employing at least 20 teachers shall employ a licensed physical education teacher, and other districts may provide for a teacher to conduct physical education courses. Two or more districts may share the costs of hiring a physical education teacher.

PHYSICAL EDUCATION

§ 804

All schools are required to offer instruction on

the abuse of alcohol, tobacco and other drugs. Such instruction shall be part of health education provided at both the elementary and secondary level. The course shall be taught by a teacher certified to teach health education. The commissioner of education may prescribe regulations for health education courses but course content may vary according to the needs of particular school districts.

ALCOHOL AND DRUG ABUSE

§805

If a teacher refuses to teach the required courses on alcohol and drug use, the commissioner of education shall revoke the teacher's license. State funds will not be distributed to any school district that refuses to comply with these requirements. Local superintendents must file an affidavit with the commissioner certifying that their school district has complied with these provisions.

REVOCATION

§806

Mandatory "courses of instruction in highway safety and traffic regulation [including bicycle safety]" will be offered in all schools in the state. School authorities are "empowered to organize . . . school safety patrol[s]" and to appoint patrol[s]" and to appoint pupils as members, contingent upon "written consent of the parents".

HIGHWAY SAFETY

§808; 809

A course in fire prevention shall be provided in every school.

FIRE PREVENTION

Instruction in humane treatment of birds and animals shall be provided in every elementary school.

HUMANE TREATMENT

§809a

Instruction may be given in "the safe and proper use of firearms, . . . the study of game laws and of proper hunting and conservation practices."

USE OF FIREARMS

§810

"The last Friday in April each year is . . . known as Conservation day," and may be used to encourage students' interest in wildlife, and soil and water conservation.

CONSERVATION DAY

§3204

"Instruction may be given only by a competent teacher. English shall be the language of instruction" and of all texts. For a period of three to six years from the date of enrollment, pupils unable to read and understand English sufficiently may receive bilingual instruction. Bilingual instruction is designed, among other things, to provide "a knowledge of . . .[the pupils' own] history and culture . . .;" and "to improve the potential for profitable learning activities by children."

"The course of study for the first eight years" of school "shall provide for instruction in . . . arithmetic, reading, spelling, writing, the English language, geography, United States history, civics, hygiene, physical training, the history of New York state and science.

COURSE OF STUDY

Instruction beyond the first eight years shall include: English language instruction, civics, hygiene, physical training, and American history."

A full time day school . . . shall be in session for not less than one hundred ninety days each year."

SCHOOL YEAR

REGULATIONS

§8.3

The commissioner shall establish regulations for the approved course of study in public schools; subjects in which Regents examinations may be given; the method of grading; and credit to be given for other subjects.

RULEMAKING

§ 100.1

An approved high school four-year course of study shall include: 4 units of English; 3 units of social studies including a year of American history; 1 unit of science, 1/2 unit of health and physical education. A guidance and counseling program, with certified guidance personnel, shall be provided. These subjects constitute the "constants" or required courses and shall be taught in accordance with State syllabuses.

Each pupil shall follow through a three-year sequence in one of the following: science, mathematics, foreign language, music, visual arts, business subjects, practical and industrial arts or vocational subjects.

The additional units needed for graduation shall be free electives. The complete program in any high school shall be determined in terms of "the size of the school, the fundamental arts and interests of the community and the adolescent groups whose needs are to be served."

The junior high school curriculum shall include English, social studies, science, mathematics, health education, visual arts, music and practical arts. There must be a "definite and effective" guidance program, including the services of certified guidance personnel.

The course of study for the first eight years of public school shall include instruction in music, visual arts, arithmetic, reading, spelling, writing, English, geography, U. S. history, civics, hygiene, physical training, the history of New York State and science.

Part 107

Statutory authority: §§ 207, 806

§ 107.1

SAFETY EDUCATION

Safety education shall be taught in both elementary and secondary grades, including highway and traffic safety and bicycle safety. In the elementary and junior high grades, instruction shall be given for at least 30 periods in each grade and for at least 15 periods in senior high.

Part 135 (Statutory authority §207)

§ 135.2

HEALTH & PHYSICAL EDUCATION

All schools shall provide a program of health, physical education and recreation. Boards of education and trustees have a duty to provide adequate personnel and facilities, maintain records for each child and make reports to the department.

§ 135.3

HEALTH EDUCATION

A satisfactory program in health education must be provided in all the grades kindergarten through 12. In junior and senior high school a special course shall be taught by a teacher certified to teach health.

§ 135.4

PHYSICAL EDUCATION

Trustees and boards of education must develop and implement school district plans for physical education. The curriculum shall be designed to promote physical fitness, group understanding, and leadership qualities. The instructional program and pupil needs and progress shall be continuously evaluated and assessed.

In grades K-6, physical education instruction shall be on a daily basis. In grades 7-12, daily instruction shall be available. Pupils shall participate either a minimum of 3 periods per week during one semester and two during the other semester. For pupils in

grades 10-12 only, extraclass programs or out-of-school activities may be made available. Each high school district shall hire a director of physical education who shall be certified in physical education and administrative and supervisory service.

School district plans for the physical education program shall include: curriculum development; appropriate examinations and tests to determine students' needs and progress; class size; etc.

POLICY GUIDES

SECONDARY SCHOOL CURRICULUM IN NEW YORK STATE
A HANDBOOK FOR ADMINISTRATORS 1970
University of the State of New York/State Education Department

The Bureau of Secondary Curriculum Development prepares syllabuses which provide a framework for local secondary school programs and also prepares handbooks to supplement these syllabuses. Curriculum experimentation in schools is encouraged and locally developed programs should submit a course syllabus to the Bureau of Evaluation for approval.

This policy guide is designed to assist school administrators in planning and developing curriculum in the secondary schools. The guide is intended to serve as a basic frame or reference for school administrators and other school personnel who are responsible for developing curriculum.

CROSS REFERENCES

I.City Superintendent of Schools; Statute §2508

I.Superintendent of Schools; Statute §1711

IV.H.; Regulation §16.2

IV.H.; Regulation §101.2 -- 101.4

1. Basic Curriculum

Statutes

§115-37

The "course of study" in the public schools "shall include instruction in Americanism, government of . . . North Carolina, government of the United States, fire prevention, harmful or illegal drugs, including alcohol, and the free enterprise system at the high school level . . . ." Local boards of education may, if they wish, operate a "nongraded system in which pupils are taught at their individual learning levels."

§115-198

The state superintendent, with the approval of the state board, shall prepare "a standard course of study for each grade" of the public schools. This may include establishment of a program of continuous learning based upon the individual child's need, interest, and stages of development, so that the individual child has a nongraded structure of organization.

COURSE OF STUDY

Included in the course of study shall be "outlines and suggestions for teaching . . . Americanism" and for teaching about "harmful drugs or illegal drugs including alcohol" and teaching about "the free enterprise system at the high school level." Local boards of education shall require all subjects to be taught in English and any teacher or principal who refuses to comply with this requirement may be dismissed.

§115-201 - 115-202

A non-credit program of driver training and safety education shall be taught in the public schools. The course shall be part of the required curriculum in the public high schools and made available to "public school students, nonpublic school students and out-of-school youths." The course shall include "actual operation of motor vehicles . . . under the supervision of a

DRIVER TRAINING

qualified instructor." Eligible students must be at least "fourteen years and six months" old.

§115-203

A program of music education shall be "administered under . . . the State Superintendent of Public Instruction." A "supervisor of music education and six area music supervisors" shall be hired to promote music education. The supervisors shall train teachers in "the proper methods of teaching music" and shall "organize and direct leadership in music programs in the schools."

§115-204

PHYSICAL EDUCATION

HEALTH EDUCATION

A physical education and health education program, including "instruction in the subjects of harmful or illegal drugs including alcohol," shall be "administered under" the State Superintendent of Public Instruction. Teachers and principals are required to screen pupils in an effort to "detect signs and symptoms of deviation from normal." School health funds may be used to correct "chronic remediable defects of underprivileged children." Free dental treatment shall be provided for "as many underprivileged school children as possible."

REGULATIONS

§2E.0101--.0102

"The instructional services area is responsible for: (1) developing a standard course of study to be recommended by the state superintendent for approval by the State Board of Education; (2) providing leadership and assistance to public. . . schools in the areas of curriculum, instruction, school organization and staff development; (3) developing and disseminating curricular and instructional materials; . . . (5) keeping the public informed as to the needs, . . . goals and objectives of elementary and secondary schools."

The instructional services area is organized to

carry out its responsibilities through the following functional and service areas:

General Administration and Supervision: These areas have general administrative and supervisory responsibilities in matters relating to overall program operations; they also have coordinating functions with respect to activities in curriculum and instructional services, grades K-12 or some segments or combinations of these grades.

"Subject Fields and Courses: These areas provide overall leadership and assistance to local school administrative units in all phases of a particular subject or course. Illustrative examples of such subject fields and courses are cultural arts, language arts and communications, science, mathematics, the social studies, health and physical education, occupational education, various subdivisions of these, and special subject or study areas as may seem necessary and desirable."

§2E.0103

"The State Board of Education shall adopt a standard course of study upon recommendation of the State Superintendent of Public Instruction and pursuant to a public hearing and any changes the board deems appropriate. The standard course of study thus established will be periodically reviewed by the state board.

COURSE OF STUDY

The standard course of study consists of a K-12 continuum in six broad curriculum or discipline areas:"

1) Citizenship Education. All the social studies areas, i.e., economics, history, government, sociology and human relations

2) Communications. Including all languages and all phases and applications of English-language arts.

3) Cultural Arts Education. This includes the fine and performing arts, recreation, and avocations, and is addressed to both performance and consumer objectives.

4) Healthful Living Education, i.e., personal health, community health, physical education, recreation and safety.

5) Mathematics and Science Education.

6) Occupational Education.

"The development of subject and course content in the above curriculum . . . areas shall incorporate . . . provisions for effective topics or study areas specifically identified by General Statutes, including Americanism, government of the State of North Carolina, government of the United States, fire prevention, harmful or illegal drugs including alcohol, the free enterprise system, and such other topics as may be specified."

Implementation of the standard course of study in public elementary and secondary schools may be effected in any of the following organizational modes: A continuous program of appropriate developmental content in each study area for individual pupils, grades K-8 and an appropriate program of representative course offerings in each study area in grades 9-12 with the following minimum requirements for high school graduation: English, four units; Mathematics, one unit; social studies, two units of credit one of which is American history and heritage; science, two units one of which is life science; physical education and health; electives six units.

For students with special needs, a tailored program on an individual basis will be encouraged by the local school board.

GRADUATION REQUIREMENTS

Minimum requirements for high school graduation in three year (10-12) high schools are as follows:

English: three units; Social studies: one unit of credit which shall be American history and heritage if the topic was not covered in grades eight and nine. Science: one unit of credit which shall be a life science if subject not covered in grade nine. Electives: seven units of credit.

Schools having personalized and individualized instruction will have a continuous program of appropriate developmental content in each study area for individual pupils, grades K-9; and an appropriate program of representative course offerings in each study area in grades 10-12, with graduation requirements based upon satisfactory completion of a personalized program in grades 10-12 tailored to individual abilities, rules, interests and aspirations. Summer school may be an integral part of pupils' programs.

§2E.0401--.0402

The division of cultural arts carries out its responsibilities as a single division consisting of consultants who are specialists in each of the arts. The staff is under the direction of the division director.

The division of cultural arts is responsible for the following: providing consulting services in music, art, drama, dance, speech, creative writing and the humanities on a request basis to the local school systems (K-12); preparing guidelines for curriculum design and implementation in the public schools of programs in the cultural arts; preparing evaluative criteria to determine the effectiveness of educational programs in the cultural arts in the public schools; preparing criteria for use by the state textbook commission in its task of selecting textbooks in the cultural arts for proposed adoption by the state board of education; preparing and distributing bulletins, newsletters, and other curriculum materials among local school systems in the state; cooperating with state and national professional associations to encourage better educational practices among professional teachers of the arts; promoting or continuing emphasis upon the study and practice of the arts in the

public schools: administering such special programs as may be funded by the state or federal agencies supporting the arts in education.

§2E.0701 -- 2E.0702

The division of health, safety and driver education and physical education provides through its consultants and sections leadership services for the purposes of implementing programs related to the needs of youth, grades K-12. In the areas of health, safety and driver education, and physical education: develops course of study guidelines, develops related resource materials and aids local school systems in their implementation of effective programs of instruction; upon request, provides leadership services regarding improvement and accreditation of programs; provides leadership in the development and implementation of special programs and projects, such as school beautification program, dental health project, health and physical education demonstration center and the pedestrian and bicycle safety curriculum grades K-9.

The division is composed of three sections: health education, safety and driver education, and physical education. The division is under the leadership of a director and assistant director, and consultants.

§2E.0703

The county and city boards are responsible for organizing and conducting courses in driver training and safety education. Restricted instruction permits authorizing students to enroll for the behind the wheel phase in the course shall be issued by Department of Motor Vehicle personnel.

DRIVER TRAINING

Student Eligibility Requirements

Students must meet mental and physical qualifications required of license applicants. Courses shall be without

charge, to eligible public school students, non public school students and out of school youth under 18 years of age. Students regularly enrolled in public and non public schools who are 14 years, six months up to age 18 may be enrolled in the driver training and safety education courses. Out of school youth who are 14 and six months up to age 18 may also enroll

Prior to behind the wheel instruction the enrollees must have a restricted instruction permit from the division of Motor Vehicles, state department of transportation. The law requires that this permit be in the car during instructional periods.

Instructional Programs, Materials, Organization and Scheduling

Instructional Program

Classroom instruction shall consist of at least 30 hours; behind the wheel instruction shall consist of a minimum of six clock hours per student exclusive of time spent in the car as an observer. The content of the courses shall be in accordance with a curriculum guide issued by the state superintendent of public instruction.

Materials

Advisory lists of instructional media issued to schools by the Department of Public Instruction will aid schools in selecting books and other instructional materials.

Organization and Scheduling

Driver training and safety education courses shall be made reasonably available at the public schools to all eligible students on a 12 month basis. Programs of instruction designed by county and city administrative units may include regular school day and term, full time or fraction; summer term; or, during extended day and Saturday of regular term as a pattern of operation for its instruction program. Groups for classroom instruction shall range from 24 to 35 students. Groups for in-car instruc-

tion including time spent as an observer, shall not exceed two hours daily. Two hours of classroom instruction plus one hour in car instructions are permissible; extended school day and Saturday programs shall not exceed 16 instructional hours per week per teacher not more than two hours daily in the extended day and not more than six hours on Saturday.

Certificate of Completion

A student satisfactorily completing the prescribed courses of thirty hours of classroom instruction and six hours per student of behind-the-wheel instruction, exclusive of time in the car as an observer, shall be issued a certificate on a form supplied by the state superintendent of public instruction. A file will be kept on the student with a copy of the certificate until he/she reaches age 25.

Instructional Personnel

Persons who hold a full driver education certificate, Class A or class B may teach in the high school driver education program;

Persons who hold a provisional driver education certificate and are working on a competency program prescribed by a college approved to offer driver education teacher preparation programs, may continue to teach as long as they make annual progress toward meeting full certification.

Any person holding a bachelor's degree but not in driver education may qualify to teach driver education by meeting requirements prescribed by one of two colleges approved to offer driver education teacher preparation programs.

Certification and rating of instructors in this program shall be administered by the division of certification of the State Department of Instruction; each instructor shall possess a valid North Carolina driver's license and shall have an acceptable driving record as shown by the official records of the division of motor vehicles. Instructors of driver training and safety education shall be nominated by the superintendent and elected by the county or city boards of education.

The division of languages carries out its responsibilities through the following sections:

English/Language Arts. This section is accountable for overall direction of responsibilities pertaining to English/Language Arts.

Foreign Language. This section is accountable for overall direction of responsibilities pertaining to foreign languages. Both sections are under the division director.

The division of languages is responsible for the following: providing consulting services in language arts (K-6), English (7-12) and foreign languages on a request basis to the various local education agencies; preparing guidelines for curriculum design and implementation in the public schools; preparing evaluative criteria to determine the effectiveness of educational programs in English/Language Arts and foreign languages in the public schools; preparing criteria for use by the state textbook commission in their task of selecting textbooks in English/Language Arts and foreign languages for proposed adoption by the State Board of Education; preparing and distributing bulletins, newsletters, and curriculum materials among the local education agencies to improve instructional programs in English/Language Arts and foreign languages; cooperating with colleges' and universities' teacher training programs in improving the quality of preparing teachers of English/Language Arts and foreign languages; cooperating with state professional associations, particularly in planning and jointly sponsoring one annual conference in English/Language Arts and one annual conference in foreign languages for teachers of the state; arranging for clinics, seminars, and workshops to be administered and/or conducted by State Consultants to improve instructional competencies and effectiveness of teachers of English/Language Arts and foreign languages; promoting, through public relations and demonstration of professional

competence and expertise, a continuing emphasis upon the study of English/language arts and foreign languages in the public schools.

§2E.1001 -- .1002

The division of mathematics carries out its responsibilities through a single section which is accountable for overall direction of responsibilities pertaining to mathematics

The division of mathematics is responsible for the following: providing consulting services in mathematics, K-12, on a request basis, to the local education agencies; preparing guidelines for curriculum design and implementation in the public schools of mathematics programs; preparing evaluative criteria to determine the effectiveness of educational programs in mathematics in the public schools; preparing criteria for use by the State Textbook Commission; preparing and distributing communications among the local education agencies in the State, for the purpose of improving instructional programs in mathematics; cooperating with colleges and universities in helping them to improve their teacher-training programs in mathematics; cooperating with the State professional association of mathematics teachers, particularly in planning and jointly sponsoring one annual conference and several spring conferences; arranging for clinics, seminars, and workshops to be administered or conducted by state consultants, to improve instructional competencies and effectiveness of teachers of mathematics; promoting, through public relations and demonstration of professional competence and expertise, a continuing emphasis upon the study of mathematics in the public schools.

§2E.1201 -- .1202

The division of reading carries out its responsibilities through the state central office staff, which is accountable for providing leadership for eight regional reading consultants, and the regional center staff who, like the state central office staff, are accountable for

overall direction of responsibilities pertaining to reading and related areas. Both sections' staffs are under the division director.

The division of reading is responsible for the following: planning and administering the state's primary reading program; planning, coordinating and monitoring staff development workshops for professional improvement of teachers in reading within each educational district; providing consulting services in reading (K-12) on a request basis to the local school systems; preparing guidelines for curriculum development and implementation in the local units of reading programs; preparing evaluative criteria to determine the effectiveness of educational programs in reading; preparing criteria for use by the state textbook commission in its task of selecting textbooks in reading; preparing and distributing communications among the local school systems for the purpose of improving instructional programs in reading and related areas; cooperating with colleges' and universities' teacher training programs in improving the quality of preparation for teachers of reading; cooperating with state and national professional associations in planning annual conferences in reading for teachers in the state; arranging for institutes, seminars and workshops by state consultants, to improve instructional competencies and effectiveness of teachers in reading.

§2E.1301 -- 2E.1302

The division of science education is a single section with a staff under the division director.

The division of science education is responsible for the following:

Providing consulting services in science education, (K-12); preparing curriculum guidelines and implementation; preparing evaluative criteria to determine the effectiveness of programs; preparing and distributing bulletins, newsletters and curriculum materials among the local school systems; cooperating with colleges and universities in improving teacher training programs for teachers of science;

arranging for clinics, seminars and workshops to be administered and/or conducted by state consultants to improve instructional competencies and effectiveness of teachers of science; promoting a continuing emphasis upon the study of science in the public schools; assisting local school systems in providing learning opportunities for their students in environmental studies.

§2E.1401 -- 2E.1403

The division of social studies carries out its responsibilities through the following sections:

State central office staff under the direction of the division director and as needed an ad hoc advisory committee, such as but not limited to, the social studies curriculum advisory committee, advisory committee for minority group studies, and the law-focused education advisory committee.

The division of social studies is responsible for the following: offering consulting services in social studies, the study of history and the social sciences K-12; preparing curriculum guidelines; consulting services on the teaching of statutorily mandated subjects such as Americanism, Government of the State, Government of the United States, and the free enterprise system; consulting services in the teaching of economics, law education, United States Studies and world studies; arranging for institutes, conferences, workshops and seminars to improve instructional competencies and the effectiveness of teachers in social studies; help in the planning and sponsoring of state, regional, and national conferences for teachers of social studies; cooperating with colleges and universities in improving social studies teacher training programs; prepare and distribute bulletins, pamphlets and curriculum materials designed to improve instructional programs in social studies; promoting generally the improvement of programs and teaching of history and the social sciences; cooperating with the division of archives and history and other agencies having interest in social studies education in order to make more effective

the services offered by these agencies. Procedure for reviewing proposed material in law-focused education: when such materials are presented to the Department of Instruction, they will be referred to the advisory committee on law-focused education; the advisory committee will make its affirmative recommendations to the state superintendent of public instruction within three months. Any decision by the advisory committee is subject to appeal to the state superintendent and the state board of education. If the Department of Public Instruction chooses not to follow the recommendations of the advisory committee, that decision and reasons therefore shall be transmitted in writing to the advisory committee within one month of the date of receipt of the committee's recommendation.

On approving the procedures outlined in this rule, the State Board of Education reserves the right to adopt any and all policies in relation to law-focused education.

CONSTITUTION

§15-38-09

"Physical Education shall be a regular subject for all pupils in . . . all educational institutions supported wholly or in part by money from the state." All school boards and boards of educational institutions receiving money from the state shall provide for instruction and adopt methods fostering "progressive physical exercises for the development, health and discipline of the pupils."

PHYSICAL EDUCATION

§15-38-10

"Moral instruction tending to impress upon the minds of pupils the importance of truthfulness, temperance, purity, public spirit, patriotism, international peace, respect for honest labor, obedience to parents, and deference to old age, shall be given by each teacher. . . ."

§15-38-11

"Oral instruction in the humane treatment of animals shall be given."

§15-38-12; 15-38-13

The Bible shall not be deemed a sectarian book. At the option of the teacher, it may be read in school for a time not to exceed ten minutes daily, but "no sectarian comment shall be made . . . . No pupil shall be required to read it or be present in the schoolroom during the reading."

RELIGION

§15-41-08

"Each pupil entering a high school shall select one of the courses of study offered by the high school, and [she] he shall not be permitted to change the same except by permission of the superintendent of the school, or upon the request of the pupil's parent or guardian."

§15-47-24

CONSERVATION

"[T]he state superintendent of public instruction shall cause to be set up courses in the teaching of conservation of natural resources, including irrigation and conservation of water and soil, and in teacher training institutions, courses in the teaching of those subjects shall be offered."

§15-47-32

DRIVER EDUCATION

"[A]ny school district may contract with other school districts for the joint use or employment of qualified driver education instructors, driver training cars, or equipment to be used in establishing complete training courses . . . or may contract with any other school district for the use of joint instructors for any other courses of study or may contract with any other school district for sharing the cost of . . . vocational education programs."

§15-47-37

CONSTITUTION

"All students from the seventh grade through the twelfth grade . . . shall receive . . . at least a forty-five minute class . . . each week on the constitution of the United States and the constitution of North Dakota, for at least three of those six years . . . [E]ach morning the pledge of allegiance to the flag shall precede each day's study in the first grade through the sixth grade."

REGULATIONS

Chapter I: I.B.14

DRIVER EDUCATION

The Director of Driver and Traffic Safety Education is responsible for encouraging and supervising courses to prepare teachers for driver education, for supervising driver education curriculum and the training of new drivers, and acting as liaison officer between the Department and the Motor Vehicle and Safety Responsibility sections of the Highway Department in establishing safety standards and procedures.

Chapter III.I.G.

DRUG EDUCATION

The North Dakota Drug Education Program, funded under the Drug Abuse Education Act of 1970, includes: preparation and dissemination of drug-related material; community services and workshops; communication groups; and the services of the staff for informational and educational measures.

Drug education materials, stressing a set of behavioral objectives in each of 12 grades are provided.

Chapter V. II.I.

North Dakota law requires the following subjects to be taught: spelling, reading, writing, arithmetic, languages, English grammar, geography, U.S. history, civil government, motive study, and elements of agriculture, physiology and hygiene. The law also requries instruction in physical education, in the humane treatment of animals, and in the conservation of natural resources, and also moral instruction (teaching to impress the importance of truthfulness, temperance, purity public spirit, patriotism, international peace, respect for honest labor, obedience to parents, and deference to old age). For three of the years between 7th and 11th grade, students shall receive a weekly 45-minute class on the constitution of North Dakota. In grades 1-8, the pledge of allegiance shall precede such day's study.

Students in grades 1-3 shall receive three oral lessons and students in grades 4-9 shall receive four lessons in hygiene each week for ten weeks of each year. Special instruction shall be given regarding alcohol and narcotics, tuberculosis and other contagious diseases.

Curriculum should be geared to the educational philosophy of the local districts. An organized process for curriculum development involving school board, administration, staff, parents, and students should be established.

The daily program will vary according to local circumstances. A weekly time allotment chart has been developed and may serve as a guideline in developing daily or weekly plans. Suggested allotments are provided for two different lengths of school days. Teachers must be allowed 150 minutes per week of planning time, when they are free of pupil contact. The total minutes per week will prevent taking all of the maximum time allotments in all areas in any grade. Weekly allotment allow immaginative and versatile planning.

It is desirable that some guidelines regarding amounts of time to be devoted to various disciplines exist which the local district can use.

Chapter V: II.J.

The educational environment designed for students in the upper elementary grades (7-8) must be unique to that particular situation. The program must provide the scope of the secondary program and the continuity and security found in the regular elementary program.

The following outline indicates course offerings required by law in grades 7-8 and those which could be offered as electives:

	Subject	Length in Weeks per Year
**	Art	18-36
*	Language Arts	36
	Foreign Languages	36
	Typewriting	36

*	Physical Education	36
	Home Economics	18-36
***	Industrial Arts	18
*	Mathematics	36
**	Music	18-36
*	Science	36
*	Social Studies	36

*Required.

**Required at least 1 semester during 2-year period; optionally offered for full year.

***Exploratory activities offered for 18 weeks in such areas as graphic communications, materials, and technology.

Class periods are to be 40-60 minutes in length. Study time should be part of classroom instruction. Large study halls should be discouraged.

The organizational plan of the district (8-4; 6-6; 6-3-3; 6-2-4; 7-5) bears especially on the upper elementary level. The effect on the program should be a major concern in the selection of organizational pattern.

Chapter V: II.L.

Several plans of organization for instruction that should be considered are: ability placement, departmentalization, middle school, multi-grade and multi-age grouping, multi-unit organization, non-graded elementary school, and self-contained classroom.

Chapter V: II.M.

Several instructional approaches which should be considered are: grouping, individualized instruction, and lecture approach.

Chapter V: III.B.

The objectives of the high school curriculum are to provide general education for all future citizens and education, both vocational and college preparatory, to meet the needs of all students

The State Superintendent is charged with the responsibility of approving and/or designing and preparing courses of study to be used in public schools.

To be accredited, a high school must make the following units of study available at least once every four years:

English	4 units
Mathematics	3 units
Physical Science	4 units
Social Studies	3 units
Health and Physical Ed	1 unit
Music	1 unit
Any combination of:	
Business Education	
Foreign Languages	
Homemaking	6 units
Vocational Agriculture	
Industrial Arts	

High schools are also required by law to offer moral instruction, instruction on the U.S. and state constitution, and instruction regarding the humane treatment of animals and conservation of natural resources. The content of all courses shall conform to the state course of study, of high schools as outlined by the State Superintendent. The Superintendent shall provide in the course of study for an elective one half year course in co-operative marketing and consumers cooperatives.

Four units of high school work shall be the minimum number of any year from the ninth grade to the twelfth grade. All unit courses shall be taught a minimum of forty minutes a day for at least 180 days and except for natural science courses for which the minimum shall be longer. It shall be possible in all high schools for each grade to complete four units of work per year. Such courses must be offered in sequential order.

Minimum attendance required for promotion is 160 days.

The public schools shall be equally free, open and accessible at all times to children between the ages of 6 and 21, except that children who do not arrive at the age of

ICAL-ND 8
NORTH DAKOTA

6 before midnight, October 31 of each year shall not start school until the beginning of the following year.

The school day for pupils is 6 hours. Teachers should be at their stations one-half hour before and one-half hour after school.

All doors in schoolhouses shall be kept unlocked from 8:30 a.m. to 4:30 pm on school days. Egress to fire escapes shall be kept free from obstruction at all times.

The maximum enrollment acceptable per classroom shall be:

Non-laboratory subjects	30 students
Laboratory sciences	24 students
Music and physical ed	reasonable
Vocational agriculture	15-24 students
Industrial arts	16 students
Vocational home economics	16-24 students
Typewriting	according to facilities

High school credit is based on one unit for 180 class periods of 40 minutes for non-laboratory courses and of 55 minutes for laboratory courses. For schools with different schedules, one unit shall be 120 clock hours for non-laboratory courses and 150 clock hours for laboratory courses.

Classes other than required courses shall not be offered unless six or more students are enrolled.

A list of approved high school subjects is available in "A Guide for Curriculum Planning, K-12", 1970. Additional courses may be added by securing prior approval from the Director of Secondary Education.

Accredited secondary schools may offer work for credit during the summer with the approval of the State Department. The same standards for administration, teacher qualification, pupil admission and credit shall apply to the summer as the regular session. Summer school work shall be used primarily for enrichment or make-up, not acceleration.

Chapter V: IV.A.

Required courses are:

1. Language arts 3 units

(including English I and II)

2. Social studies 3 units

(including 1/2 unit of post-1920 American political and economic history)

3. Mathematics 1 unit

4. Laboratory science 2 units

5. Physical Education 1 unit

(1/4 credit per year)

6. Safety and Driver Education

Chapter V: IV.B.

In addition to required courses, students are to elect a minimum of 7 units.

II.B.1.b.; Regulation, Chapter V: III

III.A.1.; Statute §15-41-07

III.A.1.; Statute §15-41-24

1. Basic Curriculum

Statutes

§3301.17

The department of education shall expend state funds to provide driver education courses to any child enrolled in a high school...Whether the department of education contracts to use public school facilities or operates other facilities for driver education purposes, the cost shall not exceed $50 per pupil enrolled in and completing the course.

DRIVER EDUCATION

State licensed commercial driver training schools shall receive a subsidy for each child successfully completing such a course who was unable to enroll in the driver education course conducted at his/her high school because the course was not offered or scheduling difficulties prevented attending such a course in the term or semester of either the pupil's sixteenth birthday or the next term or semester. Reimbursement at the above mentioned rate shall be obtained by presenting to the board a statement, signed by the pupil's principal, of the pupil's inability to attend a course offered through the high school.

§3313.60

Boards... of county, exempted village, and city school districts shall prescribe a graded course of study for all schools under their control subject to

state board approval. Such courses of study shall include the following subjects:

(A) The language arts, including reading, writing, spelling, oral and written English, and literature;

(B) Geography, the history of the United States and of Ohio, and national, state, and local government in the United States, including a balanced presentation of the relevant contributions to society by people of African, Mexican, Puerto Rican, and American Indian descent as well as other ethnic and racial groups in Ohio and the United States;

(C) Mathematics;

(D) Natural science, including instruction in the conservation of natural resources;

(E) Health education," including education concerning drug abuse, alcoholic beverages, and tobacco, and venereal disease, education, "except that upon written request of his(her) parent or guardian, a student shall be excused from taking instruction in veneral disease education;

(F) Physical education;

(G) The fine arts including music;

(H) First aid, safety and fire prevention."

Every school shall include one year's course in the study of American History in the requirements for promotion from the eigth ... to the ninth grade.

"Every high school shall include in the requirements for graduation from any curriculum one unit of American history and government, including a study of the constitutions of the United States and Ohio.

"Basic instruction in geography, United States history, the government[s] of the United States ... [and] Ohio, local government in Ohio, the Declaration of Independence," the constitutions of the United States, and Ohio "shall be required before pupils may participate in courses involving the study of social problems, economics, foreign affairs, United Nations, world government, socialism and communism."

§3315.091

The board of education of any school district may enter into a contract, the term not to exceed one year, with another district or a duly licensed driver training school to provide driver education instruction under section 3301.17 of this code .

Such driver training schools contacting with any public school must meet the course content standards set by the state board of education.

REGULATIONS

§3301-37-02

High schools shall have a comprehensive college preparatory or vocational curriculum. "Instructional methods and procedures shall be those which most effectively promote the purpose of the school program and which meet the needs and individual differences of all pupils."

Each high school shall be comprehensive unless classified by the state department of education as college preparatory, vocational, or island schools. Comprehensive high schools shall offer at least forty-five units of credit: business education and english, five units each; home economics, industrial arts, mathematics, social studies, science, three units each; foreign language, two units; art music, and physical education and health, one unit each; other or additional subjects, 15 units.

"Individual differences of students shall be provided for within the educational program in each school by accelerating students, grouping students, enriching or adjusting the program, differentiating materials and methods, and through establishment of special education classes for those children whose needs cannot be adequately met in general education programs.

Each school shall have a well-balanced and effectively administered student activity program. . .and. . .shall provide appropriate recreational activities."

"Policies of each school shall prohibit unreasonable kinds and amounts of out-of-school assignments and shall provide for supervised study or independent study at

school as appropriate to individual needs."

The instructional program shall have well-defined instructional objectives and manifest systematic planning by teachers. The instructional program shall give evidence of "varying types of learning materials and experiences. . ." adaptation of organization and instructional procedures to student needs. . .use of varied evaluated instruments. . . systematic instruction by the librarian. . .appropriate and effective use of community resources."

§3301-81-01 -- 3301-81-03;
3301-81-05 -- 3301-81-16

DRIVER EDUCATION

"Each public board of education shall make a driver education course available to each resident pupil during the semester or term of the pupil's sixteenth birthday or the immediate succeeding semester or term. The driver education course may be offered after school on Saturdays and during the summer. Pupil's shall be sixteen years of age on or before actual behind-the-wheel instruction is started. The program shall be partially state subsidized.

Driver education may be provided by a public school directly or by a contract with another public school or a licensed commercial driver training school. The course shall extend at least over a full regular session during the school year and shall be a minimum of four weeks during the summer semester. Exceptions may be approved by the State Department of Education. Driver education shall carry credit toward graduation. No pupil may be enrolled for the behind-the-wheel phase of driver education without the written consent of her or his parent. Cars shall have dual controls. Tuition shall not be charged. Certificates shall be issued to those who successfully complete the course. Courses shall be evaluated and approved annually by the Department of Education. Instructors shall spend no more than four consecutive hours teaching in a car. These regulations do not apply to adult education classes.

A. Educational Courses and Programs

1. Basic Curriculum

Statutes

§70-11-101 -- 103

"No sectarian or religious doctrine shall be taught or inculcated" in any public school. However, this section shall not be construed to prohibit the "reading of the Holy Scripture."

Instruction shall be conducted in the English language except for teaching of foreign languages.

Courses of study shall be formulated and approved by the State Board of Education and shall include courses necessary to insure: (a) Teaching of citizenship in the United States and Oklahoma through the study of democracy and ideals, history and government of the United States and other countries; (b) Teaching of health and other subjects which promote healthful living; (c) Teaching of safety through driver education; (d) Teaching of physical education to all physically able students for a weekly minimum of 75 minutes per student in grades 1-6, and 150 minutes per student in grades 7-12. Provided, any student with exceptional talent in music may, with approval of the superintendent of schools, substitute a course in music for a physical education course; (e) Teaching of basic skills of learning and communication, including reading, writing, and math; (f) Teaching of the conservation of natural resources; (g) Teaching of vocational education in areas which will promote occupational competence among school children and adults as citizens of the state and nation; (h) Teaching of other aspects of human living and citizenship as will achieve the legitimate objectives and purposes of public education.

The State Board of Education shall require a

yearly report containing a certification of compliance with the above provisions.

§70-11-104 -- 105

Each local board of education is authorized to provide for military training, athletic training, and physical examination of pupils in its district, and is authorized to enter into contracts for the use of property and equipment for military training.

MILITARY TRAINING

§70-1210

The Drug Abuse Education Act of 1972 shall attempt to develop "a comprehensive drug abuse education program for all children . . ." in the public schools which shall teach value orientation, the adverse effects of drugs and promote positive values and sense of self worth.

DRUG ABUSE EDUCATION

The State Department of Education shall administer the Act pursuant to regulations adopted by the State Board and shall implement the program as quickly as possible. Inservice training in teaching drug education shall be an integral part of this effort.

The State Department of Education shall report annually to the Legislature on the status of the program.

§70-1210.251 -- 1210.258

This act is known as the "Economic Education Act of 1974."

The purpose of this act is to insure the development of a comprehensive education program for all children, kindergarten through grade 12, which will provide a "positive understanding of the American economy, how it functions and how the individual can function effectively" in it as a "consumer, worker and voter." The program shall teach "positive values of profit and competition" in a free-enterprise economy which "underscores the worth and dignity of the individual."

ECONOMICS

The State Department of Education shall administer this program pursuant to regulations adopted by the State Board of Education.

INSERVICE TRAINING

The State Board of Education and State Department of Education shall: (1) implement in-service education programs for teachers, administrators and other personnel (supplementary inservice teacher education materials shall be made available to all school districts); (2) implement this act as expeditiously as possible; (3) implement local school system evaluation of the effectiveness of the economic education program; and (4) recommend degree programs and short course seminars for preparation of teachers.

Each local board of education shall schedule the integration of economic education in social studies, business education, home economics and other vocational courses in all public schools.

§70-19-101 -- 19-105

DRIVER EDUCATION

The aims of driver's education are to develop a knowledge of laws relating to operation of motor vehicles, proper acceptance of personal responsibility in traffic, a true appreciation of the causes, seriousness and consequences of traffic accidents, and to develop the "knowledge, attitudes, habits and skills" necessary to drive.

The school board of any district maintaining a secondary school may provide driver's education for pupils enrolled in day schools.

The State Superintendent of Public Instruction shall administer this program in accordance with rules and regulations established by the State Board of Education. He or she shall also appoint supervisors of safety education and necessary clerical personnel.

Each school district shall prescribe regulations determining which students are eligible for driver's education, and shall report annually to the State Superintendent of Public Instruction on the cost of the program.

§70-19-110

RULEMAKING

The State Board of Education has authority and power to promulgate "reasonable" rules and regu-

lations to effectuate the legislative intent of this article. It may purchase and/or lease all necessary equipment and materials for the driver's education program.

REGULATIONS

Middle School Regulations: p. 39

III. The Instructional Program

Req. a. The middle school's program shall include the following areas: language arts, social sciences, mathematics, science, arts, physical education, and health and drug abuse education.

b. The different needs and abilities of students should be provided for.

c. "The interrelationship among the areas of learning" should be stressed.

d. "The school shall provide for continuous . . . evaluation of the instructional program.

e. Students needing special education should be provided for.

f. "The promotion or retention of pupils shall be determined through the evaluation of the total growth of the individual child rather than the rate of academic achievement."

g. There should be six hours of instruction per school day.

h. Each grade should offer instruction in health "in the following areas: nutrition, personal health, dental health, community health, safety, and first aid."

i. The curriculum at each grade level should include Drug Abuse Education.

j. "Beginning athletic coaches shall meet the requirements as listed in the high school regulations."

k. Sixth grade students should have at least 75 minutes of physical education per week. In grades 7 and 8 a minimum of 150 minutes per week of physical education should be offered as an elective.

l. "Instruction in Economics shall be an integral part of the curriculum" in all grades.

Req. a. "The instructional program shall include such courses" as required by law and the State Board of Education to be part of the curriculum.

Req. b. A course being offered for a full unit must be taught for the entire school year. Prior approval must be obtained from the Accreditation Section if a school wishes "to offer nine-week mini-courses."

Req. c-e. "High schools shall require eighteen (18) or more units of regularly organized classroom instruction for graduation," 13 1/2 of which must be earned in grades 10-12. The required 18 units are distributed as follows: language arts-4; mathematics-1; laboratory science-1; American history-1; Oklahoma history-1/2; electives -10 -1/2. The required units in mathematics, lab science and Oklahoma history may be completed in the 9th grade. Up to 2 of the 18 units may be in subjects such as physical education, competitive athletics, yearbook or newspaper staff, and audiovisual education, if they are offered as regularly scheduled classes, "and other courses. . . within this category. . . approved by the Accreditation section." Up to 4 of the 18 units may be in "laboratory music classes. . . music theory and appreciation. . . may be counted in addition to the 4 units."

Req. f. Local boards of education may "set local requirements for graduation above those of the State Board of Education."

Req. g. In the interest of the students' "social . . . physical . . .[and] intellectual maturity. . ., it is advisable that he[she] have 4 years' experience in a four-year. . ., or 3 years' experience in a three-year high school in order to graduate. In exceptional cases" students may graduate in less time.

Req. h. "At least 2 . . . of the last 3 units completed for graduation shall be completed . . . in the

accredited high school" the student expects to graduate from.

Req. i. "Units of work earned by a student in an approved area vocational-technical school. . . shall be certified to the high school in which the student is regularly enrolled" and will count toward graduation.

Req. j. The local board of education may accept for credit "a unit of work earned by a student in any approved summer school" in the state.

Req. k. "Students who need more than one unit for graduation shall not . . . participate in the graduation exercises."

Req. l. A teacher may teach only one class during a class period.

Req. m. "Health education should exclude . . . consumer, community and personal health, dental health, mental health, drug abuse, nutrition, safety, environmental health, alcohol and tobacco."

Req. n. Students in grades 10-12 should be offered a minimum of 150 minutes of physical education per week as an elective.

Req. o. "Senior high work-study cooperative programs involving vocational rehabilitation have proved to be the best means of working with high school mentally handicapped youth." Programs should combine school and work experiences and appropriate training. Students must be supervised by the special education teacher-coordinator at least half the school day. Students complete 4 1/2 units in grade 9 and 6 units of required courses in grades 10-12: communications skills -3; social studies (American history)-1; life science-1; computational skills-1. "The remaining units necessary to complete the required 18 units for graduation will be chosen from the following: co-op training, home training vocations, physical education, arts and crafts, music, shop, and other electives.

"This program is also available as an alternate to the regular program for learning disability and deaf or hard-of-hearing youth."

Junior High School Regulations; p. 45
VII. Subject and Graduation Requirements

Req. a. "Courses offered as a full unit of work must be completed before credit can be given for graduation."

Req. b. A year each of English and mathematics must be completed each year.

Req. c. "The social studies program shall include one-half year of United States History in the 7th, 8th or 9th grades."

Req. d. Pupils must complete at least one year of science.

Req. e. The curriculum of each grade level should provide health instruction, to include: "nutrition, personal. . ., dental . . .[and] community health, safety and first aid."

Req. f. A minimum of 150 minutes of physical education per week shall be provided as an elective for all grades.

Req. g. Junior high school subjects below grade 9 may not be used toward high school graduation.

Req. h. "Drug Abuse Education shall be an integral part of the curriculum at each grade level in the junior high school."

Req. i. Teachers may teach only one "ninth grade subject during any one class period."

Elementary School Regulations; p. 30
VII. Subject Requirements

Reg. a. "The instructional program shall include . . . courses" required by state law and the State Board of Education to be part of the curriculum.

b. Local boards of education are responsible for ensuring that all elementary schools include drug abuse education in their curriculum.

c. Each elementary school grade should include health education in its curriculum, to "include such areas as: mental, dental, consumer and community health, anatomy, nutrition, safety and smoking.

d. Economics shall be an integral part of the curriculum in grades kindergarten through eight.

e. Students should have at least 75 minutes of physical education a week.

XIV. General Program of Studies, p. 70

The regulation lists courses that may be offered for credit in the following fields: business education, fine arts, foreign language, general agriculture and home economics, health and physical education, industrial arts, language arts, mathematics, practical arts, science, social studies, and vocational studies. Additional courses other than those listed may be offered for credit if prior approval is obtained from the Accreditation Section.

1. Basic Curriculum

Statutes

§335.490

After receiving authorization from the voters of the district, a union high school district can extend the course of study in the district to include any and all grades through 12.

"No union high school district composed in part of a split school district shall extend the course of study . . . unless such course of study . . . include[s] all grades of the schools in the union high school district."

§336.035

The district school board must enforce state prescribed courses of study. Supplemental courses may be established to the extent they are not inconsistent with the prescribed courses and upon the approval of the superintendent of public instruction.

Courses can be established concerning venereal disease and taught to students and adults from the community served by the schools. Parents or guardians of minors must be notified before the course is offered and may direct in writing that the minor child be excused from the class.

The course is to be coordinated with the department of health and the superintendent of public instruction. "Teachers certified for teaching venereal disease education shall be used where available." Teaching or refusing to teach such a course is not grounds for removal.

§336.057

All public and private schools must teach courses on the U.S. Constitution, beginning "not later than the opening of the eighth grade . . . continuing in grades 9 through 12."

U.S. CONSTITUTION

§336.067

"In public schools special emphasis shall be given to instruction in: (a) Honesty, morality, courtesy, obedience to law, . . . and other lessons which tend to promote and develop an upright and desirable citizenry. (b) Respect for all humans, regardless of race, color, creed, national origin, religion, age, sex or handicaps. Acknowledgement of the dignity and worth of individuals and groups and their participative roles in society. (c) Humane treatment of animals. (d) The effects of tobacco, alcohol and narcotics upon the human system."

§336.072

All instruction must be in English except: (1) instruction in foreign languages; (2) instruction in another language so that non-English speaking pupils can develop bilingual skills "to make an early and effective transition to English . . . ."

§336.079

Courses teaching "speaking, reading and writing of the English language shall be [taught] at each grade level starting at the first grade," continuing until "children are able to profit from classes conducted in English."

§343.710

DRIVER TRAINING

A driver training program shall be conducted to educate student drivers in "safe and proper driving practices."

§343.720

Any private or public school may offer a course in driver training, including classroom instruction and instruction in dual control automobiles after completion of the classroom instruction. The course shall be devoted to "the study and practice of the rules of the

IIA1

1. Basic Curriculum

A. Educational Courses and Programs

1. Basic Curriculum

Statutes

§16-1-16

A local board of education may prescribe special courses in citizenship, health, morals or any other subject it considers necessary to meet the needs of special groups of students. The board may also prescribe individual tutoring or counseling and may assign special teachers and schedule special courses to carry out this program.

CITIZENSHIP

§16-3-15

The state board of education, on the state superintendent's recommendation, shall prescribe minimum course content for all courses in the public schools. In every elementary school, the following courses shall be taught: reading, spelling, penmanship, arithmetic, English, geography, United States and Alabama history, science, hygiene, physical training and other studies the state board may prescribe.

§16-8-28

The county board of education shall prescribe, based upon the superintendent's recommendation, courses of study for its schools and supply a printed copy of these courses to every teacher and all interested citizens.

§16-12-9

The city superintendent of schools shall prepare courses of study for the schools and submit them to the city board of education for its approval.

§16-35-4

The state board of education shall prescribe minimum course content for all public schools in the state and shall set the maximum number of courses which are compulsory in each grade of the elementary schools.

§16-35-5

The following courses shall be taught in every elementary school: reading, spelling and writing, arithmetic, English,

geography, United States and Alabama history, science, health education, physical education and other studies the state board of education may prescribe.

§16-40-1

PHYSICAL EDUCATION

Every public school shall carry out a system of physical education in accordance with the program outlined by the department of education.

§16-40-2

U.S. CONSTITUTION

Courses on the United States Constitution shall be offered in all public and private schools, beginning not later than the eighth grade and continuing through high school.

§16-40-3

COMMUNISM

In all public high schools instruction shall be given each year in the history and doctrines of communism in order to instill in the minds of students a greater appreciation of democratic processes. The study shall contrast the government of the United States with the Soviet government and shall emphasize the dangers and evils of communism.

§16-40-4

HUMANE TREATMENT OF OF ANIMALS

In all public schools, the humane treatment of animals shall be taught.

§16-40-5

DRIVER EDUCATION

All high school pupils are required to complete a course in driver education before high school graduation.

§16-41-3; 4

DRUG ABUSE EDUCATION

In order to insure the development of a comprehensive drug abuse education program for all children in grades 1 through 12, a program is established that will teach the dangerous effects of drugs.

The state superintendent of education shall administer this program. Priorities for implementation of the program include: (1) implementing in-service education programs for teachers; (2) establishing resource centers; and (3) insuring that this program will become part of the curriculum of every public school.

§16-41-6 -- 16-41-7

DRUG ABUSE EDUCATION

The state board shall adopt regulations to insure the teaching of drug abuse education to all pupils. Every county and city school system shall schedule drug abuse education courses as part of the curriculum of every school, K-12.

Children may be exempted from this requirement if their parents present a signed statement to the principal stating that the course subjects conflict with their religious beliefs.

§16-41-8

SEX EDUCATION

This chapter shall not be construed to authorize or require the teaching of sex education in any form.

III.C.Students; Regulation R7-2-301 ARS §15-2021

1. Basic Curriculum

Statutes

§80-1607.1

A teacher or Board of School Directors may authorize a brief, silent prayer in school. Students have the option of participating. It "shall not be conducted as a religious service or exercise, but . . . as an opportunity for silent prayer or meditation."

§80-1608--1610

The State Board of Education shall designate days of "patriotic observances," and may authorize school closings with the consent of district boards of directors. A principal or person in charge of a school shall provide a patriotic service for its pupils, including instruction on the "meaning, use of and proper respect for the flag of the United States," if such service isn't being arranged in the community.

PATRIOTISM

§80-1611--1612

During "Bird Week", the third week in April, teachers shall give lessons on "the economic and esthetic value of the resident and migratory birds of the state."

§80-1613 -- 1616

The teaching of American history in all grades of public and private primary schools is compulsory. Arkansas history may be substituted one year. At least one hour a week "shall be devoted to such instruction."

AMERICAN HISTORY

The primary goal of this instruction is fostering a love of country and teaching the principles of American Government.

One year of American history and civics in high school is required for graduation.

Every school shall offer at least a one-half year course in Arkansas history and government between the fifth and twelfth grades inclusive. No institution

of higher learning shall award degrees to students who have not passed a course in American history and civil government. Any person violating the above shall be liable to a fine of $100 to $500 and such violation shall be grounds for dismissal.
The State Superintendent of Public Instruction shall administer the carrying out of this law.

§80-1617

The Commissioner of Education shall outline a course for physical training in cooperation with the State Board of Health. It shall include: "exercises, calisthenics, formation drills, instruction in personal and community health and safety, and in preventing and correcting bodily deficiency." Every pupil, except those excused for physical disability, are required to take such a course. County and city superintendents, boards of directors and other school officials shall oversee the administration of this program.

PHYSICAL TRAINING

§80-1618 -- 1619

The effects of alcohol and narcotics shall be taught in grades three to eight inclusive. This material shall be included in textbooks on physiology and hygiene and "be free from political propaganda." It shall contain "complete, detailed, and scientific information on the subject."

HEALTH EDUCATION

Study in this area is required for promotion from one grade to the next. The State Department of Education shall "provide teacher's aides and devices for . . . assistance" in teaching this subject matter.

Violators of this provision shall be guilty of a misdemeanor and fined $25 --$500

§80-1620 -- 1625

Nature study and conservation of natural resources shall be taught in at least two elementary grades, in at least one high school course at the high school level and to students preparing to be teachers. This category includes: fish and game, soil fertility and erosion, forests and minerals. The Commissioner of Education shall solicit the help of government officers concerned with conservation and natural resources.

§80-1626

At least twenty minutes per week shall be devoted to the study of fire prevention in the primary grades of all public schools.

§80-1637 -- 1643;75-1901 -- 1905;75-281;75-921

DRIVER EDUCATION

School districts are "authorized and encouraged to establish driver education and training programs" primarily for high school students. Districts shall receive from the State Department of Education $20.00 for each student completing such course, and the State shall accredit such courses. Courses must include at least thirty classroom hours and at least six hours of driving in order to be certified. Courses shall be supervised by a "qualified driver education teacher."

All funds credited to driver education programs shall be placed in the Driver Education Account of the Public School Fund. The cost of the program is determined by the cost and upkeep of the automobile(s), instructor's salary and list of other educational materials or equipment.

Each student shall pay a $5.00 fee for the course and the State shall "prorate the amount of federal funds available" in order to equalize the per pupil amount received by each district.

Other persons availing themselves of this course shall pay a $10.00 registration fee. However, the state will waive the fee for those unable to pay it. Public or private funds may be directed towards this program, which shall be "under the auspices of the Arkansas State Police Commission."

Motor vehicles used in this program are exempt from state, county and municipal taxes and license fees. And no automobile dealer who furnishes a car to the State for this program will be held responsible for injuries or damages incurred during the car's use by the school.

Acts 1975, No. 302, §5

In December the State Board shall determine the subjects to be taught in grades one to eight inclusive.

Acts 1975, No. 302, §10

A school district may request a new course and/or new materials by submitting a course outline, materials desired, and statement of course's objectives to the Director of the State Board. After consultation with the Division of Instructional Services, the Director shall approve or reject the request.

III.A.2.; Statute §80-1601 -- 80-1682

1. Basic Curriculum

Statutes

§8700 -- 8734

This chapter deals with the need for environmental education, and the establishment of the Conservation Education Service as part of the Department of Education, that has the power and duty to: (a) assist school districts in preparing teachers to present concepts of conservation and other environmental concepts; (b) to cooperate with institutions of higher education for the purpose just stated; (c) assist school districts in the development and/or acquisition of materials relating to wise use of resources and environmental issues; (d) assist districts in the development of educational curriculum and education opportunities for students relating to the conservation of resources; (e) establish and maintain a central library for those purposes; and (f) review each application for a grant to institutions of higher learning.

CONSERVATION EDUCATION

This chapter also provides for a conservation education library as a master source of materials for the Conservation Education Service. The establishment of the library is to be based on new procedures and means of processing and distribution.

§33350-33352

The Department of Education shall adopt such rules and regulations as it deems necessary and proper to secure the establishment of courses in physical education in the elementary and secondary schools. The Department shall also compile a manual in physical education for distribution to teachers in the public schools of the state; exercies general supervision over the courses

RULEMAKING

PHYSICAL EDUCATION

of physical education; exercies general control over all athletic activities of the public schools; advise in matters of physical education; and investigate the work in physical education in the public schools.

§51040 -- 51041

COURSES OF STUDY

Every school governing board shall prepare and keep on file for public inspection the courses of study prescribed for its schools and shall evaluate its educational program, making necessary revisions.

§51050

Every school governing board shall enforce in its schools the courses of study and the use of textbooks and other materials prescribed by the proper authority.

§51053 -- 51056

COURSE OF STUDY

The governing board shall prescribe and enforce the course of study for preschool, kindergarten, grades 1 through 6, and grades 7 and 8 of elementary districts maintaining grades 7 and 8. It may do so in cooperation with the county board and superintendent. The development of any course of study on such a cooperative basis is a proper charge against whatever funds the county superintendent may have for this purpose.

The course of study for grades 7 through 12 and for adult school shall be prepared by the governing board, subject to state board or Department of Education approval.

Courses for continuation high schools shall be prepared under the governing board and shall insofar as possible meet high school requirements under §51220 and 51222.

§51057

Upon a governing board's request, the state board may, for a specified number of years, grant the district exemption from one or more course of study requirements,

if the request is deemed an essential part of a planned experimental curriculum project.

EXEMPTION

The request for exemption shall include: the rationale and objectives of the project; plans for its administration and evaluation and necessary revision; and plans for reporting to the state board on the project.

§51200 -- 51201; 51204

Courses of study are required in grades 1 through 12, designed to fit the needs of pupils for which the courses are prescribed. In addition to course of study requirements, a governing board may include in the curriculum additional courses of study deemed to fit pupil needs.

§51202 -- 51203

SAFETY AND HEALTH EDUCATION

The course of study shall include at the appropriate levels instruction in personal and public safety and accident prevention, fire prevention, the protection and conservation of resources and the environment, and health.

DRUG EDUCATION

Instruction on the nature of alcohol, narcotics, restricted dangerous drugs as defined under §11032 of the Health and Safety Code, and other substances and their effects on the human system shall be included in the curriculum. The governing board shall adopt regulations specifying grades and courses of study in which such instruction shall be given.

§51210 -- 51213

The course of study beginning in grade 1 and continuing through grade 6 shall include instruction in:

ENGLISH

English, including knowledge of, and appreciation for, literature and language and the skills of speaking, reading, listening, spelling, handwriting, and composition;

mathematics, including concepts, operational skills, and problem solving;

social sciences, drawing upon various disciplines, providing a foundation for understanding the development of California and of the United States, the development of the American economic system, man's relations to the human and natural environment (including the wise use of natural resources), eastern and western cultures, and contemporary issues, and including the study of the role of American Negroes, American Indians, Mexicans, persons of oriental extraction and other ethnic groups and the role of women in the development of California and the United States;

science, including biological and physical aspects, with emphasis on experimental inquiry and man's place in ecological systems;

fine arts;

health;

physical education, with emphasis on physical activities for a total period of not less than 200 minutes each 10 school days, exclusive of recesses and lunch period;

other studies, as prescribed by the governing board.

The Legislature encourages the establishment of instructional programs in foreign languages, with instruction beginning as early as feasible.

§51220 -- 51221; 51227

The course of study for grades 7 through 12 shall offer courses in:

English, including knowledge of and appreciation for literature, language, and composition, and the skills of reading, listening, and speaking;

social sciences, drawing on various disciplines, providing a foundation for understanding the development

of California and the United States, the American legal system and the rights and duties of citizens, the American economic system, man's relations to the human and natural environment (including the wise use of natural resources), Eastern and Western cultures, and contemporary issues, and including the study of the role of American Negroes, American Indians, Mexicans, persons of Oriental extraction, and other ethnic groups, and the role of women in the development of California and the United States

foreign languages, beginning not later than grade 7;

physical education;

science, including biological and physical aspects, with emphasis on basic concepts, theories, and processes of scientific investigation and on man's place in ecological systems;

mathematics, designed to develop mathematical understandings, operational skills, and insight into problem-solving procedures;

fine arts, including art, music, or drama;

applied arts, including instruction in the areas of consumer and homemaking education, industrial arts, general business education, or general agriculture;

vocational-technical education, designed to prepare youth for gainful employment;

DRIVER EDUCATION

automobile and motorcycle driver education, designed to develop a knowledge of the Vehicle Code and other state laws relating to the operation of motor vehicles, a proper acceptance of personal responsibility in traffic, a true appreciation of the causes, seriousness and consequences of traffice accidents, and the knowledge and attitudes necessary for the safe operation of motor vehicles;

other studies prescribed by the governing board.

§51222 -- 51223

PHYSICAL EDUCATION

All pupils, except those exempted, shall be required to attend physical education courses for a total of at least 400 minutes each 10 school days. Any pupil may be excused from physical education classes during one of grades 10, 11, or 12 for not more than 24 clock hours to participate in automobile driver education; such a pupil shall attend a minimum of 7,000 minutes of physical education during that school year.

A governing board that elects to exempt pupils from required physical education attendance under paragraph 1 and/or 2 of §512416 shall offer those pupils a variety of elective physical education courses of not less than 400 minutes each 10 school days.

Elementary physical education shall be for at least 200 minutes each 10 school days, exclusive of recesses and the lunch period.

§51240

SEX EDUCATION

WAIVER

Whenever any part of the instruction in health, family life education, and sex education conflicts with the religious training and beliefs (including personal moral convictions) of a parent or guardian, the pupil, on written request of the parent or guardian, shall be excused from that part of the training.

§51241 -- 51242; 51246

PHYSICAL EDUCATION

EXEMPTION

The governing board may grant temporary exemption to a pupil from physical education courses, if the pupil is ill or injured and a modified program cannot be provided, or enrolled for one-half, or less, of the work normally required of full-time pupils.

Permanent exemption may be granted if the pupil has completed 10th grade or is 16 years of age or older and has been enrolled in the 10th grade for one academic year or longer, or is enrolled as a postgraduate pupil. No such pupil shall be permitted to attend fewer total hours of courses if he/she elects not to enroll in a

physical education course than he/she would have otherwise attended.

A high school pupil may be exempted from physical education courses if engaged in a regular school-sponsored interscholastic athletic program carried on wholly or partially after regular school hours.

Also, a pupil may be exempted who is enrolled in the last semester or quarter of the 12th grade and under §§46145 or 46147 is permitted to attend school less than 240 or 180 minutes per day.

§51243 -- 51245

FOREIGN LANGUAGES

Credit shall be given for the purposes of course of study requirements to courses in foreign languages in private schools on the basis of their being at least equivalent to those required in the public schools. The state board shall adopt regulations prescribing standards and conditions by which such credit shall be given.

Credit for private school courses shall be given for Chinese, French, German, Greek (classical and modern), Hebrew (classical and modern), Italian, Japanese, Jewish, Latin, Spanish, and Russian, and other languages designated by the state board.

It shall not be required that instructors of such courses in private schools be regularly credentialed teachers.

§51261

DRUG EDUCATION

A comprehensive statewide program in public elementary and secondary schools in drug education, providing instruction on the nature and effects of the use of tobacco, alcohol, narcotics, restricted dangerous drugs (under §11032 of the Health and Safety Code) and other dangerous substances, shall be established. The program shall include: sequential instruction throughout

the grades; training for school personnel; instructional materials; identification and reporting of promising programs; and promotion of effective liaison between school and community.

The Department of Education shall facilitate maximum cooperation with other state and federal agencies concerned with drug education and endeavor to obtain maximum federal financial assistance.

§51262

Instruction in drug education should be conducted, in grades 1 through 6, in conjunction with courses in health pursuant to §51210 and, in grades 7 through 12, in conjunction with courses in health or any other appropriate area under §51220. Instruction should be sequential and suited to the grade level.

§51263

The Department of Education shall develop a comprehensive statewide program by assuming the following functions: assist in the development of model curricula and teaching methods in drug education, develop methods of evaluating such instruction, serve on a repository for research results relative to drug education, assist in drug education teacher training in school districts and in training institutions, administer pilot projects on drug education, assist in the development of adult drug education programs, and report annually to the Legislature, school districts and appropriate agencies.

§51268

Each governing board shall adopt a policy regarding its drug education program, in accord with State Board-approved guidelines, specifying, among other things: drug education curriculum; provisions for in-service training and curriculum assistance to teachers; minimum qualifications for instructors in drug education; and responsibility of certificated personnel in teaching or supervising drug-dependent or debilitated pupils.

§51511

RELIGION

Nothing in this code shall be construed to exclude from the public schools references to religion or references to or the use of religious literature, art, or music when such references or uses do not constitute instruction in religious principles or aid to any particular religious group and are incidental to or illustrative of matters properly included in the course of study.

§51530

COMMUNISM

No teacher giving instruction in any part of the public school system shall advocate or teach communism with the intent to inculcate in the mind of any pupil a preference for communism.

However, this shall not prevent the teaching of the facts about communism.

For these purposes, communism shall be considered a political theory that the existing form of the U. S. government should be changed by force or unconstitutional means to a totalitarian dictatorship based on principles of communism expounded by Marx, Lenin, and Stalin.

§51550 -- 51551

SEX EDUCATION

No school governing board may require pupils to attend any class in which human reproductive organs and their functions are described, illustrated, or discussed, whether designated "sex education," "family life education," or part of any other course.

WAIVER

If such classes are offered, the parent or guardian of each pupil enrolled shall first be notified in writing and given the opportunity to request that the pupil not attend. Such requests shall be valid for the school year in which they are submitted but may be withdrawn at any time. No child may attend a class if a request that the child not attend has been received.

Any written or audiovisual material to be used in such classes shall be available for inspection by the parent or guardian at reasonable times and places prior to the holding of a course which includes such classes. The parent or guardian shall be notified in writing of the opportunity to inspect these materials.

This section shall not apply to description or illustration of human reproductive organs which may appear in a legally adopted textbook on physiology, biology, zoology, general science, personal hygiene, or health, nor to any venereal disease education classes conducted under §51820.

Nothing in this section shall be construed as encouraging the description, illustration, or discussion of human reproductive organs and their functions in the schools.

The certification document of any person charged with making instructional material available under this section or with the responsibility of notifying a parent or guardian of any class covered by this section who knowingly fails to carry out the charge may be revoked or suspended on this account. The certification document of any person who knowingly requires a pupil to attend a class covered by this section when a request that the pupil not attend has been received may be revoked or suspended.

§51750

MILITARY SCIENCE

A governing board maintaining a secondary school may establish courses in military science and tactics complying with U. S. laws and provided with reference to Reserve Officers Training Corps units in educational institutions.

No student shall be required to enroll in such courses.

§51820

A governing board may offer instruction in venereal disease education in schools with the assistance of the Department of Education.

VENEREAL DISEASE EDUCATION

Nothing in this section shall be construed as limiting any right provided for in §51240.

If such education is to be offered, the parent or guardian of each pupil to be enrolled shall be notified in writing at least 15 days prior to the commencement of the program, of the parent's right to inspect instructional materials, and of the parent's right to request that the child not attend any such program.

WAIVER

Such a request shall be in writing, but may be withdrawn at any time.

§51830 -- 51833

CONSUMER EDUCATION

Finding that many high school graduates lack the skills necessary to function effectively in the business world, the Legislature intends to provide pupils with the opportunity to learn about the market economy, intelligent consumerism, the knowledge of goods and services necessary to make intelligent decisions, and statutes, regulations, public agencies, and governmental actions affecting consumers. There shall be made available to schools the program materials needed to enable them to offer this instruction to pupils in grades 7 through 12.

The superintendent shall, with state board approval, plan and develop a one-semester instructional program in consumer economics to be made available to grades 7 through 12. It shall include, but not be limited to: fundamentals of personal banking; elementary contracts; consumer guides to purchasing; credit; insurance; and taxation.

§51850

A school governing board, a county superintendent, and the California Youth Authority and State Department of Education in providing programs of high school education, may prescribe regulations determining who shall receive

RULEMAKING

instruction in automobile driver training (the laboratory phase of driver education), subject to state board standards for driver education and training.

No pupil shall be permitted to enroll in automobile driver training unless presently enrolled or having completed a course in autombile driver education.

Driver training courses shall be given in one or more of the grades 9, 10, 11, or 12. Pupils shall be at least 15 years and 6 months of age at the time of completing the driver training course.

§51851

A course in driver education shall: be of at least 2-1/2 semester periods and be taught by a qualified instructor, be completed by the student within the academic year or summer session in which it was begun; and provide the opportunity for students to take it within the regular school day and within the regular academic year.

§51852 -- 51853

A course in the laboratory phase of driver education shall include instruction under one of four plans.

Plan One: a minimum of 12 hours allocated as follows:

1.) A minimum of 6 hours of on-street behind-the-wheel practice driving instruction in a dual-control automobile with a qualified instructor.

2.) A minimum of 6 hours in a dual-control automobile with a qualified instructor for observation purposes. Practice driving on an off-street multiple-car driving range approved by the department under the supervision of a qualified instructor may be substituted for all or part of the observation time.

Plan Two: a minimum of 24 hours allocated as follows:

1.) 3 hours of on-street behind-the-wheel driving instruction in a dual-control automobile with a qualified instructor.

2.) 6 hours in a dual-control automobile with a

qualified instructor for observation purposes.

3.) 12 hours of instruction in a driving simulator approved by the department.

4.) 3 additional hours in one or more of the above areas.

Plan Three: a minimum of 24 hours allocated as follows:

1.) 3 hours of on-street behind-the-wheel practice driving instruction in a dual control automobile with a qualified instructor.

2.) 6 hours in a dual-control automobile with a qualified instructor for observation purposes.

3.) 12 hours of instruction on an off-street multiple-car driving range.

4.) 3 additional hours in one or more of the above areas.

Plan Four: a minimum of 24 hours alllocated as follows:

1.) 2 hours of on-street behind-the-wheel practice driving instruction in a dual-control automobile with a qualified instructor.

2.) 4 hours in a dual-control automobile with a qualified instructor for observation purposes.

3.) 18 hours of instruction in a driving simulator approved by the department and on an off-street multiple car driving range.

For these purposes, one hour means 60 minutes including passing time.

Any deviation from the standard use of a simulator or off-street multiple-car driving range shall have prior approval by the Department of Education before the governing authority can be reimbursed for the students trained.

§51860

A governing board over any elementary, intermediate, or junior high school may provide time and facilities to any local law enforcement agency for bicycle safety instruction.

§52720

In every public school, there shall be conducted daily appropriate patriotic exercises. The giving of the Pledge of Allegiance to the Flag of the United States shall satisfy such requirements.

REGULATIONS

§10000, 01

All high schools shall offer a one semester course in reading and one in math focusing on diagnostic and remedial instruction. Failure to offer such courses or show "good cause" for not providing them shall result in the Department of Education's refusal to approve the schools' course of study. The course of study will also not be approved if no instruction in public safety and health is provided.

MATHMATICS

SAFETY AND HEALTH EDUCATION

§10020

The laboratory phase of Driver Education classes may be provided for eligible students. All autos used shall be equipped with dual controls and shall be identified as such. The course shall include a minimum of 30 hours of classroom instruction. Satisfactory completion of driver education classes and/or laboratory phase shall be recorded in each student's permanent record file.

DRIVER EDUCATION

§10045

Schools may contract with private driver training schools to provide driver education to students. Such districts shall comply with the rules set forth in this section and annually submit a report to the State Department of Education.

§10060

Each school shall appraise the quality of its physical education program.

PHYSICAL EDUCATION

§ 11220

The minimum standards for basic reading programs are:

READING

a) Systematic instruction in basic skills and continuous practice in applying those skills.

b) Presentation of a wide variety of appropriate literature.

c) Continuous assessment, practice and instruction for pupils in oral communication and expression of thought.

Policy Guides

GUIDELINES FOR DRUG EDUCATION PROGRAMS IN THE SCHOOLS

California State Board of Education, 7 pages

1973

DRUG EDUCATION

This statement adopts a "sociological/psychological approach" to drug education in the schools. This model approach recognizes that the individual is a free decisionmaker whose behavior patterns will be influenced by his own value structure. The Board recognizes that drug education should be part of a comprehensive health education program required of all students, and should be structured along the following lines. A program should be comprehensive and continue from grades K-12; inservice training should be offered to staff on a continuing basis and all teachers should have a course in health education; counseling should be readily accessible to all pupils.

1. Basic Curriculum

Statutes

§22-1-103

Instruction in the public schools shall be conducted in English, but the development of "bilingual skills" should be encouraged and students who speak another language should be given assistance to "make an effective transition to English."

§22-1-104

The history of the United States and of the State of Colorado shall be taught in the public schools. United States history shall include the "history, culture, and contributions of minorities."

U.S. HISTORY

§22-1-105

"The commissioner of education shall include in the state course of study the history and civil government of the state of Colorado."

§22-1-108--22-1-109

"In all public and private schools . . . there shall be given regular courses of instruction in the Constitution of the United States," beginning not later than seventh grade.

CONSTITUTION

§22-1-110 -- 22-1-111

"The nature of alcoholic drinks and narcotics, and their effects upon the human system . . . shall be included in the branches of study taught in the public schools."

Failure of a teacher or director to comply with this requirement shall be cause for removal.

HEALTH EDUCATION

§22-25-102 -- 103

As "health survival education is an essential element of public education" and as "the school system is the most logical vehicle for conveying . . .

significant health information and developing an awareness of the value of good health," the "Colorado Health and Survival Education Act" is established. The purpose of this act is to "foster and disseminate educational activities and materials which will assist Colorado . . . [residents]. . . in the understanding and appreciation of health needs and problems and their solutions."

"Health and survival education" includes concerns such as "communicable diseases, community health, consumer health, dental health, drug abuse (including alcohol and tobacco), environmental health, human growth and development, health careers, hereditary and developmental conditions, mental health, nutrition, personal health and physical fitness, and safety and emergency care." A "comprehensive health and survival education program" for grades one through twelve is established. Responsibility for administration shall rest with the department of education in cooperation with the department of health.

The program shall include . . ."programs for the selection and training of health education instructors; planning and activation of initial or extended programs; [and] establishment of guidelines for teacher certification programs."

Local boards, with or without the technical assistance of the department, shall submit proposals for the implementation of this article. All such proposals submitted must be approved by the commissioner of education before they are enacted.

§22-25-104

The health and survival education program is responsible for providing: trained health education instructors [for the schools], a plan to improve health education, and guidelines to assure teacher preparation [for health education instruction].

§22-25-106

A district school board or board of cooperative services may request technical assistance, from the department of education, to help it in developing a health education project.

§22-25-108

The state board of education shall, transmit to the governor and general assembly an evaluation of the health education program. Yearly, thereafter, evaluation of the health education program's effectiveness, efficiency and utilization of resources shall be submitted to the above-named parties by the commissioner of education.

§22-25-109--22-25-111

Children whose parents object in writing to their childs' participation in a health education program, because of religious or other beliefs, "shall be exempt from such instruction."

EXEMPTIONS

The Act shall not be "construed to require the teaching of sex education as a specific area of instruction or as a part of health and survival education required by the state board of education."

REGULATIONS

2202-R-2.05

"A district shall offer a comprehensive program of studies and activities with special attention to general education, since this is the primary purpose of education in the public schools."

2202-R-9.01

COURSE OF STUDY

A school district shall provide a comprehensive curriculum. Such an individualized curriculum meets the educational needs of community youth while exhibiting educational goals the district has formulated for its direction. Such a curriculum provides articulation and continuity within and between each field and subject, as well as within and across grade levels. A comprehensive program provides:

(1) general education for school pupils in addition to education programs for the handicapped;

(2) career purpose programs for those with acquired skills;

(3) programs for those who continue on to technical school or college.

2202-R-9.02

Curricular improvement shall be a continuous process. It shall be carried on through an effort involving teachers, supervisors, administrators, and board members. Provisions shall be made so that pupils, parents, concerned citizens and higher education specialists also have input.

2202-R-9.03

The needs of pupils as evidenced by their interests, achievements, aptitudes and the assessment of current community education needs shall be the basis of the curricular program.

(1) PRESCHOOL curriculum shall encourage the cognitive, social, emotional, physical and aesthetic development of young children, while allowing them to work at their own pace, encountering language developing experiences.

2202-R-9.04

ELEMENTARY school curriculum shall include but is not limited to the following areas: language arts, social studies, science, mathematics; fine arts; health, physical education, safety, and career education.

2202-R-9.05

MIDDLE AND JUNIOR HIGH SCHOOL curriculum shall: (1) devote primary attention to the needs of the adolescent, (2) offer exploratory experiences for all pupils, (3) expand activity type experiences, (4) provide a balanced program highlighting academic subject and career education.

2202-R-9.06

The SENIOR high school curriculum shall provide a program of studies which includes at least 30 units (300 semester-hours), or the equivalent, of work

distributed among: language arts; social studies; science; mathematics; foreign language; fine arts; career, vocational and practical arts education; and health, physical education and safety. (Courses offered on alternative years may be used when calculating the 30 units.)

2250-R-102.0

A preliminary evaluation report shall be submitted to the Education Commissioner 30 days after the close of the attendance year of the final segment of the student population, followed by a comprehensive evaluation of the program after six months.

A. Educational Courses and Programs

1. Basic Curriculum

Statutes

§10-17

The English language will be the primary language in instruction and administration except that instruction may be given in any language other than English to any pupil who, "experiences difficulty in reading and understanding English."

ENGLISH

§10-18

All public or tax exempt private schools shall provide instruction in United States government at all levels including the duties and rights of United States citizenship. Familiarization with these subjects is a prerequisite for graduation.

UNITED STATES GOVERNMENT

CITIZENSHIP

The state board shall make available samples of materials to schools required to teach these courses.

A copy of courses in United States history, government, and citizenship shall be filed with the secretary of the state board by each school. Any modification in these courses must also be filed with the secretary.

§10-19

The effect of alcohol, tobacco and drugs shall be taught every academic year to all students in the public schools; textbooks and other such materials shall be used. Institutions of higher education approved to train teachers shall give instruction on the subjects and the best methods of teaching them. The state board and the commission for higher education shall develop health education programs for elementary and secondary schools and for the training of teachers, administrators and guidance personnel with reference to the effects of tobacco, alcohol and drugs.

DRUG EDUCATION

§10-23

SAFETY EDUCATION

Safety education shall be taught in all public schools as part of a program to eliminate automobile accidents. The state board shall prepare material for these courses and furnish them, free of charge, to superintendents of schools.

§10-24d

DRIVER EDUCATION

The secretary of the state board, subject to the board's approval, shall prepare regulations governing driver education programs in secondary school. The regulations shall permit any local board or private secondary school to hire a licensed drivers' school; instruction may also be given by such school's driving instructors who are licensed by the motor vehicle department.

§10-124

The state board shall provide a course of study of motor vehicle operation and highway safety.

Including not less than thirty clock hours of classroom instruction and not less than six clock hours of behind-the-wheel instruction, each local board may provide a course of instruction in motor vehicle operation and highway safety on a secondary level.

The courses shall be open to any person between sixteen and eighteen years old (inclusive) who is a resident of the school district or whose parents or guardian owns taxable property in such school district. The board may hire a licensed drivers' school for such instruction.

§10-220a

HEALTH EDUCATION

All boards of education shall provide in-service training programs for teachers, administrators and guidance personnel. The program must be approved by the state board and shall provide participants with information on drug and alcohol abuse.

Local boards of education shall establish health education programs which shall specifically include instruction on alcohol and drug abuse. This course shall be included in the curriculum for grades K-12.

DRUG ABUSE

The board of education of every school district shall adopt a written policy on the use and sale of drugs on school property and procedures for cooperation with law enforcement officials.

REGULATIONS
§ 10-24d-2 to 10-24d-10

DRIVER EDUCATION

"Any public, private or parochial secondary school which wishes to issue the secondary school - vocational school driver education certificate and ...receive state grants for driver education" must obtain state department of education approval before starting a program.

The driver education course should be offered "to eligible youth as near to their minimum legal licensing age as possible." The course may be scheduled during or after regular school hours or in the summer. Students may not take more than two hours of classroom instruction a day and must be issued appropriate texts, manuals or other classroom materials. Students may take a maximum of one hour of "behind-the-wheel, on-the-street instruction per day."

Driver education teacher must have a valid state driver's license, be at least 21, and "have an acceptable driving record."

Students who complete "an approved driver education course shall be issued a driver education certificate." Schools should keep records of students who have completed the course for at least 9 years.

"Vehicles used in driver education programs shall be...in safe operating order," adequately insured, and have student driver signs.

Secondary schools that have "approved driver education programs shall report annually to the state department of education."

CROSS REFERENCE

I.Local Board of Education; Statute §10-221

A. EDUCATIONAL COURSES AND PROGRAMS

1. BASIC CURRICULUM

STATUTES

§4103

U.S. CONSTITUTION
FREE ENTERPRISE
STATE GOVERNMENT

"All public and private schools shall offer instruction in the Constitution of the United States and the Constitution and government of Delaware and the free enterprise system."

Such instruction shall not begin later than the opening of the eighth grade and shall continue in the high school courses and in courses in state colleges, universities and the education departments of state and municipal departments.

A. Educational Courses and Programs

1. Basic Curriculum

STATUTES

§31-112

All academic and scientific subjects shall be classified into eight departments or four departments depending upon the high school, so that each department shall contain correlated subjects.

§31-1119

The Board may accept, on a loan basis, and provide insurance for, vehicles for use in driver education programs.

DRIVER EDUCATION

§31-1201 — 31-1204

The Board may establish in senior high schools an optional course, for credit, in aeronautics and may employ up to 6 teachers for the course. The Board may provide pupils with free use of textbooks, maps and other supplies necessary for the course and may include, in its budget, sufficient funds to defray expenses for the course.

CROSS REFERENCE

III.C.Public Schools: Regulation: Chap. VII, §702

1. Basic Curriculum

Statutes

§229.8055

In accordance with the Florida Environmental Education Act of 1973 the department of education shall develop and distribute educational materials and activities designed "to assist students, teachers, and administrators in the perception, appreciation and comprehension of environmental principles and problems." The Environmental Education Program shall be administered by an office of environmental education to the department of education.

ENVIRONMENTAL EDUCATION

The office of environmental education shall: (1) assemble, develop and distribute environmental education instruction materials, with special emphasis on the urban environment; (2) develop programs for in-service and preservice teacher training; (3) integrate environmental education into the general curriculum of public schools; (4) estimate environmental protection manpower needs in government, science, and industry, and make an annual report on the adequacy of the education and training programs to the commission and legislature.

Each district school board may submit a model environmental education project for the district. The commissioner shall review all projects submitted, and shall authorize funds equal to the cost of approved programs. It shall transmit to the state board of education and legislature an annual appraisal of programs and projects funded and recommend the level of funding for the coming year.

The commissioner of education shall appoint 20 persons from the public and private sectors to serve on an environmental education advisory council. Each member shall serve a one-year term. The council shall inventory, review, and support environmental education

and formulate and recommend statewide policies in environmental education. Members shall be reimbursed for expenses incurred in performing these duties.

§ 229.841

By December 1978, the Department of Education shall develop a plan and adopt rules by which the metric system can be adopted by 1980 as a system of measurement in all phases of public school education.

§233.061; 233.064; 233.065

HEALTH EDUCATION

The following shall be taught throughout the state: the United States Constitution, proper consideration for the flag, civics, principles of agriculture and "the true effects of alcohol and narcotics on the human body and mind." Parents who object on religious ground to any material presented in connection with the teaching of these subjects may have their child (children) exempt from such instruction.

Public high schools shall "teach a complete course of not less than 30 hours . . . entitled 'Americanism versus Communism' . . . for the primary purpose of instilling . . . a greater appreciation of democratic processes, freedom under law, and the will to preserve that freedom."

CONSUMER EDUCATION

The public schools shall "conduct a free enterprise and consumer education program" which shall include "advertising, appliances, banking, budgeting, credit," etc. This course shall be inter-disciplinary and provide in-service training for teachers. The program shall be appraised yearly by the Commissioner of Education. [§233.0641 may be known and cited as "The Free Enterprise and Consumer Education Act."]

PATRIOTISM

School boards shall institute a "program of a patriotic nature to encourage greater respect for the U.S. government" including recitation of the pledge of allegiance and proper respect for the flag.

§233.062

"The school board may install . . . a secular

program of education including but not limited to an objective study of the Bible and religion."

§322.11

DRIVER EDUCATION

Persons under 18 are required to take a driver education course given by a public or private school or "agency . . . listed by the department (of Motor Vehicles) to qualify for a driver's license." The course shall be a maximum of 36 hours of instruction.

REGULATIONS

6A-6.22 Required instruction in history and government

HISTORY AND GOVERNMENT

Each school that has eighth and ninth grade shall provide instruction in the history and government of Florida which shall include but not be limited to basic concepts and objectives prescribed in accreditation standards and state courses of study. The purpose of the instruction is to aid proficiency in participatory citizenship, learning about contemporary and historical political, economic and social development of the state and applying what is learned in developing value judgments about the affairs of the state in the context of community, state, nation and world concerns.

6A-6.23 Health Education

HEALTH EDUCATION

Comprehensive health education programs may be submitted for funding to the director, division of elementary and secondary education, in accordance with guidelines established by the director for the administration of the program.

CROSS REFERENCES

II.A.4.; Statute §230.2311

III.C.Teachers; Statute §231.09

1. Basic Curriculum

Statutes

§32-434;437

The state board of education may allocate funds for educational research and the preparation and publication of instructional materials. These funds shall be used to promote research and the development of curriculum materials on the influence and effect of alcohol. The state board of education may hire research specialists to develop these materials. The curriculum materials developed shall be distributed to all the public schools.

§32-657a

All elementary and secondary schools which receive state funds shall provide a course on federal and state governments, and courses in U.S. and Georgia history, including a study of federal and state constitutions. The State Board of Education shall prescribe these two courses. Students may not receive a high school diploma without having completed these courses.

UNITED STATES HISTORY

GEORGIA HISTORY

DIPLOMA

§32-1901

"The Georgia State Board of Education shall prescribe a course of study in health and physical education for all grades and grade levels in the public school system and shall establish standards for its administration." The course may include instruction in alcohol, smoking and drug abuse education. The State Superintendent of Schools shall prepare a manual setting out the details of such courses.

Regulations

30-311

"The . . . State Board of Education believes that the

basic skills, attitudes and values essential for the preservation of a society of free men [and women] and the effective functioning of the individual . . . must be acquired in the program of elementary education of pupils ages six through 13. The State Board advocates primary attention . . . to speaking, reading, writing, listening, observing, mathematics and human relationships. The State Superintendent of Schools shall take positive action to insure the development of these skills in a wide range of experiences including music, art, physical activity, occupational orientation and academic studies in science, social sciences and languages."

30-312

"The State Board believes that programs of education for pupils ages 14 through 18 should enable the pupil to explore a wide range of activities and content," with emphasis on "occupational education." High schools should offer courses "in the basic disciplines of social sciences, science, mathematics, languages, art and music," and government and politics. Pupils should be given opportunity to "develop special interests and skills in language art, music, sports and recreational activities." Upon graduation pupils should be prepared "to pursue further study" at the post-secondary level.

"The State Superintendent shall actively and aggressively seek continuous refinement and improvement in content, methods, systems, personnel and facilities of elementary and secondary education . . . . The State Superintendent shall actively and aggressively evaluate programs of secondary education in terms of effectiveness, cost, benefits, facilities, personnel, management and organization."

30-510;520

The State Board is legally responsible for "prescribing a course of study for all schools receiving state aid, . . . approving additional courses of study set up by local school systems, and . . . providing

curriculum revision . . . . The State Board assumes that curriculum planning and development will reflect current best knowledge of the nature of society, . . . the individual and . . . the learning process."

The State Board is responsible for developing courses of study and "comprehensive guidelines for curriculum planning and development . . .[which] shall include appropriate content relating to . . . goals and objectives; . . . nature of . . . the learning process; . . . human growth and development; [and] . . . evaluation of learning."

The guidelines should also describe the instructional program, identify appropriate course guides, and provide for incorporation of the following areas of instruction: nutrition and hygiene; U.S. and Georgia history, Constitutions and government; and physical education.

Approved guidelines shall be reviewed by the State Board at least every 5 years. Local school systems receiving state aid are required to follow these guidelines.

Every five years the "State Superintendent of Schools will appoint a curriculum review committee" representing the teaching profession and other educational personnel, parents, high school students, and Department of Education personnel. The committee's recommendations will be submitted to the State Board for approval.

30-610; 30-620

The "State Board of Education believes that educational goals can best be achieved through a clearly defined program structure that relates objectives to courses taught" and which provides "for funding, management control and accountability for each element . . . ."

"Separate course-of-study guides shall be prepared for programs . . .or content areas," to be distributed to "local school systems for adoption or adaptation . . . Local school systems shall be encouraged to develop local course guides to supplement" those prepared by the state.

"State course guides shall be reviewed" at least every 5 years.

The Office of Instructional Services will prepare course guides, "utilizing appropriate advisory committees appointed by the State Superintendent of Schools." Drafts of course guides shall be submitted to the State Board for approval.

30-717

PILOT PROGRAMS

Pilot programs to implement the State Board's policy on graduation requirements will be instituted in the school systems in 1977-78 . "Local school systems will develop plans for adoption/adaptation of the pilot models in 1978-79 . . . . Statewide implementation of the policy for students who enroll in the ninth grade in 1979-80 will be contingent upon positive evaluation of the pilot program."

FREE ENTERPRISE

Ninth grade students in 1977-78 "must complete a course of study . . . in the principles of economics (business) free enterprise."

A "question of competency-based education for students" will be designated by the State Superintendent to "coordinate the implementation of the policy on graduation requirements.

30-1710; 1720

Career education should assist individuals to acquire "the abilities necessary to satisfactorily manage a personally meaningful and productive career." Schools should help pupils to relate their abilities and interests "to work and educational alternatives" and their eductional training to work, to "identify with work, workers and work values, . . . (and) develop skills and attitudes needed for continued learning, career decision making, planning, job preparation, job seeking and career success."

A school's curriculum should incorporate "the following elements of the career education concept"

by "using career-oriented content and learning-by-doing activities in existing curriculum," encouraging "individual responsibility for personal career planning, and a broadening of perceived occupational and career choices. . . (;) using community and home resources for learning experiences", assisting pupils "to create their own personalized curriculum related in part to career" possibilities or goals; providing for "career exploration, . . . volunteer and paid work experience for credit, development of entry level job skills and job placement . . . (;) relating the fine, practical, and liberal arts to work and other life roles and values . . . (;) establishing work related performance expectation that each secondary student is expected to demonstrate prior to leaving school."

In assisting local school systems to implement the career education concept, the State Superintendent of Schools shall "develop . . . a resource guide" for local use, "incorporate . . . career education into the curriculum framework, . . . insure that local educational plans . . . include . . . the career education concept," and develop a plan for State Department of Education assistance to local systems.

"Each Department Office shall develop annually a plan for career education . . . to be coordinated and reviewed by the Superintendent's Task Force with recommendations being made to the State Superintendent."

30-1910; 1920

HEALTH EDUCATION

"Instructional packages on a course of instruction in health education including alcohol, smoking and health and drug use and abuse shall be instituted in the public schools. . . .

The State Superintendent of Schools shall develop a plan for health education including concepts dealing with alcohol, smoking and health, and drug use and abuse. This plan shall make health education . . . a part of the total school curriculum . . . (and) shall

include a program of curriculum research, development and instruction in health eduation including the effects of alcohol, tobacco and drug use and abuse on the body. . . . The Office of Instructional Services shall prepare and distribute a health education guide for grades kindergarten through six, a . . . guide for grades seven through 12 and a viewpoint in drug use, misuse and abuse."

DRUG ABUSE

30-2010; 2020

Recognizing the Supreme Court decisions on Bible reading and prayer, "The State Board concludes that individuals have the right to read the Bible and pray . . . (and that) education includes the imparting of moral values and concepts to pupils by teachers. Therefore, the State Board will not condemn nor interfere with the judicious use of prayer and religious writings in the classroom. "The State Board encourages the study of the Bible and . . . of religions as a guidance in forming ethical and moral values as a part of the social science curriculum." The State Superintendent shall assist local superintendents to develop "curricular materials appropriate for use in the public schools."

BIBLE READING

The Office of Instructional Services shall "prepare and distribute a comprehensive listing of materials available for use in studies of the Bible and . . . religions."

30-2710; 2720

In order that pupils achieve "a basic understanding of the history and principles of the American system of government at both the federal and state levels, . . . the State Superintendent of Schools shall prescribe for State Board approval a course of study in the background, history and development of the federal and state governments, and . . . the United States Constitution and the Constitution of Georgia."

UNITED STATES HISTORY

All high schools receiving state funds are required to teach this course, and all students graduating from such high schools must successfully complete the course. "The course in . . . federal and state governments shall be supplemented . . . by a study of the local county and municipal governments."

The Office of Instructional Services shall see that local schools offer the prescribed course in government, select texts from the State Board-approved list, and include periodic examinations as part of the required course, and that the "course in American history and government does not supersede . . . courses in Georgia history and government . . . taught traditionally in the seventh and eighth grades."

1. Basic Curriculum

Statutes

§33-113

The state board "shall define the limits of all instruction in the educational institutions supported in whole or in part by the state."

§33-1601

"Instruction in all subjects in the public schools, except . . . the teaching of foreign languages, shall be conducted in the English language."

§33-1602

"Instruction in the Constitution of the United States . . .[and] in the proper use of the American flag and the national colors shall be given in all elementary and secondary schools." Students shall be taught the pledge of allegiance to the flag, the national anthem, and "America."

CONSTITUTION

§33-1603

"No sectarian or denominational doctrine shall be taught in the public schools, nor shall any books . . . or documents of sectarian or denominational character be used."

§33-1605

"In all school districts there shall be instruction in health and physical fitness, including effects of alcohol, stimulants, tobacco and narcotics on the human system."

HEALTH EDUCATION

§33-1606

Arbor Day shall be observed during the month of April to "encourage the planting, preservation and protection of trees and shrubs."

§33-1608 -- 33-1611

SEX EDUCATION

Family life and sex education programs in the schools are intended only to complement "standards . . . established in the family." The decision to implement such a program in schools is made by the local school board of the district. If adopted, such a program should emphasize the importance of the family and offer instruction in the anatomy and physiology of sex and human reproduction. Parents and community groups should be involved in the planning and revision "of any instruction in sex education." Upon written request from a parent or guardian to the board of trustees, a child shall be excused from instruction in sex education and be provided with alternative educational endeavors.

§33-1701 -- 33-1703

DRIVER EDUCATION

The department of law enforcement and the state board of education shall cooperate in the "establishment of driver training courses in the public schools" and "in establishing . . . minimum standards for driver training programs."

All state residents between the ages of fourteen and eighteen are eligible for driver training programs, "whether or not they are enrolled in public, private, or parochial school."

§33-1704 -- 33-1707

In order to be reimbursed for costs of operating a driver training program, "the board of trustees of any school district proposing to establish" such a program must submit its plan to the state board of education at least 30 days "prior to . . . commencement." "Two or more school districts may . . . offer a driver training program jointly," with one district "designated as the operating district." After completion of a course, school districts must report to the state board the number of pupils enrolled, the number completing the course, and "the total cost of operation of the

program." Reimbursement to the district is based on the calculation of these costs.

§33-1708

"The state board of education shall administer the driver training fund" and employ a full-time "state supervisor of driver training." A "complete record of all costs of administering and supervising the driver training program" shall be maintained.

REGULATIONS

Policy Manual, Ch. 400, §401

1. The Board of Education shall determine the minimum Courses to be taught in the public, private and parochial schools.

2. State Board Policies

New curriculum materials shall be made available to the Departments of Education; however, a charge will be levied for disbursal to those persons out-of-state and using the material for personal use.

Venereal disease education shall be incorporated in the health curriculum in the public schools of the state.

High school students completing required courses prior to finishing eight semesters of high school work may petition the State Board for early graduation provided such student has an endorsement and the approval of the superintendent and the local board.

GRADUATION REQUIREMENTS

Any person or group may present, through the local school district to the State Board for approval, programs enabling students to complete the number of units required for graduation from high schools. All participating students must be state residents. Any student may be instructed by a teacher qualified to teach in the course being taught, or by a person qualified by training in the subject field which is to be taught.

Proposed programs of study submitted for Board approval shall:

Be planned and approved by the local school district of which the student is a resident, or by the high school which has the student's records.

Indicate how the costs shall be borne--tuition, fees, textbooks, etc.

A transcript must be submitted with the program and must show: dates of attendance, subjects taken, grades received, credits earned, units required for graduation from the local school.

List the courses which must be completed and credits earned to complete the graduation requirements of the local school in effect at the time.

Indicate the willingness of the school district to provide assistance to the participating student and to administer all correspondence work tests.

Work completed shall be recorded in the district where the program originated. Upon completion of the proposed program the local school districts shall submit a transcript to the State Board indicating any additional credits earned.

When the Board receives the transcript it will issue a diploma, designating the credits earned in residence at the high school and additional credits earned.

No diploma will be issued prior to the regular class graduation date.

The following must be considered in the development of home study programs:

There are no schools available and attendance in school would present a hardship for the child; a recommendation has been approved by the State Superintendent of Public Instruction; the local school district must assume responsibility for maintenance of the program.

High School credit may be granted for religious education pursuant to the following rules:

That the credit be allowed if the course is taught by a

duly certified teacher and may not be given with sectarian interpretation.

That a teacher not employed by the school district teach the courses under the heading of "Bible History" or "Bible Literature": one-half unit for Old Testament and one-half unit for New Testament. Bible History or Bible Literature may be allowed. The course offering shall at all times conform to section 6, Idaho Constitution.

Violations of the constitutional prohibitions shall be taken through the officers or courts of the county in which the violation occurred.

Pupils may be released to attend religious instruction classes outside of the schools. Such release time programs must meet these guidelines:

RELEASE TIME

Such programs shall not interfere with the regular programs offered in the public schools; they shall be voluntary and outside the school facilities.

The programs shall not exceed 30 minutes from the normal school schedule and should be placed at the last part of the day. Participating pupils shall not be given credit for these programs.

Participating pupils and parents shall be informed that transportation to and from the program shall be their responsibility.

The schools and districts shall assume no responsibility for the safe transportation to and from the program nor the health of the pupils while attending the programs.

Pupils transferring from parochial to public school may receive one-half credit for the following courses: Old Testament or Bible Literature and New Testament or Bible History.

Credit in applied music may be granted for voice, piano, woodwind, string, or brass instruments found in a regularly organized symphonic orchestra. Credit issued is subject to the following:

Teachers shall hold a valid certificate and follow regulations regarding attendance, achievement and records.

Pupils must complete a 45-minute practice period five days per week for the school term and shall receive one-half credit for such participation. More than one credit outside music

credit shall not be counted towards graduation.

The Metric System shall be taught in the Idaho schools and all school districts shall convert to the Metric System by 1984.

The State Board of Education has approved high school seniors to participate in a vocational training setting away from the school environment during their eight semesters and earn credits for such participation.

GRADUATION REQUIREMENTS

Graduation requirements for four-year high schools and grades 9-12 of six-year high schools are as follows:

English	3 units (6 semester credits)
Science (1 must be laboratory)	2 units (4 semester credits)
Mathematics	1 unit (2 semester credits)
Physical Education (not athletics)	1 unit (2 semester credits)
American History (grade 11)	1 unit (2 semester credits)
American Government (grade 12)	½ unit (1 semester credits)
Health	½ unit (1 semester credit)
Electives	8 or 8½ units (16 or 17 semester credits)
TOTAL	17 units (34 semester credits)

"Successful completion of 2 units (4 semester credits) of Homemaking or Agriculture may be substituted for the non-laboratory science. Health is required for high school graduation only for students who have not successfully completed a one semester course in Health in the seventh or eighth grade.

Graduation requirements for three-year senior high schools are as follows.

English	2 units (4 semester credits)
Science (laboratory)	1 unit (2 semester credits)
American History	1 unit (2 semester credits)
American Government	½ unit (1 semester credit)
Electives	8½ units (17 semester credits)
TOTAL	13 units (26 semester credits)

"The above requirements assume that the following courses have been successfully completed in grade 9: one year of English, one year of mathematics, one year of science and one year of physical education. The above requirements

further assume that the student has successfully completed one semester course in Health in either grade 7, 8 or 9. In the event that any of the above courses were not successfully completed in the grades indicated, they must be included in the requirements for grades 10-12."

EQUIVALENCY CERTIFICATE

"The State Department of Education issues the Idaho High School Equivalency Certificate to adult residents who have not completed high school provided they meet the following requirements":

1. Minimum test score;
2. They are at least nineteen years of age;
3. "Bona fide resident of Idaho at the time of application and for a period of six months just preceding application. . . "; and
4. Have completed "a one-semester course in American Government," the course to include United States constitution and principles of state and local government.

Policy Manual
Ch. 400, §411

DRIVER EDUCATION

The Department of Law Enforcement is directed to cooperate with the State Board of Education in establishing a driver education course in the public schools of the state.

The State Board recommends that participating school districts operate programs at times other than during regular school hours.

Use of driving simulators is permissible based on a three hour simulation which shall be equal to one hour of behind-the-wheel instruction; that simulation shall not count more than one hour towards the minimum six hour behind-the-wheel training.

The State School for the Deaf and Blind is authorized to offer a driver training program.

The University of Washington Driver Education Instructor Course to certify teachers to teach Driver Training in Idaho is acceptable.

Accreditation Standards For Secondary Schools:
STANDARD III. B.

"Opportunity for proficiency in a given foreign language is highly recommended, with at least the equivalent of two years being offered. The alternation of courses in successive years may be counted in the school's total offerings. Schools whose philosophy or size precludes a comprehensive foreign language program shall secure the approval of their secondary administrator if they deviate from the prescribed program . . . ."

Accreditation Standards For Secondary Schools:
STANDARD III. C.

"The minimum graduation requirements for accredited Idaho high schools shall be as follows:

"a. Four-year High Schools and Grades 9-12 of Six-year High Schools

English	3 units (6 semester credits)
Science* (one must be a laboratory science)	2 units (4 semester credits)
Mathematics	1 unit (2 semester credits)
Physical Education (not athletics)	1 unit (2 semester credits)
American History (grade 11)	1 unit (2 semester credits)
American Government (grade 12)	½ unit (1 semester credit)
Health**	½ unit (1 semester credit)
Electives**	8 or 8½ (16 or 17 semester credits)
TOTAL	17 units (34 semester credits)

* Successful completion of 2 units (4 semester credits) of Homemaking or Agriculture may be substituted for the non-laboratory Science.

** Health is required for high school graduation only for students who have not successfully completed a one semester course in Health in the seventh or eighth grade.

"It is suggested that a course in World Regions (or World History, World Georgraphy, World Affairs, etc.) be strongly recommended sometime at Senior High School level.

"b. Three-year Senior High Schools

English	2 units (4 semester credits)
Science (laboratory	1 units (2 semester credits)
American History	1 unit (2 semester credits)
American Government	½ unit (1 semester credits)
Electives	8½ units (17 semester credits)
TOTAL	13 units (26 semester credits)

. . . .

"All pupils shall be required to complete four years of satisfactory attendance in grades 9-12 to graduate from an accredited high school.

"If a school deviates from the above rule, the school district shall get permission from the Director of Secondary Education in the State Department of Education."

CROSS REFERENCE

III.A.1; Statute §33-118

A. Educational Courses and Programs

1. Basic Curriculum

STATUTES

§27-2

Instruction in the elementary branches of education in all schools shall be in English.

§27-5 -- 27-7

PHYSICAL EDUCATION

Courses in physical education shall be taught in the public schools. Special activities shall be provided for pupils whose physical or emotional condition prevents their participation in normal daily activities.

Courses in physical education shall be designed to develop strength, develop desirable moral qualities, and promote hygienic school and home life. The Superintendent of Education shall prepare course guides for physical education courses.

§27-9.1; 27-11

SEX EDUCATION

A pupil shall not be required to take a course in sex education if his or her parent submits a written objection. Parents and guardians shall be afforded an opportunity to examine instructional materials used in sex education courses.

A pupil shall not be required to take a course on diseases if his or her parent or guardian files a written objection.

§27-12

Every public school teacher is required to teach pupils honesty, kindness, justice and moral courage.

§27-12.1

CONSUMER EDUCATION

Pupils in grades 8 through 12 shall be required to study courses which include instruction in consumer education. The Superintendent of Education shall devise consumer education curriculum for grades 10 through 12.

§27-13.1

In all public schools, courses shall be given on the current problems and needs in conservation of natural resources, including air and water pollution and preservation of wilderness areas.

CONSERVATION

§27-17

School boards of public schools may provide instruction in safety education in all grades. Safety education includes auto safety and safety in the home and school.

SAFETY EDUCATION

§27-18 - 27-20.1

The following holidays shall be observed in the public schools: Arbor and Bird Day, Leif Erickson Day, American Indian Day, and Illinois Law Week.

§27-21

United States history shall be taught in all public schools. One of the objectives of a history course shall be to give pupils a comprehensive idea of our democratic form of government. History courses shall include a study of the role played by American Negroes and other ethnic groups in the history of this country.

U.S. HISTORY

ETHNIC STUDIES

Before a student graduates from eighth grade he/she must receive this instruction and give evidence that he/she has a comprehensive knowledge of the subject matter.

§27-23

The curriculum in the public schools shall include a course in the motor vehicle code. Safety education shall be given in grades 1 through 8 for 1 class period each week, and in at least 1 of the years in grades 10 through 12. Each school district shall provide driver's instruction for district residents between 15 and 21.

§27-24.2

Any school district which maintains grades 9 through 12 shall offer a driver education course in that school. The course will be open to a resident or a non-resident who is at least 15 but not yet 21. Teachers of these courses must meet the certification requirements and regulations of the State Superintendent of Education.

DRIVER EDUCATION

§27-24.3

In order for the school district to receive reimbursement from the State for drivers' education courses, the driver education course it offers must consist of at least 30 hours of classroom instruction and at least six hours of practice driving.

§27-26

SAFE BUS RIDING

The curriculum in all public schools shall include instruction in safe bus riding practices for all students.

§698.1-698.5

CONSERVATION

There is created a Division of Conservation Education, supervised by the State Board, which shall aid in establishing classes "for the purpose of teaching the methods of conservation of wildlife, forests, timberlands, minerals and scenic and recreational areas . . . ."

Classes "shall be open to any person interested . . . "

§698.51 - 698.55

SEX EDUCATION

There is established a Division of Sex Education in the office of the State Board, as well as a Sex Education Advisory Board.

The Advisory Board "shall examine the motion pictures, literature and educational programs" used in sex education programs intended for use in the schools, "recommend criteria in regard to the scope and emphasis" of these materials, and "make recommendations in regard to policies for distribution" of the materials.

The Division shall "aid in the establishment of educational programs designed to provide . . . wholesome and comprehensive education in regard to . . . all aspects of family life and sexual relations, and the dangers of illicit sexual relations. . . ."

§771

SILENCE

A teacher "may observe a brief period of silence with the participation of all the pupils . . . at the opening of every school day." This shall not be a "religious exercise"; rather, it is but "an opportunity for silent reflection on the anticipated activities of the day."

The State Board shall "[e]stablish the minimum amount of instruction time to be devoted to comprehensive health education," a "program designed to provide . . . learning experience based upon scientific knowledge . . . which will favorably influence the . . . values and practices of . . . youth; and which will aid them in making wise personal decisions in matters of health."

The State Board shall also "[e]stablish guidelines in developing . . . programs . . .", and "[e]stablish . . . in-service programs to provide . . . preparation. . . for teachers and administrators . . . ."

REGULATIONS

Driver Education for Illinois Youth

2.01

Any resident of a district who is eligible for driver education may request the complete course from the public high school of his resident district.

27-24.2

DRIVER EDUCATION

School districts providing instruction in grades 9 through 12 shall offer a driver education course in any such school which it operates. The classroom instruction and driver education course shall be open to a resident or non-resident pupil attending a non-public school where the course is offered and to each resident of the district who acquires or holds a currently valid driver's license during the term of the course and who is at least 15 but has not reached 21 years of age ....

The Illinois Program for Evaluation, Supervision, and Recognition of Schools

Ch.4-1

Subject to the following requirements, the instructional program of a school shall be determined by the board of education with involvement of parents, students, the professional staff, and the local community. The basic curriculum shall include organized experiences which provide each student ample opportunity to achieve

the goals for which the school exists and which meet the minimum program defined by The School Code of Illinois and the State Board of Education. It is recommended that activities, including student internships and observations of government in action, be a part of the instructional program where appropriated.

Ch. 4-3

A district shall provide the following coordinated and supervised courses of study [for elementary schools]. The time allotment, unless specified by the Code or regulation, is the option of the local board of education.

Language Arts, Reading and other Communication Skills; Science; Mathematics; Social Studies; Music; Art; Health Education, one semester or equivalent at the junior high level; Physical Education, daily; Career Education -- Awareness and Exploration; Safety Education, one hour per week; Consumer Education, 8th grade only; Conservation of Natural Resources.

American patriotism and the principles of representative government, as enunciated in the American Declaration of Independence, the Constitution of the United States of America and the Constitution of the State of Illinois, and the proper use and display of the American flag shall be taught in all public schools. Not less than one hour per week, or the equivalent, shall be devoted to the study of this subject matter in the 7th and 8th grade or equivalent. No student shall receive certification of graduation without passing a satisfactory examination upon such subjects.

Ch. 4-4

The district shall provide a comprehensive curriculum including the following as a minimum program of offerings [for high schools]. The time allotment, unless specified by the Code or regulations, is the option of the local school district.

Language Arts, three units; Science; Mathematics; History of the United States, one unit; Foreign Language; Music; Art; Career Education -- Orientation and Prepara-

tion; Health Education, one semester or equivalent; Physical Education, daily; Consumer Education, nine weeks, 50 minutes a day or equivalent, grades 10-12; Conservation of Natural Resources; Driver and Safety Education, 30 clock-hours of classroom instruction and 6 clock-hours behind the wheel -- grades 10,11, and 12; Vocational Education -- Job Entry Skill Development.

The daily program should be organized so as to afford each student easy access to the instructional materials center, the counselor, program of extracurricular activities, and teacher-student conferences.

No teacher should have more than five different preparations. Each teacher should have time to conduct student conferences and plan for instructional programs.

School districts maintaining grades 9-12 shall provide instruction in driver education. Such a course shall consist of at least 30 clock-hours of classroom instruction and at least six clock-hours of practice of driving in a dual control car. Strong emphasis shall be provided to establish and promote essential knowledge, correct habits, fundamental skills, proper attitudes, and a sound understanding of the rules and laws necessary for safe driving. Such a driver education course may include classroom instruction on the safety rules and operation of motorcycles or motor-driven cycles.

Specific minimum requirements for graduation [include]:

16 units in grades 9-12 if a four-year school and 12 units in grades 10-12 if a three-year high school. School districts have an option to deviate from this standard with approval from Public School Approval Section of the Illinois Office of Education.

In either of the above, one unit shall be in American History, or American History and Government.

In a four-year high school, three units shall be in Language Arts and in a three-year high school, two units shall be in Language Arts. In either instance emphasis shall be on reading and writing skills while

one-half unit may be in oral communication.

American patriotism and the principles of representative government, as enunciated in the American Declaration of Independence, the Constitution of the United States of America and the Constitution of the State of Illinois, and the proper use and display of the American flag, shall be taught in all public schools. Not less than one hour per week, or the equivalent, shall be devoted to the advance study of this subject. No student shall receive certification of graduation without passing a satisfactory examination upon such subjects.

In addition to the foregoing, all graduates are required by law to have had adequate instruction in honesty, justice, moral courage, humane education, safety education, and others mandated in The School Code of Illinois, Section 27.

It is the responsibility of the school's administration to provide parents and guardians timely and periodic information concerning graduation requirements for a-l students, particularly in cases where a student's eligibility for graduation may be in question. Additional requirements for graduation may be adopted by local boards of education. Boards of education may accept courses completed in a community college toward graduation.

CROSS REFERENCES

I.General Superintendent; Statute §34-8

III.C.Students; Statute §27-3 -- 27-4

1. BASIC CURRICULUM

STATUTES

§20-10.1-4-1 -- 20-10.1-4-2

In grades six through twelve, all public and nonpublic schools shall provide instruction in the constitutions of Indiana and the United States. Failure of any public school teacher or principal to comply with this requirement constitutes a reason for license revocation. Any public school official who fails to enforce this statute or the rules and regulations shall be subject to a fine.

Each public and nonpublic high school shall provide a required course, of at least one year of school work, in the historical, political and civic aspects of the constitutions of Indiana and the United States. The commission on general education shall prescribe this course and its outlines. No high school student may receive a diploma without completing this course.

U.S. CONSTITUTION

INDIANA CONSTITUTION

§20-10.1-4-3

All public and nonpublic schools shall provide, during the two weeks preceding each general election, class discussions in grades six through twelve on government, voting, and election laws. No one may receive a high school diploma unless he/she has completed a two semester course in American history.

CIVICS

AMERICAN HISTORY

§20-10.1-4-4

All public and nonpublic teachers are required to present their instruction with emphasis on honesty, morality and lessons which tend to promote an upright citizenry. The state superintendent shall prepare outlines for this instruction and incorporate them into the regular courses of the schools.

§20-10.1-4-5

COURSE OF STUDY

Each commissioned high school shall include in its curriculum the following studies: mathematics, history, geography, English, literature, language, science, civil government, drawing, music, and "additional courses selected by each governing body, subject to revision by the commission on general education."

§20-10.1-4-6

SAFETY EDUCATION

A course in safety education for at least one full semester shall be taught in the eighth grade of each public and nonpublic school.

§20-10.1-4-7

HYGIENE

"The principles of hygiene and sanitary science shall be taught in the fifth grade of each public school and may be taught in other grades . . . . The state health commissioner and the state superintendent shall jointly compile a leaflet describing the principles of hygiene, sanitary science, and disease prevention . . . Any person who objects in writing, or any person under the age of eighteen whose parent or guardian objects in writing because of his/her religious teachings is entitled to be excused from receiving medical instruction . . ."

§20-10.1-4-8

DISEASE PREVENTION

"The trustee of each township and the board of school trustees of each city shall provide in each of their public schools for the illustrative teaching of the spread of disease by rats, flies, and mosquitoes and its effects, and of disease prevention by the proper selection and consumption of food."

§20-10.1-4-9

"In grades four through eight every governing body and county superintendent shall include instruction in the nature of alcoholic drinks, tobacco, sedatives, narcotics and their effect upon the human system . . .

The commission on general education shall include for high school students a separate course on the effects of these drugs on the human system."

§20-10.1-7-8 -- 20-10.1-7-10

A "voluntary religious observance" is permitted in each school corporation that follows the requirements of the statute. The time used for voluntary religious observance must be in addition to the regular school day of six and one-half hours. Any group which does not accept the religious observance may use school facilities during that time. "Each school corporation shall provide properly supervised facilities for recreation and study" during the time of the religious observance.

The school corporation, principal, teacher, or other employee shall not encourage attendance at any voluntary religious observance and to do so constitutes an "act of insubordination." However, the school shall inform parents and students in writing of any voluntary religious observance and alternatives provided.

The school shall make sure that "no coercion is undertaken by students to cause attendance at these observances and that no opprobrium attaches among the student body or faculty for not participating."

§20-10.1-7-11

At the opening of each school day the teacher in charge of a classroom "may conduct a brief period of silent prayer or meditation with the participation of all students assembled." The governing body of the school corporation may direct the teacher to conduct this meditation period.

§ II, Ch. 1, Policy 70-06

Sex Education Guidelines

SEX EDUCATION

"1. In the primary grades we encourage the identification of male and female roles in relation to family and social situations. We encourage teachers to stress the wonder of the creation of life and its spiritual implications. No information concerning the reproductive process shall be included in the primary level. Classroom discussion should center on positive, normal, moral behavior.

2. Instruction should be given concerning menstruation for girls and concerning puberty with its concomitant body changes for boys... [T]he grade level at which such subject matter is introduced may differ locally. Teachers must be sensitive to and make allowances for individual differences and readiness.

3. Sex education should be appropriately integrated into home economics, health, science, and physical education courses at the junior and senior high school level rather than offered as separate, specialized courses of study.

4. Individual schools must provide complete information to the parents concerning all programs within these areas. Parents should be free to attend classroom instruction at any time and inspect all instructional materials used in the classroom.

5. Methods and techniques of contraception, abortion, descriptions and positions of sexual intercourse shall not be taught.

6. Specific and graphic illustrations and descriptions of sexual deviations, masturbation, and homosexuality shall not be used.

7. Sensitivity training, questionnaires, group encounters, or any other form of activity, the purpose of which is to alter values or the divulging of private information relative to home life and family standards and beliefs, shall not be used.

8. A program must be so structured that it is possible to excuse a child upon request from the parent or guardian.

9. It is absolutely incumbent upon the school board to cause to be carefully read or reviewed all materials used in the program..."

§ II, Ch. 1, Policy 71-10

Foreign Language

"All first class commissioned high schools shall offer at least two years of one foreign language and at least three of a second, and these languages may be classical or modern or both.

§ II, Ch.1, Policy 73-03.1,

Fields of Study and Approved Course Titles-Grades 9-12

NOTE: This policy is adopted as an interim measure only...until a comprehensive review of Commission rules and policies is completed.

"1. General Considerations:

a. This listing of Fields of Study and Approved Course Titles is controlled by the following rules of the Commission on General Education: Rules C-2, C-4 and C-5, Rule G-1, Sections 1, 2 and 3, Rule G-2, Section 3, and Rule G-3, Sections 1, 2, 3, 6, 7, 8, 9, and 10.

b. Definition of terms:

(1) Field or Field Study shall refer...to major groupings of course titles, such as Multidisciplinary, Language Arts, etc.

(2) Course Title shall refer to titles listed under each Field...and to the course titles listed in the Vocational Education Data System Manual.

(3) Approved Course Title are those identified in this document.

c. Credit - A student...shall receive credit for the semesters he has completed the prescribed program for one or more semesters. Unless specified in the listing, the maximum number of semesters to be offered for any particular course shall be locally determined.

e. Grade level - Course titles are...for grades 9-12 unless otherwise specified...

f. Multidisciplinary - Multidisciplinary... encompasses courses which...are often most effectively taught by a team of teachers, however, such courses may be taught by a single teacher from one of the allied disciplines. Since there is no certification pattern...the teacher bearing primary responsibility for each course shall have valid certification in the area of major emphasis in the course. A Multidisciplinary course may, for purposes of meeting graduation requirements and/or providing adequate supervision, be assigned to the department of the teacher bearing primary responsibility for the course.

2. Special Consideration Relating to Vocational Programs:

a. Prior Approval - All local school corporations must have approval from the Division of Vocational Education... prior to planning, developing and implementing programs of vocational education...to be eligible for..reimbursement.

b. Methods of Instruction - The two methods of instruction utilized...are cooperative education and in-school laboratory. The cooperative education method utilizes related classroom instruction and on-the-job training, whereas the in-school laboratory method is based on related classroom instruction and a realistic laboratory experience.

(1) Through cooperative education students acquire occupational skills by on-the-job training... Students spend a part of the day on the job...and...part of the day...

in school for related instruction and courses necessary for graduation. A teacher-coordinator is responsible for supervising and coordinating the...program...

(2) Through the in-school laboratory method... the student spends a part of the day in workshops and laboratories which contain the equipment, accessories, tools and materials actually used in today's industry, business and agriculture. The laboratory teacher is responsible planning, directing and controlling the learning activities... so that they duplicate, as nearly as possible, the situation found in actual industry, business and agriculture.

c. Vocational Student Organizations - The co-curricular activities of vocational student organizations are under the direct supervision of the vocational teacher."

§ II, Ch. 1, Policy 73-03.2

Policy on Differential Credit

"As Indiana schools develop new programs...options providing flexibility to arrange time, space, people, and materials...are needed. The following... is...offered as an alternative to the standards outlined in Rules G-1 and G-3 for granting high school credit.

1. Definitions

a. Course - An organized one or two semester program offered under a single title for one-half or one unit of credit, respectively.

b. Minicourse - A learning activity of shorter duration than a course which may either be a separate self-contained learning activity or a sub-unit of a course for which distinct goals, and objectives are identified. Sometimes called learning blocks, units, microcourses, etc.

c. Fields of Study - One of the curriculum areas listed in Policy Resolution 73-01.1,...

d. Units of Credit - The unit of credit... is... the equivalent of learning experience conventionally provided students during a school year by a minimum of 200 minutes (275 minutes for laboratory fields...)

2. Standards

a. Credit Value for Minicourses - Credit... may be awarded either under Option A or Option B.

Option A

Each minicourse shall provide for...0.05 unit of credit or multiple thereof.

Option B

Each minicourse shall provide for the equivalent of 3 weeks of instructional time as defined in Rule G-3, Section 3 (1/21 unit of credit) or multiple thereof.

b. Curriculum Organization - A high school organizing a ...curriculum,...in terms of minicourses shall design them to...meet...the graduation requirements outlined in Rule G-1.

c. Allowable Combination - A student may meet the minimum graduation requirement...by a combination of appropriate minicourses within the field of study...." The following guidelines should be used to determine "appropriateness" in the areas designated:

(1) Citizenship - The one-half unit of U.S. Government must consist of a combination of minicourses which are all directly related to the philosophy, history, constitutional basis and mode of operation of all levels of government.

(2) U. S. History - The one unit of U.S. History must consist of a combination of minicourses which deal directly with significant aspects of the history of the United States; minicourses in current events or social issues will be considered appropriate if they include relevant historical background.

(3) Mathematics and Science - For some students approaches to the disciplines of mathematics and science which provide an overview of the total field are of greater usefulness than a concentrated study under one course title; therefore, in either mathematics or science, a combination of minicourses totaling one unit of credit which meets the needs of the individual student may be used to fulfill the graduation requirement.

"3. Procedures

a. Program Preparation - If a school chooses to... use...minicourses, it shall define its program by listing the fields of study and/or the courses within those fields

of study in which it will offer minicourses. This...shall include title, credit value and a brief description of each minicourse.

b. Filing - The local superintendent shall then file the program with the Commission on General Education through the Associate State Superintendent for Federal Affairs Services.

c. Authorization - The program shall be... permissible for use...when the local superintendent is advised that the program has been filed with the Commission.

d. Continuation of the Program - The program shall be considered in effect until the Commission is notified that the program has been cancelled, a revised program is filed or the Commission removes it from the files and so notifies the local superintendent."

§II, Ch. 1, Rule C-1

Section 1

HEALTH & SAFETY EDUCATION

"All schools (shall) offer at least 1/2 unit in health and safety education and 1/2 unit in physical education, credit in which courses shall meet the minimum requirements in this area for graduation." Properly equipped high schools may offer a complete unit of credit in either field.

§II, Ch. 1, Rule C-2

Aeronautics

Section 1

AERONAUTICS

High schools may offer up to one unit credit for a course in aeronautics. Such credit "shall not be substituted for any specific state required subject."

§II, Ch. 1, Rule C-3

Social Studies Fusion Course

Section 1

Social studies, a fusion course, may be taught in grades 4-8, in lieu of geography and history.

§II, Ch. 1, Rule C-4

Driver Education

Section 1

Driver and traffic safety education should be taught in both on the road instruction and with an approved simulator.

Section 2

DRIVER EDUCATION

"The Driver Education course shall be taught as a separate subject and made available to all youths of licensing age."

Section 3

Up to 1/2 unit (one credit) may be granted to students successfully completing "the equivalent of a full semester of supervised instruction in keeping with the requirements found in the Administrative Handbook . . ." Student experience will include a minimum of six clock hours behind-the-wheel and twelve hours of in car observation and meet all other standards of section 5 of this rule.

Section 5

"Non-credit, but approved, programs may be offered by public, parochial, private and commercial school programs when properly licensed teachers . . . are used as instructors, and the following minimum standards are met."

a) At least 30 clock hours of classroom instruction

b) At least 6 clock hours of behind-the-wheel instruction (part of which may be undertaken in approved simulators)

c) No more than two hours of behind-the-wheel instruction in any 24 hour period.

Section 6

"Courses are to be offered at that grade . . . or

age level where students are closely approaching or have recently reached the licensing age."

Section 8

Classroom and laboratory instruction should, whenever possible, be concurrent. When not possible the student shall be required to complete both phases in three semesters (fall, spring and summer).

Section 9

Fractional credit may be granted on a pro rata basis provided prior approval is granted by the Commission on General Education and the minimum standards in Section 5 are met.

§II, Ch. 1, Rule G-12

Subject or Courses Offered for Credit

Section 1

"Only high school subjects shall be offered for credit which are . . . certificate[d] . . . by the Commission on Teacher Training and Licensing . . ., but for experimental purposes, the Commission on General Education . . . may authorize for credit . . . subjects not [so] covered. . ."

III.C. Students; Regulation §II, Ch. 1, Rule G-1

A. Educational Courses and Programs

1. Basic Curriculum

STATUTES

§257.25 (3) -- (6)

(3) In grades one through six the following shall be taught: "language arts, including reading, handwriting, spelling, oral and written English, and literature; social studies, including geography, history of the United States and Iowa with attention given to the role in history played by all persons, and a positive effort shall be made to reflect the achievements of women, minorities, and any others who,...may have been overlooked by reasons of race, sex, religion..., cultures of other peoples and nations, and American citizenship including the study of national, state, and local government in the United States; mathematics; science, including conservation of natural resources and environmental awareness; health and physical education; music; and art."

ETHNIC STUDIES

(4) In grades seven through eight, the minimum required courses are: "science,...mathematics; social studies (with same emphasis on roles played by women, minorities, etc.),...American citizenship; language arts...; health and physical education including the effects of alcohol, tobacco, drugs and poisons on the human body, the characteristics of communicable diseases, including venereal diseases and current crucial health issues; music; and art."

DRUG EDUCATION

(5) Provisions will be made for children requiring "special education."

(6) In grades nine through twelve, the following subjects shall be taught:

a. Four units of science including physics and chemistry...

b. Four units of the social studies. American history, American government, government and cultures of other peoples and nations, and general consumer education, family law, and economics, including comparative and consumer economics.... All students shall be required to take one unit of American history which shall give attention to the role in history played by all persons (with same emphasis as in 3 and 4 above, on the role played by women and minorities) ...one-half unit of the governments of Iowa and the United States, including instruction in voting statutes and procedures....

c. Four units of English, including language arts.

d. Four units of a sequential program in mathematics.

e. One unit of general mathematics.

f. Two units of one foreign language..."

g. Physical education is required for all students in each semester. Emphasis is to be placed on "leisure time activities which will benefit the student outside the school environment and after graduation from high school."

h. "Five units of occupational education subjects...which prepare students for employment in office and clerical, trade and industrial, consumer and homemaking, agriculture, distributive, and health occupations.

i. One or partial units...in the fine arts...which may include art, music, and dramatics.

j. Health education, including an awareness of physical and mental health needs..."

§257.25 (8)

The state board of public instruction may grant exemption from an educational requirement to a public or non-public school. The state board will grant exemption only if it determines that the request is part of "a planned innovative curriculum project" which will meet the students' educational needs and be "consistent with the intent of the educational program." The request for exemption must include a detailed report of the project's rationale, objectives, administration and costs.

§280.3

The board of directors of each public school district "shall prescribe the minimum educational program for schools" and "shall not allow discrimination in any educational program."

§280.9

CAREER EDUCATION

The educational program in each public school shall include the concept of "career education" to "enable students to become familiar with the values of a work-oriented society." The essential elements of the program shall include "awareness of self in relation to others ...," an "exploration of employment opportunities," and experiences to help students "integrate work values and ... skills into their lives."

§321.178

Every public school district shall offer to make available to students attending schools in the district an approved

course in driver education. Such a course shall consist of at least thirty hours of classroom instruction, and six or more hours of laboratory instruction.

REGULATIONS

§670-6.1

Each driver education teacher must be certified to teach in Iowa, have completed twelve semester hours of safety education, have a valid driver's license and a satisfactory driving record and be free from any physical defect that would handicap him in teaching driver's education.

Each student enrolled in Driver's Education shall complete 30 hours of classroom instruction and six hours of laboratory instruction in a dual control automobile.

Courses may be taught at night for adults or in the summer for an eight-week duration.

Autos shall be dual-controlled and easily identified by other motorists. These autos shall be adequately insured. School districts shall be reimbursed for the costs of the program as provided.

CROSS REFERENCE

III.E.Instruction; Regulation §670-2.1 -- 670-2.8

1. Basic Curriculum

Statutes

§72-1101

Every accredited elementary school shall teach reading, writing, arithmetic, geography, spelling, English grammar and composition, history of the United States and the state of Kansas, civil government and the duties of citizenship, health and hygiene, together with such other subjects as the state board may determine. The state board shall be responsible for the selection of subject matter of instruction and for its organization into courses of study. COURSE OF STUDY

In accredited elementary schools, instruction shall be given in English except for courses of instruction in foreign languages, or as otherwise provided. The board of education of any school district, or the governing authority of any nonpublic school may apply to the state board of education for approval of any bilingual elementary school program and upon approval thereof, instruction may be given in the appropriate languages in accordance therewith.

§72-1103

All accredited high schools, public, private and parochial, shall give a course of instruction in citizenship, and U.S. history. Satisfactory completion of a course in the government and institutions of the United States, and particularly of the U.S. Constitution shall be required for graduation. COURSE OF STUDY

§72-5016; 72-5017

A school board may contract with an auto dealer to obtain driver training vehicles for use in driver education courses. The state board may adopt rules and regulations to administer this act. The state department of education shall prepare a list of schools accredited to conduct driver education training. RULEMAKING

"The board [of education] shall have authority to prescribe courses of study for each year of the school program and provide rules and regulations for teaching in the unified district and general government thereof, and to approve and adopt suitable textbooks and study material for use therein subject to the plans, methods, rules and regulations formulated and recommended by the state board of education."

REGULATIONS

§91-5-1 -- 91-5-3; 91-5-6 -- 91-5-8; 91-5-10 -- 91-5-12

DRIVER EDUCATION

Only a public secondary school accredited by the state board or a special school accredited by the state board shall be eligible for reimbursement for a driver education program.

In a driver education course classroom instruction shall be at least thirty hours, and behind-the-wheel driving instruction shall be at least an average of six hours per student. Each student shall have a minimum of two hours of behind-the-wheel instruction.

A maximum of twelve hours of student experience in a state-approved driving simulator shall be accepted in lieu of three hours of behind-the-wheel instruction.

A maximum of eight hours driving time on driving ranges in a multiple-car, state-approved plan shall be accepted in lieu of four hours behind-the-wheel instruction.

The state board shall approve any combined use of simulators and multiple-car driving ranges.

A driver education course shall last at least twenty instructional days.

A driver education instuctor shall have a secondary school teacher certificate, a motor vehicle operator's license, and eighteen semester hours of special training in driver education.

To be eligible to attend a driver education course a person shall be at least a three-fourth-time student in grades nine through twelve or be eligible for an instruction permit, under 21 years old, and not graduated from high school or over eighteen years old, not successfully com-

pleted a course before, and eligible for an operator's license.

To qualify for behind-the-wheel training each student shall have an instruction permit for limited driving or a driver's license.

III.A.2.; Regulation §91-13-1

1. Basic Curriculum

Statutes

§152.320: 152.390

The administrator of the coal use research program "in cooperation with the superintendent of public instruction . . . shall . . . make plans and provisions for extending . . ." the research program designed to develop new and more effective uses of fossil fuels, "into the regular courses of instruction in chemistry in the public high school."

CHEMISTRY

§158.175

"As a continuation of the policy of teaching our country's history and as an affirmation of the freedom of religion in this country, the [local] board of education . . . may authorize the recitation of the traditional Lord's prayer and the pledge of allegiance to the flag in public elementary schools. Pupil participation . . . shall be voluntary. Pupils shall be reminded that this Lord's prayer is the prayer our pilgrim fathers recited when they came to this country in their search for freedom. Pupils shall be informed that these exercises are not meant to influence an individual's personal religious beliefs in any manner. The exercises shall be conducted so that pupils shall learn of our great freedoms, including the freedom of religion symbolized by the recitation of the Lord's prayer."

LORD'S PRAYER

§158.177

1)" In any public school instruction concerning the theories of the creation of man and the earth, and which involves the theory therein commonly known as evolution, any teacher so desiring may include as a portion of such instruction the theory of creation as presented in the Bible, and may accordingly read such

THEORY OF CREATION

passages . . . as are deemed necessary for instruction on the theory of creation, thereby affording students a choice as to which such theory to accept.

2) For those students receiving such instruction, and who accept the Bible theory of creation, credit shall be permitted on any examination in which adherence to such theory is propounded . . . .

3) No teacher in a public school may stress any particular denominational religious belief.

4) This section is not to be construed as being adverse to any decision which has been rendered by any court of competent jurisdiction."

§158.200 -- 260

"The [local] boards of education. . . may provide for moral instruction of pupils subject to their jurisdiction, in the manner provided . . ." by statute.

MORAL INSTRUCTION

"The board . . . may authorize a complete survey of all the pupils attending the public schools within the district and ascertain those pupils who desire moral instruction and have the consent of parent or guardian for the instruction.

The boards . . . shall fix one day each week when pupils . . . may be excused for at least one hour to attend . . .[some] . . suitable place to receive moral instruction in accordance with the . . . preference of the pupils.

Each board . . . may make such arrangements with the persons in charge of the moral instructions as the board deems necessary and admissable.

Pupils attending the classes for moral instruction . . . shall be credited with the time spent as if they had been in actual attendance in school.

Any pupil who fails to take advantage of the moral instruction shall remain in school during the time

when the instruction is being given, but shall not receive any educational advantage over children receiving the moral instruction.

The moral instruction shall be given without expense to any board of education beyond the cost of the original survey."

§158.280

"Instruction in all phases of environment shall be included in the curriculum of the public schools . . . and textbooks regarding the proper use and protection of forests, soils, water, minerals, wildlife and other aspects of the environment shall be prepared or selected by the State Textbook Commission for this purpose."

ENVIRONMENT

§158.405

"The department of education shall administer . . . [the statutes pertaining to alcohol and drug education] . . . pursuant to regulations adopted by the state board of education. In administering . . . [these statutes]. . . the department . . . shall take into consideration the advice of the secretary for human resources . . . the Kentucky commission on alcohol and drug problems . . . and the interagency council on alcohol, drugs and occupational problems."

ALCOHOL AND DRUG EDUCATION

§158.410

1) "Instruction in the effects of the use of alcohol and drugs and the problems which may result in the[ir] periodic, habitual or chronic use . . . shall be conducted in the elementary and secondary schools . . .

ALCOHOL AND DRUG EDUCATION

2) Such instruction shall be sequential in

nature and suited to meet the needs of the students at their respective grade level."

§158.415

ALCOHOL AND DRUG EDUCATION

"The department of education shall develop a comprehensive state-wide program on alcohol and drug education by assuming the following functions;

1) Assist in the development of model curricula for the public schools in drug education and the effects of the use of alcohol, restricted dangerous drugs . . . and other dangerous substances;

2) Identify innovative teaching methods for the instruction of alcohol and drug education in the public schools;

3) Develop methods of evaluating the effectiveness of instruction in alcohol and drug education;

4) Assist school districts in conducting teachers' in-service education programs on alcohol and drug education;

5) Assist teacher education institutions in the development of courses on alcohol and drug education;

6) Administer pilot projects on alcohol and drug education in the schools and conduct teacher in-service education; and

7) Assist . . . the department for human resources in the development of alcohol and drug education programs which will include parents, students, community health agencies, law enforcement agencies, and other community groups. This program shall emphasize the development of coordinated school-community programs relative to alcohol and drug education."

§158.425

"The governing board of each local school district shall adopt a policy regarding an alcohol and

drug education program by resolution in accordance with guidelines approved by the state board of education and consistent with the provisions of . . .[the statutes] . . . specifying among other things, the curriculum to be utilized in teaching alcohol and drug education, provisions for in-service training and curriculum assistance to teachers, and responsibility of certified personnel in identification, counseling and medical referral of pupils."

§158.430

"Nothing in . . .[the statutes]. . . shall be interpreted as prohibiting any [certified employee of any] local school district . . . from inviting qualified persons in the field of alcohol and drug education from outside the school system to assist the teacher in classroom programs . . ."

§158.450;455

"The department of education shall administer . . . [consumer education statutes] . . . pursuant to regulations adopted by the state board of education. In [so] administering . . . the department . . . shall take into consideration the advice of the secretary of consumer protection and regulation, . . . the state consumer advisory council, and the consumer protection division of the office of the attorney general.

Instruction in consumer education shall be conducted . . . in conjunction with courses in any appropriate area of study.

Such instruction shall be sequential in nature and suited to meet the needs of the students at their respective grade level."

CONSUMER EDUCATION

"The department of education shall develop a comprehensive statewide program in consumer education by assuming the following functions:

1) Assist in the development of model curricula . . . in consumer education;

CONSUMER EDUCATION

2) Identify innovative teaching methods for the instruction of consumer education . . .;

3) Develop methods of evaluating the effectiveness of instruction in consumer education;

4) Assist schools in conducting teacher in-service education programs on consumer education;

5) Assist teacher education institutions in the development of courses on consumer education; and

6) Administer pilot projects on consumer education in the schools and conduct teacher in-service education;"

In addition, "the department . . . shall develop and establish a consumer education training program for . . . teachers and administrators to provide training at the local district level."

§158.470

"The governing body of each local school district shall adopt a policy regarding consumer education programs by resolution in accordance with guidelines approved by the state board of education and consistent with the provisions of . . . [the statutes] . . . specifying among other things, the curriculum to be utilized in teaching consumer education, provisions for in-service training and curriculum assistance to teachers."

CONSUMER EDUCATION

1) "Career education shall be conducted in the elementary and secondary, . . . programs . . . as a process incorporated into the total curriculum and in conjunction with courses in any appropriate area of study.

CAREER EDUCATION

2) [It] shall include, but not be limited to the areas of:

(a) Personal development, including the development of competencies necessary to acquire basic learning skills [so that the student learns to:] communicate; compute using the basic processes; acquire knowledge and skills through continued learning; make informed decisions relating to career and life development; apply acquired knowledge and skills to real-life situations; pursue personal interests and enrichment; and obtain and apply knowledge of physical fitness, nutrition and mental health to life-long personal health maintenance;

(b) Career and occupational awareness, including information activities and guidance procedures of the career education concept designed to develop the understanding and ability necessary to make career choices, to cope with the changing economic and occupational environment, and to develop occupational and educational competencies necessary for employment and continued education;

(c) Economic understanding, including knowledge of economic systems, information on tax structures and obligations, understanding of personal and family money management, and the competencies required for the application of such knowledge and understanding to consumer practices;

ECONOMICS

(d) Citizenship, including the rights and responsibilities of citizenship in the community, state,

CITIZENSHIP

nation, and world social and political orders;

(e) Family life, including information and activities designed to develop an understanding of the role of the individual in family life, the rights and responsibilities incumbent upon each role participant, the responsibilities and duties of marriage and parenthood, and the theories and practices of child rearing and early childhood development; and

FAMILY LIFE

(f) Human relations, including knowledge of the relationship of the individual to his[her] social, cultural, natural and political environments, and understanding of the worth and dignity of other people, and the skills and understanding required in developing an ability to work with and relate to other individuals and groups, and an appreciation of the historical and cultural values of his[her] environment and that of others.

HUMAN RELATIONS

3) Career education shall be sequential in nature and suited to meet the needs of the students at their respective grade level."

§158.530

"The governing body of each local school district shall adopt a policy regarding career education by resolution in accordance with the guidelines and regulations approved by the state board of education and consistent with the provisions of . . .[these statutes]. . . specifying among other things the curriculum or program to be utilized . . . provisions for in-service training, assistance to teachers and guidance personnel in implementation of such program, and the procedures by which parents, community members, and others may provide input to the program."

CAREER EDUCATION

§158.535

"Nothing in . . .[these statutes]. . . shall be interpreted as prohibiting any [certified employee of any] local school district . . . from inviting qualified persons in the areas of career education from outside the school system to assist . . . in classroom programs or to present programs to all or any part of the student body in a manner consistent with policy and regulation of the local board of education, the state board of education and the provisions of . . .[these statutes]."

CAREER EDUCATION

§161.170

"Each teacher . . . shall enforce the course of study, the use of the legally authorized textbooks, and the rules and regulations prescribed for the schools. If any teacher wilfully refuses or neglects to comply with . . .[this provision]. . . the board of education, upon recommendation of the superintendent, may remove him[her] at any time. When so removed the teacher shall receive payment only for the time taught."

REGULATIONS

704 KAR 4:010

Physical education experiences and instruction shall be made available to elementary and secondary school pupils.

PHYSICAL EDUCATION

"Each school shall include health instruction in its curriculum for grades K-12 . . . ."

HEALTH INSTRUCTION

I.Superintendent of Schools; Statute §160.370

III.A.2.; Statute §156.230

III.C.Public Schools; Statute §158.510

III.E.Career Education; Statute §158.540

IV.A.; Regulation 704 KAR §4:020

1. Basic Curriculum

Statutes

§17:13

The board and the superintendent shall establish and, maintain, and operate a statewide drug education program, through a separate division of drug education within the state department. The director of this division shall be appointed by the superintendent, and "shall be responsible for the affairs of the division of drug education and the statewide drug education program."

DRUG EDUCATION

§17:151.1

"Any city or parish school board may, with the approval of the State Board of Education . . .[and] of the Coordinating Council of Higher Education, extend the curriculum of any high school . . . to include a thirteenth or fourteenth grade, or both, when . . .[it] is necessary or desirable for the benefit of [the] school children . . .[these] city and parish school boards shall designate appropriate courses of study to be offered in the additional school grades . . . .and shall provide the facilities necessary for the effective operation of [the] extended school program."

ADDITIONAL GRADES

§17:154

"The branches of spelling, reading, writing, drawing, arithmetic, geography, grammar, United States history, and health, including the evil effects of alcohol and narcotics, shall be taught in every elementary school . . . The minimum daily session . . . shall be five hours . . .[unless facilities are so insufficient as to require half-day sessions]. . . A school week shall consist of five days and a school month of twenty days."

COURSE OF STUDY

§17:261; 266; 267; 268

Regular courses of study on the Constitution of the United States shall be given, beginning with the eighth grade. The Declaration of Independence and the

U.S. CONSTITUTION

Federalist Papers shall be made required courses in the elementary schools and in the high schools of the state, respectively. At least one hour of instruction per week shall be given to pupils above the eighth grade, in the principles and practices of military science and tactics, stressing the duties of the solider. "The state board of education may take steps . . . to provide for the teaching of kindness to dumb animals in the public schools . . . ."

§17:262 -- 265

ALCOHOL AND NARCOTIC ABUSE

"The state board of education shall include in the curriculum of all public schools in the state a course of study on the evil and injurious effects on the human system of the use of alcohol and narcotics.

The state superintendent of education shall instruct and require the various school boards and parish superintendents to establish" these courses in all of the grades of the public schools.

REMOVAL

Any parish superintendent of education or any member of any parish school board, who refuses, fails, or neglects to comply shall be removed from office.

"The books to be used in the teaching of these courses . . . shall be exhaustive and complete on the subject."

§17:269

SELECTIVE SERVICE OBLICATION

"The state board of education may establish and administer . . . a selective service obligation orientation program of instruction which may be part of the required curriculum for all male students in grades higher than the eighth grade in the state's public schools."

Every male student may be given one hour of non-credit instruction in the ninth, tenth, and eleventh grades, and six hours of instruction during the second semester of the twelfth grade.

§17:270

DRIVER EDUCATION

"The State Board of Education and the State Department of Education shall establish and operate a driver education and training program in each parish of this state for children of secondary school age [whose

purpose it will be]. . . to educate drivers to be competent . . . and to develop the knowledge, attitudes, habits and skills necessary for the safe operation of motor vehicles."'

The State Superintendent of Public Education "is authorized to purchase all the necessary equipment, visual and training aids and devices . . . required to conduct and operate the program."

§17:272

FRENCH LANGUAGE

All public elementary schools shall offer at least five years of French instruction starting with oral French in the first grade, and all public high schools shall offer a program of at least three years of instruction in the French language and at least one course included in the culture and history of the French populations of Louisiana and other French speaking areas in the Americas.

Any parish or city school board may request the State Board of Education to be excluded from these requirements and these requests shall not be denied.

§17:273

SECOND LANGUAGE

As of the 1976-77 schoolyear, each parish school board and city school board "is . . . authorized to establish as part of the general curriculum of instruction" the teaching of a second language from the first grade to the twelfth grade, "in a well articulated, sequential manner" so that all school children can attain proficiency in a second language.

If a second language program is not established by May 30, 1976, a petition requesting the instruction of a particular second language containing the signatures of at least twenty-five percent of the heads of households of students, shall require such a program to be established by the parish or city school board, upon certification by the superintendent of the parish or city schools.

EXEMPTION

"Any student shall be exempted from the second language program upon request of the parent or guardian."

§17:274 -- 274.1

IIA1-LA 4
LOUISIANA

As a prerequisite to graduation, beginning with the 1977-78 session, all public high schools shall give instruction in a course in civics for at least two semesters, equal to one unit of credit; and instruction on "the essentials and benefits of the free enterprise system," for at least one semester or quarter, equal to one-half unit of credit.

CIVICS

FREE ENTERPRISE

"Free enterprise" as used in this section, means an economic system characterized by private or corporate ownership of capital goods, by investments that are determined by private decision rather than state control and by prices, production, and the distribution of goods that are determined in a free manner. Instruction . . . shall emphasize the positive values of profit and competition in a free economy and the enhancement of the worth and dignity of the individual under such a system.

In-service training programs [for teachers] shall be provided each year by the State Department of Education."

§17:281

"No elementary or secondary school in Louisiana, shall offer, and no teacher shall teach or instruct, any courses specifically designated 'sex education', or a course by any other name in which instruction is given to the pupil at any grade level, primarily dealing with the human reproductive system as it pertains specifically to the act of sexual intercourse . . . No instructor shall test, quiz, or survey students about their personal or family beliefs or practices in sex, morality or religion. This shall not be construed as preventing instructors from supporting principles of good moral behavior with their students. Violation of this section shall be punished by suspension without pay for a period between fifteen and sixty days.

SEX EDUCATION

SUSPENSION

The "State Board and/or Department of Education shall withhold any and all funds payable to a school system until compliance is affected," if the violation has not been corrected within thirty days.

§17:2115

MEDITATION

"Each parish and city school board in the state shall permit the proper school authorities . . . to allow" students and teachers to observe, at the start of each school day, a brief time in silent meditation if they desire to do so. "The brief time in silent meditation shall not be intended or identified as a religious exercise."

REGULATIONS

Policy and Procedure Manual of State Board of Elementary and Secondary Education, 3.01.533

VENEREAL DISEASE EDUCATION

EXEMPTION

All schools are authorized to implement venereal disease education for high school seniors. If parents object in writing, their child shall be excepted from the program.

BULLETIN 741

CURRICULUM AND INSTRUCTION

"The high school shall provide a comprehensive, college preparatory and/or vocational curriculum which includes all those pupil activities for which it assumes responsibility. Instructional methods in the elemencary and high school shall be those which most effectively promote the purpose of the school program and which meet the needs and individual differences of all pupils. . . .

Individual differences of students shall be provided for within the educational program in each school by accelerating students, grouping students, enriching or adjusting the program, differentiating materials and methods, providing alternate programs, and through establishing special education classes for those children whose needs cannot be adequately met in general education programs."

A. Educational Courses and Programs

1. Basic Curriculum

STATUTES

§322

"Insofar as practicable, the studies required by the laws of both states shall be offered in an interstate school district."

§802

The state and national flags will be displayed at every school when that school is open for instruction. It shall be the duty of the teachers "to impress upon the [pupils]. . . the significance of the flag, to teach them the cost, the object and principle of our government, the inestimable sacrifices made by our forefathers, the important contribution made by all who have served in the armed services of our country since its inception and to teach them to love, honor and respect the flag of our country that cost so much and is so dear to every true American citizen."

§1011

"In order to thoroughly prepare the youth of the state for the duties and obligations of citizenship and to provide for their future well-being and comfort", school committees or directors shall provide "adequate programs of health, safety, and physical education" which shall be taught in elementary and secondary schools. The curriculum and "plans of lessons and instruction" shall be prepared by the commissioner.

HEALTH EDUCATION
SAFETY EDUCATION
PHYSICAL EDUCATION

§1012

"Administrative units may employ certified supervisors and directors of physical education." The superintendent of schools shall report to the commissioner "the number of pupils receiving instruction, the number of directors and supervisors employed," their salaries, and other required information.

§1221

All instructors of youths and children in public or private institutions "shall use their best endeavors to impress upon the minds of their pupils . . . the principles of morality and justice and a sacred regard for truth; love of country, humanity and a universal benevolence; sobriety, industry and frugality; chastity, moderation and temperance; and all other virtues which ornament human society . . . [in order to] secure the blessings of liberty and to promote their future happiness and the tendency of the opposite vices to slavery, degradation and ruin."

MORALITY

Teachers must devote at least one half hour of each week to teach ". . . the great principles of humanity, as illustrated by kindness to birds and animals and regard for all factors which contribute to the well-being of man."

HUMANITY

§1222

The commissioner shall prescribe a course of study, required for graduation from all free public high schools", in the foundations of our American freedoms, including the U.S. and Maine constitutions.

FREEDOM

§1223

Scripture reading is unconstitutional, "but the secular study of the Bible or those subjects in which the history of religion may be an integral part is not prohibited."

HISTORY OF RELIGION

§2451

This chapter stresses development of the "knowledge, attitudes, habits and skills necessary for the safe operation of motor vehicles" with classroom instruction and actual driving experience. This chapter also seeks to encourage school committees and directors to make provision for driver education "in all the public secondary schools and academies.

DRIVER EDUCATION

"The commissioner shall employ necessary personnel, subject to the terms of the personnel law, and establish rules and regulations to carry out this chapter" including salaries and expenses for a state director of driver education, "clerical assistance and supplementary teaching aids essential to the program."

REGULATIONS

STATE PLAN FOR METRIC EDUCATION

Issued October 1975

Metric study units for all levels are prepared. Workshops for teachers and administrators have been presented. Plans for regional workshops are completed.

METRIC EDUCATION

Administrative Letter No. 3 8/5/77

Driver Education

No charge may be made to students for a driver education program offered entirely within the regular school day. A program taught after school may charge students a fee not to exceed the per pupil cost of the program. Programs taught partially during school hours may charge a fee limited to those costs incurred after school hours. Programs taught during the summer may charge a fee.

IV.A.; Regulation, Administrative Letter No. 1 8/1/77

A. Educational Courses and Programs

1. Basic Curriculum

Statutes

Art. 77 §15

"The State Board . . . shall prescribe . . . basic policy and guidelines for the program of instruction for the public schools" and distribute them to all interested parties.

Art. 77 §66

The county superintendent shall recommend to the county board "curriculum guides, courses of study, resource material, and other teaching aids" for adoption.

Art. 77 §87

PHYSICAL EDUCATION

A program of physical education shall be required of all students to develop their good health and coordination.

Art. 77 §88

SAFETY EDUCATION

A program of safety education shall be organized in accordance with the bylaws, rules and regulations of the state board.

Art. 77 §88A

A program of drug education shall be implemented in the public schools prior to the sixth grade and as soon as practicable by those trained in the field of drug abuse. The state board "shall establish criteria for determining how a teacher . . .[is]. . . trained in the field of drug education."

Art. 77 §88B

HEALTH EDUCATION

ALCOHOL AND DRUG ABUSE

The state board shall implement a program of health education dealing specifically with the abuse of alcohol. This program may be included within the program on drug abuse as provided in §88A.

DRIVER EDUCATION

The county board "shall offer instruction in the safe operation of motor vehicles to high school students" who are fifteen years of age or older. The county board shall determine whether the course shall be elective or required and the state board shall determine whether the course shall be given credit. The school principal shall make sure the course does not interfere with other school work.

REGULATIONS

13.03.02.01

Local school systems must "provide a comprehensive program of Family Life and Human Development as a part of a total health program" that conforms to State Board standards. "Such programs shall be initiated following Community involvement" and appropriate teacher preparation.

SEX EDUCATION

"The programs of Family Life and Human Development shall serve two important goals: to build an understanding of the . . . basis of moral values generally accepted in our society, and to develop the foundation for making responsible choices of behavior that will reflect respect for the individual and for others." Objectives include understanding family relationships and potential problems and human sexuality and sexual roles.

The programs shall have three focus areas: "interpersonal relationships, physiological and personality changes, and advanced physiology and psychology of human sexual behavior. Focus Area One: . . . The content shall be concerned with family life and interpersonal relationships . . .[and] shall be part of the regular curriculum for all students in grades kindergarten through 12, to be taught in mixed groups and included within the framework of existing subject areas . . . .

Focus Area Two: . . . The content shall be concerned with the physiological and personality changes related to maturation and human reproduction. The material shall be presented as an identifiable unit within the total program . . . . introduced as shortly in advance of puberty as is

practical . . . direct teaching of human reproduction" should begin between ages 10 and 12. "Each local school system shall develop a prescribed procedure for consultation. . . with community groups relative to the program of human reproduction." Male and female students may be taught separately but must be given the same information. "Pupils may be excused from the unit of the program upon a written request from their parents." Such students shall be provided other worthwhile learning activities.

"Focus Area Three: . . . The content shall be concerned with the advanced physiology and psychology of human sexual behavior and related matters and may be offered as an elective course at the junior and/or senior high level . . . . A student who chooses this course must have the prior consent of his[her] parents . . . The elective course may be taught separately to boys and girls, but should include the same information for both groups . . . . All instruction shall be objective and carefully supervised." The local school system may offer an adult education course in Family Life and Human Development if funds are available.

Each local school system shall establish procedures for evaluating and selecting . . . materials to be used in . . . programs . . .[and] shall appoint a joint committee of educators and representatives of the community which shall examine all . . . materials proposed to be used in the schools . . . . Each school shall provide . . . opportunities for parents to view all instructional materials . . . before the materials are used in the classroom."

Program curricula shall be developed by professional educators. "A Citizens' Advisory Committee . . . representing . . . the Community shall consult with these educators in developing, implementing, and evaluating the program." This committee should be formed immediately. "After the system-wide curriculum is established, local school administrators and local PTA's or similar groups shall develop a community planning group. After studying the . . . program, this group shall prepare a plan for

2. Programs for Exceptional Children

2. Programs for Exceptional Children

Statutes

§16-39-2; 3

Each school board shall provide at least 12 consecutive years of instruction and special services for exceptional children, beginning with those six years old. No matriculation or tuition fees shall be required of exceptional children. Exceptional children are those between six and 19 who have been certified under state board regulations as being unsuited for enrollment in regular public school classes, including the following: the mildly and moderately retarded; speech impaired; deaf and hearing impaired; blind and vision impaired; emotionally conflicted; socially maladjusted; multiple handicapped; and the intellectually gifted.

§16-39-4; 6

Beginning with the school year of 1972, each school board shall submit a five-year plan for implementing instruction and special services for exceptional children. The plan must be approved by the state board of education.

During the fifth year of implementation, each school board shall submit a long-range plan to the state board for its review and approval. The long-range plans shall include provisions for the following: (1) establishment of special education classes; (2) utilization of teachers; (3) attendance requirements; (4) services for exceptional children whose condition will not permit them to benefit from any kind of school program; and (5) tuition payments for exceptional children who are sent to private schools.

§16-39-5

The state board of education shall adopt regulations on the following: (1) standards for certification of exceptional children; (2) minimum standards of instruction and special services to be provided; (3) qualifications for teachers, instructors and other personnel; and (4) guidelines for five-year plans for local programs. The state board shall review and approve or disapprove plans submitted by school boards, and shall have primary responsibility for enforcing compliance with the plans.

RULEMAKING

PUPIL/TEACHER RATIO

§16-39-7

For every group of eight to 15 exceptional children to be taught as a special class, one teacher unit shall be allowed. The minimum number of pupils required for each unit may be reduced to not less than five.

§16-39-8

In order to be eligible for special services an exceptional child must be properly classified and the child's parent must be informed of the classification. In providing instruction for exceptional children, the school boards shall utilize regular school facilities. Exceptional children shall not be segregated and taught apart from other nonexceptional children until a careful study of the child's case has been made and evidence obtained which indicates that such segregation would be for the child's benefit. A written record on each child shall be kept by the school principal. This confidential record shall be available for inspection by school officials and faculty with the principal's consent.

§16-39-10

The state superintendent of education is authorized to purchase and distribute among school boards textbooks, equipment and materials for the use of vision and hearing impaired children and those with other special learning disabilities enrolled in the public schools.

§16-39-11

The special education trust fund shall provide 80 percent of the cost of transportation for exceptional children.

II.A.1.: Statute §16-1-16

II.B.1.a.: Statute §16-36-23; 16-36-25

III.C.Pupils: Statute §16-1-13

2. Programs for Exceptional Children

Statutes

§14.30.180

The state shall provide competent education for exceptional children who are at least three years of age.

§14.30.186

A school district or attendance area may provide special services for exceptional children and shall do so when at least five children reside in the area served by the school. Different school districts (and attendance areas) may cooperate with one another in providing these services. When a district or attendance area does not provide such services exceptional children may attend classes in another district or area under a cooperative agreement.

§14.30.191

EVALUATION

An exceptional child shall be examined to assess his/her learning, mental and physical status before placement in a special program, and "not less than once a year," while he/she is in the program. A report of the assessment, and an opportunity for consultation shall be made available to the child's parent or guardian after each assessment and before placement. A parent or guardian may request an independent examination, "if [he/she] believes that the educational assessment of his [her] child is in error." Where a discrepancy between evaluations exists, a hearing, at the request of the parent or guardians, shall be held -- pursuant to regulations of the department of education and subject to the Administrative Procedures Act -- to resolve the discrepancies.

The department shall establish regulations for such hearings and shall cooperate with the Department of Health and Social Services in establishing "diagnostic standards for the identification and classification of the learning, mental and physical status of exceptional children."

§14.30.231

"The commissioner of education and the commissioner of health and social services shall establish an advisory committee . . . to provide information and guidance for the development of appropriate special education programs and services for exceptional children."

§14.30.285

"The department of education shall institute a statewide program . . . for exceptional children to insure that" children are educated in or near their own school when necessary.

"The . . . exceptional child may be sent to another school district or in-state program . . . if an adequate program . . . is not available in the child's own district and if the commissioner of education determines that another . . . program is adequate . . ." The sending district shall pay the receiving district at the sender's cost-per-pupil rate and the department of education shall pay any remainder necessary to meet the receiver's cost-per-pupil rate. If the commissioner determines that no program in the state is "appropriate for the needs of," or "feasible for," the child, he/she be sent to an out-of-state institution with his/her expenses being paid by the department of education. No child may be transferred to a school outside [his/her district] without the consent of the parent or guardian.

§14.30.305

A school district may provide special instructional services for "exceptional children who are hospitalized or confined to their homes."

HOME INSTRUCTION

§14.30.330

"The parent or guardian of an exceptional child or [with parental knowledge and consent] the school administrator, for . . . children . . . in the district or area . . . , shall make application for enrollment of the child" (in the Program for Education of Exceptional Children). The application shall be

submitted to the governing body of the district and forwarded to the commissioner. "Final certification . . . is the responsiblity of the commissioner."

§14.30.340

"No handicapped child may be required to enroll in a special program if the parent or guardian of the child certifies to the satisfaction of the school board . . . that the child is receiving adequate educational advantages.

A child shall be excused from the [program's] requirements if a physician certifies in writing that the child's bodily, mental or emotional condition does not permit his attendance at school."

§14.30.347

School transportation for exceptional children shall be the same as that provided for regular students except when it is in the best interests of the exceptional child to be transported separately.

§14.30.350

(1) "Exceptional children means children who differ markedly from their peers to the degree that they are better served by placement in a special program . . ." They are categorized as follows:

(A) Mentally retarded includes those children of educable or trainable mind who consistently demonstrate evidence of reduced academic achievement or social behavior and whose intellectual potential indicates restriction significantly below . . . their peers;

(B) Physically handicapped includes children whose . . . physical impairments require "special facilities, equipment or methods to make their educational program effective."

(C) "Emotionally handicapped includes children whose . . . emotional impairments require special facilities, equipment or methods to make their educational program effective."

(D) "Children with learning disabilities includes those who exhibit disorders in one or more of

the basic learning processes . . . who may require special facilities, equipment or methods to make their educational program effective."

(E) "Gifted includes children having outstanding intellect, ability or creative talent;"

(F) Multiple-handicapped includes children who "fit into a combination of these categories . . . whose needs demand . . . special facilities, equipment or methods to make their educational program effective."

REGULATIONS

4AAC 33.020

The administration and operation of a special education program will be guided by the Special Education Handbook published by the department.

4AAC 60.120

"At the age of three years, an exceptional child may receive special assistance as a part of the local school district's annual plan of services for special education. Any pre-elementary school which provides services for an exceptional child and receives state funds for providing those services must adhere to state guidelines for special education programs.

2. Programs for Exceptional Children

Statutes

§15-802

The Arizona State School for the Deaf and Blind shall be located in Tucson and shall serve the intellectual and physical needs of the children educated there.

§15-811; 813-814

The board of directors for the school for the deaf and blind shall be made up of the governor and five appointed members, serving three-year terms. The board may bring actions to protect the school, and shall provide books and supplies. The school's records shall be open for public inspection. The board shall annually report to the governor on the financial conditions and work of the school.

SCHOOL FOR THE DEAF AND BLIND

§15-815

The superintendent of the school for the deaf and blind shall be appointed by the board and shall serve as the school's chief executive officer. The superintendent must be a competent educator with at least five years' experience as a teacher of the deaf. The board has authority to remove the superintendent for inefficiency. The superintendent is entitled to a full hearing before the board and if it is decided that she/he was removed without good cause, she/he shall be reinstated without any loss of salary.

REMOVAL

HEARING

§15-816

The superintendent shall recommend the appointment of personnel to the board. The superintendent shall also have the authority to discharge employees and if she/he does so, shall file a written report of such action with the board.

§15-817

The school for the deaf and blind shall have a medical officer to act as physician, who shall visit the school as often as necessary.

§15-818

Teachers or other employees of the school for the deaf and blind shall not be required to subscribe to any religious or political beliefs. The board of directors shall not attempt to influence any school employee to campaign for or contribute to any political candidate, subject to penalty of dismissal. Board members and school employees are prohibited from receiving gifts or money from any firm doing business with the school. A violation of this provision constitutes bribery and is cause for removal.

CONFLICT OF INTEREST

§15-831

The board of directors of the school for the deaf and blind shall supervise the care and education of the students and see to it that the best methods for teaching the deaf and blind are used in the school. The board shall give particular attention to the "humanitarian aspects" of the students' education.

§15-832--834

A complete record of all admissions to the school for the deaf and blind shall be kept. The records may be viewed by the board, a legislative committee, or by court order. Political and religious beliefs shall not be a criteria of admission. Any resident of the state between ages 6 and 21, who is blind, deaf, or defective in speech to the extent that she/he cannot obtain an education in the public schools, shall be admitted, without charge, to the school for the deaf and blind.

ADMISSIONS

The board of directors may enroll a child under six years who meets these same requirements. Persons over 21 may be admitted if there is space available.

§15-835--837

Persons between six and eighteen, whose parents are state residents, and who, due to blindness, deafness or speech defect are unable to attend public school, must attend the school for the deaf and blind. A parent who refuses to send their child to the school

ATTENDANCE

shall be subject to a fine or imprisonment. State truant officers shall enforce the attendance laws and failure to do so shall result in a fine.

§15-838

The superintendent of the school for the deaf and blind shall supply clothes and transportation to students without means. The parents of these students shall be assessed for the supplies provided.

§15-839

The board of directors of the school for the deaf and blind may establish a residential facility for deaf and blind children who are unable to attend the school due to a serious emotional disturbance. The facility will provide a specialized program in order to prepare the student to return to a regular school program.

§15-851

The board of directors of the state school for the deaf and blind may establish a branch elementary day school for the deaf in the Phoenix area. This school shall be governed by the superintendent of the state school.

§15-1001

The department of education shall prescribe a program for the education of crippled children.

§15-1010

All school districts shall develop a plan for special education provisions for all handicapped children.

§15-1012

A division of special education is created which shall have a director appointed by the state superintendent of public instruction. The director must have a master's degree and be experienced in special education. An advisory committee on special education is created, consisting of 12 state board-appointed members, who shall serve for three-year terms.

§15-1013--1014

Before a child is placed in a special education program, she/he shall be evaluated by a professional specialist in order to determine her/his capabilities and needs. At the request of a parent or guardian, the evaluation process may be repeated once each semester.

EVALUATION

§15-1015 --1015.01

The governing board of each school district shall (by 1976-77) (1) provide special education services for all handicapped children; (2) employ special personnel to administer these programs; (3) carry on the educative process within the regular classroom whenever possible; (4) provide transportation to pupils; and (5) establish policies on pupil-teacher ratios in special education.

Each common or high school district board may cooperate with other districts in providing special education services. The boards may establish "work-experience programs" for students 16 or over.

A school district or county superintendent may contract with other public or private schools to provide services for exceptional children. The state board of education may make rules and regulations concerning special education.

RULEMAKING

§15-1020 --1020.04

A special education voucher fund, administered by the state superintendent of public instruction, will serve the needs of persons placed in a private institution to receive special education. Requirements for the voucher system will be developed by the director of the division of special education. One requirement shall be an evaluation of the pupil's educational needs and capabilities by a professional in the field. The pupil's school district (i.e., the location of the private institution) shall review the pupil's progress with the aim of integrating the pupil into the public school at the earliest date possible.

VOUCHERS

REGULATIONS

R7-2-306

ARS 15-1010A, 15-1012 D, 1017 C

Approval of District Special Education Programs

Each district must submit a plan to the State Board of Education which includes a determination of the number and ages of handicapped children in the district, the available facilities, transportation and number of teachers. It must also submit a description of the program of study to include the program goals, children to be served, evaluation procedures, equipment and materials. Screening and placement services must comply with the Guadelupe decision.

R7-2-306

ARS 15-1013, 15-1014 and [Guadelupe court decision]

Procedures for Screening, Referral, Evaluation, Placement and Review of Placement of Handicapped Children.

Each district shall establish written procedures to screen potential handicapped children who can profit from special education programs. These shall include physical and learning disabilities but not psychological testing. No program may have a teacher-pupil ratio of more than 15 to 1.

CROSS REFERENCES

I.District Board of Trustees; Statute §15-448

III.C.Students; Regulation R7-2-301 ARS §15.J46A

III.C.Legislature; Constitution Art. XI, §1

A Board of Trustees of the Arkansas School for the Blind and Arkansas School for the Deaf consisting of five members is responsible for the management of said institutions and is liable for same.

SCHOOL FOR THE DEAF

SCHOOL FOR THE BLIND

"The Governor, by and with the advice and consent of the Senate shall appoint the members of the said Board(s)." Vacancies shall be filled by the Governor, "subject to the approval by the majority of the [Board] members." Board members must be residents of Arkansas and no elected or appointed official shall also serve as a board member. Likewise, persons may only serve on one board at a time. Board members shall take an oath of office and give written notice of acceptance of a position.

REMOVAL

"The Governor [may]. . . remove any member of such Boards . . . for cause only after notice and hearing." Members may appeal their removal to the courts.

Members shall be compensated for expenses of attending meetings.

Boards shall meet monthly on a regular schedule. Each shall select a superintendent of the respective institution committed to its care who shall make recommendations to the Governor on matters relevant to her/his particular institution. Selection of superintendents shall be based on "previous training and fitness to care for the institution." Superintendents shall select employees pending approval by the Board and may dismiss employees "for cause" and report on such dismissals to the Board.

No spouse of the superintendent or board members or relative to the fourth degree shall be newly employed by the superintendent.

§80-2101; 2102

Special educational programs and facilities shall be available to those "for whom the regular public school facilities are not available or are not adequate to meet the specialized needs of these students. . . '[e]xceptional children' means mentally retarded, hard of hearing, deaf, speech impaired, visually handicapped, emotionally disturbed, crippled, specific learning disabled" in addition to other health impariments.

An "exceptional child" is determined by medical and psychological tests.

"Treatment institutions" are hospitals or centers for children confined to institutions for medical reasons for long periods of time.

"A special education class unit is the number of pupils in attendance . . . [for most of] a month in an approved . . . special education class in a public school."

§80-2103

ELIGIBILITY

Eligibility for special services is "limited to . . . students enrolled in public schools and/or approved treatment institutions in the state." Specific requirements shall be set by the Board of Education.

§80-2104

RULEMAKING

The Board may "initiate, inspect, approve, and supervise" educational programs for exceptional children. It shall be the "agency of cooperation", mediating between the state and federal government, treatment centers and local schools. It shall make "necessary rules and regulations . . . and . . . employ necessary personnel . . . contingent upon available funds" to carry out the special education provisions.

§80-2106

All school districts may apply to the State Board for funds to operate a special education program. Applications must be made on "prescribed forms . . . prior to the opening of school." Said application "will serve as a contract between the district and the Board."

If the number of approved applicants exceeds funds available, the Board will prorate funds among the districts.

". . . no part of payment from this Act . . . [shall be] used . . . for school buildings, premises, or plants."

§80-2107

In any district, five or more persons or agencies may petition its district Board of Education for a special class and "school authorities . . . [shall] request the Board to cooperate in the establishment of such a class." Two or more districts may join in making such a request, and one district shall be designated the controlling agent.

"In districts where there is not a sufficient number for the organization of a special class, exceptional children may be . . . [sent to] any other district on a plan acceptable to both districts and Board."

§80-2108

"Courses of study, teacher-pupil ratio, adequacy of methods of instruction, in-service training, qualifications of teachers, therapists, educational examiners, and technicians, and necessary equipment for special education programs must comply with the requirements established by the Board. School boards of the districts wherein a special class or classes are established are to employ all personnel according to the special qualifications and training prescribed by the Board."

§80-2109

"Local boards . . . and treatment institutions shall keep an accurate account . . . of all moneys expended for special education programs" as prescribed by and reported to the Board. They also shall keep records of average daily attendance including pupils instructed by home teachers."

§80-2111

ADMISSIONS

Admissions and discharges of students in special education programs shall be made based upon the recommendations of a private physician or Board approved medical expert.

§80-2112

The State Board may contract with a local or county board of education or other public institution for services for "exceptional children."

§80-2113

CONTRACTS

"Local school boards are . . . authorized to contract for services for exceptional children." Local boards may ask the County Board to perform said function as well.

§80-2115--2117

In accord with "The Handicapped Children's Act of 1973", school districts shall "provide . . . special education sufficient to meet the needs and maximize the capabilities of handicapped children."

The Department of Education shall see to it that "all regular and special education, corrective and supporting services required by handicapped children" is provided. "Full services" should be available by the school year 1979-80.

§80-2118

"To the maximum extent handicapped children shall be educated along with children who do not have

handicaps." Preferrably, handicapped students shall be part of "the regular school environment;" with "special aid and services."

§80-2119

Eligible students must be "enrolled in the public schools and/or approved treatment institutions.

The local . . . school board or governing board of an approved treatment institution shall be responsible for the initial determination of eligibility, but the final determination . . . shall rest with the Board."

§80-2121

FACILITIES

"Physical aspects and specifications for buildings, classrooms and other facilities for, or likely to be used by handicapped children, shall be approved by the Department of Education."

§80-2122

It is the responsibility of local school districts, "to the maximum extent practicable," to provide supplemental aids and services for handicapped students equal to the amount spent on non-handicapped students. However, the state board makes the final determination.

§80-2123

It is the Department of Education's responsibility to provide free public education for the handicapped, irrespective of the availability of existing public and private facilities. The school district shall be responsible for providing "the most appropriate services based on a careful evaluation of the child's needs." Objections by parents or guardians, or "the child's participation in beneficial services" shall have no bearing on the district's and state's responsibilities.

EVALUATION

§80-2124

A "handicapped child" is a person six to twenty-one years of age "who because of mental, physical, emotional or learning disabilities requires special education services." This includes persons who are "mentally retarded, hard of hearing, deaf, speech imparied, visually handicapped, emotionally disturbed,

crippled, specific learning disabled and/or other health impaired children who . . . require special education and related services."

Aid and services may be extended to five year olds participating in a kindergarten program and preschoolers whose handicaps "could become greatly compounded" if unattended.

§80-2125

"Special education means classroom, home, hospital or other instruction . . . to meet the needs of handicapped children transportation, and correcting and supporting services", aside from state operated schools or institutions.

§80-2126

A section for the education of exceptional children shall be established within the department of education if funds are made available. Its coordinator shall direct programs "relating to the handicapped."

§80-2127

The Department of Education shall cooperate with the Department of Social and Rehabilitative Services and other individuals and institutions" to provide diagnostic services to handicapped children."

§80-2128

The Board shall "initiate, inspect, approve, and supervise a program of education for exceptional children, provided funds are available for such a program."

§80-2129

An Advisory Council for the Education of the Handicapped, "shall advise and consult with the Director of the Department of Education and the Coordinator of the Section for the Education of Exceptional Children," review state plans for the education of exceptional children prior to their submission to the proper authorities and report annually to the Governor, General Assembly, State Board and Director of the Department of Education on education of the handicapped.

ADVISORY COUNCIL

The Department of Education shall allocate funds for the publishing of said report, which shall be made public.

§80-2130

"The Department of Education shall develop such plans and procedures . . . to receive and disburse federal funds for handicapped children."

§80-2131

School districts shall report annually to the Department of Education on its efforts to provide special education to handicapped children. Cooperation between the schools and institutions and treatment centers are the primary purpose of this provision.

§80-2132

"Two or more school districts may join together to establish a special class or classes for handicapped children.

[O]ne district shall be designated as the controlling agent."

§80-2133--2135

Districts shall test and examine children it believes are handicapped according to rules and regulations set by the department of education. Regulations shall include "providing for parental prior notification of testing and provision of special education services, right to request educational evaluation and special education services, and right to hearing and appeal of education decisions."

EXAMINATION

These requirements are not mandatory for private schools. Results of tests and examinations shall be confidential and only the parent, guardian and child age 18 and over and physicians or specialists with permission of the former may have access to the results.

§80-2136

The State Board shall "receive and disburse federal funds designated to improve educational opportunities provided for exceptional children," excluding those funds earmarked for "other agencies, institutions, or treatment facilities for exceptional

children."

Expenditures may cover "consultative services, workshop expenses, in-service programs, scholarship for teachers of the handicapped, and testing programs."

§80-2137

The Department of Education shall establish a Special Education Materials Center with available federal and state funds.

§80-2138

The State Board shall set rules and regulations and require reports pertaining to the implementation of programs for handicapped children.

§80-2140--2143

The Arkansas State Department of Education may participate in the El Dorado school district's pilot program of "early education, diagnosis, and treatment of children with hearing defects" in order to determine the feasibility of a similar statewide program. Children with a wide range of hearing defects shall be enrolled in the program, based on "otolaryngological, audiological and psychological examination." The program shall include "free play observation, age ranked toy play, various aptitude and intelligence tests, outpatient care,"and training sessions for parents of handicapped children.

"The facilities and services of other agencies dealing with education of handicapped children shall be utilized." After twelve months the Special Education Section of the State Department of Education shall make a progress report of the program and make recommendations regarding a statewide program.

§80-2201-2207; 2209

SCHOOL FOR THE BLIND

The Arkansas School for the Blind shall be supervised by a Board of Trustees. The trustees and superintendent shall report, independently, to the General Assembly biennially on their operations. Property acquired from the state by this institution shall be the property of the State.

§80-2208

The Board of Trustees of the School for the Blind shall elect a superintendent, physician, matron, teachers and steward and fix their salaries.

§80-2217

"The superintendent shall report to the trustees prior to each session of the General Assembly a detailed statement of the number of pupils admitted and discharged, their place of residence and supposed cause of blindness, the amount of money expended, and for what purpose, and the probable sum necessary to defray the current expenses of the institution."

§80-2301--2304

SCHOOL FOR THE DEAF

The Arkansas School for the Deaf, under the auspices of the Department of Education shall educate the deaf-mutes in the state.

A board of directors (trustees) may hold in trust land or money given the institution.

§80-2307

The Board of Directors and the principal of the School for the Deaf shall keep records of "the condition of the Institute, the amount of the receipts and expenditures, the number, name, and date of admission, age, cause of deafness, and length of time under instruction, of beneficiaries, and all other pupils . . . and the number and salaries of officers and employees." This report shall be made to the Governor on or before the convening of the General Assembly.

§80-2308 -- 2310

The trustees shall contract for "the rent or construction and repair of any building and appurtenances . . . used by [the School for the Deaf]," fuel, furnishings, and meat.

§80-2311

The Board of Trustees and the superintendent of the school for the deaf shall make a report to the Governor and present it to the General Assembly by January 16th of each year. The report shall deal with

"improvements made during the biennial period covered" and include suggestions and recommendations for the coming year.

§80-2314--2316

The Board of Directors and superintendent of the School for the Deaf shall elect employees and have the authority to discharge same. All teachers must have prior experience teaching the deaf.

§80-2401--2406

ATTENDANCE

"Mentally normal" blind or deaf students over eight years of age are required to attend the Arkansas School for the Blind and Deaf at least thirty-two weeks each year until completing a course prescribed by the Honorary Board of Managers or until discharged by the school superintendent. If no facilities exist for blind and deaf persons, the School for the Blind may send those under twenty-one to institutions outside of the state and finance their room, board, tuition, transportation and other relevant items.

Deaf or blind minors shall be exempt from attending state schools if they are instructed by a private tutor, attend another school, are physically incapacitated or for any other reason approved by the superintendent of said school. Parents or guardians who do not comply with the above shall be guilty of a misdemeanor and fined $10.00 to $50.00 for each offense. One week's absenteeism shall constitute an offense.

Anyone encouraging non-attendance or harboring a truant shall be guilty of a misdemeanor and fined $20.00 to $50.00 for each offense. The county superintendent, school attendance offices, prosecuting attorneys, special officers for the deaf and blind and peace officers shall enforce these attendance regulations.

§80-2407--2408

TUITION

Blind persons "of suitable character and capacity" between six and twenty-six years of age who are state residents are "entitled to the benefits of the institution free of charge." Out of state pupils may be admitted upon payment of an amount determined by the Board. Persons over twenty-six may be admitted "by

unanimous vote [of the Board] and approval of the superintendent. . . to learn a trade or receive instruction." Such persons may be expelled if their presence is deemed "injurious."

§80-2412; 2414

Deaf-mutes who are "between six and twenty-one years, of fair intellect and free from any contagious disease" and indigent orphans under six years who are deaf-mutes shall be admitted to said Institution.

Applicants must present a certificate proving state residency.

§80-2415; 2416; 2423 -- 2424

Where parents, guardians, friends, or students themselves cannot provide suitable clothing and traveling expenses to and from an institution, it shall be provided by the school with the authorization of the superintendent or principal. At most $40.00 per student per year shall be allotted. And no more than $2,000.00 total shall be charged to the county per year. If a student must be removed from an institution temporarily or permanently because of "ill-health, . . . vacation of the school," course completion or being disqualified from the program, the state shall reimburse the institution for costs of removal. Funeral expenses for a student shall be made in like manner.

§80-2425; 2426

A deaf-mute may attend state schools for thirteen years unless, at the trustees' discretion he/she is discharged sooner. The trustees may extend this term up to an additional three years and no more than twenty pupils shall be recommended for an extension in one year.

CROSS REFERENCES

I.State Board of Education; Statute §80-147

III.B.Teachers; Statute §80-2211

2. Programs for Exceptional Children

Statutes

§1046

The county board of education in any county required to provide for the education and training of handicapped persons may construct and maintain dormitories for use and occupancy by such persons.

§1261

CONTRACTS

The county superintendent may contract with any other like officer to provide for the education of educationally, physically and mentally handicapped pupils.

§1705

The county school service fund shall make amounts payable to special education schools and programs for the education of all handicapped pupils.

§1710; 1711

No education program for physically handicapped pupils shall be transferred to the county superintendent of schools unless it is in the best interest of the education and welfare of the pupils.

All pupils eligible to participate in such programs shall be provided the opportunity, a list being kept of all applicants who have been denied access.

§1850 -- 1855; 1870 -- 1885

These articles (Art. 12-14) concern themselves with the education and attendance of handicapped and mentally retarded pupils.

Programs dealing with such pupils shall be provided in one or more of the following ways:

"(a) In special schools or classes of elementary and secondary grade and in remedial classes of elementary and secondary grade. (b) By the employment of emergency teachers to provide special instruction in the regular schools of the districts of the county. (c) By the maintenance of special classes of secondary grade. (d) By the employment of home instructors to give individual instruction in the

home or at the bedside in institutions, and by the employment of instructors to provide remedial instruction for physically handicapped pupils in regular, special day, and special training schools or classes which he[she] may be authorized to conduct, and by the employment of instructors to provide individual instruction for pupils with speech disorders or defects who are at least three years of age for the purpose of remedying such speech disorders or defects. (e) By cooperation with the Department of Rehabilitation in the provision of individual instruction and coordination services. (f) By contract with the county superintendent of schools of another county or with the governing board of any school district. (g) In integrated programs of instruction of elementary or secondary grade. (h) By the employment of instructors to provide individual instruction . . . in schools or in the homes of pupils who are deaf or hard of hearing . . . ."

Mobile classrooms may be acquired and maintained for the purpose of educating physically handicapped pupils enrolled in integrated programs, remedial classes may be provided for pupils excused from regular classes for a portion of a class period.

A report shall be made annually by the county superintendent of schools as to the average daily attendance of such students, along with other pertinent information to be filed with the Superintendent of Public Instruction.

Attendance credits for handicapped students will be granted for emergency elementary classes, secondary grade classes, pupils taught by emergency teachers, and pupils residing in one county and being taught in another, as prescribed herein.

There shall also be maintained special training schools or classes for mentally retarded pupils, provided here are formulas for computing the average daily attendance

of such schools, as well as provisions for attendance regulations and rules, including transportation and lodging.

§11004

The governing board of any school district required or authorized to maintain special training schools or classes for exceptional children may contract with any college or university campus situated within the boundaries of the county within which the school district is located to provide for the education and transportation of such children in and to laboratory classes for exceptional children established and maintained within or without the boundaries of the school district.

LABRATORY CLASSES

§33590 -- 33596

There is in the state government the Advisory Commission on Special Education which "shall study and provide assistance and advice to the State Board of Education in new or continuing areas of research, program development, and evaluation in special education."

§ 46116

With respect to educationally handicapped pupils, the minimum schoolday shall be 180 minutes in kindergarten, 200 minutes in grades 1-3, and 240 minutes in grades 4-8.

SCHOOL DAY

§46502;46512

The attendance of all physically and educationally handicapped pupils given instruction by a school district shall be reported annually to the county superintendent of schools.

ATTENDANCE

§51051 -- 51052

The governing board of a district with more than 8,000 pupils in average daily attendance shall prescribe and enforce a course of study for mentally retarded pupils.

Each county board shall prescribe and enforce a county course of study for mentally retarded pupils to be used in special education programs conducted by the county superintendent and in school districts with an average daily attendance of 8,000 or less.

§51700 -- 51701

The board of any city school district, on the recommendation of the city superintendent, or the board of any elementary district, on the recommendation of the county superintendent, may establish separate classes for pupils who would profit more from a course other than the regular prescribed elementary course and may substitute for th regular course of study school work better adapted to the mental needs of the pupils.

Pupils enrolled in such classes shall be required to use the state series of textbooks only insofar as they are adapted to the work of the classes. All materials and textbooks required in the classes shall be furnished free.

§52200 -- 52208

A governing board or a county superintendent may provide programs for mentally gifted minors living in the district or county.

GIFTED STUDENTS

The minor shall have demonstrated such general intellectual capacity as to place him/her within the top 2 percent of students having achieved his/her grade throughout the state or who is otherwise identified as having such capacity but for reasons associated with cultural

disadvantages has underachieved scholastically. General intellectual ability shall be evidenced by achievement in schoolwork, test scores, and judgments of teachers and administrators who are familiar with the minor's demonstrated ability. The ability of a minor determined to be culturally disadvantaged shall be evidenced by criteria developed by the state board. In no event shall the ability of a culturally disadvantaged minor be evidenced solely by test scores.

A governing board may contract with another district for furnishing programs for such minors and may enter into agreements with a county superintendent for appropriate services.

A program for such minors shall consist of a special day class or special services for an amount of time each week averaging a minimum of one class period per day. A program may qualify for one semester of pupil participation if it consists of special services provided each pupil for 200 minutes per week for 17 weeks through two semesters or for 60 hours per semester during eight or more weeks of a given semester or for 120 minutes per day for 20 days during a summer session.

A governing board providing a program for mentally gifted minors may: conduct programs, seminars, and classes for such minors, within or without the district boundaries; employ personnel and provide equipment and supplies; transport pupils and personnel to and from places (within the state) where such activities are being conducted; and use district facilities for outdoor service and conservation education.

Attendance at these activities shall be included in computing attendance and average daily attendance.

The state superintendent, if he/she approves, shall apportion to each applicant school district or county superintendent an amount per pupil participating in a

mentally gifted minor program.

Each applicant school district or county superintendent shall report to the state superintendent as a part of the annual financial report the total income, including the amount apportioned for special programs for mentally gifted pupils during the year, the total number of such pupils in special programs, and the amount per special program or service expended for them. If the amount of state funds allocated is in excess of expenditures, such excess shall be withheld pursuant to §41341.

RULEMAKING

The state board shall adopt rules which prescribe procedures for identifying mentally gifted minors, establish minimum standards for programs, and establish separate criteria by which a district may identify culturally disadvantaged pupils as mentally gifted minors.

IDENTIFICATION

The state superintendent shall adopt rules which define "apportionment" and prescribe the manner of application for special apportionment.

The Director of Education shall employ such persons as are necessary for administration of services for mentally gifted minors.

§56000--56005

To compile sufficient information regarding handicapped children to assure their proper education, by April 30 of each year, each governing board shall report to the county superintendent: (a) each handicapped child participating in a special class or program for handicapped children and (b) each handicapped child not participating in a special class whose parent or guardian applied to the district for enrollment of the child in a special class or program. ("Applied" includes an interview by school personnel of the parent or guardian of the child.)

The first report required may be limited to the particular

programs in which pupils are participating and the numbers participating in each. The second report shall state if the child was denied enrollment and contains all of the following information for each child; name, address, date of birth, names of parents or guardians, the child's handicaps, and special class or programs, if any, in which the child is enrolled, with a statement of any suspensions of 10 days or more or expulsions.

Handicapped children include the physically handicapped, the mentally retarded, the severely mentally retarded, the educationally handicapped, and the multihandicapped.

The governing board shall adopt regulations to require officers and employees of the district to gather the required information.

RULEMAKING

§56003; -- 56005

By June 30 of each year, each county superintendent shall report for that fiscal year to the state superintendent all of the handicapped children in the area under his/her jurisdiction who are participating in a special class or program provided by the county superintendent and all who are not participating but for whom application has been made. The report shall contain all information required of reports under §56002 and shall also specify the district which submitted the information.

The state superintendent shall adopt regulations specifying the form of reports required of districts and county superintendents.

§56020

To encourage districts and county superintendents to design, implement, and evaluate innovative and exemplary education for exceptional pupils, the state superintendent is granted broad administrative discretion to approve exemplary programs at variance from provisions of the education code.

Such variance may include full apportionment for approved experimental programs which vary from maximum class size or duration and other requirements which derive apportionment

from average daily attendance.

EXPERIMENTAL PROGRAMS

Enrollment in experimental programs for exceptional children shall be limited to combinations of children enrolled in programs for exceptional children at the time of application for approval to operate the experimental program. No more than 5 percent of the statewide enrollment in programs for exceptional children may be enrolled in experimental programs in a given fiscal year.

RULEMAKING

The state board shall adopt regulations relating to application for, operation of, and evaluation of, such exemplary experimental programs.

§56030 -- 56035

With the approval of the county superintendent, any district having a physically handicapped, mentally retarded, severely mentally retarded or multiply handicapped pupil, for whom appropriate special education facilities and services are prescribed for the several sorts of handicap are not available or cannot be reasonably provided and for whom the state has no appropriate facilities, shall, and any district having an educationally handicapped pupil, for whom likewise appropriate facilities cannot be provided, may, in lieu of establishing the needed facilities at unreasonable cost to the district, pay an amount to the parent or guardian of such pupil toward the tuition (including transportation costs) of such pupil, enrolled in a public or private nonsectarian school or institution within or outside the state offering the needed facilities.

Such payments shall also be applicable where the special educational facilities are available but are an unreasonable distance from the pupil's home. The state superintendent shall adopt regulations regarding the determination of unreasonableness of cost and distance. The county superintendent shall make a finding as to the unreasonableness of such cost and distance and report it to the state superintendent who, if he/she approves the finding, shall authorize payments.

Such payments shall also be applicable where the special education facilities are available but the attending physician (or attending optometrist in cases of visual disorder) has recommended that it is in the best interests of the pupil

that the pupil be enrolled in a private nonsectarian school or institution offering the needed special education facilities and the recommendation has been approved by the county health officer and the county superintendent on forms specified by the state superintendent.

Priority in providing special education facilities shall be given to public schools on state-operated programs. State and school district support for an exceptional child's education at a private nonsectarian school or institution shall be approved only if no publicly operated programs are available providing the required facilities and services. Priority in approving private nonsectarian schools or institutions shall be given to the nearest such school or institution to the child's home which provides appropriate facilities and services.

TUITION

Where public funds are paid toward the tuition of a pupil at a private school or institution, the school or institution shall at the end of each school year submit a written progress report for each pupil on forms provided by the state superintendent
and forward them to the county superintendent authorizing placement. The reports shall be used to determine continued placement and reimbursement.

In no event shall the total of any allowances made to a district on behalf of a pupil under this provision exceed the total of such amounts which would have been allowed to the district if the pupil were in attendance at a school in the district.

Whenever an admissions committee is established to determine eligibility for these tuition payments, the parent or guardian shall have the rights of representation prescribed by statute.

The parent or guardian of a pupil who has been denied admission and who qualifies for a tuition payment shall make written application to the district for the payment. Within 30 days, the district shall grant or deny the application, with reasons stated in case of denial. The parent or guardian may

appeal a denial to the county superintendent who shall affirm or reverse the district's decision. If the county superintendent reverses the decision, a report and claim shall be made by the district in which the pupil resides. Thereupon the county superintendent may place and contract for the placing of the exceptional child in another district or county offering special educational services. The superintendent may then transfer to that district or county the amount of state aid the placing district receives for that pupil. If the county superintendent affirms the district's decision, the parent or guardian may further appeal to the Department of Education which shall affirm or reverse the county superintendent's decision and, in case of affirmation, append a statement of reasons. If the department affirms the county superintendent's decision, that decision shall be final. If the department reverses the decision not to grant the application, a report and claim shall be made by the district in which the pupil resides.

A school district having any pupil receiving benefits of special education facilities and services under §56031 shall pay to the parent or guardian of the pupil a monthly amount toward the tuition cost of such attendance. The monthly payments shall be based on estimated amounts computed pursuant to §56031 or the monthly tuition charge, whichever is less. The district shall report the attendance of such pupil and submit a claim for the regular and special purpose apportionment, to be used as reimbursement to the district for payment to the parent or guardian, through the county superintendent to the state superintendent. The report and claim shall be submitted at the time and in the manner prescribed by the state superintendent. The county superintendent shall verify the attendance reported and claim submitted in a manner prescribed by the state superintendent.

Upon verification of the report and claim, the state superintendent shall apportion to the district an amount sufficient to satisfy the claim but not in excess of the allowances specified above.

§56036 -- 56038

No claim shall be satisfied by the state superintendent for the education of an exceptional child unless the school or institution which the child will attend meets minimum educational standards which the state board will establish. Such minimum standards shall relate solely to the educational program to be offered.

A claim concerning the attendance of an exceptional child at any school or institution in which there are insufficient numbers of properly credentialed teachers but which otherwise offers an acceptable educational program shall not be disallowed if the Department of Education determines that in the area there is a shortage of properly credentialed teachers and that the needs of the exceptional children will be more adequately served through an education at the school or institution than they would at existing educational environments.

When there is in the area a sufficient number of properly credentialed and employable teachers, the Department shall require that properly credentialed teachers be employed at the school or institution.

This exemption shall apply only to a school or institution situated in this state.

§56070; 56072 -- 56075

The state board may adopt regulations governing the establishment and conduct of programs for preparing physically handicapped and mentally retarded pupils enrolled in special day classes who are unable to profit from courses of work experience education for suitable occupations.

School districts and county superintendents may contract with sheltered workshops and other work establishments approved for supervised occupational training of physically handicapped and mentally retarded pupils under the age of 21 years and reimburse them for the expenses of training such pupils.

The state superintendent shall reimburse districts and superintendents for the cost per pupil per year for services provided by sheltered workshops and work establishments. The reimbursement shall be the cost of such service not to exceed

$650 per year, less the share of the district or superintendent, as determined pursuant to state board regulations.

Any governing board or county superintendent maintaining secondary schools may enter into contracts with other governing boards or with a county superintendent and with any state agency to obtain or provide services and other assistance related to providing effective rehabilitative services, such as occupational training, mobility training, sheltered workshops, and work-experience programs.

A governing board or county superintendent which accordingly enters into a contract with the Department of Rehabilitation may employ employees of the Department or others not employed by the Department but certified by the Department as fully qualified. A certification to the Department of Education by the Department of Rehabilitation that the individual fulfills all qualifications of that department for the position for which he/she is being considered shall serve as evidence that the individual meets requirements for a services credential with a specialization in pupil personnel services as a rehabilitation counselor or mobility instructor for the blind, in accord with requirements adopted by the Commission for Teacher Preparation and Licensing. Other teacher certification requirements required by this code or by Title V of the California Administrative Code shall be waived for such an individual.

County superintendents and high school and unified school districts which do not have a sheltered workshop available within a reasonable distance may sponsor sheltered workshops or training centers for handicapped students, develop job training situations based on individual capabilities by entering into contracts to produce goods or provide services for public and private agencies or business, and pay students on a piece-rate basis from revenues derived from any source not otherwise prohibited by law, or regulated by state and federal wage and hour laws applicable to persons employed in a sheltered workshop.

A governing board of a high or unified school district, the administration of a regional occupational center program, or a county superintendent may establish and operate a sheltered workshop or rehabilitation service. Before commencing the workshop or service, the educational agency shall publish its intention to operate the workshop or service in a newspaper of general circulation in the area. A copy of the publication, along with pertinent details of the workshop or service, shall be sent to the Department of Education and the State Department of Rehabilitation. These departments may comment on the advisability of commencing the workshop or service, and any other aspect of the workshop or service, to the educational agency and make these comments public.

§56130

No pupil may be required to participate in any special class or program unless the parent or guardian is first apprised of the facts which make participation in the special class or program necessary or desirable.

§56140 -- 56143

When a handicapped minor (including, for these purposes, a mentally disordered minor or any minor eligible for enrollment in a development center or in an educational program for handicapped minors) from a state hospital between the ages of 3 and 18 is deemed to need an educational training program, the appropriate regional center (established under Chapter 3 of Division 25 of the Health and Safety Code) or local mental health program shall send a notice to the county superintendent of residence of such minor and to the county superintendent of placement where such minor is proposed to be transferred from the state hospital. After such notification, the county superintendent of placement shall certify to the state superintendent and to the Director of Health whether or not appropriate public or private educational facilities and programs exist or are planned in the county for the minors proposed to be transferred. If not, the county superintendent shall report to the county mental health advisory board, the county mental health program or the regional center and the developmental disabilities area board, whichever is appropriate. This data shall be used in

the development of the annual county mental health plan, or the annual developmental disabilities area plan, or both.

§56144; 56145

The state superintendent shall report annually to the state board and to the Commission on Special Education in the Department of Education the number of handicapped minors transferred from a state hospital to a regional center or a local agency, who are not currently enrolled in a public or private educational program.

In the event that state appointments authorized for pupils transferred to local jurisdictions requiring development center services for handicapped minors are insufficient to provide programs for all such eligible minors, the state superintendent shall prepare a supplemental budget request to provide sufficient funds. The state superintendent shall furnish a copy of the budget to the appropriate developmental disabilities area board or local mental health program.

§56160

BLIND/DEAF PUPILS

Pupils who are deaf, severely hard of hearing, blind, deaf-blind, or other multihandicapped pupils as determined by the state board and who are between the ages of 18 months and 3 years may be enrolled in experimental programs conducted by a school district or county superintendent. Such programs shall be approved by the state superintendent and conducted in accord with regulations established by the state superintendent. Instruction shall be afforded by a teacher possessing full qualifications to teach such children as prescribed by the Commission for Teacher Preparation and Licensing.

§56161.5

PROGRAMS FOR THE DEAF

A governing board or county superintendent, with the approval of the county board of education and the state superintendent, may establish and maintain an experimental program for deaf or severely hard-of-hearing children who are at least six months of age. Not more than two such experimental programs shall be established. Program approval shall be given to a district or superintendent presently operating such a program or prepaid to undertake such a program.

Such programs shall be permitted to operate differently from regular class programs. The state superintendent may waive provisions of the education code to provide necessary flexibility for such programs.

The Legislature intends that, in connection with such programs, proper recognition be given to the needs of parents, through parents' home training and counseling, the audiological needs of the child, and the purchase of necessary supplies and equipment.

The state superintendent shall prepare for the legislature an interim evaluation report of the programs' results no later than July 1, 1977, and a final evaluation no later than June 30, 1978. Authorization to conduct such experimental programs shall expire on July 30, 1978.

§56500--56501; 56514

MENTALLY RETARDED

The education of mentally retarded pupils of compulsory school age who may be expected to benefit from special educational facilities shall be provided all eligible pupils under §56500 to §56534, §1880 to §1889 and §1856. Such special education may be provided to mentally retarded pupils who are between 5 years and 9 months and 6 years of age and those above compulsory school age and less than 21 years of age.

The annual report shall be made by each district or county superintendent to the Department of Education indicating the number of eligible pupils for whom no special education is provided and the reasons.

No pupil shall be required to participate in a program for mentally retarded pupils unless the local admission committee has consulted with the parent or guardian of the pupil regarding the pupil's intellectual development.

Admission of a pupil to a special program for the mentally retarded under §56500 to §56534 and §1880 to §1887 shall be made only on the basis of an individual evaluation according to state board standards on the recommendation of a local admission committee, including an administrator in charge of special education programs in the district or county, an experienced special education teacher,

a school nurse, and a school psychologist who has examined the child.

Whenever possible, persons on the admission committee for mentally retarded pupils may also serve on the admission committee for educationally handicapped minors.

The committee shall use available medical reports and the services of other pupil personnel workers, educational specialists, school nurses, social workers, or physicians as needed. The recommendation shall include a statement that in the professional judgment of the admission committee's members the pupil recommended for placement in any program can reasonably be expected to benefit from such placement. Any member dissenting from the recommendation shall attach to the final recommendation a statement of reasons for such objection.

PLACEMENT

A district or county superintendent may make an interim placement of a pupil in a program for the mentally retarded for a period not to exceed 30 schooldays whenever a pupil transfers into a district from another in which the pupil was enrolled in a program for the mentally retarded. Such a placement may be made without a complete evaluation. However, before the end of the 30-day period, the admission committee shall examine the interim placement and make a final recommendation.

EVALUATION

Whenever a pupil is being so evaluated, the pupil's parent or guardian shall have the right to be present at all meetings of the admission committee and to 48-hour prior notice of such meetings and may have an appropriate professional represent the pupil and present material to help the committee in its determination. Such a representative shall have no decisionmaking power in any determination made by the committee.

§56504

The Legislature finds and declares that the state has a primary interest in providing equal educational opportunity to children of all ethnic, socioeconomic, and cultural groups and that pupils should not be assigned to special

classes if they can be served in regular classes and that there should not be disproportionate enrollment of any socioeconomic, minority, or ethnic group pupils in classes for the mentally retarded.

§56505--56506

TESTING

Before a pupil is admitted to a special education program under this chapter or under §1880 et seq., the pupil shall be given verbal or nonverbal individual intelligence tests in the primary home language. Tests shall be selected from a state board-approved list.

No pupil shall be placed in a special education class for the mentally retarded if the pupil scores higher than two standard deviations below the norm, considering the standard error of measurement, on an individual test or if, when tested in a language other than English, the pupil socres higher than two standard deviations below the norm on the nonverbal intelligence test.

PSYCHOLOGICAL EXAMINATION

No pupil may be placed in a special education program for the mentally retarded unless a complete psychological examination by a credentialed school psychologist investigating such factors as developmental history, cultural background, and school achievement substantiates the retarded intellectual development indicated by test scores. This examination shall include estimates of adaptive behavior. Until adaptive behavior scales are normal and approved by the state board, such adaptability testing shall include a visit, with the consent of the parent or guardian, to the pupil's home and interview with members of the pupil's family in the home language.

In the case of a pupil where primary home language is other than English, the psychological evaluation shall be conducted in the pupil's primary home language by a credentialed school psychologist fluent in the pupil's language. If such a psychologist is not available, an interpreter qualified in the pupil's home language shall aid in the evaluation. The district shall provide the interpreter with in-service training under the school psycho-

logist's direction, in the application of evaluation techniques.

Prior written permission for the psychological evaluation shall be received from the parent or guardian. After the evaluation, the psychologist shall confer with the parent or guardian regarding the recommendation to the admission committee. Following the admission committee meeting, a committee member shall meet with the parent or guardian to obtain written permission for placement.

All permission documents shall be written in English and in the language of the parent or guardian. Conferences and informative notices to the parent or guardian shall be in the language of the parent or guardian.

§56507

If a parent or guardian objects to the withdrawal of a child from a special education class under §§56501 or 56515, he/she may request a hearing to be held not less than 20 nor more than 30 days after the request. HEARING

For purposes of §56501, the hearing panel shall consist of a credentialed school psychologist, a teacher currently instructing a special education class at the same grade level in which the pupil is enrolled, but who is not an employee of the district involved, and a special education administrator, each designated by the county superintendent. If it is not practicable to secure services of persons so qualified, the county superintendent may designate persons lacking these qualifications but deemed otherwise qualified. For purposes of §56515, the panel shall consist of a credentialed school psychologist designated by the county superintendent, the medical director or designee of the nearest regional center for the mentally retarded, and a teacher, designed by the county superintendent, currently instructing a special education class at the same grade level in which the pupil is enrolled, but who is not an employee of the school district involved.

The panel, by majority vote, may uphold or reverse the action to withdraw the pupil from the program. The panel's decision is binding on the district. Upon a decision by the panel to reverse a district decision, the pupil shall be readmitted to a special education class notwithstanding §56506, except that in no case shall a pupil scoring higher than one standard deviation below the norm be readmitted to such a class.

§56508--56509

In exceptional circumstances, the admission committee may by unanimous vote agree to place a pupil in a special education class for the mentally retarded in spite of a test score higher than two standard deviations below the norm. The committee shall be guided by the legislative intent expressed in §56504. A written report indicating such a decision and reasons for it shall be sent to the parent or guardian.

Each district shall report annually to the Department of Education: the ethnic breakdown of children placed in special education classes for the mentally retarded and the ethnic breakdown of children newly placed in such classes (1) by the standard admissions procedure and (2) by the exceptional unanimous consent procedure described above.

If the percentage of children from any minority ethnic group in such classes varies by 15 percent or more from the percentage of such children in the district as a whole, an explanation for the variation shall be attached to the report.

The state superintendent shall annually report to the state board on those districts in which there is a significant variation in social and ethnic composition between special education classes under §56500 to §56534 and the regular enrollment of the district.

Mentally retarded pupils who come under §56501 may be enrolled in integrated programs of instruction conducted by a district or a county superintendent. In an integrated program, mentally retarded pupils who are enrolled in a special day class are integrated into regular classes modified to the extent that the mentally retarded pupils can benefit from the integration.

The district or superintendent conducting the integrated program shall be entitled to an apportionment equal to the amount which would have been credited had these pupils been enrolled fulltime in a special day class.

Whenever the number of mentally retarded pupils is less than 6 in each of one or more schools of a district or schools served by a county superintendent and the distance between schools prohibits reasonable transportation of pupils, such pupils may be instructed in regular classes, with the state superintendent's prior approval, provided an instructional aide is employed in such regular class and that supervision of the instructional program for mentally retarded pupils is provided by a person holding credentials to teach the mentally retarded.

Special day classes established for mentally retarded pupils at the elementary and secondary levels shall be maintained for at least the minimum schoolday and taught by a fulltime teacher.

The maximum enrollment in special day classes shall be 18 pupils except that when the chronological age span is more than four years the maximum enrollment shall be 15 pupils. The state superintendent may waive the maximum class size whenever a project is approved to conduct experimental studies to determine proper class size standards.

If after the beginning of the school year it is determined that classes are at maximum size, that additional pupils will be without schooling unless additional classes are established, and that additional qualified teachers are, or classroom space is, not available, a district or county superintendent may, on forms provided by the Department of

Education, request permission of the state superinterdent to exceed the maximum class size. The superintendent may approve the request, provided the maximum is not exceeded by more than two pupils and the requesting district has consulted with the teacher involved. Such approval, when based on a lack of additional classroom space, shall not be given for any school year after 1977.

Continuance of pupils in special education progams for the mentally retarded shall be the subject of annual review by the local admission committee to determine whether continued placement in the program is appropriate.

REVIEW

§56515--56518

The education of mentally retarded pupils who do not come within the provisions of §56501, who are 6 or more, and less than 18 years of age, and who may benefit from special educational facilities, shall be provided for as set forth in §§56500 to 56543, 1880 to 1889, and 1856. The education of such pupils who are three or more and less than six years of age may be provided for in the same manner.

Any such pupil who becomes 18 years of age while in attendance upon a special class shall be permitted to continue to attend for the rest of the current year.

However, any such pupil who is participating regularly in an approved occupational training program under §56070 and §56072 may be permitted to continue until his/her 21st birthday.

Mentally retarded pupils identified pursuant to §56515 shall participate in special day classes maintained for at least the minimum schoolday and taught by a full-time teacher.

Maximum enrollment in such classes shall be 12. Circumstances allowing, and procedures for, waiving this maximum are the same as those described in §56512.

An annual report shall be made by each district or county superintendent to the Department of Education indicating the number of eligible pupils under §56515 for whom no such education is provided and the reasons therefor.

§56519; 56529; 56530

The governing board of any elementary or unified district with an average daily attendance of 900 or more in the elementary schools or of any high school district which has an average daily attendance of 900 or more shall provide for the education in special training schools or classes of mentally retarded pupils who come within the provisions of §56501 and who are not in attendance in other special classes under §§56500 to 56534.

The governing board of any elementary or unified school district which has an average daily attendance of 8,000 or more in the elementary schools, and any unified or high school district which has an average daily attendance of 8,000 or more in the high schools shall provide for the education in special training schools or classes of mentally retarded pupils who come within the provisions of §56515 and who are not in attendance upon other special classes under §§56500 to 56534. Governing boards of districts with an average daily attendance in elementary or in secondary schools of less than 8,000 may, with the county superintendent's approval, do the same.

Governing boards required to provide for the education of mentally retarded minors under §56515 may, with the state superintendent's approval, enter into an agreement with a county superintendent for the latter to provide the educational services or enter into agreements with each other. Parties to such agreements are reported through the county superintendent to the state superintendent. Agreements shall include provision for transportation.

§56520

The state superintendent shall adopt regulations prescribing conditions under which the education of mentally retarded pupils under §§56501 and 56515 shall be the responsibility of either a district's elementary schools or its high schools and for determining when such pupils shall be designated as of elementary or secondary grade for attendance and state apportionment purposes.

§56521

A county superintendent of a county with more than 25,000 pupils in average daily attendance, and in which at least 50% of the mentally retarded pupils are enrolled in classes conducted by the county superintendent, shall employ at least one full time certificated person to coordinate activities related to the course of study for mentally retarded pupils in classes conducted by the county superintendent and by school districts in which the county course of study is required to be used. This employee shall hold at least a regular teaching credential with authorization to teach the mentally retarded.

A county board of a county with 25,000 or less pupils in average daily attendance or the governing board of a district with more than 8,000 pupils in average daily attendance may cooperate with a county superintendent of 25,000 or more in average daily attendance in the development of a course of study for mentally retarded pupils educated by them.

The governing board of a unified or high school district with an average daily attendance of 900 or more shall provide a four-year secondary school program for mentally retarded pupils who come under §56501 and for whom the district is required to provide an education under §56519.

The governing board of a high school district with an average daily attendance of less than 900 may establish special training schools or classes for such mentally retarded pupils or may be admitted by the governing board.

The Department of Education shall establish and enforce minimum standards for all such special schools and classes. The Director of Education shall employ such persons as are necessary to carry out §§56500 to 56543, 1880 to 1889, and 1856.

Before being placed in a school or class for the mentally retarded, a child shall be given a careful individual examination by a psychologist credentialed for that

purpose by the state board or Commission for Teacher Preparation and Licensing, or by a person serving under such a psychologist and holding a credential for that purpose, and a consultation with the parent or guardian shall be held. A psychiatrist may be consulted when the governing board deems it necessary.

EXEMPTION

No examination called for in §§56500 to 56543 shall be given if the parent or guardian objects on religious grounds.

§56533

COUNSELING

Individual counseling in social and vocational matters shall be provided as part of the instructional program for the mentally retarded. With Department of Education approval, a governing board separately, or in cooperation with one or more other boards or with the Department's Bureau of Vocational Rehabilitation, may employ a special coordinator to study employment opportunities and help coordinate the education of mentally retarded pupils with industrial pursuits of the community.

§56534; 56536--56541

The state superintendent shall prescribe procedures for qualifying for and shall determine the amount of allowances for classes and authorized instruction outside classes for the mentally retarded.

During the next two fiscal years, the State Controller shall deduct from apportionments made to each school district from the State School Fund an amount equal to that apportioned to the district under §§56536 to 56541 and pay it into the State General Fund.

§56542

Every mentally retarded, physically handicapped, or multihandicapped pupil is entitled to training or an education free of charge in the public schools.

Educationally handicapped pupils are pupils under the age of 21 years who, by reason of marked learning or behavior disorders or both cannot benefit from the regular educational program and who, as a result, require special educational programs. Such disorders shall be associated with a neurological handicap or emotional disturbance and shall not be attributable to mental retardation.

AUTISTIC CHILDREN

The education of pupils diagnosed as autistic shall be provided eligible pupils as set forth in this chapter.

The governing board of any elementary or unified district or of any high school district with an average daily attendance of 8,000 or more in the elementary schools or in the high schools shall provide for the education, in special classes or programs, of autistic pupils residing in the district and not attending other special classes or programs.

The county superintendent shall provide such education for autistic pupils who reside in the county and in elementary or unified districts or in high school districts with average daily attendance of less than 8,001. Such special classes and programs shall be established at centrally located places. The county superintendent shall provide transportation.

The state board shall adopt regulations prescribing standards for special education programs for autistic pupils. Such regulations shall ensure that no county has more than four autistic pupils enrolled in special classes or programs for autistic pupils per 10,000 average daily attendance. The state superintendent may waive this requirement if necessary.

A governing board or county superintendent with the approval of the county board of education, maintaining schools in juvenile homes, halls, ranches, or camps, may provide for one or more of the special educational programs

for educationally handicapped pupils authorized below.

A county superintendent and the governing board of a district with average daily attendance of less than 901 in the elementary schools or in the high schools may enter into an agreement to provide one or more of the special programs below for educationally handicapped pupils.

A county superintendent and the governing board of a district with average daily attendance of 901 or more in the elementary schools or in the high schools may enter into an agreement to provide only programs (a), (c), or (d) below or a combination of them. Whenever program (a) or (d) is provided by a county superintendent for a district with 901 or more average daily attendance, the foundation program under §41704 (for elementary districts) or under §41712 (for high school districts) shall apply to educationally handicapped pupils.

Governing boards may enter into agreements with one another for the education of educationally handicapped pupils. The district of residence having pupils receiving special education shall pay current expenses entailed in such education which exceed state apportionments made to the county superintendent or school district providing the program.

EDUCATIONALLY HANDICAPPED

Special educational programs for educationally handicapped pupils are:

(a) Special day classes (elementary and secondary) for pupils unable to function in a regular class. Such classes shall be maintained for not less than the minimum school day and fundamental school subjects shall be emphasized.

(b) Learning disability groups (elementary and secondary). The pupil remains in the regular class, but is scheduled for individual or small group instruction given by a special teacher. Whenever one to four educationally handicapped pupils are instructed in such a group, the total attendance credited shall equal one unit of attendance for each 60 minutes of instruction.

(c) Special consultation to teachers, counselors, and supervisors (elementary and secondary) related to the learning disabilities of individual pupils and special education services they require.

(d) Home and hospital instruction (elementary and secondary).

(e) Regular class instruction. When the number of educationally handicapped pupils is less than 6 in each of one or more schools in a district or served by a county superintendent and the distance between schools prohibits transportation, such pupils may be instructed in regular classes with the state superintendent's prior approval, providing an instructional aide is employed in each regular class and that supervision of the instruction program of the pupil is by a credentialed person with expertise and experience in teaching the educationally handicapped.

For special day classes for the educationally handicapped, the maximum enrollment shall be 12 pupils per class. The state superintendent may approve a request to exceed the maximum, if additional classes cannot be established because additional qualified teachers are not available, provided the maximum size is not exceeded by more than 2 pupils.

For classes for autistic pupils, maximum class size shall be six pupils. The maximum may be exceeded upon the determination by the state superintendent that to do so is in the best interests of the pupils.

CLASS SIZE

For learning disability groups, maximum enrollment shall be 32; however, participation in any one group shall be for at least 30 minutes and shall not exceed eight pupils at any one time.

Instruction provided by a full-time teacher or equivalent shall result in not more than eight units of average daily attendance being credited.

A governing board may provide for instruction of educationally handicapped pupils who reside in all non-profit, tax-exempt licensed children's institutions within the district. Such instruction may be in the public

schools or in the institution.

The governing board may contract with the county superintendent to provide such instruction.

§56605 -- 56618

A school district maintaining special educational programs for educationally handicapped pupils shall not enroll at any given time more than 2 percent of total district enrollment in such programs except as permitted by the state superintendent.

The superintendent shall report to each regular session of the Legislature the school districts and county superintendents permitted to exceed the 2 percent during the preceding school year, the number of additional pupils involved, and the reasons for granting the permission requested.

A county superintendent maintaining schools in juvenile halls, homes, ranches, or camps shall not enroll at any given time more than 2 percent of the juvenile population in programs for educationally handicapped pupils except as permitted by the state superintendent.

The 2 percent limitation does not include pupils participating in programs under §56604.

In any fiscal year, extension of an existing program for educationally handicapped pupils which exceeds 120 percent of the enrollment at the end of the sixth school month of the prior year shall receive the prior approval of the state superintendent before any allowance is made. Approval shall be based on, but not limited to: actual demand for the program; district experience in the operation of such programs; and demonstrated ability of the district to return educationaly handicapped pupils, who can participate effectively, to the regular school program.

Before initiating any program for educationally handicapped pupils, a governing board or county superintendent shall apply to the state superintendent to do so and furnish information requested by the superintendent.

Admission of minors to programs for the educationally handicapped shall be made only on the basis of an individual evaluation and on recommendation of an admission committee including an administrator of special education programs in the district or county, an experienced special education teacher, a school nurse, and a school psychologist who has examined the child. The committee shall avail itself of health reports on the child and of services of pupil personnel workers.

The recommendation shall include a statement that, in the professional judgment of the committee members, the minor is recommended for special placement to ameliorate a marked learning disability and/or behavior disorder. A dissenting committee member shall attach to the final recommendation a statement of reasons for such dissent and alternative recommendations.

A district administrative head or county superintendent may make an interim placement of a pupil in a program for the educationally handicapped for not to exceed 90 days whenever a pupil transfers into the district from another in which the pupil was enrolled in such a program. Before the expiration of the 90-day period, the admission committee shall undertake a full evaluation and make a final recommendation on the pupil's placement.

EVALUATION

PLACEMENT

The committee shall annually review pupil placements in special educational programs and recommend return of pupils to regular programs, continance in special programs, transfer to other special programs, and so on.

Whenever a pupil is being evaluated for placement in a program for the educationally handicapped or a pupil's placement is being reviewed, the parent or guardian shall have the right to be present at all meetings of the admission committee concerning that pupil, the right to a 48-hour prior written notice of such meetings, and the right to have a professional representative to present material to assist the committee in its determination. Such a representative shall have no decisionmaking power in the committee's determination.

NOTICE

RULEMAKING

The state board shall adopt regulations prescribing standards for individual identification and evaluation of educationally handicapped pupils and their admission to special programs. In reaching such standards, the state board shall receive assistance from an advisory committee consisting at least of one member from the Department of Education and one member from the State Department of Health.

The state board shall prescribe standards for programs for educationally handicapped pupils, including, but not limited to, pupil evaluation and curriculum content.

The Commission for Teacher Preparation and Licensing shall adopt standards for teacher qualifications for each type of program authorized for educationally handicapped pupils.

The Director of Education shall employ persons necessary for the administration of services for educationally handicapped pupils.

The state superintendent shall prescribe the form and manner of notification of intention to initiate a program and prescribe procedures for qualifying for allowances for special day classes and other authorized instruction for the educationally handicapped.

TESTING

The testing of all pupils in a grade, school, or district shall not be a condition for apportionment under §41880 et seq. If a governing board elects to do such testing, only such tests so approved by the state board shall be used. Districts intending to do such testing shall give written notice to parents or guardians of pupils concerned at least 15 days prior to such testing and make available to parents or guardians copies of written testing instruments. No pupil shall be required to participate unless the parent or guardian files prior written consent.

§56630--56632

With the state superintendent's approval, a school district with an educationally handicapped pupil for whom special education services cannot reasonably be provided and for whom the state offers no appropriate services may

pay to the parent or guardian a sum toward the tuition (including transportation) of the pupil at a public or private nonsectarian school offering the appropriate services. The amount shall not exceed the sum per unit of average daily attendance of the regular state apportionment to the district, the maximum amount allowable per unit of average daily attendance for excess current expenses under §41863 and §41882, and the amount per unit of average daily attendance from revenue derived from district taxation.

A district with a pupil receiving such benefits shall report the pupil's attendance and submit a claim through the county superintendent to the state superintendent, in a manner prescribed by the state superintendent. The county superintendent shall verify the attendance reported and the claim submitted. On verification, the superintendent, shall apportion to the district an amount sufficient to satisfy the claim.

§56700--56729

A governing board may make special provisions for the education of physically handicapped pupils. Any pupil who, by reason of a physical impairment, cannot receive the full benefit of ordinary education facilities, shall be considered physically handicapped. Such pupils include: the deaf or hard of hearing; the blind or partially seeing; orthopedic or health impaired; the aphasic; the speech handicapped; other pupils with physical illnesses or conditions which make attendance in regular day classes impossible or inadvisable; pupils with physical impairments so severe as to require instruction in remedial physical education; and the multihandicapped.

Programs for physically handicapped pupils are:

(a) Special day classes (elementary and secondary) for groups of pupils with a similar handicapping condition. The class shall be maintained for at least the minimum schoolday and taught by a full-time teacher whose responsibility is to teach pupils enrolled in the class at the grade level of pupils in the class who are at the highest grade level in the class.

(b) Regular day class program of assistance to physically handicapped pupils enrolled in regular day classes who require special services and equipment beyond the services provided to pupils not handicapped to benefit fully from regular classroom instruction. Such services may include supplemental teaching, transportation, teaching aides and specialized equipment.

(c) An integrated instructional program in which physically handicapped pupils receive their education from regular teachers in regular classrooms, but receive, in addition, supplementary teaching services of a full-time special teacher credentialed to teach physically handicapped pupils of the type enrolled in the program. The special teacher shall serve within the district being served for the full schoolday established for regular pupils.

(d) Remedial instruction class, providing remedial instruction or physical education to physically handicapped pupils who are excused in small numbers, for not to exceed one class period, from their regular or special program.

(e) Individual instruction to physically handicapped pupils in hospitals, sanitariums, homes or other circumstances.

(f) Special speech instruction through speech aides. In counties with less than 30,000 average daily attendance or defined as class five through eight counties (under §1205), a remedial program for speech-handicapped pupils may be conducted using specially trained instructional aides in structured programs of language and articulation under the direction of a credentialed speech therapist. No more than two speech aides may be supervised by one speech therapist.

The maximum size for special day classes for the physically handicapped are as follows:

CLASS SIZE

Types of pupils in class	Ages 3 through 8 years	Ages 9 through 20 years
Deaf	6	8
Severely hard of hearing	8	10
Combination of deaf and severely hard of hearing	6	8
Blind	8	10

Partially seeing	10	12
Combination of blind and partially seeing	8	10
Orthopedic or other health impaired	12	16
Aphasic	6	8
Other physically handicapped	--	20
Deaf-blind multihandicapped	3	5
Other multihandicapped	6	8

The state board may waive these standards whenever it approves a project to conduct experimental studies to determine proper maximum class size standards.

If, after the beginning of the school year, it is determined that classes are at maximum size, that additional pupils will be without schooling unless additional classes are established, and that additional qualified teachers are not available for employment, the state superintendent may permit a district to exceed maximum class size, provided that the maximum is not exceeded by more than two pupils.

The state superintendent: shall promote and direct special instruction for the physically handicapped; may employ such personnel as necessary to do so; shall prescribe conditions under which the education of physically handicapped pupils shall be the responsibility of either the elementary or the high schools in a district and determine when such pupils shall be designated in elementary or secondary grades for attendance and apportionment purposes; and shall prescribe procedures for qualifying for and shall determine the amount of allowances for special regular day classes and for authorized instruction outside classes.

The Director of Education shall employ persons necessary for the administration of multihandicapped pupils. The Department of Education may prescribe minimum standards for the special education of physically handicapped pupils.

Whenever a pupil is being evaluated for placement in a program for the physically handicapped, the parent or guardian shall have the right to be present at all meetings of the admission committee concerning that pupil, the right to a 48-hour prior notice of such meetings, and may have a professional representative to present material to assist the committee in its determination. The representative shall have no decisionmaking power with respect to the committee's determination.

Any district furnishing education to physically handicapped pupils shall furnish such education to all such handicapped pupils actually living within the district five or more days a week, although their legal residence may be outside the district.

Subject to §1850, a school district which does not maintain facilities for the education of physically handicapped pupils shall enter into a contract with another district or with a county superintendent maintaining such facilities.

If, after the complaint of a parent or guardian, a county superintendent determines that facilities offered in a district for the physically handicapped are inadequate, the county superintendent shall order the district to provide adequate facilities or enter into a contract with a district maintaing adequate facilities.

The contract shall provide for the payment of the cost of tuition by the district in which the pupil lives and may provide for payment of the cost of the use of buildings and equipment.

Subject to §1850, a governing board may provide for the transportation of pupils assigned to special schools or classes for the physically handicapped and shall provide transportation for those whose physical handicaps prevent their walking to school.

Subject to §1850, the governing board of a district in which any physically handicapped pupil is actually living, although the residence of the pupil's parent or guardian is outside the district, shall provide for the transportation of the pupil to the school at which education is furnished, if the handicap prevents the pupil's working or if the distance is greater than one mile, regardless whether the education is furnished within or without the district.

TRANSPORTATION

Physically handicapped pupils may be admitted at the age of three years or, with the state superintendent's approval, may be admitted at the age of 18 months to special schools or classes for such pupils.

When the district of residence of a physically handicapped pupil between the ages of three and six years does not maintain a special class in the category of a pupil's handicap, but such a class is maintained by the county superintendent or another district, such a pupil shall be admitted to that class when: the pupil is eligible for enrollment under regulations of the superintendent or board maintaining the class; and the superintendent or board is willing to admit the pupil, and the parents of the pupil file a written request that the pupil be so admitted and a physician's statement that the pupil is physically able to attend the class.

When a pupil is thus admitted, the district of the pupil's residence shall enter into a contract or under §56709.

Necessary care may be provided during school hours for pupils where attendance has been irregular because of physical handicaps, and such employees as may be needed may be employed to provide the care.

Subject to §1850 and subject to Department of Education standards, a governing board may establish regulations determining who can profit by and who shall receive special instruction for the physically handicapped provided by §56700 et seq.

Subject to §1850, physically handicapped pupils may be instructed in special schools or classes, in hospitals, sanatoriums, or preventoriums, in the home through home instructors, by cooperative arrangement with the Department of Rehabilitation, or by any other means approved by the Department of Education.

HOME INSTRUCTION

Pupils with speech disorders may be admitted at school for individual or small group instruction. With the state superintendent's prior approval, such pupils may be admitted at the age of 18 months.

Pupils with hearing disorders between the ages of three years and six years may be admitted at school for individual instruction or be instructed in the home, provided that there are too few of such educable pupils to establish a special day class or too few within travel distance and provided that such instruction is afforded by a teacher or home instructor possessing full qualifications for the credential to teach deaf pupils. With the state superintendent's prior approval, such pupils may be admitted at the age of 18 months.

Multihandicapped pupils between the ages of 3 and 21 may be enrolled in special day classes, approved in advance by the state superintendent.

The state superintendent shall approve not more than 100 classes during 1970-1971 and not more than 50 additional classes each fiscal year thereafter not to exceed a total of 400 classes. The superintendent shall report annually to the Legislature the progress being made in the education of multihandicapped pupils including: the number of authorized classes, the numbers of pupils enrolled, the nature of handicapping conditions of pupils enrolled, a description of the instruction being provided, objectives of the program, results, and recommendations for further program development.

Subject to §1850, special classes or individual instruction provided for pre-tuberculosis, tuberculosis, convalescent, or other physically handicapped pupils in hospitals, sanatoriums, and preventoriums, may be maintained in institutions within or without the district. Attendance of such pupils shall be credited to the district providing instruction. The minimum schoolday for such classes is 180 minutes.

No pupil shall be required to take advantage of educational provisions for the physically handicapped if the pupil's parent or guardian files a statement with the governing board that the pupil is receiving adequate educational advantages.

Subject to §1850, a pupil with cerebral palsy may attend a special class for pupils with cerebral palsy. The governing board of the district of residence shall pay to the district of attendance each year the total current expenditures of the district of attendance for the pupil's education, less all apportionments of state and federal funds made on account of attendance of the pupil. The governing board of the district of residence may agree to reimburse the district of attendance for the cost of the use of buildings and equipment. If the district of residence has insufficient funds to make such payment, the county superintendent shall apportion to the district a sum to permit the district to meet its objection.

The Department of Education may appoint counselors to assist blind pupils to solve problems related to their school program. The counselors may visit blind pupils in their houses to advise them and confer with their parents; shall be available to advise school personnel regarding the education of the blind; shall be specially trained for this work and thoroughly familiar with problems of the blind. Blindness shall not disqualify persons for these positions.

Individual counseling and guidance in social and vocational matters shall be provided as part of the instructional program for physically handicapped pupils. With Department of Education approval, districts singly or cooperatively may employ a special coordinator to study employment and occupational opportunities and assist in coordinating the education of the physically handicapped with commercial and industrial pursuits of the community.

The Department of Employment Development shall, through the State Employment Development Service, cooperate with local and state school officials in the placement of physically handicapped individuals.

No person shall be employed to teach physically handicapped pupils with the several sorts of handicap who does not have a valid credential authorizing such teaching.

However, the employment, as a substitute teacher in special classes for not more than 20 schooldays in any school year, of a person holding some other valid credential authorizing substitute teaching shall not be prohibited. The state superintendent may approve an extension of the 20-day period for a given person but not beyond the end of the school year.

Notwithstanding the above, any person may be employed to teach physically handicapped pupils in a sheltered workshop, occupational training program, or other vocational education program if that person holds a designated subjects teaching credential in a subject related to the program in which the person is employed.

The Department of Education may cooperate with the American Printing House for the Blind in the provision and distribution of Braille books and other materials for the use of blind pupils.

The governing board shall insure against the liability, other than a liability which may be insured against under Division 4 of the Labor Code, imposed on the district by any state law, in any insurance company authorized to do business in the state. The cost of such insurance shall be paid out of the district's development center for handicapped pupils fund.

An Advisory Committee on Development Centers for Handicapped Pupils shall be established to aid in setting standards for admission to centers and to advise the Department of Education in the administration and operation of centers. The committee shall consist of one member from the Department of Benefit Payments (appointed by the Director of Benefit Payments), one member from the State Department of Health (appointed by the Director of Health), and one member from the Department of Education, one lay member from the general public, one parent of a handicapped pupil, and four members each from a school district or county superintendent's office participating in the program (all appointed by the Director of Education). The member from the Department of Education shall serve as the committee's secretary.

Members shall serve without compensation but shall be reimbursed for actual and necessary expenses incurred in the performance of their duties.

A governing board or a county superintendent may provide or pay for the transportation of pupils between their homes and a development center for handicapped pupils.

Whenever a governing board or county superintendent closes temporarily a development center for handicapped pupils, because of fire, flood, epidemic, an order under §41422, or other emergency, the state superintendent shall grant the amount of state funds which would have been earned had there been no closure to the school district or county superintendent, provided that the fact of the closure has been established to the state superintendent's satisfaction by affidavits from the local educational authorities.

§56750 -- 56752

Whenever a school district maintains a school or classes at a tuberculosis or polio ward, hospital or sanatorium maintained by a county, any person who has been admitted to the institution is, if otherwise qualified, eligible to attend such school or classes but shall be deemed to be a resident of the district in which the person resided prior to admission to the institution.

SCHOOL DAY

The minimum schoolday for such classes is 180 minutes. Whenever two or more districts maintain such schools or classes, the governing boards may jointly employ personnel to conduct the programs.

The district maintaining the school shall, no later than 30 days after the enrollment of a student, notify the student's district of residence.

The cost of educating the person shall be paid by the district of residence to the district maintaining the school. Such pupils shall be apportioned excess cost apportionments for handicapped pupils. No interdistrict attendance agreement is required for this arrangement.

RULEMAKING

The state superintendent shall adopt standards and regulations relating to administration, attendance, accounting, and counseling in hospital schools and classes.

§56800 -- 56833; 56865

DEVELOPMENT CENTERS

A governing board or a county superintendent is authorized to establish and maintain, with the state superintendent's approval, one or more development centers for physically handicapped and mentally retarded pupils between three years and 21 years of age residing in, and in the custody of persons residing in, the district or county. The governing body or county superintendent shall determine the hours, days, and months, during which the development center is to be maintained.

The establishment of such a center by a county supertendent shall be undertaken subject to the prior approval of the county board, upon the application of one or more districts under the superintendent's jurisdiction, and on terms provided for in a written contract between the county superintendent and the governing body of any district.

Pupils otherwise eligible for development center placement who are between 18 months and 3 years of age may be enrolled in experimental programs conducted by a district or county superintendnet maintaining a development center. Experimental programs shall be approved in advance by the state superintendent and considered according to state board rules.

Pupils otherwise eligible for development center placement who are between 18 months and 3 years of age may be enrolled in experimental programs at development centers. Such programs shall be approved in advance by the state superintendent.

The governing board or county superintendent maintaining a development center for handicapped pupils shall certify to the state superintendent that each child enrolled in the center has been found eligible by the local admissions and evaluation committee and shall report the number of pupils identified as eligible and the number of pupils enrolled.

The state board shall establish and the state superintendent shall enforce standards for development centers for handicapped pupils and standards for the admission of pupils. The board may change the standards whenever it deems advisable, but shall never adopt a regulation which precludes enrolling a child in a center on the basis of any means test. Eligibility shall be based on the physical and mental handicapping conditions of each pupil.

The state superintendent shall establish standards for the issuance of permits for persons to be employed in centers.

The Director of Education shall employ such persons as are necessary for the administration of services by centers.

With the consent of the parent or guardian, each eligible handicapped pupil, between 3 years and 21 years of age residing in the district, shall be enrolled in a development center maintained either by the district or pursuant to a contract for the district. If a parent or guardian seeks to enroll a child and enrollment is denied, or if a parent or guardian disagrees with the proposed enrollment of a child, provision shall be made for a hearing, including final notice and an opportunity to be heard, before the board itself or before a

panel composed of persons designated by the board and the parent or guardian.

The state board and local governing boards shall adopt regulations for such hearings.

A governing board maintaining a center may accommodate in the center children residing in another district upon terms, including the payment of costs, as are agreed on by the boards. The amount shall be paid from funds of the contracting district available for this purpose.

Enrollment of otherwise eligible pupils shall be on a first-come, first served basis. Enrollment priorities shall not favor the admissions of an eligible pupil living with a parent or guardian over an eligible pupil living in an out-of home residential placement.

A governing board may permit the use of, and furnish maintenance for, buildings, grounds, and equipment of the district and may use existing administrative personnel for the purposes of development centers for handicapped pupils.

A board may enter into agreements with political subdivisions of the state, public agencies, and private non-profit entities for the furnishing to the board of property, facilities, personnel, equipment or supplies for the purposes of such centers.

A board may adopt regulations, consistent with the law and with state board regulations, for centers maintained by it. Regulations may include rules pertaining to the admissions or exclusion of children from centers.

RULEMAKING

A governing board shall employ in a development center for handicapped pupils only such persons who hold credentials issued by the state board of the Commission for Teacher Preparation and Licensing or permits issued by the commission. Each person employed by a governing board for a portion requiring a credential or permit shall, not later than 60 days after the commencement of service, file with the county superintendent a

valid credential or permit issued by the date that service commenced.

A district or superintendent maintaining one or more centers shall designate one person in each center to serve as a supervising head teacher. Such person shall hold a valid credential to teach exceptional children.

Each person employed in a center in a position requiring certification shall be subject to the same rules and eligible for the same benefits as provided for all teachers within the district maintaining the center. Other persons employed in a center shall be deemed for all purposes to be persons employed by the district in positions not requiring certification qualification.

MEDICAL EXAMINATION

EXEMPTION

No regulation shall require medical examination or immunization for admission to a development center for the handicapped of a child whose parent or guardian files a letter with the governing board stating that examination or immunization is contrary to his/her religious beliefs. However, whenever a child is suffering from a recognized or infectious disease, the child may be temporarily excluded until the board is satisfied that any such disease does not exist.

Children regularly enrolled in a development center for the handicapped who are absent on account of illness or quarantine shall be considered in regular attendance for the purpose of reporting attendance for state apportionments, whenever the district certifies that such absence was on account of illness or quarantine.

Any center may be discontinued at any time at the discretion of the governing board, if, not less than 30 days before the discontinuance, the board shall mail to each person having custody of a child in attendance at the center a notice of the intended discontinuance and shall post a similar notice at the center.

Any balance left in a development center for handicapped pupils fund may be deposited in the district general fund one year after discontinuance of the center.

Whenever a district in which a development center for handicapped pupils is located does not have adequate facilities to provide services for pupils, the district shall apply under §16200 for funds to construct needed facilities.

A governing board or a county superintendent maintaining a development center for handicapped pupils may admit to such centers pupils who live in regularly established licensed children's institutions or in a family home, provided that the county board of education of the county or city and county in which the child resided prior to admission to the children's institution or family home approves of the admission and agrees to reimburse the district or county maintaining the center for the costs of educating the child.

If the child's prior residence cannot be ascertained or, if the residence was outside the state, the district or county shall be reimbursed by the county or the city and county in which the institution or family home is located, provided that admission has been approved by the county board of education of that county.

The Legislature recognizes that each severely mentally retarded or physically handicapped pupil eligible for enrollment in development centers is entitled to an appropriate program.

It is the Legislature's intent that there be an orderly phase-in of pupils identified or eligible so that by September 1, 1978, all eligible pupils shall be served.

A county superintendent shall establish development centers for handicapped pupils who reside in the county and in elementary or unified school districts and in high or unified school districts with less than 8,000 average daily attendance in the elementary schools or in the high schools, provided that such districts have not entered into a contract with other counties or districts to provide such programs.

An elementary or unified school district and a high or unified school district with more than 8000 average daily attendance in the elementary schools or in the high schools shall establish development centers for the handicapped.

The county superintendent may establish such centers for handicapped pupils who reside in any district of the county with the approval of the county board of education and the agreement of the local governing board.

Any elementary or unified district and any high or unified school district with less than 8,000 average daily attendance in the elementary schools or in the high schools may establish programs for the handicapped, with the county superintendent's approval.

A county superintendent required to provide development centers for handicapped pupils may, with the state superintendent's approval, enter into agreements with an elementary, unified or high school district for the latter to provide for the education of such pupils.

§59000 -- 59007; 59020 -- 59031; 59040 -- 59045

SCHOOL FOR DEAF

The California School for the Deaf (including two state schools, the California School for the Deaf, Northern California, and the California School for the Deaf, Southern California) is a part of the state school system, except that it derives no revenue from the State School Fund, and has for its object the education of the deaf who, by reason of their infirmity, cannot be taught in the public schools.

The school is under the administration of the Department of Education, which shall: prescribe rules for the school's government; appoint the superintendent and other officers and employees; remove for cause any officer, teacher, or employee; and fix the compensation of all personnel.

The superintendent of the California School for the Deaf shall have had not less than three years' experience in the teaching of the deaf and shall hold a credential issued by the state board for secondary school teaching.

The powers and duties of the superintendent shall be assigned by the state superintendent.

The state superintendent may authorize the California School for the Deaf to maintain teacher training courses in the instruction of the deaf and the hard of hearing. The state superintendent shall prescribe standards for the admission of persons to the courses and for the content of the courses.

The California School for the Deaf may enter into agreements with the Trustees of the California State University and Colleges, the University of California, and any other university or college accredited or a teacher training institution to provide practice teaching required for the issuance of the credential authorizing the holder to teach the deaf and severely hard of hearing.

The Department of Education may employ any person, otherwise qualified, who has retired for service as a substitute in a position requiring certification qualifications at the California School for the Deaf; provided that the total of such service and any service rendered under §23919 shall not exceed 90 teaching days in any one fiscal year.

Every deaf person between the ages of 3 and 21 years, who is a state resident and meets the criteria set forth in this section is entitled to an education in the California School for the Deaf free of charge.

Priority in admission shall be given to elementary age deaf minors residing in sparsely populated regions and to secondary age deaf minors for whom appropriate comprehensive educational facilities and services are not available and cannot be provided.

Admission criteria shall be administratively determined by the state superintendent.

For determining district responsibility when a pupil resides in other than a unified district pupils 15 years of age or older as of September 1 of each year shall be considered resident of the high school district and pupils 14 years or under shall be considered resident of the elementary district.

If the parent or guardian of any pupil in the California School for the Deaf is unable either himself/herself or from the estate of the child to clothe the child or pay for the child's transportation or for necessary dental, opthalmological or medical care while the child is at the school, the parent or guardian (or the school superintendent) may apply for a certificate to that effect to the superior court of the county in which the parent or guardian is resident. If the court is satisfied that the parent or guardian is unable to pay for any such service, it shall issue a certificate to that effect. If the court is not satisfied, it shall not issue the certificate but shall, according to the nature of the application, order the superintendent to provide the child with the service and order the parent or guardian to reimburse the Department of Education for expenses incurred in providing the service.

If the Department of Education is not reimbursed, the superintendent may sue the parent or guardian, in the name of the state, to recover any money paid out by order of the court or due the department or reimbursement.

All money expended under the authority of any such certificate by the Department of Education constitutes a legal charge against the county from which the certificate is issued. Expenditures for clothing and transportation shall not exceed $385 for 1974 - 1975 and an amount thereafter adjusted annually with the Consumer Price Index, measured for the calendar year next preceding the fiscal year to which it applies.

When a certificate is presented to the school superintendent, the superintendent shall clothe the child and provide the child with necessary transportation and dental, opthalmological, and medical care. The expense shall be advanced by the Department of Education.

All pupils in the school shall be maintained at the expense of the state, except as provided in §59021, 59023 to 59028, 59030, and 59031.

The governing board of each district of residence shall, from the district general fund, pay for the transportation cost of each pupil of the district attending the California School for the Deaf as a day-class pupil.

For determining district responsibility when a pupil resides in other than a unified district, pupils 15 years of age or older as of September 1 of each fiscal year shall be considered residents of the high school district and pupils 14 years or under shall be considered residents of the elementary district.

Deaf persons not residents of the state may be admitted to the benefits of the California School for the Deaf by paying to the Department of Education the school year cost for care and instruction of persons at the school, payable quarterly in advance. The cost shall be determined by the Department of Education with the approval of the Department of Finance.

The state superintendent, in conjunction with the California School for the Deaf, shall provide assessment and instructional planning services for individuals referred for such services by responsible local agencies.

§59100 -- 59103; 59110 -- 59113; 59120 -- 59131; 59140 -- 59144

SCHOOL FOR BLIND

The California School for the Blind is a part of the state school system, except that it derives no revenue from the State School fund, and has for its object the education of the blind, who, by reasons of their infirmity, cannot be taught in the public schools.

The school is under the administration of the Department of Education which shall prescribe rules for the school's government, appoint the superintendent and other officers and employees, remove for cause any officer, teacher or employee, and fix the compensation of all personnel.

The superintendent of the California School for the Blind shall have had not less than three years' experience in teaching the blind and shall hold a credential for teaching in secondary schools.

The powers and duties of the school superintendent are such as are assigned by the state superintendent.

There is hereby created at the California School for the Blind the position of fieldworker to be appointed by the school superintendent with the state superintendent's approval.

The fieldworker shall be a member of the school teaching staff and receive a fixed salary.

The fieldworker shall visit graduates and former pupils of the school to advise them regarding the extension of their education, to assist them in securing remunerative employment, and to improve their economic condition in all possible ways. The field worker shall have had special training for such work. Blindness shall not be grounds to disqualify a person for this position.

The Department of Education may employ any person otherwise qualified who has retired as a substitute in a position requiring certification qualifications at the California School for the Blind, provided that the total of such service and any service under §23919 shall not exceed 90 teaching days in any one fiscal year.

Every blind person resident of this state, of suitable age and capacity, is entitled to an education in the California School for the Blind, free of charge.

If the parent or guardian of any pupil in the California School for the Blind is unable either himself/herself or from the estate of the child to clothe the child or pay for the child's transportation or for necessary dental, opthalmological, or medical care while the child is at the school, the parent or guardian (or the school superintendent) may apply for a certificate to that effect to the superior court of the county in which the parent or guardian is resident. If the court is satisfied that the parent or guardian is unable to pay for any such service, it shall issue a certificate to that effect. If the court is not so satisfied, it shall not issue the certificate, but shall, according to the notice of the application, order the superintendent to provide the child with the service and order the parent or guardian to reimburse the Department of Education for expenses incurred in providing the service.

If the Department of Education is not reimbursed, the superintendent may sue the parent or guardian, in the name of the state, to recover any money paid out by order of the court or due the department as reimbursement.

All money expended under the authority of any such certificate by the Department of Education constitutes a legal charge against the county from which the certificate is issued. Expenditures for clothing and transportation shall not exceed $385 for 1974 - 1975 and an amount thereafter adjusted annually with the Consumer Price Index, measured for the calendar year next preceding the fiscal year to which it applies.

When a certificate is presented to the school superintendent, the superintendent shall clothe the child and provide the child with necessary transportation and dental, opthalmological, and medical care. The expense shall be advanced by the Department of Education.

The governing board of each district of residence shall, from the district general fund, pay for the transportation cost of each pupil of the district attending the California School for the Blind as a day-class pupil.

For determining district responsibility when a pupil resides in other than a unified district, pupils 15 years of age or older as of September 1 of each fiscal year shall be considered residents of the high school district and pupils 14 years or under shall be considered residents of the elementary district.

Blind persons not resident of this state may be admitted to the benefits of the California School for the Blind by paying to the Department of Education the school year cost for the care and instruction of persons at the school, payable quarterly in advance. The cost shall be determined by the Department of Education with the approval of the Department of Finance.

The Department of Education, in connection with the California School for the Blind, shall establish and maintain a kindergarten service for the care and teaching of children under school age.

The Department of Education shall create the position of visiting teacher to blind children of preschool age. With the consent of the parents of any blind child of preschool age, it shall be the duties of such visiting teacher to assist and instruct the parents in the early care and training of the

child, to train the child in play and to do anything necessary to assure the child's adjustment to its environment. A sufficient number of visiting teachers shall be maintained to adequately serve the needs of such parents in accordance with the known number of such children and to prevent the caseload of each visiting teacher from exceeding a number of clients that can be adequately served.

The Department of Education shall adopt measures for the giving of vocational training to pupils in the California School for the Blind. The board shall determine the character of this training so as best to adopt the blind to follow useful pursuits, after the completion of their education.

The state superintendent may authorize the California School for the Blind to establish and maintain, either independently or in cooperation with the University of California or the Trustees of the California State University and Colleges, teacher training courses for teachers of the blind. The state superintendent shall establish standards for the content of such courses and for admission to them.

The school may enter into agreements with the institutions of higher education accredited by the state board for teacher training purposes to provide practice teaching required for credentials to teach the visually handicapped, the deaf-blind, or provide orientation and mobility instruction. Such agreements may provide a reasonable payment to teachers at the school who have practice teachers under their direction.

The state superintendent, in conjunction with the California School for the Blind, shall provide assessment and instructional planning services for individuals referred by responsible local agencies under §53336.

§59200 -- 59204 ; 59210 -- 59211

DIAGNOSTIC SCHOOLS

The three diagnostic schools for neurologically handicapped children (Northern California, Central California, Southern California) are part of the state school system, except that they derive no revenue from the Public School Fund, and have for their object diagnosis, and the determination of the treatment, and educational program of children with

neurological handicaps. These schools provide temporary residence for children, who, by reason of their handicaps, need educational diagnostic services not available in regular public school classes.

RULEMAKING

APPOINTMENT

The schools are under the administration of the state superintendent, who shall: prescribe rules for the schools' government; appoint the superintendents and other officers and employees; remove for cause any officer, teacher, or employee; fix the compensation of teachers; determine the length of, and the time for, teacher vacations; and contract with the University of California or with other public or private hospitals or schools of medicine for diagnostic and treatment centers for neorologically handicapped children. Also, in connection with these schools, the state superintendent shall: make comprehensive diagnostic evaluations of individuals referred by local agencies under §56336 and provide instructional planning services for them; provide counseling services for parents, guardians, and families of neurologically handicapped and seriously emotionally disturbed children; and conduct experimental assessment projects designed to meet needs of categories of neurologically handicapped children selected by the state superintendent.

The powers and duties of the superintendents of the Schools for Neurologically Handicapped Children, are such as are assigned by the state superintendent.

The state superintendent, in cooperation with an accredited college or university, may authorize the California Schools for Neurologically Handicapped Children to establish and maintain teacher training courses in the instruction of neurologically handicapped children and shall prescribe standards for the content of the courses and for admission to them. Such courses shall be counted toward a credential in the area of the educationally handicapped upon the establishment of such a credential.

The schools may enter into agreements with universities and colleges accredited for teacher training to provide practice teaching required for the credential to teach the educationally handicapped. Such agreement may provide payment

to teachers at the schools who have practice teachers under their direction.

§59220

Every state resident less than 21 years of age, of suitable capacity as determined by diagnosis at the diagnostic and treatment schools for neurologically handicapped children, is entitled to enrollment in one of the schools, free of charge.

Children with neurological handicaps, not residents of California, may be admitted to the benefits of the schools on payment to the Department of Education, quarterly in advance, the average cost of maintinaing pupils in the school for the period in question. This cost shall be determined by the Department of Education with the approval of the Department of Finance.

REGULATIONS

§3110

School districts and county superintendents shall submit reports of handicapped children on the following forms supplied by the Superintendent of public instruction:

a) "First Period Enrollment Report for Special Education Programs," which concern participation in a special class, school or program;

b) "Report of Handicapped Minor Whose Application for Enrollment in School, Special Class, or Program Was Denied and of Handicapped Minors Not Continuing in Attendance After Admission," for students not participating in such programs, schools, or classes; and

c) for those participating, the name of such class, school or program.

Concerning the latter group, the county superintendent shall review the placement of such students "to determine whether incidence of similar disabilities, location of residences, and chronological ages are such as to

warrant the establishment of special education facilities and services by the county superintendent or school district of residence."

§3150

These regulations are intended to assure all individuals with exceptional needs the individual rights and protections of this article, and to achieve conformity with the Federal Education of the Handicapped Act.

This article does not apply to a) Development Centers for Handicapped Pupils (Title 2, Division 4, Part 30 of the Education Code); b) Educational Services for Individuals with Exceptional Needs (Title 2, Division 4, part 30, Chapter 2 of the Code); or c) Education for Exceptional Children for Whom No Public Facilities are Available (Sedgwick Act, Title 2, Division 4, Part 30 Chapter 1 of ARticle 3 of the Code).

§3152

PUPIL ASSESSMENT

Each school district shall make a formal assessment of pupils thought to have exceptional needs to determine the need for, and placement in, a special education program, upon written consent of the parent.

The following procedures may be used, among others, in making such an assessment:

" 1) testing and assessment materials and procedures shall be selected and administered so as not to be racially or culturally discriminatory;

2) tasks and assessment materials shall be in English, native tongue of the pupil, or other appropriate mode of communication;

3) tests and assessment instruments shall be validated by the specific purpose of their use;

4) care shall be taken that test results accurately reflect the individual's aptitudes or achievement level, rather than the pupil's impaired sensory, manual or speaking skills (except where tests are designed to measure, specifically, those skills);

5) tests and assessment materials shall be used by applicably credentialed personnel;

6) tests and assessments shall be designed to assess the specific area of a pupil's educational needs rather than provide a single intelligent quotient only.

7) Sources in addition to ability or achievement tests, including information concerning the pupil's health status and physical condition, sociocultural background and the adaptive behavior in the school and home environment shall be considered in any determination of the special educational needs of the pupil;"

8) the interpretation of assessment data and resulting determination as to placement shall be made by professionally licensed personnel. No single assessment instrument shall be used by them as the sole criteria for determining the appropriate special education program; and

9) when the assessment team determines that the pupil does not require placement in a special education setting, the pupil shall be placed in a regular instructional setting.

§3153

PLACEMENT

A change in the special education placement of a pupil shall be based on:

1) the pupil's current individualized program;

2) information relating to the pupil's current performance; and

3) a review by a team composed of the parent; administrator or designee, the pupil's teacher(s), the pupil, if feasible; and any other appropriate personnel.

§3154

INDIVIDUALIZED PROGRAM

At the beginning of each school year, the local education agency shall develop or revise the individualized education program for each pupil with exceptional needs. This program shall be developed by the assessment team upon determination of eligibility for special services and shall be reviewed at least annually.

The persons who develop and revise the program shall include, though not be limited to: a special education administrator or designee; the pupil's special or regular

teacher; the pupil's parents; the pupil, when appropriate; other competent persons knowledgeable about the needs of special education pupils; and members of an admission committee, if required by the Education Code.

The written individualized program shall include, though not be limited to statements of:

1) the pupil's present levels of educational performance, including academic achievement, social adaptation, prevocational and vocational skills, psychomotor skills, self-help skills;

2) time-referenced, long-range goals and principle objectives;

3) specific educational services to be needed by the pupil (without regard to their availability), including a description of:

A) all special education and related services needed to meet the unique needs of the pupil;

B) any special instructional media and materials needed;

C) type of special physical education program, if needed

D) career and vocational education program participation;

E) anticipated timeline for any services not immediately available.

4) A description to the extent to which a pupil may participate in regular education programs;

5) projected date of placement and duration in special education program;

6) rationale for the type of educational placement, keeping line with the least restrictive educational environment concept;

7) a list of these responsible for program implementation;

8) "the objective criteria, evaluation procedures, and schedules to determine instructional achievement"; and

9) "the individualized education program is a statement of the services to be delivered and of the anticipated

goals and objectives for the pupil; but is not a contract which guarantees the accomplishment of the anticipated goals and objectives."

§3155

"Least restrictive Educational environmental means that to the maximum extent appropriate, each individual with exceptional needs . . . shall be educated with pupils who are not handicapped; that assignment to special classes, separate schooling or other removal of such pupil from the regular education environment shall occur only when the nature and severity of the handicap is such that education in regular classes with the use of supplementary bids and services cannot be achieved satisfactorily. Public education must offer special assistance to exceptional individuals in a setting which promotes a maximum interaction with the general school population and which is appropriate to the needs of both."

The unique needs of the pupil, any potentially detrimental effect on the pupil with exceptional needs and the quality of services provided for such a pupil or other pupils in the regular classroom shall be considered in selecting the least restrictive environment.

Alternative educational assignments shall be determined by the individual pupil needs as noted in his/her individualized learning program. The range of such alternatives shall include, though not be limited to: individual instruction in home or hospital instruction in residential institutions operated by public and state agencies other than the State Education Department, private, nonsectarian school programs, regular program with appropriate special education related services, special class or center, special class with appropriate integration into the regular program, and state run special schools.

Each school district shall develop policies and procedures for implementing individualized education programs including the least restrictive environment and describing the allocation of resources and support necessary; imple-

menting a school site process for considering such allocation and developing methods of making the school climate receptive to pupils with exceptional needs.

§3156

HEARING

Parents and pupils are guaranteed procedural due process by a fair and impartial administrative hearing before a panel concerning any decision on the pupil's identification as an individual with exceptional needs; assessment and implementation of individualized programs and the denial, placement, transfer, or termination of the pupil in a special education or related services program."

§3157

NOTICE

Parents of an individual with exceptional needs are entitled to written notice of his/her rights.

§3158-3159

The school district shall give written notice to parents of individuals with exceptional needs prior to:

1) proposing to initiate or change the identification, assessment or educational placement of a pupil, or the appropriate public education provided to the pupil; or

2) refusing to initiate the above.

Written consent by the parent must be obtained prior to conducting any assessment.

The written notice shall include:

1) a statement that individuals with exceptional needs shall be educated with non-handicapped pupils, to the maximum extent possible;

2) "A statement that special classes, separate schooling, or other removal of individuals with exceptional needs from the regular education environment shall occur only when the nature or severity of the handicap is such that education in regular classes, with the use of supplementary aids and services, can not be achieved satisfactorily.

3) a full explanation of all procedural safeguards available to the parent and pupil;"

4) a description of proposed or denied action, why such action was taken, and options considered;

5) a description of the assessment procedure, test, record, or report used as the basis for the proposed or denied service;

6) a description of any other factors relevant to the proposed or denied action.

The notice must be in language understandable to the general public and in the native language or other mode of communication, such as those used by the blind or deaf, used by the parent.

If the mode of communication is not in written language, the school district shall insure that the notice is translated orally to the parent and the parent understands the content of the notice. Written evidence of such understanding is required.

§3160-3161

HEARING

A parent or school district may request a hearing on any matter described in this article.

Such hearings and reviews shall be conducted at a time and place reasonably convenient to the parties involved and shall be commenced and completed as quickly as possible, but not later than 45 days after the initial complaint, unless there is a mutually agreeable extension.

§3162

APPEAL

A pupil shall remain in his/her current program while his/her appeal is pending, unless the school district and parent agree otherwise.

Upon written voluntary consent of the parent, the school district may exclude from attendance any pupil:

1) whose physical or mental disability may cause the pupil's attendance to be inimical to the welfare of other pupils or which presents imminent physical danger to such pupil; or

2) whose physical or mental condition may prevent or render inadvisable, attendance at school in special education or related services.

If the parent objects to such exclusion a hearing shall be held to make a determination.

Pending such a hearing, the pupil shall remain in his/her current program unless documentation is presented that actual physical bodily harm has occurred to such pupil or others as a result of such physical or mental disability.

§3163

HEARING

When a school district becomes party to a fair hearing, the district superintendent or his/her designee shall, within ten days:

1) Meet with the parents informally to discuss the parent's concern. The parent has the right to see any documents in the student's file and the right to a representative.

2) After the above review, the superintendent may authorize modifications of the individualized education program to the parent's satisfaction.

3) If the above meeting does not resolve the issue, the superintendent shall immediately refer the problem to the Fair Hearing Panel.

§3164

RECORDS ACCESS

"The parents shall have the right and opportunity to examine all relevant school records of the handicapped pupil . . ." within five days after such a request is made.

The district may charge only the cost of reproducing such records, provided the cost involved does not prevent the parent from access to the records. In such case, no charge shall be made.

§3165

ASSESSMENT

The parent of a handicapped pupil has the right to an independent educational assessment of the pupil by a fully licensed examiner who is not employed by the State Department of Education or the district responsible for the pupil:

If the parent disagrees with the district's assessment, he/she may have an independent assessment made at public expense, if such an assessment is appropriate. If the hearing decides that the assessment is not appropriate, the parent still has the right to a hearing, but not at public expense. Such a parent initiated

assessment shall be considered in any decisions regarding the provision of a free appropriate public education to the pupil, and may be presented as evidence at a hearing before the Fair Hearing Panel. If a Fair Hearing Panel requests an independent assessment, it shall be at the public expense.

Whenever the school district pays for an independent assessment, the criteria for such an assessment shall be the same as when the school district initiates the assessment.

§3166

HEARING PANEL

"The Fair Hearing Panel shall be composed of three persons knowledgeable with the needs of the individual with exceptional needs to serve as an impartial body in its deliberations so as to protect the rights of the parties involved." The Panel shall be formed within five days after the review by the district superintendent, and if there is no agreement as to the concern(s) at issue; or by request of the parent or school district.

"Each member shall be impartial, unbiased and not an employee or agent of the school district or the county superintendent of schools responsible for the hearing and shall not be an employee or agent of a private nonsectarian school being considered for the pupil's placement." The members shall be selected as follows: one by the parent, one by the school district, and one by mutual agreement. Each member shall have expertise relating to the handicap of the eligible pupil. The Chairman shall be selected by the members of the Panel.

Members shall be reimbursed a reasonable per diem rate and transportation costs, as well as other incidental costs.

§3167-3168

HEARING

RIGHT TO COUNSEL

Hearings shall be conducted in an informal manner. All parties to the hearing have the right to counsel and to be advised by individuals with special knowledge and training with respect to the problems of handicapped children, and the right to a verbatim record of the hearing.

All parties shall have the right to names and addresses of witnesses of the other parties, to compel the attendance of any witness who is employed by, or an officer of the school district, to examine and cross examine witnesses, to inspect all statements and other evidence and to present oral summation and argument at the end of the hearing. The hearing need not be conducted according to technical rules relating to evidence and witnesses. Any evidence may be admitted if it is reasonable to the conduct of serious affairs. Hearsay evidence may be used for supplementing or explaining other evidence, but shall not be sufficient in itself to support a finding unless it would be admissible in a civil action. The Chairman may exclude irelevant or repetitious evidence.

The hearing shall be conducted in English, and an approved translator may be provided if English is not the primary home language of the parent.

The hearing shall be held within thirty-five days after the request for an appeal before the Panel at a reasonable time and place. At least ten days notice shall be given to the parents as to time, place and date.

§3169

Wtihin ten days of the hearing, the Panel shall, by majority decision, render a written decision based on evidence and testimony and shall submit the decision to the involved parties. The decision shall contain the findings of fact, a determination of the issues presented, and the reasoning and basis of the decision. The Panel may grant or deny, in whole or in part, the request which caused the hearing. The decision shall be binding unless appeals are made to the Superintendent of Public Instruction.

The school district shall implement the Panel's decision and shall submit the decision to the State commission on Special Education as an informational item, deleting any identifiable information relating to the pupils.

§3170

Written petition for appeal to the State Superintendent of Public Instruction may be filed within twenty days of the decision of the Fair Hearing Panel.

The parties shall be notified within ten days of the time and location of the hearing before the superintendent or his/her designee, and they shall be given an opportunity, within thirty days, to present oral or written arguments. The superintendent's designee shall be known as the Appeal Review Officer.

Within fifteen days after the appeal, the Superintendent shall render a written decision which shall be the final administrative determination. Such determination shall be binding. Notification shall be sent to all parties along with the effective date of the determination and notice of the right to appeal to a court of competent jurisdiction.

§3220

Every educationally handicapped pupils program shall meet the following standards:

a) Be the most appropriate program in the Education Code to meet the specific needs of the pupil and provide for differential grouping of pupils according to specific instructional and management needs of the pupils;

b) provides systematic procedures to assure equal opportunity for referral and assessment for possible participation in educationally handicapped pupils programs;

c) provides a priority system of enrollment based on severity of handicap. First priority shall be given to pupils eligible for the home and hospital program, second priority to those eligible for special day classes, and third to those eligible for learning disability groups.

d) "emphasizes the amelioration of handicapping conditions to the greatest extent possible and in the shortest period of time;"

e) makes adjustments in curriculum and learning areas for the pupil's achievement of his/her fullest potential and continued development in areas of pupil strength;

f) provides career education, vocational education, work experience, and work study programs for pupils who could benefit from such programs;

g) "provides the educational, psychological, pupil personnel and health services necessary for pupil assessment, program planning evaluation and consultation;

h) provides for curriculum development, inservice education, consultation and supervision for the staff;"

i) provides coordination of services;

j) provides an individual educational program for each pupil based on identified disability;

k) provides for monitoring and evaluation of programs and results; and

l) provides for notification, consultation and consent of parents concerning eligibility, program objective, and enrollment of the pupil in the educationally handicapped program.

§3221

Special Day Classes shall meet the following standards:

a) be composed of pupils whose range of handicaps can be managed within their class, and provide for differential groupings of pupils according to specific educational objectives;

b) be maintained for the same time as regular school except:

1) when the governing board or county superintendent of schools "cannot provide more than one program option for educationally handicapped pupils, parttime assignment between special day class and regular school program for those pupils whose prognosis indicates full return for the regular program may be made by admission committee action." Such combined attendance shall equal the regular length of the school day.

2) When pupils can benefit from attending a special class less than a minimum school day.

c) if taught by a full-time teacher whose sole responsibility is the instruction, supervision and coordination of all educational activities of the pupils enrolled in the special day class;

d) is taught by a teacher who holds credentials in special education for learning handicapped or severely handicapped after August 1, 1976.

§3222

A learning disability group shall meet the following standards:

a)"provides special education that, in conjunction with the pupil's regular program of instruction, enables the pupil to effectively participate in the total school program";

b) provides coordination of instruction with the pupil's regular program of instruction;

c) provides specialized learning on a daily or less than daily basis to ameliorate the handicap identified in psycho-educational and health studies in the shortest period of time;

d) is composed of pupils whose range of handicaps can be managed within the group;

e) is limited to pupils enrolled in the educationally handicapped pupils program by recommendation of the admissions committee;

f) shall not enroll a pupil for more than one-half of the regular school day, except where the pupil would otherwise be denied services or a program;

g) "limits a part-time teacher of learning disability groups to a total enrollment that is the same proportion of 32 as the number of minutes taught in learning disability groups is to the length of the regular school day,"

h) only direct instruction time in a learning disability group can be credited for attendance accounting purposes;

i) only time related to instruction, coordination, and preparation for instruction relating to learning

disability groups shall be including in computing full teacher equivalents;

j) is taught by a teacher holding specialist credentials in special education for learning handicapped or severely handicapped, after August 21, 1976

§3223

HOME INSTRUCTION

Pupils enrolled in home and hospital instruction shall receive at least 300 minutes of individual instruction per week, or between 150 and 300 minutes per week as dictated by reasons of health.

Such pupils shall be taught by teachers with special education credentials for learning handicapped or severely handicapped pupils.

§ 18100

DEVELOPMENT CENTER

Development Center for Handicapped Minors as specified in this chapter, means a development center for the supervision and instruction of handicapped minors as authorized by Article 2 of Chapter 5 of Division 12 of the Education Code.

Each center is separate and distinct and shall be approved by the Superintendent of Public Instruction.

POLICY GUIDES

CALIFORNIA MASTER PLAN FOR SPECIAL EDUCATION.
California Department of Education, 44 pages.

The plan includes the goals of the program; the responsibilities of various state agencies and the school districts; the components of a special education program; the evaluation and information systems; and personnel training and development. Specific guidelines and objectives for achieving each of these provisions are also described.

2. Programs for Exceptional Children

Statutes

§22-20-10

The department of education shall pay the costs of maintenance, in a family care home, for those children enrolled in special education programs, for the handicapped.

§22-20-102 -- 22-20-105

It is the intent of the general assembly to provide "educational opportunities for handicapped children." These children shall be instructed in regular classrooms however, regular classroom instruction shall be replaced by special education classrooms if the child's handicap warrants it. The department of education shall assemble and maintain a system of textbooks and equipment for the education of visually and hearing handicapped children.

§22-20-106 -- 22-20-107

Administrative units [school districts] shall submit plans to the department of education for approval of their special education programs. Each plan must include the type and number of children, services to be provided, and the resources necessary. Administrative units may contract with each other, institutions of higher learning or community center boards to provide education programs for handicapped children.

EDUCATION PLAN

§22-20-108--22-20-109

"The determination that a child is handicapped . . . shall be made by a [designated] committee of profesionally qualified personnel," the composition of which shall be prescribed by the state board in accordance with the mandates of this statute. Parents of a handicapped child will be given an opportunity to consult with the committee. The local board of education in the child's school district shall give "final approval" to the enrollment of the child in a special education program.

IDENTIFICATION

If an administrative unit cannot provide the services needed, it may contract with another unit for the needed program, and the child's residence unit shall reimburse the unit providing such services.

§22-20-111

Administrative units that maintain special education instructional materials and a specialist instructor shall be eligible for reimbursement of cost incurred in providing these services.

§27-35-101; 109

SCHOOL FOR THE DEAF AND BLIND

"There shall be permanently maintained an institution for the support and education of the deaf and blind residing within the State of Colorado."

"Every blind, deaf, or mute citizen of the state of Colorado under twenty-one years of age is entitled to receive an education in said school at the expense of the state unless such person has a physical or mental condition which would render his[her] instruction impractical. All applicants above the age of twenty-one years may be admitted at the option of the executive director of the department of institutions."

The governance and operations of the school are set forth in the statute.

REGULATIONS

2220-R-2.0

PROGRAM APPROVAL

An applicant seeking to qualify as a special education unit must satisfy the following standards:

Have an average pupil enrollment of 4,000 or 400 handicapped children in special education programs;

Have boundaries encompassing a geographic area of manageable size;

Employ a qualified special education director, who shall be responsible for development and delivery of the programs permitted by the Handicapped Children's Educational Act;

Provide administrative support for special education programs which will allow compliance with these Rules.

A comprehensive plan shall be developed and administrative units are to update these plans and make new submissions, for Departmental review every three years. A copy of any major change shall be filed with the Department.

An advisory committee shall be formed, one fourth of which shall be parents of handicapped children, and shall aid the administrative unit on all aspects of the program, but shall have no administrative or decision-making authority.

Those districts or boards who desire to form new administrative units are to submit, to the Department, a letter of intent by November 1 of each year preceding the operation of the unit. The letter shall specify objectives that the change shall influence and propose how the unit will comply with these rules.

The Department has thirty days to review letters of intent and calendar it for a decision.

The decision-making process shall not exceed thirty days without the consent of the affected applicant, however if an impasse occurs the State Board of Education shall resolve the issue.

A determination denying an administrative unit shall be followed by written reasons for denial and specific steps for satisfying the objectives of reorganization. The affected applicants must then negotiate with the Department. However, if within thirty days a satisfactory resolution is not reached, an appeal to the State Board may be taken.

An approved, new administrative unit has six months to develop a comprehensive plan.

ADMINISTRATIVE PLAN

An approved administrative plan shall:

Contain a description of the characteristics of special education administrative unit as distinguished by demographic, geographic, sociological and economic factors.

Describe programs and services to be provided for each handicapping condition defined in this section.

Describe the administrative structure of the unit specifying proper procedures to meet or exceed minimum standards in these Rules.

Detail the financial commitments and agreements of

participating districts for special education programs and services.

Provide for a system which maintains the quality of special education programs which also calls for regular evaluation of programs and student progress.

Provide a special education advisory committee, including parents of handicapped children.

Describe procedures to be utilized in satisfying record keeping and reporting requirements as stipulated in these Rules. Add procedures providing instructional materials.

2220-R-3.0

IDENTIFICATION

Local administrative units shall make all efforts to seek out and identify those children, from five to twenty-one years, who may be in need of special education and to refer these handicapped children to available special education programs.

REFERRAL

Children referred for special education programs shall have their records reviewed in a search for information that would be helpful in properly placing or determining, if there is a need, for further assessment. Parents of children referred shall be informed of any referrals and conclusions thereof and of procedures followed to resolve any differences.

Prior to assessments being undertaken, school authorities shall:

Notify parents of reasons for the assessment, offering them opportunity for a conference in which the language of the parent shall be used.

Obtain written permission for the assessment and if the parent refuses, and there exists a danger of harm to the child if services are not given, the local board may institute court dependency proceedings to obtain authorization for assessment. Parents may use the appeal process required by these Rules.

In a situation where the child's parents are unknown the school may seek a judicial declaration as guardian ad litem for the child to enable rendering of the services

needed in the child's best interest.

To properly protect the child being assessed, personnel conducting evaluations must be certified, or otherwise approved and instruments used must control for cultural or ethnic bias.

Assessment shall be conducted in the safest most accurate manner possible; therefore children shall not be placed in special education programs because of an inability to read or write English.

ASSESSMENT

Each administrative unit is responsible for the conduct of its staff and assessment procedures used.

Qualified professionals shall select appropriate assessment procedures for detecting a handicapping condition, to determine its level and intensity and identify the child's education needs.

Educational assessment includes the following: academic history, evaluation of educational environment, consideration of vocational and avocational needs, and evaluation of current academic status.

Health history shall relate information relating the child's birth history, health habits, family health, significant illnesses, accidents, injuries or operations, medications used, screening results, height, weight, body build, medical observations . . . .

A child may be placed, with parental permission, by the director of special education or designate, in a special education environment for a twenty day diagnosis. A child so placed must be staffed before being admitted to a special education program.

If an assessment has been completed parents may submit to the director copies of those records, to be reviewed by the staffing committee in evaluating the child for special education. Use of records of independent assessment call for written parental consent.

PLACEMENT

A committee of professional personnel shall make all determinations as to placement within special education programs. A consensus among committee members is required.

The committee shall have: a special director, school

building administrator, teacher or counselor and a special educator;

Problems of reduced hearing or visual acuity shall require specialist in those areas;

A school psychologist or social worker, nurse, audiologist, physical therapist, speech correctionist, blind mobility specialist and others who have contributed to the child's assessment.

If assessment indicates that a child's condition might be better served by a community center program, he/she shall be so placed, pending parental approval of the staffing committee recommendation.

Members of staffing committees shall not simultaneously serve as designee of more than one other member of the committee.

The staffing committee shall: certify that sufficient assessments have been completed, provide professional interpretation of formal and informal assessment results, identify special education needs of a child, determine a child's need for special education placement as described in these rules, properly place the child in a special education program and place the child in the least restrictive program alternative, and minutes of meetings.

Parents shall receive, timely, written notification of staff so that they may participate in the staffing. Parents shall also have the right to be represented by counsel at staffing or conferences.

2220-R-4.0

A child shall be placed in a special education program that is the least restrictive alternative to meeting his/her needs.

Prior to being placed a staffing committee representative shall meet with the child's parents and present, in writing, a determination of special education need with recommended placement; available alternatives; access to school records pertaining to their child; procedures for review; and appeal procedures.

PLACEMENT

Written parental permission for special education

placement must be obtained, however. If such is refused, the local board may take appropriate action.

If a child, in a special education program, changes districts he/she is to be placed in a comparable program in the new district provided that: written parental permission for the placement is obtained; thirty school days after the child's records are received he/she shall have been staffed; and transfer students shall not be favorably treated over those already waiting placement.

A handicapped child who cannot be accommodated in his/her residentiary administrative unit, due to justifiable cause, shall be served in another unit.

When the assessment and staffing process result in a recommendation or referral for placement in a community center, the state School for the Deaf and Blind, state home and training school, or other state institution, program or service, administrative units and the Department shall cooperate with such agency to secure services for the child.

An administrative unit may contract with a community center to provide services for seriously handicapped or retarded children by a written, executed contract expressing mutual obligations and expectations.

Annual reports on the services rendered and individual progress of each child shall be placed with the administrative unit.

For those special cases a referral may be made for placement in the Colorado School for the Deaf and Blind, state institutions for the mentally handicapped and emotionally disturbed and other state or county agencies. When a child is not accepted into an appropriate institutional program the case shall be referred to the Commissioner of Education for disposition. Expenditure of Handicapped Children's Funds shall not be used for the placement of pupils in private institutions.

2220-R-5.0

Those children who have been placed in special education programs for the handicapped shall participate in these programs as long as there is a need for such a restrictive environment. The cases of such student shall be reviewed, for less restrictive programs annually or more frequently as circumstances dictate.

REVIEW

Program adequacy and the need for other placement shall be made by the reviewing staff committee, if the placement is in a community center and by institutional administrative staff, if the placement is in an institutional program.

The annual review shall be conducted by committee consisting of: director of special education, school administrator or designate, regular and special educators and or support staff assigned specific responsibilities for the child's special education program and those having additional knowledge about the child.

Those making decisions as to change of handicapped program shall be of the same discipline composition as the original staffing committee specified in these Rules.

The review staffing committee may recommend: a continuation placement indicating that the child does not need a program change, alternative placement which allows a change in the program so that the child can be better served, or termination which signals an end to special education.

Procedures for conducting special, annual and termination staffing shall be the duty of administrative units, such procedures providing that: parents be notified of such meeting in time to attend; parents may disagree with the annual review by filing an appeal. Reports of the review shall be placed in a pupil's records or personally delivered to parents.

2220-R-6.0

Appeals procedure, of staff committee findings and recommendations, shall be developed by administrative units.

APPEALS

These procedures shall be part of the administrative

units comprehensive plan submitted to the Department.

The Department shall approve procedures meeting the standards in this section and establish a rule compliance calendar.

Parents have a right to appeal policies and procedures of: classification of children in categories of handicapped condition; determination of child's eligibility for special education; and the recommended program placement.

Appeal time limits are to be set for their completion which are not to exceed eighty days from the date of the staffing committee meeting. Policies and procedures must provide for: timely notification of parties; representation by counsel; cross examination of witnesses; presentation of evidence; and an impartial hearing.

The policies and procedures must detail the steps to be followed by the local board in making its final decision on appeal.

Such policies and procedures must specify how the administrative unit will provide for the education of the child during the period in which the finding and recommendations of the staffing committee are being considered.

2220-R-7.0

The following are approved methods of delivering services to handicapped children:

Consultive assistance to the regular classroom teacher wherein the child continues full-time under the responsibility of the regular classroom teacher who receives help from a special education consultant to develop means to meet the child's needs. The consultant shall work with the child and modify the program as needed.

Itinerant services, where the child receives full time instruction from a regular classroom teacher and special assistance in certain areas, as a supplement to regular classroom instruction.

Resources classrooms which expose the child to instruction from regular classroom teachers and part-time special education teachers.

A self-contained classroom which places the child under the full-time direction, of a special education teacher who has direct responsibility for the child's education. Regular art, music and physical education programs may be used to supplement the special education program.

A work-experience-study program shall expose the handicapped child to a work program; this program is to be maintained by a consultant or coordinator. This program may be part of, or apart from, other types of service alternatives.

HOME-HOSPITAL PROGRAM

A home-hospital program which provides educational instruction to a child not attending private school or participating in an institutional program by assigning him/her an itinerant teacher.

The following variations from these standards are approved without special application for variance and prior departmental approval, subject to the conditions and restrictions specified:

Self-contained and resource classroom maximums may be exceeded by no more than two students or by four, when a full-time classroom aide is available.

Handicapped children with different impediments but similar educational needs in the same educational program, when justified.

Maximum teacher caseloads shall be a compromise between those specified for the different handicapping categories. The interest of the child shall rule such compromises.

Teachers of such programs shall be endorsed in the handicapping category of the majority of their case load.

Properly assigned home/hospital and specialty teachers shall be provided as needed to satisfy student needs, but do not require special education endorsement.

Support staff services shall be controlled by individual educational objectives; such services may be supportive of regular or special education programs and when physical and/or occupational therapy is provided, it shall be considered with the recommendation of a licensed physician.

The Department of Education shall be the qualifying body for any person receiving reimbursements under the Handicapped Children's Act.

All professional personnel shall have been approved, in some manner, by the State in their area of assigned professional service.

Each administrative unit will determine the qualifications and competencies required of instructional aides, secretaries, and other non-certified personnel claimed for reimbursement.

Administrative units, unable to employ properly endorsed teachers must have the local special education director apply for temporary, non-endorsed, teacher eligibility. Any approval shall run for five years from date issued, renewable subject to the following conditions:

STAFF

The individual has a valid Colorado teacher's certificate or letter of authorization.

The employing administrative unit certifies that it has made reasonable efforts to hire an endorsed special education teacher but none could be found.

When the administrative unit, annually, show evidence of reasonable progress toward the endorsement program within the five year period.

Application for another term for the same temporary teacher shall not be approved unless the first temporary teacher's eligibility has been completed or the second endorsement program could be completed within the same five-year period specified in the first request.

Administrative units shall make those needed instructional materials available for the handicapped children program.

Special education instructional centers may be operated as part of the general instructional materials center.

The resources of the Colorado Instructional Materials Center for the Visually and Hearing Handicapped may be utilized by administrative units in their instructional programs. Procedures for use of these resources may be established and recommended to the units by the Department.

Administrative units shall provide approved special equipment for use in educating handicapped children. All facilities that accommodate the instruction of handicapped children shall be free of architectural barriers, and otherwise adequate.

School related transportation of handicapped children shall be provided, when necessary, to assure access to appropriate educational services.

Those administrative units who provide services to handicapped children under five should utilize appropriate child find, family consultation, referral services and direct services.

2220-R-9.0

Administrative units shall maintain adequate records.

The record shall include for each child assessed: signed permission forms; written assessment records; written records of staffing; review, termination or appeal conferences, handicapped child progress reports; and an individual education program.

RECORDS

A record shall be maintained indicating endorsement or approval and assignment of special education personnel. The record shall contain evidence denoting progress toward completion of the endorsement within the stipulated time, for those with temporary teacher eligibility.

A record shall be maintained for each school year showing:

Number of children assessed; number determined to be handicapped by condition; number of students awaiting and placed by handicapped condition.

"Administrative units shall have on file information documenting the operation of a special education advisory board."

Individually identifiable records of students placed in special education program are confidential and shall not be disclosed. Such records shall be maintained for three years.

Administrative units shall submit annual status reports summarizing information required by this section.

2220-R-10.0

Administrative units shall provide programs and services which reasonably comply with the criteria, regulations and standards set forth in these rules or establish a claim for variance based upon conditions indigenous to the administrative unit.

The Department of Education shall monitor special program operation in the following ways:

Analysis and evaluation of all reports applications or other data submitted by the administrative units to the Department.

EVALUATION

An on-site review of programs and services provided which is to be followed, within sixty days, by a written evaluation of the program's accomplishment of Handicapped Children Education Act goals.

Administrative units shall have an opportunity to respond to any written evaluation.

Action shall be taken to implement any changes that have been identified by the on-site visits.

Determination of administrative unit compliance with these rules shall be based on Departmental monitoring of activities allowed in this section.

An administrative unit found conducting a program that does not satisfy these Rules shall be provided the discrepancies with recommendations for their correction and shall have one year to make corrections or file a claim for variance. The administrative unit also may be subject to termination of state funding if the discrepancies are not corrected.

CROSS REFERENCE

III.B.Teachers; Regulation 2260-R-7.0

2. Programs for Exceptional Children

Statutes

§10-76b

The state board of education shall supervise the educational programs and services for children requiring special education and "may regulate curriculum, conditions of instruction, physical facilities and equipment, class composition and size, admission of students, and the requirements respecting necessary special services and instruction to be provided by town and regional boards of education. The educational aspects of all programs and instructional facilities . . . shall be subject to the approval and supervision of the state board."

The secretary shall, by regulation, designate the procedures which shall be used to identify exceptional children. RULEMAKING

The state board shall be the agency for consultation with federal agencies, other state agencies and private bodies on matters of public school education of children requiring special education.

The state board of education shall periodically evaluate the progress and accomplishments of special education programs. They shall also review, with "the joint standing committee on education of the general assembly," the types of projects funded and the evaluation of programs dealing with special education.

§10-76d

Each town or regional board of education shall provide professional services to identify school age children requiring special education; determine the eligibility of such children for special education; prescribe programs for eligible children; and maintain records and reports. EVALUATION The parent or guardian of a child for whom an evaluation is conducted shall be given at least three school days notice prior to the meeting and shall have the right to be present at and participate in the meeting at which an educational program for the child is discussed or developed. NOTICE

The responsible town or regional board shall inform the parent or guardian immediately upon the formal identification of any child as a child requiring special education. "No school-age child requiring special education shall be excluded or exempted from school privileges except with the express approval of the secretary."

Each town and regional school district shall provide special education for school-age children who require special education programs, and for pre-school children whose educational abilities would be greatly impaired without special education provided at an early age. This obligation will terminate when the child graduates from high school or reaches age twenty-one.

The state board of education shall define criteria for determining whether a child is eligible for special education.

The board of education may, with the approval of the state board, make agreements with any private school, agency or institution to provide the necessary pre-school special education program, provided such private facility has a program which meets the special education needs of the pre-school children.

Each town or regional board of education may provide special education for children who have "extraordinary learning ability" which requires programs beyond the level of the regular school program.

With the consent of the parent, any town or regional board may make agreements with any private school, public agency or institution to provide special education programs. Expenditures for contracts made with private schools will be reimbursable by state only if the contract describes the education program and its goals and objectives, and if the public school system cannot provide the special education. The secretary of the board of education shall make this determination based on such factors as the child's needs and the suitability of the program.

Any school district which provides special education shall also provide transportation, tuition, room, and board for children who are placed in a residential facility because of the need for services other than educational services . . . .

No additional children, who have been identified as requiring special education services, shall be placed in a private school, agency or institution outside of the state, except when no public or approved private facility is available in the state; it would be less expensive than an existing special education program in the state. No placement in an out-of-state private special education school, agency or facility shall be approved unless such school, agency or facility first agrees in writing to submit to the state department of education any financial program and student progress reports as the secretary may require.

Each board shall review annually and make a report as to the progress of each child and shall submit the reports to the state board.

Whenever a board determines that a child who has received special education services in private facilities for three years must receive such services for an additional period of time, the board shall annually review the progress of the child prior to approving or disapproving for purposes of reimbursement . . .
§10-76h

A parent or guardian of a child requiring special education may request a hearing on and a review of: diagnosis, evaluation of the program, or exclusion from school privileges.

HEARING

The hearing shall be granted within ten days after receipt of request. A written copy of the decision shall be sent to the parent or guardian within ten days of the hearing, together with a statement of the parent's right of appeal to the state board of education.

APPEAL

The appeal may be taken within thirty days and

at the expense of the board of the school district; the board shall supply a copy of the transcript to the parent or guardian and to the state board.

The appeal may request the state board of education to review the diagnosis, program evaluation, or the exclusion from school privileges by the district board of education.

A parent of a child requiring special education may . . . agree in writing to submit such matters to be reviewed to the secretary for mediation. Within fifteen days of receipt of a request for mediation, . . . the secretary shall appoint a mediator who shall attempt to work out a solution which is acceptable to both the local board and the parent of the child. The state board shall establish a hearing board of not less than three persons knowledgeable in the fields and areas significant to the educational review of such child. Members may be either employees of the state department or qualified persons from outside the department."

Within thirty days after receipt of the request, the hearing board shall review previous records. The hearing board may hear any additional testimony that it shall deem relevant. It may require a complete and independent diagnosis by qualified persons, the cost of which shall be paid by the board of education of the school district. All formal sessions of the hearing and review shall be transcribed by the hearing board.

The hearing board shall have authority to confirm, or reject any diagnosis, evaluation, educationl program prescribed, or exclusion or exemption from school privileges and prescribe alternate special educational programs for the child. "If the board of education of the school district responsible for providing special education . . . does not take action on the findings or prescriptions of the hearing board within fifteen days after it receives

same, the state board of education shall take appropriate action to enforce the findings or prescriptions of the hearing board." Appeal from the hearing board's decision may be made to the court of common pleas within 30 days of the board's decision.

§10-76i

An advisory council for special education, composed of fifteen members, shall advise the state board of education. The secretary of the state board shall appoint the members for three-year terms and vacancies shall be filled in the same manner as original appointments. No member shall serve more than two consecutive three-year terms.

APPOINTMENT

The advisory council shall elect its own chairperson and officers. The members shall serve without compensation but shall be reimbursed for reasonable expenses.

COUNCIL OFFICERS

The advisory council shall review the regulations, standards and guidelines on special education and recommend any necessary changes; make comment on proposed or revised regulations and participate in the development of a plan for providing special education.

The advisory council shall review, with the joint standing committee on education, the progress made by the state and make recommendations for improvement of special education services.

§10-76j

"The state board . . . shall make and keep current a five-year plan for the implementation of special education policy" set forth by law. The plan shall include: A census of children requiring special education . . .; an inventory of personnel and facilities available to provide instruction . . . .; an analysis of the present distribution of responsibility for special education . . .; a formulation of goals, objectives and strategies necessary to achieve compliance with . . . law; a program for recruitment . . . and inservice training . . . in special

education . . .; procedures for identification, screening and diagnosis of children requiring special education . . .; standards for the education . . . to be received by children requiring special education; a program for the acquisition . . . and maintenance of . . . facilities needed to implement the provisions of special education law; a policy . . . for private schools . . . and services for those requiring special education; a delineation of the roles of program personnel; and an analysis of the present formula . . . of financial support . . . and recommendations to insure maximum use of funds . . . ."

Professional organizations, parent groups, local school boards and state agencies may participate in the development of the state plan.

§10-76K

Any school board, public or private nonprofit organization or agency may develop experimental education plans and submit them to the state board, provided all such plans are first approved by the local district school board. Each plan shall specify. . .: "time objectives . . .; methods of evaluation . . .; the area to be served . . .; the policies . . . to be employed in the selection of pupils; the policies . . . with respect to the operation of the project . . .; the size, site, and . . . estimated cost and method of financing . . .; the expected sources of financial support . . .; the policies and standards with respect to professional staff . . .; provision for direct participation" by community members in the project. Acceptance by the state board of an experimental educational project shall constitute compliance of the plan with law.

"The state board shall furnish assistance to all applicants in the planning and developing of projects."

All experimental educational projects shall be evaluated at least annually.

§10-76l

Town and regional boards shall evaluate the progress and accomplishments of special education programs and shall submit annual evaluation reports to the secretary of the state board.

§10-76n

The state board shall continue to maintain the "special education resource center." The secretary of the state board of education is authorized to accept and allocate federal funds for this purpose.

§10-94a

The state board of education may spend up to $3600 per year per child to send children with "perceptual learning disabilities" to institutions outside the state for special education services.

§10-190

LEAVING CERTIFICATE

The secretary of the state board of education may issue a "leaving certificate" to an educationally retarded child without the child having completed eight grades of school.

§10-94g

When the secretary of the state board . . . determines that a child may require special education and the child's parent is unknown or unavailable or the child is a ward of the state, the secretary . . . may petition . . . for the appointment of a surrogate parent who shall represent the child . . . . The petition shall be verified . . . and shall explain why the child meets the criteria . . . and the name of a proposed surrogate parent . . . .

Upon the filing of a verified petition . . . the juvenile court shall issue a summons requiring the parents . . . to appear in court . . . and the cost of the service of any such summons . . . shall be paid by the state board of education.

§10-94h

When the juvenile court determines that the child on whose behalf a petition was filed . . . meets the criteria . . ., the court shall appoint a surrogate parent who shall be the proposed surrogate parent named in petition, or if not that person, another person recommended by the secretary . . . upon request of the court . . . . The appointment shall be effective until the child reaches eighteen years old provided the secretary . . . may petition the court for an extension of the original order . . . and further provided the secretary may petition . . . for replacement of the surrogate parent. Upon the filing of such petition, the court shall issue a summons requiring the child and surrogate parent to appear . . . . If the surrogate parent is for any reason unable to continue . . . the secretary of the state board shall . . . petition the court in the same manner as for the first appointment.

REGULATIONS

§ 10-75b-1 ; 10-75b-2; 10-75c-1

All local and regional boards of education must provide approved special classes or programs for all children "identified by procedures approved by the state board of educaton as being mentally retarded." The board should make the superintendent of schools or another staff member responsible for programs for the mentally retarded. If a town has 10 or more special classes for mentally retarded it should employ a supervisor who holds an appropriate certificate issued by the state board.

There must be "a complete appraisal by appropriate professional personnel...before a determination of mencal retardation is made." This should include comprehensive psychological and medical evaluations and a "report of the child's developmental, social, educational and medical history," any additional necessary reports and professional conferences.

"For initial placement," reports may be no more than 2 years old. A conference with the parents must be held before a child is placed in a special program for the mentally retarded. "Evaluation of children appraised as mentally retarded shall be continuous."

The local board of education should provide transportation for mentally retarded children as necessary. § 10-75b-1; 10-75b-2; 10-75c-1

The board must obtain prior approval, for special education programs from the state board on an annual basis.

The curriculum for educable mentally retarded children aged 16 and over "shall include an educational work experience program..."

"The types, maximum class enrollment and age ranges of special classes for mentally retarded" should conform to the tables included in the regulation.

"Special classes for educable mentally retarded children" should be held in schools which conduct regular classes for children who are their age peers. Trainable and educable children should not be in the same class. Schools that have special classes shall provide for "participation of mentally retarded children in appropriate aspects of the total school program." The school day for educable children shall be the same as for children in regular classes. Trainable children between ages 6-13 should attend school at least 4 hours a day, and those between 13-21 shall attend the same hours as children who attend regular classes. § 10-76b-5

"Special classes and resource rooms in which public school special education programs for exceptional children are constructed shall be part of the public schools housing children in the regular school program." The ratio of special to regular classes shall not exceed 1 to 3. The local board must provide necessary special education equipment and materials.

"The number and age range of exceptional children assigned to a special class..." must be approved by the secretary of the state board.

The local board should establish a plan for the identification of children who require special education and submit the plan to the secretary for approval. The plan should include (1) "professional personnel to be included in the planning and placement terms," (2) guidelines for "preliminary identification; (3) the procedures by which staff members...shall refer children to the planning and placement team for future study...; (4) the procedures...by which the...team shall determine whether future diagnostic study is necessary....

PLACEMENT

"The planning and placement team shall make an evaluative study of any child who may require special education...to determine whether special education is required and to establish the scope of the program." Each child's progress in the program shall be reviewed by the team at least annually. If a child needs special education, his or her parents must "be advised of the nature of his [her] exceptionality and the purposes... of the proposed special education program."

If a child has "more than one significant handicap... the special instruction...needed to meet each such handicap" shall be provided. A local board shall establish a special class when there are "at least four pre-school or six school-age handicapped children for whom special education is required and who need and may be taught effectively together in a special class."

Speech impaired children should be provided "the services of a speech and hearing clinician for at least two thirty-minute periods per week."

If the planning team determines "that a child needs a special education program in the school setting," the local board must provide the program within 12 weeks. "Home instruction shall be provided only when recommended

by the planning and placement team based on evidence that no other educational program is possible" and at least one of the following is applicable: (1) the child cannot attend school for medical reasons; (2) the child cannot be in school because of the severity of his or her handicap or the possible disruption his or her presence could cause; (3) "a special education program is being planned; (4) the child is pregnant...; (5) the parents of the child are unwilling to accept the special education program offered by the board of education; (6) home instruction is recommended "as a supplement to the child's in-school program." The special education services provided to handicapped children receiving home instruction should be "equivalent to those provided to such children in school."

HOME INSTRUCTION

Exceptions to these regulations may be allowed by the secretary of the state board upon request of the local board if it is in the best interests of the children.

EXCEPTIONS

§ 10-76b-9

The local board of education "shall maintain records concerning all exceptional children and shall provide for the...confidentiality of such records."

The local board shall report to the state board of its special education programs as required by the secretary.

§ 10-75g-27

Local boards of education "shall provide or pay for the transportation for speech or hearing handicapped children to school or lessons if the state board approves. The local board may also be reimbursed for the transportation costs of a speech and hearing teacher.

§ 10-766-2 -- 10-766-3

The local board of education, "shall establish a sufficient number of special education planning and placement rooms" to identify and plan "for all children requiring special education." If a board employs 15 "full-time special education personnel," the

superintendent should make a staff member responsible for special education programs. Special education supervisors should be employed in the following ratios: 1 supervisor to 15-29 personnel; 2 supervisors for 30-49; 3 for 50-74; 4 for 75 or more. Responsibility for coordinating a service should be assigned to a staff member in each of the following pupil personnel services if there are between 4 and 12 full time personnel in that category: social work, psychological, speech and hearing, guidance and counseling, and school health services. If more than 12 staff members are employed in any of these specialties, there should be a full-time supervisor. Special education aides should be supervised by certified personnel.

Children in special education programs should be given "the opportunity to participate in all aspects of the total school program" within their capacity. "The board of education shall provide educational programs...for handicapped children" culminating in high school graduation "for all except trainable mentally retarded children." A vocational education program should be provided for children ages 16 and over "who are mentally retarded or whose educational and vocational potential makes such programs desirable."
§ 10-766-4

The school day for children in special education programs shall be the same as for children in the regular programs of the school, except the day may be four hours for mentally retarded children under age 13 or emotionally disturbed children.

Special education staff members should be provided "sufficient time during the school day...to consult with other staff members and parents."

III.B.Teachers; Regulation §10-146-10 -- 10-146-15

III.B.Teachers; Regulation §10-146-24 -- 10-146-26

STATUTES

§203

The Board may provide special schools for persons whose educational needs are not being met in regular classes or schools. Such schools may include but are not limited to, schools for persons who are orthopedically handicapped, socially or emotionally maladjusted, or mentally handicapped educable or trainable, or for persons who suffer hearing or speech impairment, or for persons who are truant or insubordinate.

§606

A handicapped pupil who is a resident of a state or country other than Delaware or the United States may be accepted, at the discretion of the receiving district, to attend a Delaware special school under the following restrictions:

Handicapped children may be accepted for admission to special school after a certification from the State Superintendent of Public Instruction that provisions have been made for all eligible in-state students by the special school.

The full tuition shall be paid in advance, such costs reflecting all state, local district and federal expenditures for the education of the handicapped students attending the special school, excluding pupil transportation costs which shall not be the responsibility of the receiving Delaware school district or the state. State costs shall be reimbursed to the General Fund of the State and local district costs shall be retained by the receiving district.

§3102

The State Board shall make and adopt rules and regulations for the education, training and transportation of handicapped, gifted and talented children.

§3103

The Board and the local school boards shall provide and maintain classes and facilities to meet the needs of all handicapped, gifted, and talented children within the State.

§3104

The Board shall use, or transfer for use any fund appropriated to it for the education and training of handicapped, gifted and talented children.

§3105

The principals, superintendents, teachers, and visiting teachers, shall, when known, report to the Board by May 15 of each year on the identity of children between the ages of 5 and 21 who are in need of special education and not receiving it. These children shall be examined and evaluated as to their fitness for special education and training.

§3106; 3107

The Board is also designated as the agency for the care and education of deaf persons. Its duties in this connection shall be in addition to any other duties which it may have in regard to deaf persons. In addition, costs for board, maintenance and instruction of deaf persons shall be borne by the Board, however, the amount paid shall not be greater than the sum paid by or for other persons in the same institution.

§3108

The Governor shall appoint an advisory committee on the needs of exceptional children to serve in an advisory capacity to the Board and the Board of Trustees at the Delaware State Hospital at Farnhurst.

§3109

The Board may enter into agreements with any local school district whereby the Board will reimburse the district for part or all of the cost of educating handicapped children who are institutionalized.

§3110

The Board is designated to make rules and regulations to carry out the provisions of this and other titles relative to identification, evalution, education, training and transportation of exceptional persons.

The rules promulgated shall provide criteria by which handicapped person, ages 4 through 20, shall be assigned to public school facilities or if necessary to private institutions.

§3120

The State of Delaware shall provide . . . for the free and appropriate public education designed to meet the needs of handicapped persons. The Board is charged with the responsibility of implementing the handicapped education program.

§3121

Each school district or state agency responsible for the care of Delaware citizens shall establish and maintain programs and facilities to meet the educational needs of handicapped persons.

§3122

Each school district is to identify, locate, and evaluate handicapped persons residing within its boundaries and in need of special education. The identification system is to provide information concerning the time, method of evaluation and describe the training, education and location of such training. People not receiving training, education or related services are to be identified with reasons for their lack of involvement. Medical treatment shall not be administered to those objecting to such treatment.

§3124

"Any school district administering a program for autistic children may provide from its own personnel or contract with another state agency, or a private service provider if necessary for appropriate supportive services; including, but not limited to, physical, art and music education, psychological services, language and speech therapy, physical and occupational therapy. The supportive services to be provided shall be based upon a program for each child as approved by the State Board of Education. Funds for such services are to be paid from the Educational Contingency Fund of the State Board of Education."

PRIVATE PLACEMENT

"Private placement with financial aid shall be granted only to a 'complex or rare' handicapped person defined as a person in the chronological age group 4 through 20 years inclusive, who is found to suffer from two or more of the defined handicaps, or who is so severely afflicted by a single handicap, that the total impact of the condition means that he or she cannot benefit from the regularly offered free appropriate public educational programs.

The determination shall be made by a committee appointed by the local board of education for identification, placement, review and dismissal of handicapped persons and by the State Board of Education that no school district or other state agency has a suitable free and appropriate program of education for the particular person. Such private placement shall be in a school/institution approved by the State Board of Education. The State Board of Education shall make the final determination concerning the designation of a person eligible under the provisions of this definition.

HEARING

In the case of dispute concerning the private placement of a child, the aggrieved party shall first be heard by the local board of education. Such hearing shall be conducted by an impartial hearing officer appointed at the discretion of the local board of education, but who shall not be an employee of the district involved in the education of the child or have any interest in the outcome of the hearing.

APPEAL

The ruling of the local board of education may be appealed to the State Board of Education. The decision of the State Board of Education shall be final in determining the private placement school or institution in which the authorized persons shall be enrolled.

'Financial aid' shall include maintenance, transportation and tuition as herein defined:

'Maintenance' shall mean the cost for room and board at a residential institution or in a residence approved by the institution in which a person is enrolled. Maintenance does not include the cost of health care or treatment.

'Transportation' is defined for in-state placement as the same number of dollars as provided for a nonpublic school student in accordance with rules and regulations of the State Board of Education; in the case of out-of-state private placement, transportation is defined as the amount provided for nonpublic school students or one round trip per year between Delaware and the school based upon actual air coach fare if that is the lesser amount or as determined by the State Board of Education if no air coach fare estimate is possible.

'Tuition' shall mean payment for instructional services, materials and supplies. Tuition does not include the cost of health care or treatment.

The amount authorized for payment shall be the amounts charged by that institution for tuition or program costs, transportation and maintenance in accordance with the definitions set forth herein."

§3126

The extent of programs and facilities provided for persons determined to be gifted or talented shall be in accordance with the rules and regulations of the Board.

IV.G.; Statute §604

IV.H.; Statute §2705

STATUTES

§31-203

The Board of Education may excuse from school a child who, upon an examination ordered by the board, "is found to be unable mentally or physically to profit from attendance at school." However, "if such examination shows that such child may benefit from specialized instruction adapted to [her]his needs, [she]he shall attend such instruction."

MEDICAL EXAMINATION

§ 31-1053; 31-1071

After consulting with the National Advisory Committee on Education of the Deaf, the Secretary of HEW may "enter into an agreement with Gallaudet College for the establishment . . . of a model secondary school for the deaf to serve primarily residents of the District of Columbia and of nearby States." Gallaudet College may also maintain an elementary school for the deaf "to serve primarily residents of the National Capital Region."

SCHOOL FOR THE DEAF

§31-1120

The Board may provide funds for "subsistence supplies and transportation for severely handicapped children . . . ."

REGULATIONS

CH. IV, §450

"The Public Schools of the District of Columbia shall provide an adequate, publicly-supported education for all students, including handicapped students for whom the regular program of instruction is inadequate to meet their special educational needs.

The following priorities are established for the provision of educational services to handicapped students: (a) Handicapped persons who are not currently receiving services; (b) Handicapped students within each disability group, with the most severe handicaps who are not receiving an adequate education; (c) All other handicapped students....

An individualized educational program shall be established for each student identified as in need of special educational services. The individualized educational program for each student shall be reviewed, and modified if necessary, on an annual basis or more often, if required.

PLACEMENT

Handicapped students shall be provided with a placement in the least restrictive educational environment which is adequate to meet their special educational needs. Where possible, special educational services shall be provided at the local school level, preferably in the classroom. Removal from a regular classroom setting shall occur only when the nature and severity of the handicapping condition require such removal in order to provide adequate educational programs and services to the individual student.

"Where special educational services can be adequately provided only by removing the student from the local school classroom, on a full-time or part-time basis, it shall be the goal of the individualized educational program for such student to return to the local school classroom as soon as possible."

CH. IV, §451

TESTING

". . . No single test or evaluation shall be used as the sole criterion to accomplish either of the following: (a) The identification of a student as handicapped in a specific disability category; (b) The placement of a handicapped student in any particular educational program. In all instances where these Rules require any evaluation, diagnosis, recommendation, or proposed placement, such actions shall include a team or group of persons who have knowledge or information of the following and shall be based upon the following: (a) The student's total educational and family situation, including adaptive behavior at

home and in school; (B) Socio-cultural information; (c) The physical and medical condition of the student; (d) The meaning of all results of evaluations and diagnostic tests; (e) All placement options; (f) The personnel available to provide the necessary special education and related services.

In all instances where tests and evaluations, the delivery of notice, or the conduct of a hearing are required by these Rules, the Superintendent of Schools shall ensure that students, parents, and guardians who do not speak or read English are afforded equivalent rights and services through the use of translations, interpreters, bilingual materials or other appropriate means.

"The following requirements and procedures shall apply to all tests and evaluation materials used pursuant to these Rules: (a) All tests shall be validated for the specific purpose for which they are used; (b) Tests and evaluation materials shall be selected and administered only by [or under the supervision of] persons who meet all applicable certification or license requirements; (c) Tests and evaluation materials shall be selected, administered, and interpreted in accordance with the purposes and instructions provided by the producer/author of such tests and materials; (d) Tests and evaluation materials shall include those tailored to assess specific areas of educational need and performance or ability, and not merely those which are designed to provide a single general intelligence quotient; (e) Tests and evaluation materials which are used to determine the aptitude or achievement level of students with impaired sensory, manual, or speaking skills shall be designed for and effective in determining actual aptitude or achievement levels rather than reflecting the student's impaired sensory, manual, or speaking skills...."

CH. IV, §452

"A student who has a physical or mental impairment, or a record of impairment, which is one or more of the following, and who is otherwise eligible, shall be eligible for special education programs and services: (a) mental retardation; (b) hearing impairment or deafness; (c) visual impairment or blindness; (d) speech impairment; (e) orthopedic impairment;

(f) other serious medical or health condition requiring special educational services; (g) serious emotional disturbances; (h) learning disability.

Local school programs and services shall be open for admission to all eligible students at any time. . . .

All students attending Public School programs for the handicapped or who have been placed in private facilities within the District of Columbia and immediate metropolitan area by the Public Schools shall be eligible for free transportation to and from school."

CH. IV, §453

"The Superintendent of Schools shall establish and implement a process for the identification of persons in need of and eligible for special educational services....

"Persons who are not currently enrolled in the public schools who are identified as eligible for and in need of special educational services shall be referred...[for assessment and placement]....

Students who are enrolled in and attending the public schools may be identified as potentially in need of special education services by any parent, guardian, teacher, administrator, counselor, pupil personnel worker, physician, public or private agency, or next friend....

In all instances where a case conference results in an agreement to continue the participation of the student in a local school program, a follow-up case conference shall be held each successive semester unless waived in writing by the parent or guardian. A follow-up case conference must be held, in any event, at least once each school year. The parent or guardian shall be informed of the right to request a referral for further assessment and placement at each follow-up case conference."

CH. IV, §454

"Upon referral for assessment and placement, the following evaluation and diagnosis procedures shall be followed: EVALUATION
(a) All records, reports, information, and data which relate to the student's special educational needs and eligibility for

services shall be compiled and reviewed; (b) The written permission of the parent or guardian shall be obtained for confidential evaluation and testing. Such written permission shall also authorize the Public Schools to obtain any existing data, information, or records from any agency or person which may contribute to the completeness of the educational assessment and diagnosis; (c) Additional tests, interviews, conferences, or other information required for evaluation and diagnosis shall be conducted or obtained and reviewed; (d) A confidential report shall be prepared and shall be reviewed and interpreted for the parent or guardian at a conference held for that purpose.

The written evaluation, diagnosis, and recommendation report shall provide for one of the following: (a) If the student is deemed to be in need of special educational services which can be provided in the local school program, the report shall recommend placement in a local school program. This shall constitute a placement; (b) If the student is deemed to be in need of special educational services which are not available in the local school program, the student shall be referred to the Division of Special Education for a proposed placement; (c) If the student is deemed not to be in need of special educational services, the report shall indicate that the student will remain in or is eligible for the regular school program. This shall constitute a denial of placement.

In any instance where parental permisssion cannot be obtained for the conduct of evaluation and diagnosis due to the refusal of the parent or guardian to grant such permission, the time limits imposed by this section shall not apply.

The following time limits shall apply to the procedures for evaluation and diagnosis: (a) In cases where pre-referral observation and educational assessment have occurred at the local school level OR in cases where an assessment of the student's special educational needs has been made by a private agency, another governmental agency, or a private physician or educational specialist, the evaluation, diagnosis, and recommendation shall be completed within twenty . . . working days of the receipt of the referral; (b) In cases where additional time is required due to lack of pre-referral observation and educational

assessment or other assessment information from outside sources... the evaluation, diagnosis, and recommendation shall be completed within thirty (30) working days of the receipt of the referral; (c) Failure to complete the evaluation, diagnosis, and recommendation within the required time limits shall constitute a denial of placement; (d) If a denial of placement hearing is requested due to a failure to meet the time limits imposed by this section, and a recommendation pursuant to either subsection 454.2(a) or 454.2(c) is made prior to the hearing, that recommendation shall be the subject of the hearing; (e) If a denial of placement hearing is requested due to a failure to meet the time limits imposed by this section, and a referral to the Division of Special Education is made prior to the hearing, such hearing shall be delayed pending the placement recommendation by the Division of Special Education, subject to the time limit modification required by subsection 454.6; (f) In the event that no recommendation or referral for placement is made prior to a hearing on denial of placement due to failure to meet the time limits imposed by this section, the subject of the hearing shall be the failure to complete the process within the required time limits.

HEARING

Upon referral to the Division of Special Education for a proposed placement, the following procedures shall be followed: (a) The placement specialist observes the student in the student's current educational setting or other environment; (b) The evaluation, diagnosis, and recommendation report is reviewed, and other information and data required are obtained and reviewed; (c) A placement conference is held with the student's parent or guardian; (d) A proposed placement is made in writing, stating the reasons for the proposed individualized educational program. The parent or guardian shall be given formal notice of the proposed placement.

The following types of proposed placement may be made by the Division of Special Education: (a) Placement in a local school program with special educational services; (b) Placement in a program operated by another agency of the District of Columbia for which the student may be eligible; (c) Placement in a private facility. The following time limits shall apply to

PLACEMENT

the completion of the proposed placement by the Division of Special Education: (a) Where a timely referral is made to the Division of Special Education, the proposed placement shall be made within thirty...working days of the receipt of the placement referral; (b) In any case where the placement referral has been made to the Division of Special Education after the expiration of the time limits required in subsection 454.4, the thirty-day time limit for the proposed placement shall be reduced by the number of working days taken to complete the evaluation, diagnosis, and recommendation beyond the required time limit; (c) In any case where a denial of placement hearing has resulted in an immediate referral for proposed placement to the Division of Special Education, the proposed placement shall be completed within the time limit imposed by the hearing officer.

Subsequent to a referral and during the assessment and placement process, the student shall be assigned to a local school program or other environment suitable for conducting compehensive assessment and diagnosis."

CH IV, §455.1

"In all instances where a student is identified as potentially in need of special educational services, the student's parent or guardian shall be informed of the following in writing: [a]n explanation of the reasons for the identification. . .; [a]ll procedures for referral, assessment, evaluation, diagnosis, referral for placement, and placement. . .; [r]equirements for notice and due process and request for a hearing. . .; [and] [t]he name and telephone number of an employee. . .who can be contacted for further information. . . ."

CH IV, §455.5

NOTICE

"In all instances where formal written notice is required. . .such notice shall be sent to the parent or guardian by certified mail. . . .and shall include the following: (a) A statement of the recommended placement . . .OR denial of placement. . .including an explanation of the reasons for the action and a description of the. . .

information upon which the action is based; (b) A statement clearly indicating the right of the parent or guardian to challenge the action by requesting a hearing; (c) An explanation of the rights and procedures. . .and the hearing procedures. . .; (d) The name and telephone number of an employee. . .who can be contacted to request a hearing and to obtain further information. . . ."

CH IV, § 455.6

RIGHT TO COUNSEL

HEARING

"The following rights and procedures shall be afforded . . .: (a) The right to be represented at the hearing by a representative of their choosing, including legal counsel . . .; (b) Information on where to obtain free legal counsel; (c) The right to compel the attendance of any school official, or other agent or employee of the District government who may have evidence or present testimony directly related to the subject of the hearing; (c) (sic) The right to present evidence, including documents, reports, and data; and the right to present testimony, including any expert medical, psychological, or educational testimony; (f) The right to have the hearing held not later than forty-five (45) days after the receipt of the request for the hearing. In most cases, the hearing will not be held in less than twenty (20) days from the receipt of the request for hearing in order to provide an opportunity for the parent or guardian to obtain representation, if desired, and prepare for the hearing. However, the hearing may be held sooner upon the request of the parent or guardian; (g) The right to have the hearing held at a time which is reasonably convenient to the parent or guardian and school personnel involved in the hearing. Hearings shall not be scheduled on weekends or holidays without the consent of all parties; however, hearings may be scheduled outside of normal business hours at the request of the parent or guardian; (i) The right to examine all portions of the student's record prior to the hearing, including the right to examine and, upon request, receive copies of any test results, reports, or other data upon which the proposed action is based;

(j) The right to receive a list of the witnesses who will testify at the hearing for the Public Schools; (k) The right to receive the written determination of the hearing officer within ten (10) working days of the completion of the hearing; (l) The right to receive, upon request, a copy of the electronic recording of the hearing; (m) The right to cross-examine any documents or witnesses presented at the hearing by the Public Schools.

CH. IV , §456

"The hearing officer shall conduct the hearing according to the following procedures: (a) The hearing officer shall ensure initially that all necessary parties are present and that an electronic recording is being made of the hearing; (b) The hearing officer shall determine whether proper notice has been provided and whether all required procedures have been followed and rights afforded OR that such rights and procedures have been specifically waived by the parent, guardian, or their representative; (c) The Public Schools, through their representative, shall present documentary evidence and examine any witnesses called on behalf of the Public Schools; (d) The student's parent, guardian, or their representative shall be given an opportunity to cross-examine any documents or witnesses in the order of their presentation; (e) The student's parent, guardian, or their representative shall present documentary evidence and examine any witnesses called on behalf of the student; (f) The Public Schools, through their representative, shall be given an opportunity to cross-examine any documents or witnesses in the order of their presentation. (g) Copies of all documents or written materials presented in evidence shall be made available to the hearing officer and the other party; (h) The hearing shall not be conducted according to the strict rules of evidence; however, the hearing officer may exclude any evidence or testimony which is irrelevant or repetitive; (i) The hearing officer may question any witness or party upon the conclusion of direct and cross-examination, and shall examine all documentary evidence; (j) The hearing officer shall ensure that the hearing is conducted in an orderly manner and shall

have the authority to exclude any party or other person from the hearing on the grounds of substantial interference or obstruction of the hearing process.

If the student has not reached the age of eighteen... years, or is an adult student without legal capacity as determined by a court of competent jurisdiction, the parent or guardian may determine whether or not the student shall be allowed to attend all or part of the hearing. The hearing officer may also exclude the student from all or part of the hearing upon a determination that the attendance of the student would be harmful to the welfare of the student.

The Public Schools shall bear the burden of proof, based solely upon the evidence and testimony presented at the hearing, that the action or proposed placement is adequate to meet the educational needs of the student.

Within ten...working days of the conclusion of the hearing, the hearing officer shall issue a written determination which shall include a summary of the evidence and testimony presented at the hearing, a statement of findings and fact based upon the evidence and testimony, and a conclusion.

In cases where the hearing is held to challenge a denial of placement, the hearing officer's conclusion shall address the following issues: (a) If the denial of placement is based upon failure to meet the time limits for evaluation and diagnosis, pursuant to subsection 454.4, the hearing officer shall make one of the determinations required by subsection 454.4(f). (b) If the denial of placement is based upon failure to make a referral for evaluation, diagnosis, and recommendation upon request, or to hold a pre-referral case conference as required by section 453, the hearing officer shall determine whether or not the denial is justified. If the denial is unjustified, the hearing officer shall order that an immediate referral be made. (c) If the denial of placement is based upon a recommendation that the student is not in need of special educational services ...the hearing officer shall determine whether the regular school program is adequate to meet the educational needs of the student. If the regular school program is found to be inadequate, the

hearing officer shall order that the student be referred to the Division of Special Education for a proposed placement.

In the event that a parent or guardian requests a hearing on a denial of placement and such hearing results in further referral, recommendation, or proposed placement, the parent or guardian shall continue to have the right to request a hearing to challenge any subsequent denial of placement or proposed placement.

In cases where a hearing is held to challenge a proposed placement by the Division of Special Education, the hearing officer's conclusion shall address solely the issue of the adequacy of the proposed placement.

If the hearing officer concludes that the proposed placement is not adequate, one of the following shall apply: (a) If the proposed placement is for a local school program with special educational services, the Division of Special Education shall have twenty...working days to propose another placement.... (b) If the proposed placement is for a special school program within the Public Schools, the Division of Special Education shall have twenty...working days to propose another placement.... (c) If the proposed placement is for a program operated by another agency of the government of the District of Columbia, the Division of Special Education shall have twenty...working days to propose another placement....(d) If the proposed placement is for a private facility, the Division of Special Education shall have twenty... working days to propose another placement....(e) If it is determined at the hearing that no adequate placement exists within the Public Schools or another agency of the District of Columbia government, the Division of Special Education shall have twenty...working days to propose placement in a private facility.

In no instance shall a hearing officer direct a placement in any particular program or private facility.

If a hearing officer determines that the evidence and testimony presented at the hearing do not justify a conclusion that the proposed placement is adequate, the hearing officer shall determine that the placement is inadequate. However, if the hearing officer determines that the evidence and testimony presented at the hearing are not sufficient to reach a conclusion

with regard to the adequacy of the placement, the hearing officer may require the submission of additional evidence or testimony, including additional assessment and evaluation of the student and may continue the hearing to a date certain for the receipt of additional evidence or testimony.

In any instance where this section imposes time limits, a hearing officer may extend the time limits upon a showing of extenuating circumstances by either party."

CH.IV, §457

PLACEMENT

"Students who are otherwise eligible for admission to the Public Schools of the District of Columbia . . . and for whom no adequate educational program is available in the Public Schools, shall be eligible for placement in a private facility by the Division of Special Education.

The Public Schools shall pay the cost of tuition for education and related services for all students placed in private facilities by the Division of Special Education.

Placement in a private facility shall be made only subsequent to an assessment of the student's needs and upon the recommendation of the Division of Special Education or the determination of a hearing officer...

In all cases where it is determined that the programs and services available in the Public Schools are not adequate to meet the educational needs of a student, the selection of the private facility for placement shall be the responsibility of the Division of Special Education.

All private facilities in which students are placed by the Public Schools must meet the following standards:
(a) The facility shall have established an instructional program for students with one or more...handicapping conditions....
(b) The facility's program objectives must agree with the educational and treatment programs required to meet adequately the needs of students with the type(s) of handicapping condition(s) which the facility purports to serve; (c) The facility must provide an individualized instructional program, including specialized curriculum, equipment, and methodology, which is adequate to meet the needs of the students who are placed in

the facility. Individualized instructional programs provided by the facility must provide flexibility sufficient for prescriptive planning and programming to meet individual student needs; (d) The ratio of students to teachers maintained by the facility must be within standards established by a nationally recognized organization acceptable to the Public Schools; (e) The ratio of students to other professional staff members maintained by the facility must be within standards established for each profession by a nationally recognized professional organization acceptable to the Public Schools; (f) All professional staff members who teach or work directly with students must be duly certified or licensed by the jurisdiction in which the facility is located to work with the types of handicapping conditions which the facility purports to serve. Facilities which employ uncertified or unlicensed professionals, when such persons were employed on or before March 1, 1977, and have been continuously employed by the facility since that date, shall have until March 1, 1977, to comply fully with the requirement of this subsection; (g) The facility must be duly licensed or certified by the jurisdiction in which it is located in compliance with all federal, state, and local laws. Such licensure or certification must include evidence that the facility is in compliance with all applicable health, safety, and fire regulations, codes, and ordinances; (h) The facility shall not impose any fee upon the parent or guardian of the student which is not specifically approved within the scope and terms of the contract between the facility and the Public Schools, nor shall the payment of such fees by the parent or guardian be established as a prerequisite for the acceptance of the student for placement; (i) The facility must agree to a written statement in the contract with the Public Schools that the facility does not discriminate against any employee or applicant for employment because of race, creed, color, sex, national origin, or handicapping condition; (j) The facility must agree to a written statement in the contract with the Public Schools that the facility does not discriminate against any applicant for admission or any student because of race.creed, color, sex, or national origin; (k) The facility must agree to a contractual provision which

provides for due process procedures in the event of the suspension or expulsion of any student placed in the facility by the Public Schools; (1) The facility must agree to a contractual provision which provides for representatives of the Public Schools to conduct on-site inspections, evaluations, or studies of the "facility, its programs, and the progress of any student placed by the Public Schools. Such on-site visits may be conducted in order to insure compliance with the educational standards of the Board of Education, the provisions of the contract between the facility and the Public Schools, or the provisions of any applicable federal laws and regulations.

Where a proposed placement is made in an out-of-town private facility the Public Schools shall provide round-trip transportation for the student and one accompanying adult to attend one pre-admission interview at the private facility.

The Public Schools shall provide one round-trip transportation fare per year for each student placed in an out-of-town private facility by the Public Schools.

Application for admission or referral for assessment must be made by the following deadlines for placement in a private facility: (a) May 15th for placement in the following fall semester; (b) November 15th for placement in the following spirng semester.

Exceptions to the deadlines set forth in this subsection may be granted in extraordinary cases by the Assistant Superintendent of the Division of Special Education."

CH. IV. §499

NOTICE

"Special Forms of Notice: Where notice is required by this Chapter, such notice shall be given to the following persons in the manner provided: (a) Non-Readers: Written notice shall be given to the legal representative or other representative designated by the non-reading person. (b) Visually-Impaired Persons: Written notice shall be given to the legal representative or other designated representative of the visually-impaired person OR may be given in braille to a person who can read braille. (c) Non-English Reading Persons: Written notice shall be given in the same manner as notice to non-readers OR

RIGHT TO COUNSEL

may be given in a language which the person can read and understand....

Right to Counsel: Where the right to representation includes the right to legal counsel, persons entitled to act as legal counsel in Public School administrative matters shall include the following: (a) Attorneys: Persons admitted to practice before the highest court of any state, any U.S. Court of Appeals, or the Supreme Court of the United States; (b) Lawyers: Graduates of accredited law schools; (c) Law Students: A second or third-year law student in a supervised clinical program sponsored by an accredited law school."

2. Programs for Exceptional Children

Statutes

§229.831-.833; .836; .838

Any child who may be "exceptional", as defined by the state board of education requirements, shall be tested to determine whether disability exists. Children with disabilities shall be identified, diagnosed, and treated at the earliest possible time in their school career.

DIAGNOSTIC CENTERS

The department of education shall establish 18 regional diagnostic and resource centers for exceptional children which shall "provide a responsible range of medical, psychological, educational, and other testing services" and shall provide consultant services to parents, teachers, and school personnel. Counties without regional centers shall have mobile testing units. Each center shall hold inservice workshops yearly to familiarize teachers, principals, and supervisors with center programs and facilities.

Each school board in a district with a regional diagnostic center shall: (1) provide necessary physical facilities and administrative support; (2) refer students to the center for testing and; (3) provide programs to meet the needs of students serviced by the center.

The department of education shall award grants to school districts for the establishment or expansion of special education support services designed to provide instructional and consultant services to appropriate persons within the district.

§232.13

The Department of Rehabilitative Services shall review cases of "exceptional children" "whose conditions require special educational services" and report to the school superintendent by March 31 of each year.

§233.056

The Division of Public Schools of the Department of Education is authorized to "establish a coordinating unit and instructional materials center for visually handicapped and other exceptional students."

§233.49

The Department of Education shall purchase material "in various media for the use of partially sighted children."

§242.331-.332

SCHOOL FOR THE DEAF AND THE BLIND

The board of trustees for the Florida School for the Deaf and the Blind shall consist of seven members, including one blind person and one deaf person, appointed by the Governor and confirmed by the state senate. Members must be state residents at least 10 years and serve four-year terms. They "shall act . . . in conjunction with and under the supervision and general policies adopted by the State Board of Education."

The board is responsible for the "management, maintenance, support and control of the Florida School for the Deaf and the Blind."

The School may send deaf and blind students under 20 years of age for whom the state cannot provide the proper facilities to out-of-state schools and finance their "room, board, tuition, transportation," and other relevant costs.

REGULATIONS

6A-3.121 TRANSPORTATION OF THE HANDICAPPED 229.053(1)

The school board shall determine what specific measures shall be used in the transportation of physicially handicapped pupils, including designation of roads, bus turning areas and pupil stop locations. Physically handicapped pupils using the bus must be able to understand instructions from the bus driver. Bus transportation will not be provided to the physically handicapped whose parents fail to meet them at the designated stops. The driver of a bus transporting physically handicapped pupils shall remain with the bus so that pupils aboard will be under supervision at all times. A driver will not be responsible for lifting a physically handicapped person on or off a bus except in an emergency situation. The driver shall not give medicine to the students or aid in any other way that is not expected, but

he or she should be aware of the needs of the handicapped pupils. Parents shall have the responsibility of helping their handicapped child on or off buses when needed, being at the bus stops at the scheduled times and providing instructions in writing to bus driver as to any special symptoms or non-medical care which the child may need while on the bus.

6A-6.301

An exceptional student is a child or youth enrolled in or eligible for enrollment in the public schools of a district who requires special instruction or special education services who is unable to take full advantage of or respond to educational programs and opportunities because of a physical, mental, emotional, social or learning exceptionality.

6A-6.3011 Special programs for students who are mentally retarded.

ELIGIBILITY

A student is eligible for a special program if the measured level of intellectual functioning is two or more standard deviations below the mean on an intelligence test, the assessed level of adaptive behavior is below age, and cultural expectations and sub-average performance on a standardized measure of academic achievement is demonstrated.

6A-6.3012 Special programs for the speech and language impaired

A student is eligible for special programs in speech and language if the student demonstrates receptive or expressive problems of processing, disorders of syntax, fluency problems, voice quality difficulties, or nonmatured articulation disorders. All kindergarten students shall be screened for speech and language difficulties. Those considered for special programs shall also be screened for hearing. Students being considered for exceptional student programs, excluding gifted and homebound or hospitalized who may be screened on a referral basis, shall be screened for language, speech, fluency and voice disorders prior to staffing for eligibility. Students shall be evaluated by speech clinicians and by standardized testing. Developmental and social history shall be included as part of the data base in assessment pro-

grams when determined appropriate by the speech clinician. Dismissal from the program based on graduation or completion of school prior to completion of remediation shall include a referral to an appropriate agency when available.

6A-6.3013 Special programs for the hearing impaired.

To be eligible for special programs for hearing impaired, there shall be audiological evidence that the student is deaf or hard of hearing and, because of such hearing loss, is unable to perform academically or to develop language at a level commensurate with the expected level without special education. Certificated teachers of the deaf and other professionals shall be responsible for implementing and conducting the formal evaluation of a student's receptive and expressive communication skills, academic achievement and learning abilities.

Special programs organized for students who are deaf or hearing impaired shall be utilized by school districts. The programs shall include the following: special class full-time; basic class supplemented by itinerant instruction or a resource room program; basic class with supplementary consultation or special education services by a speech and hearing clinician; or individual instruction in a home setting.

The districts shall adopt a written course of study for the programs adopted and may not adopt a single philosophy of communication but shall attempt to meet the needs of the students. The district shall have or purchase the services of professionals in audiology, school psychology, guidance and other areas which shall support the special education program.

6A-6.3014

Special education programs for students who are visually impaired.

Initial screening is to be done solely for the purpose of referring students to an opthalmologist for further evalution. All new students, kindergarten students and exceptional students shall be screened. The minimum requirement is a medical eye examination and educational evaluation which identifies educational and environmental adjustments needed. Records of reevaluation by an opthalmologist every three years shall be

available except in cases where the student is verified to lack usable vision.

6A-6.3015 Special programs for students who are physically impaired.

The minimum evaluation for a student shall be:

A report of a medical examination within the previous twelve-month period, from a physician qualified to assess the student's physical problems, giving a description of the impairment and any medical implications for instruction and stating that the student is unable to or is restricted in ability to attend regular classes because of a physical impairment; an educational evaluation which identifies educational and enviromental adjustments needed; an annual medical examination to determine changes in the physical condition of the student in order to continue in the program.

6A-6.3016 -- .3017

Special programs for students who are emotionally handicapped and socially maladjusted.

Procedures for student evaluation include: documented and dated evidence that conferences concerning the student's specific problem have been conducted; documented anecdotal records made by more than one person which cite the specific behaviors causing the referral; documented evidence of two interventions and adjustments that have been tried with the student.

The minimum evaluation for determining eligibility shall include a physical evaluation; a visual screening report; a hearing and a speech and language screening report; a comprehensive psychological evaluation; an educational evaluation.

6A-6.3018

Special programs for students with specific learning disabilities.

To be eligible a student must have evidence of a disorder in one or more basic psychological processes; evidence of academic deficits; evidence that learning problems are not due primarily to other handicapping conditions. Each district shall specify the personnel who are directly responsible for the evaluation of the competencies required of these personnel and the method by which data shall be collected.

6A-6.3019 Special programs for students who are gifted.

GIFTED CHILDREN

To determine eligibility for this program, an evaluation of intellectual potential characteristics of the gifted, statement of nonacademic performance, and the need for a special program shall be required.

6A-6.3020

Special programs for students who are homebound or hospitalized.

HOMEBOUND INSTRUCTION

The minimum evaluation for a student to determine eligibility shall be: a medical statement from a physician qualified to assess the physical or mental problems, including a description of the handicapping condition with any medical implications for instruction and stating the student's inability to attend school and the estimated duration of the condition; periodic physical reexamination; and a medical report by a licensed physician as requested by the administrator of exceptional student education or designee.

6A-6.331

PLACEMENT

A staffing committee utilizing the process of reviewing diagnostic, evaluation, educational or social data shall recommend student eligibility for special programs and shall recommend the student's educational placement. Each district shall designate a staff member as a program administrator of special programs for exceptional students.

Each school board shall develop policies providing for review of any assignment, placement or denial of assignment or placement of an exceptional student in a special program. Such policies shall include adequate provision for: written notice to the parent or guardian; reasons for which the action is proposed or on which the decision was based and procedures for review conferences with the parents; procedures for review of an individual case; a decision in writing to be provided the parent or guardian; final review by the school board of any decision contrary to the wishes of the parent or guardian.

"Special programs for exceptional students established in cooperation with adjoining districts shall be established and maintained according to guidelines issued by the director of the division of elementary and secondary education."

2. Programs for Exceptional Children

Statutes

§32-605a

"All children and youth who are eligible for the general education program, preschool education, or who have special educational needs . . . shall be eligible for special education services. Children, ages 0-5 years, whose handicap is so severe as to necessitate early education intervention may be eligible for special education services. Children and youth with special needs are those who have emotional, physical, communicative or intellectual deviations, or a combination thereof, to the degree that there is interference with school achievements or adjustments, or prevention of full academic attainment and who require modifications or alterations in their educational programs. This will include children who are intellectually gifted, mentally retarded, physically handicapped, speech handicapped, behaviorally disordered, hospital or homebound, handicapped by a specific learning disability, multihandicapped, autistic, hearing impaired, visually impaired and other areas of special needs which may be identified." These special needs will be served on a statewide basis, "both for students that will be served in a self-contained setting and those who can be served effectively in the regular classroom."

§32-609a

"The State Board of Education shall annually determine the amount of funds needed for operation of the State schools for the deaf and blind and such other special schools for exceptional persons as may be established by the State Board of Education . . . The state board shall annually determine the amount of funds needed for elementary and secondary programs operated within correctional institutions, hospitals, mental

institutions and other such programs. The State Board shall "maintain an institution primarily for the detention of persons within school age, and operate within such institution as an elementary, secondary or vocational school for the education of such school age children, which shall be sufficient to enable the local unit to furnish certified teachers and other professional personnel to such school and institution in accordance with the state minimum salary schedule."

HONORS PROGRAM

"The State Board of Education [shall] inaugurate a student honors program for pupils in the public and private high schools of this state who have manifested exceptional abilities, unique potentials, or who have made exceptional academic achievements." This program may be conducted during summer months between normal school year terms at institutions of higher learning or other appropriate centers within this state with facilities adequate to provide challenging opportunities for advanced study and accomplishments by such students. The state board of education shall make "provision for . . . research into all methods of instruction and education of children and youth, sponsor conferences, study groups and workshops, and . . . conduct research or education demonstrations, experimentation, field tests and such other . . . projects as may, in the opinion of the board, tend to support, improve or strengthen the public school system of Georgia. The State Board may employ or contract for the services of specialists and others as may be necessary or desirable for such purposes and cooperate with public school systems and public and private educational institutions and agencies within or without the State for such purposes."

§32-672a

"The State Board of Education and the Georgia Board of Human Resources shall . . . establish a coordinating committee for Exceptional Individuals and Pre-School Programs including "at least one individual at one of the top levels of management."

SCHOOL FOR BLIND

SCHOOL FOR DEAF

§32-2801 --2802

The State Board of Education shall control the Georgia Academy for the Blind and the Georgia School for the Deaf which shall be exempt from regular school laws. The blind and deaf shall have "care, training, and education specially adapted to their needs."

REGULATIONS

30-1111-1124

The State Board shall "provide appropriate educational opportunities to all children and youth including those exceptional children whose school achievement or adjustment is hindered due to emotional, physical, communicative or intellectual deviation, or a combination thereof."

An individual between ages 3 and 20 is considered exceptional if he or she is physically handicapped; mentally retarded; speech, hearing or visually impaired; multi-handicapped; "requires hospital or home instruction. . . is intellectually gifted . . . has a specific learning disability . . . (or) behavior disorder"; is autistic or has other identified special needs. "Children from birth through five years of age whose handicap is so severe as to necessitate early education intervention may be eligible for special education services.

"The State Superintendent of Schools shall . . . submit to the State Board a comprehensive State Plan for Exceptional Children and Youth that:

1. Includes all areas of exceptionality,

2. Reflects the expected enrollment . . . in the special education program.

3. Details the procedures for program operation,

4. Includes procedural due process guarantees,

5. Reflects the cost of operating the program,

6. Projects staffing requirements . . .,

7. Contains procedures . . . for the allocation of state and federal funds to local school systems."

The State Plan shall provide for "state-operated schools and local school system programs. . . . Services outside the local school system will be provided" as necessary to supplement local programs.

An Advisory Council for Exceptional Children will advise the State Superintendent. The Coordinating Committee for Exceptional Individuals and Preschool Programs established by the State Board and Georgia Board of Human Resources will coordinate services.

"The Office of Instructional Services shall develop and implement" a special education program. It shall prescribe regulations for and approval of local plans, offer consultative services to local school systems, provide for in-service teacher training, "administer a program of placement . . . for those exceptional children and youth not adequately served by state schools or local system programs," evaluate local programs and "report annually to the State Superintendent on the evaluation of the effectiveness of" the special education program."

"The State Board of Education endorses the development . . . of programs of special education for pupils in the public schools . . . who have manifested exceptional abilities, unique potentials or who have made exceptional academic achievements." A State Plan for the Education of the Gifted shall be prepared by the State Superintendent for State Board approval and shall provide for programs during the regular school year and "a special student honors program for gifted students in public and private high schools" to operate during the summer. Local plans for programs for the gifted must be submitted to the State Superintendent, who will prepare guidelines for plan development.

"The Office of Instructional Services shall maintain a State Plan for the Education of the Gifted

which provides" guidelines for staffing and for development and review of local plans. It shall also "provide technical assistance to local school systems in the development and implementation of local plans."

SCHOOL FOR HANDICAPPED

The State Board is authorized "to operate state schools for the handicapped." The State Board and State Superintendent shall act in relation to these schools in the same capacity as their local equivalents and are authorized to prescribe "all rules and regulations related to the operation of state schools for the handicapped. Employees of these schools are state employees." The State Superintendent (and Office of Instructional Services) "shall manage the state schools for the handicapped." A plan for these schools' operation shall "be incorporated into the State Plan for Exceptional Children and Youth."

"The allotment of funds by the State Board to local school systems for use in programs for special education shall:

1. Provide for state-approved teachers of exceptional children,

2. Provide for maintenance and operation, sick leave, textbooks and library materials for each special education unit,

3. Provide for the purchase of braille and large print materials for . . . (the) blind or partially sighted,

4. Provide for transportation of exceptional pupils."

Additional funds may be allotted to allow "local units to furnish certified teachers and other professional personnel to . . . schools operated within institutions maintained primarily for the detention of persons within school age." The State Board may also "provide additional personnel and funds for education programs not ordinarily coming within the prescribed curricula for the public schools."

40-214

PLACEMENT

Local boards of education may determine student placement. "The primary consideration in . . . educational placement is the educational appropriateness of an activity or program for a given student or groups of students." Normally most students would attend schools in the board's district, but in certain cases it might be to the student's and school's advantage to temporarily assign the student elsewhere. A temporary placement is when 1) "a student is placed in another location for educational reasons . . . but will return to a regular placement in the local school" within 3 months, or 2) "a student is placed in a local school but on a part-time basis participates in an educational activity in some other location."

The objective of this policy is "to enhance the learning opportunities for special students. The focus therefore is on the educational appropriateness of alternative placement."

40-2191

DIPLOMA

Children who reach age 6 and "all youth who have not yet received a high school diploma or its equivalent shall be eligible for enrollment in the general education and occupational programs."

For preschool programs, 5-year-old children and "three and four year-old children who are either physically, mentally or emotionally handicapped or perceptually or linguistically deficient shall be eligible for enrollment. Enrollment . . . in the preschool program shall be strictly . . . voluntary."

2. Programs for Exceptional Children

Statutes

§298-10

"Every parent or guardian having control over any partially or totally blind person, from 6 to 18 years of age, who . . . is unable "to attend public or private schools, shall send them to the state school for deaf and blind for a period comparable to the regular school year . . ."unless excused by the superintendent of education or by a circuit court judge. This section "shall not apply where private skilled instruction is given to such persons . . . ."

SCHOOL FOR DEAF/BLIND

§301-21

"The following terms wherever used with reference to this part shall have the following meanings:"

"Exceptional children" includes:

1) "Children under 20 . . . who deviate from the so-called normal person in physical, mental, social or emotional characteristics or abilities to such an extent that specialized training, techniques, and equipment are required to enable these persons to attain the maximum of their abilities or capacities."

2) "Children under 20 . . . who by reason of physical defects cannot attend the regular public school . . ."

3) "Children under 20 . . . who are certified by a licensed physician . . . to be emotionally maladjusted or intellectually incapable of profiting from ordinary instructional methods."

"Special facilities" includes buildings, equipment and material; transportation; boarding homes; personnel qualified to work with exceptional children."

"Special services" "means psysiotherapy, or any other form of muscle training, speech training, occupational therapy, vocational training, psychological evaluation, or any of them."

§301-22

"It is . . . of vital concern to the state that all exceptional children residing in the state be provided with instruction, special facilities, and special services for education, therapy and training to enable them to live normal competitive lives." To "effectively accomplish such purpose the department . . . shall establish and administer instruction, special facilities, and special services for the education, therapy and training of exceptional children, and provide . . . corrective therapy together with academic, occupational and related training. The department shall cooperate . . . with the U.S. government . . . in developing, extending, and improving such instruction, special facilities, and special services."

"This program shall include boarding facilities . . . special classes in schools or homes, and . . . other facilities . . . required."

§301-23

"(A) division of special education for the promotion, direction and supervision and control of the program shall be created. Adequately qualified personnel may be employed to run the program.

§301-24, 25

"Where one or more exceptional children are found in any one district . . . the superintendent of education shall provide instruction, special facilities and special services according to the specifications of this part in a manner most expedient and economical." Eligibility for the program shall be determined by the department of education.

§301-26

"The department . . . shall establish and make such studies, surveys, evaluations, and rules and regulations as are necessary to carry out the purposes of this part."

RULEMAKING

"The department of social services shall administer work with and for the blind, including the registry of the blind, vocational guidance, training and placement in employment and other services, including the conduct of activities for sight conservation and the prevention of blindness."

REGULATIONS

Rule 44.43

"Substitute Teachers. The school shall maintain a plan for procuring substitute teachers which will insure adequate continuity of instruction."

Rule 49.0 -- 49.5

Students who are handicapped or are suspected of being handicapped and their parents are to be provided with opportunities to understand and to participate in the determination of each student's educational status and the educational program appropriate to his/her needs.

Department personnel shall make every effort to provide to parents the necessary information and guidance in English and, whenever necessary and feasible, in the primary language of the parents.

No change in the educational status of students shall be undertaken except in accordance with this rule.

A District Superintendent, or his/her deputy, may change the educational status of a student upon the recommendation of the principal.

Until any proceeding for change in educational status has been completed, the student shall remain in his/her then current educational status. If applying for initial admission to a public school, the student shall be placed in a regular school program until any proceedings regarding educational status has been completed.

a. Any person working with a student, including the student's parents, may advise the student's principal that a change in educational status will be of benefit to the student.

EVALUATION

The Principal, deciding in favor of an educational evaluation, shall notify the student and/or his/her parent or guardian. This and all other communications with parent or guardians shall be in English and/or in the primary language of the parent and/or guardian. The student and/or his/her parent or guardian may appeal the Principal's decision to the District Superintendent.

CONSENT

Parents shall either give written consent for an educational evaluation under Department auspices or obtain, at their own expense, an independent educational evaluation. If they do neither, the principal shall notify the District Superintendent and formal hearing proceedings shall be initiated in accord with 49-4 c-f.

HEARING

The evaluation under Department auspices shall be conducted under the District Superintendent's office by the appropriate district diagnostic team members and/or other relevant professional personnel.

The educational evaluation reports and recommendations shall be submitted in writing to the Principal. The Principal shall notify the District Superintendent of his/her recommendations. In turn, the District Superintendent shall notify the Principal of his/her action on the Principal's recommendation.

All those who participated in the educational evaluation, or developed the recommendations, or will implement the recommendations, should be available to participate in the conference.

At the conference, parents shall be provided with an explanation of their child's status and with the opportunity to review and assess their child's records, the educational evaluations, the recommendations, and alternative educational programs available.

Parents shall be informed of their right to contest the recommendations at a hearing. Parents accepting the recommended educational program shall sign an agreement authorizing the program for their child. If parents neither accept recommended or alternative educational programs, or fail to participate, the Principal shall notify the District Superintendent and formal hearing proceedings shall be initiated in accord with 49.4 c-f.

After receipt of notification from the Principal, the District Superintendent shall initiate formal hearing proceedings by a written notice to the student and/or his/her parents stating the recommendations, the alternatives available to the child, the parents' rights to a hearing and the means by which a hearing is obtained. The notice shall also indicate that, if a request for a hearing is not received by a specific date, the recommendations shall be implemented without a hearing.

Upon receipt of a request for a hearing, the District Superintendent shall schedule a hearing to be conducted by an impartial hearing officer from outside the Department designated by the Superintendent. The hearing officer shall render a written decision delivered to the student and/or his/her parent, which shall be final.

Time limits specified in the rule may be extended due to the unavailability of evidence or the time needed to translate requested material into the primary language of the parent.

IV.H.; Regulation Rules 26.1; 26.3

2. Programs for Exceptional Children

Statutes

§33-124

The state board may approve or disapprove any plan for a "program providing instruction and training for handicapped students under the age of twenty-two years in vocational education" submitted by a school district or districts.

§33-2001-2002

"Each public school district is responsible for . . . the education and training of exceptional pupils," who are defined as "those children whose handicaps, [including mental, physical, emotional, visual, auditory or speech handicaps] or . . . capabilities, are so great as to require special education and . . . services." Districts may provide instruction for such persons to the age of twenty-one. "The state board of education shall . . . determine eligibility criteria . . . qualifications of special teachers and . . . personnel, programs of instruction and minimum standards for classrooms and equipment."

§33-2002A

"Special services for exceptional children may include those services provided by certified ancillary personnel," such as special education teachers, speech and hearing therapists, school social workers and psychologists, and teacher aides.

§33-2003

The state board of education shall "establish programs, set standards, and employ . . . personnel . . . to assist . . . school districts in educating and training exceptional children; establish a research program to evaluate on-going programs . . . and make recommendations; formulate, and . . . revise . . . standards for the determination of eligiblity of children for special . . . education."

§33-2004

"The trustees of a school district may contract . . . for the education of exceptional children by another school district or by any private or public rehabilitation center, hospital, or corporation, approved by the state board of education." The school district shall reimburse "the institution, corporation or district contracting to educate such students."

§33-2005 -- 33-2005A

CONTRACT SERVICES

School districts may contract for the services of or employ ancillary personnel to provide special education for exceptional children. Districts so doing shall be reimbursed through the "foundation exceptional education program" of the state.

§33-3401 -- 33-3408

SCHOOL FOR DEAF AND BLIND

A state school for the deaf and blind shall be established and governed by the State Board of Education. It shall employ a superintendent, teachers, specialists and other personnel, and fix their salaries, prescribe the course of study and textbooks used, expend funds to repair, remodel and maintain the school and provide free examination of applicants for admission.

Each school district shall report the number of blind and deaf children attending its schools to the superintendent of the state school for the deaf and blind each year.

REGULATIONS

Administrative Rules and Regulations For Special Education, §2.1

All children in the state must attend a public school if not being educated by other means.

The State Board shall operate, administer and establish policy for all programs of special education.

Each school district functions under local board direction.

Administrative Rules and Regulations For
Special Education, §2.2

IIA2-ID 3
IDAHO

The State Board shall establish a unit to administer this act, programs, set standards, employ all necessary means for educating exceptional children, research programs for evaluation of success and access number of children in need of special education; formulate and revise standards of eligibility for children in need of special education.

ADMINISTRATION

The State Board shall determine the total cost for maintaining the special education program, and select those agencies which, on a contract basis, can supply additional support.

The State Board shall make annual reports to the legislature on the special education program highlighting number of children served; districts operating programs; money distributed; and an estimate of those children needing but not receiving services. This report shall be filed not later than the fifteenth day of the legislative session.

Responsibilities of the Department of Education shall be:

Assisting local districts in establishing special education programs, providing rules which comply with State Board standards, flexible enough to provide support for local districts.

RULEMAKING

Visiting and evaluating those agencies wishing to provide services on a contract basis, approving all on-going contracts for special education services on an annual basis.

Provide consultation services to local districts in the development of comprehensive educational programs in a single or multi-district area.

Provide assistantce to local districts in the development of a long-range plan for exceptional children in single or multi-district area.

Maintain data collection and review procedures which will assure the quality of special education programs state wide.

EVALUATION

Provide copies of program evaluation by the Department

of Education.

Monitor records of local districts which concern special education revenue and expenditure reports, comprehensive child evaluation reports, local district special education plans and any available program evaluation reports.

Make training available to teachers and other personel working with exceptional children in Idaho.

Coordinate and utilize available regional and state support services.

ADVISORY PANEL

Maintain a State Special Educational Advisory Panel which shall:

Advise the state on unmet needs; commenting on these rules and regulations.

Assist the state in developing and reporting data and evaluation of special education programs and services.

Advise the State on needed policies and practices within special education programs and services.

Responsibilities of local districts shall be:

To establish services, first, for those exceptional children not enrolled in special education programs and, second, for those within each exceptionality with the most severe or critical learning problem receiving inadequate education.

To develop plans at the kindergarten, elementary and secondary levels for the comprehensive provision of services to exceptional children.

To maintain special education program in compliance with standards set out in these rules and regulations.

To provide a full or part time administrator whose responsibilities include:

"Establishment of priorities for program development including objectives and strategies for implementing the program.

"Planning and development of instructional services including the Individual Education Program(s).

"Assistance to teachers in selecting and securing materials and equipment for instruction.

"Establishment of procedures for identifying exceptional students in the district . . .

"Coordination with district administrators in order to assure integration of the special education program with the total school program. . . .

"Assistance to building principals and other appropriate school personnel in the scheduling of classes and program for exceptional students.

"Establishment of channels of communication with the school organization and the community concerning exceptional children.

"Organization of Child Study Team(s).

"Development of a uniform procedure of student referral, comprehensive evaluation, placement, change of placement, and annual review of student progress.

"Arrangement of conferences, workshops, courses, etc., which will promote the growth of staff members toward more efficient and effective performance.

"Continuous evaluation of the curricular approaches and assistance to teachers in developing methods of measuring student progress.

"Organization of necessary transportation needs of exceptional children.

"Assistance to the administration in selection of special education personnel.

"Submission of reports and forms to the State Department of Education as necessary for the operation of an approved special education program."

Administrative Rules and Regulations For Special Education §3.4 -- 3.7

The procedures for identification of exceptional students in need of special education may include screening, child-find activities, census, or surveys, or establishing a system of child referral for special education, submitting names of those referred to a child study team for appropriate educational planning.

IDENTIFICATION

A Child Study Team shall include a regular classroom teacher and/or special education teacher, and an administrator (building principal and/or director of special education). Other team members may be selected from the following lists of regular and additional members. Parents shall be given the opportunity to get involved.

"Written parental consent must be obtained if any individual evaluations are to be initiated.

"Appropriate comprehensive evaluation should be completed.

"Individual evaluative reports should be written and submitted to the Child Study Team."

The following are functions of the Initial Placement Meeting.

PLACEMENT

"1. Comprehensive evaluation information should be reviewed on each child.

"2. Eligibility for special education services should be determined utilizing minimum state guidelines for eligibility and any additional district criteria. . . .

"3. A written Individual Education Program (IEP): Total Service Plan must be prepared. . . .

"4. Placement in the least restrictive educational setting must be determined.

"5. Parents shall be given the option to be present at the formal placement meeting. However, if parents are unable to attend, provision must be made to inform parents of the results of the comprehensive evaluation and obtain written parental agreement to the IEP. . . ."

"The IEP: Total Service Plan for each student receiving special education services shall be reviewed as (sic) least annually by the Child Study Team. Parents must be given the opportunity to participate in the annual review process."

The basis for special education placement shall be the result of a comprehensive evaluation.

Comprehensive evaluation procedures will vary according to child need; selection of specific assessment instruments are to be determined by the Child Study Team.

EVALUATION

Comprehensive evaluation records are to be completed by the professional person designated by the Child Study Team as responsible for that particular portion of the evaluation, including program recommendations.

"The Individual Education Program (IEP): Total Service Plan shall include:

"Name of student and date of Child Study Team meeting.

"A summary of the present level of the student's educational performance.

"A statement of the recommended placement. . . .

"The extent to which the student will participate in the regular education program.

"Statement(s) of the annual program goals.

"The specific special education program and/or related services proposed for the exceptional child. . . .

"The projected date, by month and year, of the annual review.

"The signature and position of each Child Study Team member present at the placement meeting, to include the parent if present."

PROCEDURAL SAFEGUARDS

Various procedural safeguards provide for initial identification, comprehensive evaluation, special education placement, and IEP planning and implementation.

These safeguards include: (1) notification to and consent of parents prior to evaluation, placement, or change of placement; (2) use of screening materials which are not racially or culturally discriminatory; (3) placement within the least restrictive educational setting; (4)

periodic review of the child's educational progress; and (5) maintenance of student records in a confidential manner.

Administrative Rules and Regulations For Special Education §3.10

"An Individual Education Plan: Instructional/Implementation Plan shall be developed and implemented for each child. Minimum components of this instructional plan shall consist of:

"Instructional objectives to implement each program goal.

"The date the implementor starts instruction on each program objective and projected date of completion.

"A statement of the level of mastery to be required for each instructional objective. . . ."

Administrative Rules and Regulations For Special Education §3.11

"Each local school district shall provide for a comprehensive system of personnel development which shall include training of general and special education instructional and support personnel serving exceptional children. In-service training might include such activities as:

INSERVICE TRAINING

"Training in the use of Individual Education Programs and other pertinent state and federal policies governing special education.

"Workshops or conferences on teaching techniques, classroom strategies, etc.

"Demonstrations of various methods of classroom management.

"Materials workshops which provide opportunities for school personnel to investigate current resources and materials available for use with exceptional children.

"Local, state, regional, and national conferences and visitations pertaining to the education of exceptional children."

Administrative Rules and Regulations For
Special Education §3.12

IIA2-ID 9
IDAHO

The local school district "shall maintain records of the district special education program for review by the State Department of Education.

"School District Central Records of Special Education program should include:" (1) due process forms; (2) comprehensive evaluation data; (3) an IEP: Total Service Plan for each exceptional student; (4) an IEP: Annual Review Report for each exceptional student; and (5) records of all formal Child Study Team meetings.

"Special Education Teacher Classroom Records should include:" (1) teacher assessment of each exceptional child; (2) the IEP: Instructional/Implementation Plan for each exceptional student which includes measures of on-going student progress; (3) records of parent conferences; and (4) scheduling arrangements regarding the delivery of services.

RECORDS

"Other Ancillary Personnel Records should include:" (1) ancillary personnel assessment of each exceptional child; (2) the IEP: Instructional/Implementation Plan for each exceptional student which includes measures of on-going student progress; (3) records of parent conferences; and (4) scheduling arrangements regarding the delivery of services.

Administrative Rules and Regulations For
Special Education §4.0

Special education program model

The resource program model shall serve as a supplement to regular classroom instruction. The physical location for this resource program may include classrooms, resource room, a learning center, or non-school setting. The resource program teacher will not interfere with the regular classroom teacher, who has major responsibility for student education, but is to serve several districts.

Pupils eligible for participation in the gifted/talented program may be assigned to an in-school or out-of-school educational program individualized to meet his/her needs.

Pupils may be assigned: to spend part of the day in a resource room then return to regular classroom; spend time with a mentor in private sessions in or out of school; to an in or out of school program where he/she receives individual professional attention which is designed to meet that pupil's needs.

Pupils may be assigned to either a regular classroom or other setting for independent study, research, advanced academic work, craftmanship, or other such activities that are not available in a regular classroom curriculum.

PLACEMENT

The above student placements may be combined to address student needs. Participating students must spend a maximum of 5 to 6 hours per week in a program with a differentiated curriculum which is not available in the regular classroom program. Documentation of all time spent in this program must be provided. Special education plans for identified students are to be coordinated with the total education program.

District shall be reimbursed, to a maximum of 16 students, under the Exceptional Sparsity Factor, for each employed full-time facilitator of gifted/talented operating approved special education programs. This reimbursement is designed to provide an operating budget for materials and equipment needed for direct services to students.

The Child Study Team may assign students to a special education self-contained class on a full-time basis. In this model, the special education teacher has the major responsibility for the educational program. Students served within this model may be integrated into the regular education program as much as possible. In the self-contained Model: Moderate, a maximum of 12 pupils without an aide and 18 pupils with an aide will receive state reimbursement under the Exceptional child sparsity factor. In the severe category, a maximum of 6 pupils without an aide and 10 pupils with an aide will receive state reimbursement

under the Exceptional Child Sparsity Factor.

Pupils assigned to the secondary vocational program model will receive instruction in prevocational skills (14-16 years); vocational skills (16-18 years); and on-the-job work experience. This model may include instruction in academic skills relating to vocational areas, training in prevocational or vocational skills, experience in the community or school work stations, and/or job placement. The special education instructor who teaches in this model must hold, in order to receive state reimbursement, an Exceptional Child Certificate.

Itinerant services model:

The consulting teacher is to provide support to the special and/or regular education personnel instructing exceptional children.

Pupils assigned to the Communication Disorders Specialist shall receive speech and language instruction. Such instruction shall be geared to reach severely handicapped pupils and class size may be set accordingly.

Homebound placement may be used to service those children who can not attend school.

HOMEBOUND PLACEMENT

When school districts are unable to meet the special education needs of eligible children, they shall be directed to a contractual program with an approved rehabilitation center, hospital, corporation or agency. Such programs require annual approval from the Department of Education.

Districts may present written Special Design Models to the Department of Education to provide adequate instructional programs for exceptional students. This model requires annual approval from the Department of Education, Special Education Section.

Exceptional children may be placed in state-operated residential hospitals or schools when determined, by child and parents, to be the best means of helping the child.

Regional and state support services will be coordinated through the Department of Education.

The three state special education learning resource centers shall be located: University of Idaho, Boise State University and Idaho State University. Each center shall have a Special Education consultant who shall be a regional staff member of the Department of Education.

Special services shall be made available to hearing impaired public school students through itinerant specialists employed by the State School for the Deaf and Blind.

Services related to special education and the needs of individual exceptional students may be available through Child Development Centers, local public and private agencies, and community organizations.

Policy Manual
Ch. 400, §409

The state shall, pursuant to Idaho code 33-2001, provide for the education and training of exceptional/handicapped pupils residing therein.

State Board responsibilities shall include:

Establish an administrative unit to administer the provisions of this act;

Establish programs, set standards, and employ sufficient personnel needed to assist school districts in educating exceptional children;

Establish a research program to evaluate on-going programs, assess the number and types of exceptional children and make recommendations;

Design and continually revise standards for the determination of those eligible for special education services.

CROSS REFERENCE

IV.D; Statute §33-1512

STATUTES

§10-22.07

CLASSES FOR DEAF

The board shall establish classes for deaf children between 3 and 21 years of age.

§10-22.31

The board may enter into joint agreement with other school districts in order to provide special education services.

§10-22.38

Boards may cooperate with other educational and governmental agencies to carry out programs to identify and treat mental, emotional and physical handicaps in preschool children.

§14-1.01 - 14-3.01

The regional superintendent of schools shall appoint a County Special Education Advisory Committee, which, every fourth year, shall "complete and report to the [State Board of Education] a comprehensive plan whereby all handicapped children in the county may receive a good common school education."

The phrase "handicapped children" refers to the physically handicapped, the educable or trainable mentally handicapped, as well as those children with specific learning disabilities or speech defects.

The State Board of Education shall appoint an Advisory Council on Education of Handicapped Children, the members of which shall be selected on the basis of their knowledge of or experience in education of handicapped children.

§14-6.01

School boards that establish special education facilities shall exercise the same powers and duties regarding these facilities as are prescribed by law for the management of other educational facilities. Any district that maintains a high school is authorized to issue graduation certificates to handicapped children who complete special educational programs.

§14-7.01 - 14-7.02a

If it is necessary for a handicapped child to attend a class or school in another school district, his or her resident district "shall grant the proper permit, provide any necessary transportation, and pay . . . the per capita cost of educating such [child]." If it is necessary that a handicapped child attend a private facility that is in compliance with the regulations of the State Board, the resident district "shall pay the actual cost of tuition charged . . . or $2500 per year, whichever is less . . ." except that transportation shall not be provided to a residential school. It should be noted that "[a] school district providing for a child requiring extraordinary special education services . . . is eligible for reimbursement from the State for the per capita cost of educating that child in excess of the District per capita tuition charge for the prior year or $200, whichever is less."

TUITION

§14-8.01

All special educational facilities shall be under the supervision of the State Board of Education, which shall prescribe standards and regulations governing personnel requirements, eligibility, curriculum, transportation, etc.

The Board shall determine eligibility based upon the recommendations of qualified specialists. Parents must be notified of the type of program and services their child will receive.

§14-11.01

An educational materials coordinating unit for handicapped children shall be established to provide a library, audio-visual, and other types of materials peculiarly adapted to special education instruction.

§14-11.02

The Illinois Office of Education shall develop and operate a service center for deaf/blind individuals. Services provided shall include counseling and referral. An Advisory Board is also created to assist the State

CENTER FOR THE DEAF/BLIND

office and to make recommendations for providing services to deaf/blind individuals.

§14A-1 - 14A-8

The State Board of Education, with the advice of an appointed Advisory Council shall promulgate regulations whereby school districts may submit proposals for the education of "gifted children."

The proposal must include "a statement of the qualifications and duties of the personnel required . . . and the educational materials necessary." If approved by the State Board, "the district shall be entitled to reimbursement for the services and materials required," based upon a statutory formula. In addition, the State Board "may make fellowship grants to persons . . . interested in working in programs for the education of gifted children, for full-time study at the graduate level . . . ."

§34-128

The board shall provide free bus transportation for every "trainable mentally handicapped child" who lives within one mile from his/her assigned school, if the State Board determines that it is necessary.

REGULATIONS

Rules and Regulations to Govern the Administration and Operation of Special Education

2.01

Local districts shall be responsible for providing and maintaining appropriate and effective educational programs for all exceptional children who are residents therein.

2.02

Each local school district, independently or in cooperation with other districts, shall provide a comprehensive program of special education for those exceptional children who are between the ages of three and twenty-one and who are resident in the district.

A comprehensive program shall include:

A viable organizational and financial structure.

Systematic procedures for identifying and evaluating

the need for special education programs and supportive services.

A continuum of program options which incorporate appropriate instructional programs and supportive services.

Qualified personnel who can provide:

Administration of the program

Supervisory services

Instructional services

Supportive services

Transportation services.

Appropriate and adequate facilities, equipment, and materials.

Functional relationships with those public and private agencies which can supplement or enhance the special education programs of the public schools.

Interaction with parents, and with other concerned persons, which facilitates the educational development of exceptional children.

Procedures for internal evaluation of the special education programs and services.

Continuous planning for program growth and improvement based on internal and external evaluation.

2.03

Special education shall be established and conducted as an integral part of the local district educational effort.

The local school district shall be considered the primary agent for the delivery of special education services to exceptional children.

An organizational unit developed by joint agreement between districts shall be considered a service agent of the participating districts.

The cooperative programs shall be directed by, and responsible to, all participating local districts.

2.04

The local school district shall be responsible for ensuring that those children who require special education services enjoy rights and privileges equal to those of all other children.

No exceptional child between the ages of three and twenty-one may be permanently excluded from the public schools, either by direct action by the board of education, by indication of the district's inability to provide an educational program, or by informal agreement between parents and the school district to allow the child to remain at home without an educational program.

A child who has been determined eligible for a special education instructional program or supportive service shall not be expelled for behavior or a condition which is, or results from, an exceptional characteristic as defined by statute.

3.01

Each local school district shall establish and maintain special education instructional programs and supportive services which meet the educational needs of children with the following exceptional characteristics:

Auditory, visual, physical, or health impairment.

Speech or language impairment.

Deficits in the essential learning processes of perception, conceptualization, memory, attention, or motor control.

Deficits in intellectual development and mental capacity.

Educational maladjustment related to social or cultural circumstances.

Affective disorders or adaptive behavior which restricts effective functioning.

3.03

Special education instructional programs and supportive services, including diagnostic services, shall be available to exceptional children who are between the ages of three and twenty-one and who are enrolled in the local school district.

An exceptional child who will be three years old by December 1, shall be eligible for special education services, including private placement if required, from the beginning of the school year. Those attaining three after this time are immediately eligible.

An exceptional child who requires continued public school educational experience to facilitate his or her integration into society shall be considered eligible for such services until age twenty-one or upon successful completion of the secondary program. The child who becomes twenty-one during the school year shall be allowed to complete that year.

An exceptional child who has satisfactorily completed a secondary program and has been assisted in locating further educational and vocational experience as necessary shall be granted a diploma. Both parents and the student shall be made aware that eligibility for the public school special education services is terminated following the granting of a diploma and that the parents may request a review of the recommendation for graduation. DIPLOMA

3.07

The director of special education shall be responsible for the establishment and operation of all special education programs throughout the state.

4.01

Special education instructional programs shall be designed in direct response to the educational needs of exceptional children.

Specific types of instructional programs may be formulated according to common exceptional characteristics of the students, or, for students with differing exceptional characteristics.

Student-based objectives shall be developed for each type of special education instructional program.

The objectives of the program shall have direct and observable relationship to the objectives which have been established for each child who is placed in that program.

4.02

A curriculum of educational experiences adaptable to individual needs, interests, or abilities of each child shall be developed for each type of instructional program.

This curriculum shall be:

Sequential

Developmental

Goal-directed

Clearly stated and available to the public

Subject to continuing evaluation and revision.

4.03

In the formation of special education instructional programs, consideration shall be given to the chronological age, mental age, physical size, motor ability, level of achievement, and social and emotional adjustment of the students.

Special education age groupings shall be early childhood (generally ages 3-5), primary (generally ages 6-8), intermediate (generally ages 9-11), junior high (generally ages 12-14), and secondary (generally ages 15-21).

The age range of students within a special program

or in any individual instructional grouping shall not exceed four(4) years.

4.04

The principal determinants of the number of students served in each special education instructional program shall be the age of the students, the nature and severity of their exceptional characteristics, and the degree of intervention necessary. All exceptions to the following program size limitations shall require the written approval of the Illinois Office of Education prior to the implementation of the program.

4.5

A school district may conduct summer school programs. The Illinois Office of Education encourages the growth of new and creative programs to meet the needs of out-of-school youths and adults. Pursuant to the needs of such students, each high school shall adopt policies with reference to the awarding of credit for evening school courses on the same basis as courses taught in the day program. Experimental and pilot studies may be undertaken with approval of, and under the supervision of, the Illinois Office of Education.

Each local district, independently or in cooperation with other school districts, shall provide a comprehensive program of special education which will meet the needs of children ages 3 to 21 with the following exceptional characteristics:

Auditory, visual, physical, or health impairment; speech and/or language impairment; deficits in the essential learning of perception, conceptualization, memory, attention and/or motor control; deficits in intellectual development and mental capacity; educational maladjustment related to social and/or cultural circumstances; affective disorders and/or adaptive behavior which restricts effective functioning.

These special education programs [for children

with exceptional needs] shall provide school psychological services and school social worker services. Schools shall provide appropriate physical education programs for exceptional students. In those instances where a student's special needs cannot be met through the local or joint Special Education Program, the public school districts may enroll the handicapped student in a private facility.

5.01

Supportive services which shall be provided by the school district are:

Individual or small group instructional services, either itinerant or resource, for exceptional children whose educational needs can be adequately met through part-time instruction by a special education teacher.

Speech and language services for all students with speech and/or language impairments which interfere with their educational or social development.

School psychological services to and on behalf of students who require psychological evaluation and assistance in their educational or behavioral adjustment.

School social work services to and on behalf of students whose educational or behavioral development is restricted due to social or emotional considerations, family circumstances, or problems of the environment.

Special reader services for children whose educational development can be significantly assisted by the provision of such services.

Braillists and typists for exceptional children with visual impairment.

Therapy, for exceptional children whose educationally related, therapeutic needs have been determined in a multidisciplinary staff conference.

Consultant services, the nature of which is determined by the needs or exceptional children.

Consultant services, the nature of which is determined by the needs of exceptional children.

7.04

The amount of instructional or supportive service time provided through the home and hospital program shall be determined in relation to each child's educational needs as well as physical and mental health.

7.05

Instructional time shall be scheduled only on days when school is regularly in session.

7.07

Periodic conferences shall be established between appropriate school personnel and home and hospital personnel to coordinate the courses of study and to facilitate the student's return to school.

7.08

The school district shall not utilize the home and hospital program to avoid its responsibilities to establish in-school programs nor to eliminate children from the school program.

8.03

When the district determines that a child cannot be provided with an education in the public schools, appropriate school personnel shall meet with the parents or guardians of the child to determine an alternative educational plan.

8.04

The district shall be responsible for locating an appropriate state-operated or private program and for facilitating the referral to that program. An appropriate program is one which will provide the child with special education experiences which are both adequate and appropriate to the student's need.

If for any reason the recommended placement cannot be achieved, the district shall provide an alternate educational plan.

8.06

All private facility placements shall be reapproved by the Illinois Office of Education on an annual basis.

8.08

The local school district shall maintain a record of supportive data on each child placed in a private facility. This data shall include:

A summary of the child's individual problems.

A description of the program required by the child.

An explanation of why the child's needs cannot be met by the public school.

The description of the special education program offered by the private facility.

The request for placement of the child in a private facility as approved by the Illinois Office of Education.

Copy of the agreement with the facility.

Conference reports and periodic progress reports submitted by the private facility.

An annual reassessment of the need for continued private placement.

9.01

Local districts are to develop and implement procedures creating public awareness of special education programs. Where appropriate such information is to be in the major language of a particular community. An annual notification to all affected individuals is to be given.

9.02

Each local school district shall be responsible for actively seeking out and identifying all exceptional children in the district who are between the ages of 3 and 21. Procedures developed to fulfill this responsility shall include but not be limited to:

An annual screening of children between the ages of 3 and 5, to identify those who may need special education.

Hearing and vision screening at regular intervals during the child's school career.

Speech and language screening of each child upon initial enrollment in a public school district in

Illinois.

Annual screening by teachers and other professional personnel, for referral of those children who exhibit problems which interfere with their educational progress and/or their adjustment to the educational setting.

Procedures may include coordination with local and state service agencies and existing parent groups.

9.03

When a child is identified through the screening process, or exhibits problems which interfere with the child's educational progress and/or adjustment to the educational setting, or when there is reason to believe that a child may require special education services, the child shall be referred for a case study evaluation.

Each local school district shall develop, and make known to all concerned persons, procedures by which a case study evaluation of a child may be requested.

Referrals may be made by school district personnel, the parents of the child, community service agencies, persons having primary care and custody of the child, other professional persons having knowledge of the child's problems, the child or the Illinois Office of Education.

The local school district shall be responsible for determining the appropriateness of the referral, deciding what further action should be taken, and initiating the necessary procedures.

9.04

All written notices required by these regulations shall be in English, and in the language normally spoken by the parents if it is other than English. NOTICE

9.05

The parents shall be notified regarding referral of their child for a case study evaluation.

When the child is to be given a comprehensive case study evaluation the parents shall be notified, in writing, of the reasons leading to this decision, evaluative procedures which will be conducted and that they will be asked for signed consent.

Annually, written notification regarding the district's policies and procedures for providing a homebound services case study evaluation and a speech and language case study evaluation shall be provided to all parents in the district.

9.07

If the parents object to a proposed case study evaluation by refusing to sign consent, and which objection is not resolved by a conference with the parents, the district may request an impartial due process hearing.

9.08

Before a child is given a case study evaluation, the local school district shall be responsible for determining the child's language use pattern, mode of communication, and cultural background.

9.06

Parental consent shall be obtained prior to a formal case study evaluation.

9.09

The child shall be given a case study evaluation appropriate to the nature of the problems which caused the referral.

For the child who requires special education placement in a home or in a hospital because of a temporary physical or health impairment, estimated to last six months or less, a homebound services case study evaluation shall be conducted.

For the child whose problems seem to be limited to the area of speech and/or language, a speech and language case study evaluation shall be conducted.

The speech and/or language impaired child with additional handicapping conditions or educational deficits shall be referred for further evaluation.

For all other children, a comprehensive case study evaluation shall be conducted. This evaluation shall include, but need not be limited to:

An interview with the child

Consultation with the child's parents

A social developmental study, including

an assessment of the child's adaptive behavior and cultural background

A report regarding the child's medical history and current health status

A vision and hearing screening, completed at the time of the evaluation or within the previous six months

A review of the child's academic history and current educational functioning

An educational evaluation of the child's learning processes and level of educational achievement

An assessment of the child's learning environment

Specialized evaluations specific to the nature of the child's problems.

MEDICAL EXAMINATION

An appropriate medical examination by a licensed medical specialist shall be obtained, at parent expense or through community resources, for any child with either a suspected physical, health, vision or hearing impairment

9.11

Each case study evaluation shall be conducted so as to assure that it is linguistically, culturally, racially, and sexually nondiscriminatory.

The language(s) used to evaluate a child shall be consistent with the child's language use pattern.

Psychological evaluation of a child shall be performed by a certified school psychologist who has demonstrated competencies in, and knowledge of, the language and culture of the child.

Tests given to a child whose primary language is other than English shall be relevant, to the maximum extent possible, to his or her culture.

9.12

In those instances in which a child has been evaluated by qualified professional personnel outside the school district, that evaluation shall be considered in determining eligibility and need for special education placement.

9.13

Upon completion of a homebound services case study evaluation the local district superintendent or designee shall determine the child's eligibility for homebound special education placement and recommend an appropriate placement.

9.14

Upon completion of a speech and language case study evaluation the speech and language clinician shall review the findings, determine the child's eligibility and need for speech and language services, and make recommendations to the local district superintendent or designee for appropriate placement.

9.16

ELIGIBILITY

Eligibility for special education programs and services shall be determined by the presence of one or more of the following exceptional characteristics: "visual impairment; hearing impairment; physical or health impairment; speech and/or language impairment; learning disability; educational handicap, behavior disorder; mental impairment; multiple impairments."

9.17

PLACEMENT

Recommendations for special education placement shall be based on the following:

The child shall be placed in the educational program which is most appropriate to the students needs and least restrictive of the interaction with nonhandicapped children.

The more severe and complex the child's handicapping condition, the more intensive shall be the special education program provided for the student.

The proposed placement shall be consistent with the findings of the case study evaluation and the established eligibility of the child.

9.19

The local school board has the authority to place students in special education programs. The board may also authorize, by regulation, that the director of special education place students in special education programs.

9.20

The case study evaluation and multidisciplinary staff conference shall be completed within sixty(60) school days of the date of referral or the date of application for admittance to the public school by the parents of the child.

9.21

At least ten(10) days prior to the actual placement of the child, the parents shall be notified, in writing, of the following:

The results of the case study evaluation.

The nature of the special education program or service needed by the child.

The recommendations for placement and the plan for implementing those recommendations.

Their right to object to the proposed placement and the specific procedures in making such an objection, including the procedures for requesting an impartial due process hearing.

Record of such notice shall be entered in the child's temporary student record.

9.22

If the parents agree to the proposed placement and waive the ten(10) school day interval before placement, the child may be placed in the recommended program as soon as practicable.

9.23

If the parents object to the proposed placement within ten(10) school days of their receipt of notification of the proposed placement, the district shall arrange a conference with the parents to try to resolve the situation. If the parents continue to object, they may appeal the proposed placement by requesting an impartial due process hearing. HEARING

9.24

Special education placement shall be made as soon as possible after the determination of eligibility and need for such placement but in no case shall placement

occur later than the beginning of the next school semester.

9.25

The educational status and continued special education placement of each child shall be reviewed at least annually in a conference attended by those professional persons working with the student and others as designated by the director of special education.

Utilizing appropriate evaluation information, including teacher and parent opinions, the annual review shall determine the extent to which the child has met the objectives, recommend further evaluation if indicated, and revise the individual educational plan, including the specific objectives set for the child, as necessary.

When further evaluation is indicated pursuant to the annual review, a review of the child's status, and/or requested by the teachers, parents, other knowledgeable persons, or as a result of an imparrial due process hearing, such an evaluation shall be completed within sixty (60) school days of the request.

9.26

Notification to parents regarding continuation, change or termination of placement shall inform the parents of their right to object and of the procedures to be followed to make such an objection. NOTICE

9.27

Written notification regarding the continuation of the child's special education placement shall be provided to the parents of the child as soon as possible but not later than ten(10) school days prior to the beginning of each school year.

9.28

At least ten(10) school days prior to any major change in the educational placement of an exceptional child(excluding changes in levels, i.e., primary to intermediate), including those stated in rule 9.26, the parents shall be given written notification of the proposed change, including the reasons for the change and a description of the proposed program.

If the parents request an impartial due process

hearing regarding a proposed change in the educational placement of their child, the district shall not change the placement until the matter is decided.

9.29

Special education placement may be terminated only after a complete review of the child's educational status determines that such placement is no longer required, that termination of the placement is in the best interests of the child, or that the child was inappropriately placed.

10.01

When there are differences between the local school district and the parents or other persons having primary care and custody of the child, or the child which cannot be resolved through the procedures regularly utilized by the district, an impartial due process hearing may be requested.

HEARING

A hearing may be requested by the parents, other persons having primary care and custody of the child, the child or the district.

10.04

Within five(5) school days of the request for a hearing, the local school district shall:

Send a certified letter to the Illinois Office of Education requesting the appointment or an impartial hearing officer.

Send to the person requesting the hearing, by certified mail, a copy of the letter sent to the Illinois Office of Education.

10.05

If the district decides not to honor the request for a review, the parents or guardian of the student shall be notified of this denial. Such notification shall be made in writing within ten (10) calendar days of the request and shall contain the reasons for the denial.

If the local district fails to notify the parent of their right to a hearing , as prescribed in the rules and regulations, or if the request for a review is denied either directly or by failure to provide such a review,

the parent or guardian may appeal such a denial directly to the Illinois Office of Education.

10.06

Within five(5) school days of its receipt of the request from the local school district, the Illinois Office of Education shall select and appoint a trained impartial hearing officer to preside at the local hearing.

10.07

Within five (5) days of his or her appointment, the hearing officer shall set the time and place for the hearing.

The hearing shall be held at a time and place reasonably convenient for the parents. However, it shall be scheduled not later than thirty (30) school days after the appointment of the hearing officer, unless the hearing officer permits an extension of time due to extenuating circumstances.

10.09

The hearing officer shall preside at the hearing and conduct the proceedings in a fair, impartial, and orderly manner.

10.10

The hearing which has been requested regarding the placement of a child shall seek to establish, but is not limited to, the following:

That the child has needs which require special education intervention.

That the evaluation procedures utilized in determining the child's needs have been appropriate in nature and degree.

That the diagnostic profile of the child on which the placement recommendation was based is substantially verified.

That the proposed placement is directly related to the child's needs.

That the child's rights have been fully observed.

10.12

The parents of the child, and the local school district or their respective representatives shall have a right to present testimony and question all witnesses at the hearing.

10.14

A record of the hearing procedure shall be made, either by a court reporter who is paid by the school district, or by a tape recorder.

10.15

Within ten (10) school days after the conclusion of the hearing, the hearing officer shall issue findings and recommendations, by certified mail, to the district and parents.

10.17

APPEAL

The parents who wish to appeal to the Illinois Office of Education shall submit a written request for a state-level review to the local district superintendent within fifteen (15) school days of their receipt of the decision of the school district.

10.19

Pending the completion of the due process hearing, an appeal to the Illinois Office of Education shall cause the district to postpone any proposed change in the child's educational placement, unless the State Superintendent of Education decides that the health and safety of the child or others would be endangered. In such a case, the school district shall be responsible for developing an appropriate interim placement.

10.20

Upon receipt of a request for a state-level review, the State Superintendent of Education shall designate a trained, impartial hearing panel, composed of appropriate attorneys and educational employees of the Illinois Office of Education.

10.21

The impartial reviewing panel shall consider the appeal based upon a study of the materials provided by the local school district and the parents.

10.22

A report of the reviewing panel, including its recommendations, shall be submitted to the State Superintendent of Education, who shall decide the appeal within thirty (30) school days of receipt of the appeal by the Illinois Office of Education.

10.23

Copies of the decision of the State Superintendent of Education shall be sent by certified mail to the local school district and the parents. The decision shall be given in English and in the language normally spoken by the parents if it is other than English.

10.24

The decision of the State Superintendent of Education shall be binding on all parties.

10.25

The local school district shall be responsible for implementing the decision of the State Superintendent of Education. All decisions of the State Superintendent of Education issued pursuant to these regulations may be enforced by denying approval of special education programs, denying personnel reimbursement, reducing school district recognition status, or by initiating action in a court of law.

10.26

During the regular school year, the local school district and the Illinois Office of Education shall comply with all timelines stated herein and take whatever other steps are necessary to expedite the resolution of the controversy.

12.01

Professional and noncertified personnel shall be employed in sufficient numbers and with appropriate qualifications to deliver to each exceptional child resident in the district the special education program necessary.

13.01

Each child who exhibits one or more exceptional characteristics as described in Article XIV of The School Code of Illinois shall be eligible for special transportation. Such transportation shall be provided as the child's exceptionalities or the program location may require.

13.03

Personnel responsible for special transportation shall be given inservice experiences which will enable

them to understand and appropriately relate to exceptional children.

13.04

Special transportation shall be scheduled in such a way that a child's health and ability to relate to the educational experiences provided are not adversely affected.

14.01

The extent to which the local school district is fulfilling its responsibilities to exceptional children shall be determined by the Illinois Office of Education.

14.02

Evaluation by the Illinois Office of Education shall focus on the local district's provision of special education services, on each special education cooperative organization of which it is a participant, and on community resources utilized by the district.

14.03

Evaluation of special education programs and services shall be based on all of the following elements:

A Special Education Services Comprehensive Plan. This plan shall describe the district's provision of special education services, its plan for program involvement, and those factors unique to the individual district or cooperative which must be considered in the evaluation. This plan shall be filed with the Illinois Office of Education and revised at least triennially.

Continuous Internal Evaluation. This district and the cooperative unit(s) designated to provide special education services shall develop and implement procedures which assess the extent to which exceptional children are being adequately served and the effectiveness of each special education program and service.

Recognition Criteria for Special Education. These criteria shall be assessed through an indepth study by a team representing the Department of Recognition and Supervision of the Illinois Office of Education.

14.04

Written reports of the results of the evaluation conducted by the Illinois Office of Education and any

subsequent recommendations or actions shall be provided to the appropriate board(s) of education. Reports of the evaluation shall be considered in the public domain.

STATUTES

§20-1-6-1 -- 20-1-6-2

"There is . . ., under the . . . board of education, a division of special education . . . . The governor shall appoint, upon recommendation of the state superintendent . . . a director of special education . . . . The duties of the director shall include:"

General supervision of all classes and schools for handicapped children; making regulations governing the curriculum and instruction, including licensing of personnel in the field of education; and inspecting classes or schools to see that they "maintain proper standards of personnel, buildings, equipment and supplies."

A "handicapped child" is defined as any child between 3 and 21 years old, who because of physical or mental disability, is incapable of being educated properly through normal classroom instruction, but who would benefit from a special educational program.

§20-1-6-3

"Every school corporation . . . is empowered to establish and maintain instructional facilities for . . . handicapped children" and/or to provide transfer and transportation of handicapped children residing in its geographical limits to the Indiana state schools for the deaf and blind or to another school corporation which maintains facilities for the instruction of handicapped children. Any school corporation may also provide for instruction of special education in the child's home if the child is "unable to attend the special class or school . . . . All nurses, therapists, doctors, psychologists and related specialists employed under [Ch. 6] shall be

registered and authorized to practice under the laws of this state and shall be subject to such additional examination as the division of special education may require.

Teachers in classes and schools for handicapped children shall" possess the usual qualifications as well as special training required by the commission on general education. "Qualifications of para-professional personnel to be employed under the provisions of [Ch. 6] shall be subject to determination of the department of public instruction of the state board of education.

All [handicapped] children shall receive credit for work accomplished on the same basis as normal children who do similar work."

§20-1-6-5 -- 20-1-6-6

A school corporation establishing [a special education program or school] may send all its handicapped children thereto and it may provide dormitories for them. It shall admit, so long as facilities permit, any other handicapped children of the state who are eligible under this act and who are not provided an opportunity to attend an adequate school in their own school corporation.

§20-1-6-8

The medical care of the handicapped child is the responsibility of the family. However, no handicapped child is to be excused from attending school unless the local health officer certifies that attendance "would be injurious to the child." The educational and recreational program shall in no way alter the medical care prescribed by the proper medical authority. Eligibility for all special educational classes and programs shall be determined by appropriate specialists. The medical care of needy children suffering a handicap [is] the responsibility of the state department of public welfare.

MEDICAL EXAMINATION

§20-1-6-12

A child shall not be required to undergo medical examination, if the parent or legal guardian of the pupil notifies the teacher or principal that he/she objects thereto because he/she relies in good faith on prayer or spiritual means for the treatment of sickness. However, no objection shall be made to a physical or medical examination to determine whether a child shall be admitted to any class or school for handicapped children.

§20-1-6-14

"School boards of any school corporations that maintain a recognized school . . . shall . . . establish and maintain such special facilities as may be needed for . . . handicapped children [between ages 6 and 18] who are residents of their school districts, and such other children, resident in other school districts, as may be authorized by this act. . . ." School boards may provide such services for children under 6 years of age.

§20-1-6-16

There is a state advisory council which shall "assist the department of public instruction in the development of a statewide plan to provide a free public school education" for handicapped children. The council shall "advise the superintendent of public instruction and the commission on general education regarding all rules and regulations pertaining to handicapped children; recommend approval or rejection of completed comprehensive plans." There are 12 members of the council appointed to 4 year terms by the superintendent of public instruction. The commissioner of health and the commissioner of the department of mental health, or their designates, shall be ex officio members of the council. Appointed members "shall be selected on the basis of their knowledge of, or experience in the problems of the education of handicapped children."

§20-1-6-19

The superintendent of public instruction may contract with private schools to pay the excess costs of educating handicapped children "whose handicap is of such intensity as to preclude achievement in the local school setting" and when it is not economically feasible to establish a local program for the child.

§20-1-6-20

"Any teacher teaching in any of the participating school corporations who becomes a teacher in the special education school shall retain tenure . . . ."

§20-8.1-6.1-4

A school corporation may transfer "a student with a physical, emotional or mental disability" to another school corporation which has special programs or facilities for children with that particular disability.

REGULATIONS

§ II, Ch. 1, Policy 70-05

Joint Service Areas

"It is recommended that the Commission on General Education approve...specified areas and authorize school corporations to jointly plan programs in special education, vocational education or other state and federal programs that may develop in the future.

School corporations upon special request to the Commission...may transfer to an adjoining district if that district can better serve those students and its adults in its community....."

Rule S-1

Section 1

General Information

a. Authorization to Conduct Special Education Programs

As part of the state's responsibility to educate all children, this rule provides guidelines for the establishment of special education programs eligible for state funding assistance. Such programs must be conducted by school corporations as reimbursement cannot be made to other agencies.

b. Joint School Service and Supply Cooperative Programs and Joint Schools

School and school corporation may conduct, and receive reimbursement for, joint program and classes in special education.

c. Granting of Diplomas and Credit for Subjects Taught

DIPLOMA

Students enrolled in special education programs or classes shall, upon meeting the required standards, be issued the same diploma as that of other students.

d. Assignment of Average Daily Attendance (ADA) or a Day's Membership

For purposes of computing the ADA in special education programs, the following rules shall apply. Students attending their home school shall have their ADA credited to that school. Students attending joint school program shall have their ADA credited to the parent corporation. Students attending joint (corporation) programs shall have their ADA credited as determined by the underlying Agreement. The ADA of transfer pupils shall be credited to the receiving school.

e. Medical and Psychological Reports

All such reports shall be made at least every three years and shall be made easily accessible to those directly concerned with the student.

f. Minimum Instructional Day

The instructional day shall be equivalent to that for regular school program for children of the same age levels. However, waivers may be obtained, provided they

WAIVER

are in writing and submitted sixty days in advance.

g. Appeals

APPEALS

Appeals of any kind shall be made to the "state board for special education appeals" whose members shall be appointed by the governor.

h. Additional Evaluation

HEARING

Where, after hearing, a decision has been made to offer a student special education services, the parent of such student may request the State Superintendent to provide a licensed school psychologist, psychiatrist, or medical doctor, to make further examinations. Such examination shall be used as a basis for recommendation to the state board for special education appeals. Any expenses incurred hereunder shall be borne by the local school system.

MEDICAL EXAMINATION

i. Administration of Medicine

Medicines shall not be prescribed or given without the knowledge and consent of a child's parents, and then only as prescribed by their family doctor.

Section 2

Definitions and Program Specifications

Programs approved hereunder shall be for children between the ages of 6 and 18, provided that program may be provided for children between the ages of 3 and 6 and the ages of 18 and 21. Program for deaf children may begin as young as 6 months.

The local superintendent, with the advice of staff specialists and parents, shall have responsibility for determining the proper education program for a student. No program shall be implemented without prior written permission from the parents.

As special education programming requires the joint efforts of the school and the parents to be effective, it is necessary that the parents be "fully informed" of their child's situation.

As such, before any child is referred for testing, the parents must be notified and a personal interview arranged. The written consent of the parents must be obtained before any tests are administered.

Preliminary group screening tests administered to all students do not require such an interview.

"No child shall be excluded from or transferred out of a regular public school assignment unless such child is provided:

a) free and adequate alternatives educational service suited to the child's needs, and

b) written notice, hearing and periodic review of his/her status and of the adequacy of any educational alternative."

A case conference committee composed of "appropriate" school personnel and the child's parents, should they desire to participate, should be convened by the local superintendent.

The coordinator of such committee shall make arrangement for:

a) "assembly of relevant data and reports concerning the child and

b) the administration of further tests and evaluation" if the child's parents do not object.

Within sixty days of the initial request or recommendation the committee shall meet, and on the basis of relevant reports, shall recommend an educational program for the child. A report in these recommendations shall be sent the local superintendent within twenty days of the meeting. "The superintendent shall provide for the special educational needs of the child by way of an educational placement as close to the norm as possible."

The superintendent shall prepare a report on the recommendations and proposed placement, and send a copy thereof to the child's parents. A notice accompanying such report shall inform the parents of their right to a hearing if there is an objection to the placement.

"Whenever the superintendent proposes to take action regarding a child's . . . placement, denial of placement or transfer the child's parent . . . shall be informed by written notice of said proposal. If the parent . . . opposes the proposal, he[she] shall make a written demand for a

hearing . . .[which]. . . must be conducted within twenty to forty-five . . . days after the demand. Pending the outcome of the hearing, the child must be provided with interim educational services. In carrying out the above, the following procedures shall be followed:

1) If the child is not currently provided with a free educational program, he[she] shall be provided with the program deemed suitable by the local school system staff pending a decision by the hearing officer . . . . If the child is already being [so] provided . . . changes to which the parents . . . object shall not be made pending the hearing decision.

NOTICE

2) Notice . . . shall be given in writing by registered mail to the parent . . . of the child.

d) Such notice shall:

a) describe the proposed action in detail;

b) clearly state the specific and complete reasons for the proposed action . . . .;

c) describe any alternative educational opportunities available on a permanent or temporary basis;

HEARING

d) inform the parent . . . of the right to object to the proposed action at a hearing . . . and of the manner in which to request such a hearing;

e) inform the parent . . . that the child may be [independently] tested . . . and specify the name. . . of an appropriate local diagnostic center;

f) inform the parent . . . of any organizations providing assistance with respect to placement questions;

RIGHT TO COUNSEL

g) inform the parent . . . of the right to be represented at the hearing by legal counsel; to examine and copy the child's school records . . . including any tests or reports upon which the proposed action may be based . . . and, to confront and cross-examine any school official, employee, or agent of the school district or public department who may have evidence upon which the proposed action is based.

4) The hearing shall be at a time and place reasonably convenient to such parent . . . and

. . . not sooner than twenty . . . days nor later than forty-five . . . days after the receipt of a request from the parent or guardian.

HEARING

5) The hearing shall be closed to the public unless the parent . . ." requests otherwise.

RIGHT TO COUNSEL

6) "The child and his[her] parent . . .[have]. . . the right to a lawyer or other representative of their own choosing. If they are unable, through financial inability, to retain counsel, the superintendent shall advise the[m]. . . of availabile voluntary legal assistance.

7) The decision of the hearing officer shall be based solely upon the evidence presented at the hearing.

8) The local school corporation shall bear the burden of proof as to all facts and as to the appropriateness of any placement, denial of placement or transfer.

9) A . . . verbatim record of the hearing shall be made, and upon request shall be transcribed and made available to the parent . . . or his[her] representative.

10) At a reasonable time prior to the hearing . . . the parent . . . or his[her] counsel, shall be given access to all records of the public school system and any of its agents or employees pertaining to the child, including any tests or reports upon which the proposed action may be based.

11) The independent hearing officer shall be designated by the State Superintendent . . . and shall not be an officer, employee or agent of the local school system . . . .

12) Costs pertaining to the hearing officer shall be paid by the local school corporation.

13) The parent . . . or his[her] representative, shall have the right to compel the attendance of, to confront, and to cross-examine any witness testifying for the public school system or any public employee who may have evidence. . . .

14) The parent . . . or his[her] representative, shall have the right to present evidence and testimony . . . ."

15) Within thirty . . . days after the hearing, the hearing officer shall render a decision in writing. Such decision shall include findings of fact and conclusions of law and shall be sent by registered mail to the parent . . . and his[her] counsel.

16) Appeals of any kind . . . may be made to the state board for special education appeals after [these] procedures . . . are followed." APPEAL

a. Programs for the Multiply-Handicapped

1) Definition

"A multiply-handicapped pupil is one with two or more handicapping conditions which . . . result in problems so complex that placement in programs designed for children with single handicaps will not result in significantly meaningful growth and achievement."

2) Evaluation and Placement Procedures

A case conference committee, on the basis of tests and other evaluations of learning capabilities, shall determine the appropriate placement for multiply handicapped pupils. Said committee shall prepare a written report containing recommendations as to eligibility and admissibility of the student to appropriate special education programs. If it is impossible to satisfactorily assess a given student's needs, he/she may be assigned to a "diagnostic teaching center for intensive continuing evaluation."

The Committee, prior to making its decision as to eligibility, shall determine whether additional evaluations are needed. The director of special education shall coordinate the results of such evaluations in a manner designed to aid the committee in making proper recommendations.

3) Annual Case Review

Each student's case shall be renewed annually by the Committee to determine if additional data is needed "to assess the student's current and continuing needs." The committee shall prepare a report recommending either:

a) "retention in the program;

b) Transfer to a different level of special education programming ;

c) Transfer to a regular school program

d) Transfer to an appropriate public or private resource;"

4) Diagnostic-Teaching Center

A Diagnostic-Teaching Center, staffed with a certified special education teacher and other appropriate consulting specialists, shall assess the learning strengths and weaknesses of individual students assigned thereto. The center shall make recommendations on the basis of such assessments, and the students shall be placed on the basis of such recommendations. "The caseload of the . . . center shall be limited to allow the pesonnel to meet the individual needs of each student enrolled."

5) Classes for the Multiply-Handicapped

Class size shall be no greater than eight, although exceptions may be granted by the Division of Special Education. A teachers-aide shall be employed if the situation so warrants.

b. Programs for the Physically Handicapped

1) Definition

A physically handicapped child is one whom a licensed physician finds has a serious health impairment of his/her "locomotion or motor functions" which shall cause an inability to function in the regular school program or a need for greater protection than the regular school program provides.

2) Evaluation and Placement Procedures

A case conference committee shall determine appropriate placement for the child on the basis of medical reports; an evaluation of learning capabilities and other school information. A written report shall be made containing recommendations as to the eligibility and admissibility of the student "to the most optimum type of special services warranted by the student's needs."

PLACEMENT

The Director of Special Education shall coordinate the results of such evaluation in a manner which shall aid the Committee in making proper recommendations.

3) Annual Case Review

Annually, the committee shall review each student's

case to determine whether additional data is needed "to assess the student's current and continuing needs." The Committee shall prepare a report recommending that the student remain in the program, be transferred to another special education program, or transferred to a regular school program.

4) Classes for the Physically Handicapped

"The following types of classes may be approved:

Nursery: Ages 3-4; Kindergarten: Ages 5-6; Primary Ages 7-9; Intermediate: Ages 10-12; Junior High Ages 13-14; Senior High Ages 15-21"

The above may be combined so long as a special education program is maintained on both the elementary and secondary levels. Class size shall be limited so as to allow the teacher to meet the individual needs of each student. A teacher's aide shall be employed where warranted. Such class may be used as a resource room for students who have been integrated into the regular classes. "The special class teacher . . . will act as consultant for those regular class teachers who have physically handicapped pupils enrolled in their classes."

PUPIL/TEACHER RATIO

5) Alternate Programs for the Physically Handicapped

The Division of Special Education may approve alternate programs for the physically handicapped. Proposals for such programs shall include "a description of the program rationale; the procedures for selection and placement of students; the plan for in-service education of teachers . . . the organizational plan and general curriculum content, and a detailed plan for the continuing evaluation of each student's progress." Such proposal must be submitted 60 days prior to its initiation. All modifications in the program must be submitted annually.

c. Programs for the Visually Handicapped

1) A visually handicapped pupil is one who comes under the statutory description for a blind pupil or a partially-seeing pupil.

2) Evaluation and Placement Procedures

A case conference committee, on the basis of medical reports, evaluations of learning capabilities and other school information, shall make recommendations as to the appropriate placement of such child in the "optimum type of special services warranted by the pupil's needs." The Director of Special Education shall coordinate the result of necessary evaluations so as to aid the committee in making proper recommendations.

3) Annual Case Review

Annually, the case committee shall determine what, if any, "additional data is required in order to assess the student's current and continuing needs." Their report shall recommend retention in the program or transfer to another program.

4) Itinerant Teacher of the Visually Handicapped.

An itinerant teacher is properly certified to teach the visually handicapped who shall regularly provide special instruction and materials to visually handicapped students "who are assigned to regular classrooms throughout the school corporation(s)."

5) Resource Teacher of the Visually Handicapped

"The resource teacher provides intensive instruction from a resource . . . center to blind and partially seeing pupils who are assigned to regular classrooms throughout the school corporation(s)."

6) Classes for the Visually Handicapped

"The following types of classes may be approved: Nursery Ages: 3-4; Kindergarten Ages: 5-6; Primary Ages 7-9; Intermediate Ages 10-12; Junior High Ages 13-14; Senior High Ages 15-21. Combinations may be approved provided that the class sizes shall be limited "to allow the teacher to meet the individual needs of each student enrolled."

d Programs for the Hearing-Impaired

1) Definition

Hearing impairment exists in those students who are either deaf or hard of hearing and whose condition

is such that it is either irreversible or requires prolonged medical care. As defined herein, these are students who shall require special education services, placement and programming determined by the age of onset of the hearing loss, the nature and/or degree of hearing loss, and the ability of the person to function within the group structure.

2) Evaluation and Placement Procedures

Local school administration shall determine the proper placement for any hearing-impaired pupil. The Director of Special Education shall coordinate all necessary evaluation so as to aid the case conference committee in making the proper recommendations.

PLACEMENT

When necessary the Division of Special Education will provide a consultation term. Determination of appropriate placement shall be shall be on the basis of the following:

a) "An audiological evaluation by a [licensed] clinical audiologist . . .

b) A general medical examination.

MEDICAL EXAMINATION

c) An otological examination by an otologist.

d) An evaluation of learning capabilities."

A case conference committee shall prepare a report for each child which shall include recommendations regarding eligibility of the child for a special education program and the most appropriate type of program.

3) Annual Case Review

The committee shall review each case annually to determine "what, if any, additional data is required in order to assess the student's current and continuing needs." They shall recommend either retention in the program or transfer to another program.

(4) Programming in Early Education for the Hearing Impaired

School officials may obtain approval for programs for the education of hearing impaired children between the ages of six months and five years. Programs submitted for approval should contain a plan for the operation and

evaluation of the program.

(5) Classes for the Hearing Impaired

The following types of classes may be approved: infant, preschool, primary, primary-intermediate, intermediate, junior high, and senior.

Class size shall be limited to as "to meet the individual needs of each student . . . ."

(6) Alternate Programs for the Hearing Impaired

Alternate programs may include the following:

(a) Special Consultation and Itinerant Instruction - Provided for those students who are only mildly hearing-impaired and whose needs can be best met by their remaining in the regular classroom. In such cases, "special periodic instruction of an itinerant nature" must be provided, and special consultation, provided the student's teachers, counselors, and supervisors. Such consultation shall be provided by licensed personnel.

(b) Resource Person Programming - In this situation students remain in their regular class for the majority of the day but shall attend a resource room "for specialized work which may include language development, speech-reading, and . . . developmental and remedial instruction in the basic subjects."

(c) Cooperative Part-Time Programming - Students are scheduled to attend a special education class for a major portion of their instruction. Such classes shall have no more than eight students, and the teacher therein shall be required to maintain "a close working liaison" with regular class teachers. "Pupils are individually programmed into regular classes and activities as each student demonstrates potential for successful placement."

PLACEMENT

e. Programs for the Emotionally Disturbed

(1) Definition

An emotionally disturbed child is one who, after available supportive and counselling services, "is chronically unable to make constructive use of his/her school experience as manifested by an inability to develop, socially and emotionally and learn at the same rate as his classmates. . .

This definition does not include or intend to imply an obligation to provide psychiatric treatment or social welfare programs to all children with problems" nor does it include students who are mentally retarded or severely handicapped.

A psychiatrist, a clinical psychologist, or certified school psychologist shall make the determination of whether or not a child is emotionally disturbed.

(2) Evaluation and Placement Procedures - Appropriate placement for such children shall be made on the basis of a report written by any of the three professionals mentioned above. A written report indicating such placement shall include "information pertaining to the nature and extent of such problems as perceptual difficulties, language and communication deficits, related physical impairment, psychological, emotional, and social maladjustment, and other factors affecting the learning of the student."

PLACEMENT

A case conference committee on the basis of said report and other school and health information, shall determine the appropriate placement for each child. The committee shall prepare a written report which shall include recommendation as to the eligibility and admissibility of such child in special education programs.

The Director of Special Education shall coordinate the result of all necessary examinations "in such a manner as to aid the....committee in making proper recommendations."

(3) Annual Case Review

Annually the committee shall review each student's case to determine what, if any, "additional data is required in order to assess the student's current and continuing needs." Their report shall recommend retention in the program or transfer to another program.

(4) Special Consultations

For students whose needs can be best met by remaining in the regular classrooms, special consultations may be utilized as a means of dealing with his/her problem. Such consultation shall deal with "individualized sequence of instruction, behavioral management, (and)

crisis counseling and guidance". Each counselor shall deal with no more than forty students.

(5) Learning Resources and Tutoring Center

Under this program students spend the majority of their time in the regular classroom, and are scheduled into the learning resources and tutoring center for one or more periods of tutorial or small group instruction. Such instruction shall be given by teachers licensed to teach the emotionally disturbed, with caseloads varying between eight and forty students depending on the severity of the handicap.

(6) Part-time Special Class

Students are assigned for a major portion of their classroom instruction to part-time special class. They shall be more finally integrated into the regualr classes as they demonstrate "potential for successful performance." Class size shall be between four and twelve students depending on the severity of their handicap. The teacher in such classes shall be responsible for maintaining a close working liaison with teachers of regular classes and activity programs.

(7) Full-Time Special Classes

The following classes may be approved:

Nursey Special	Kindergarten Special	Primary Special
Ages: 10-12	Ages: 5-6	Ages: 7-9
Intermediate	Junior High	Senior High
Ages: 10-12	Ages: 13-14	Ages: 15-21

Approval may be obtained for providing combination of the above, provided that class size shall be limited "to allow the teacher to meet the individual needs of each student enrolled." Composition of such classes "shall be determined by the behavioral and learning compatability of the students."

F. Programs for the Neurologically - Impaired/Learning Disabled

(1) Definition

"A student with neurological impairments/learning disabilities exhibits severe specific defects in perceptional, integrative or expressive processes which severely impair learning efficiency."

(2) Evaluation and Placement Procedures

Pupil eligibility for such services shall be made upon the basis of an individual evaluation performed by a physician who is trained in the specialty of neurology, pediatrics, internal medicine or psychiatry.

Determination of appropriate placement shall be made by a case conference committee which will consider the results of a psychological evaluation as well as other school and health information. "A written report shall include... recommendations regarding eligibility...(and admissibility)... of the pupil to the most appropriate special education program.

The committee shall...determine whether additional medical evaluation... is needed prior to making a decision on eligibility of the pupil and a recommendation as to the most appropriate of the types of programs..."

The Director of Special Education shall coordinate results of necessary evaluations in such a manner as to aid the committee in making proper recommendations.

(3) Annual Case Review

"A case review of each student...each year by a case conference committee...shall determine what, if any, additional data is required in order to assess the student's current and continuing needs." The committee shall prepare a report recommending one of the following:

(a) Retention in the program.

(b) Transfer to a different level of special education programming.

(c) Transfer to a regular school program.

(d) Transfer to an appropriate public or private resource.

(4) Special Consultation

"Special consultation programs may be established to serve...students whose special needs may be met by remaining in regular classrooms when special consultation is provided by their teachers and supervisors. Such consultation is related to the development and utilization of special, individualized sequences of instruction, behavioral management, speech and language development, crisis counseling and guidance."

(5) Learning Resources and Tutoring Center

"Pupils remain in the regular class for the major portion of the day and are scheduled into the Learning Resources and Tutoring Center for...periods of tutorial or small group instruction given by a professionally certificated teacher. The caseload...may vary from a minimum of eight...to a maximum of forty, depending upon the type of instructional service needed."

(6) Part-Time Special Class

"Students may be assigned to...special education class for a major portion of their instruction... and individually programmed into regular classes and activities as each student demonstrates the potential for successful performance. Class size may range from four to twelve, based on the handicap-severity of the students involved. The special education teacher shall maintain a close working liaison with teachers of regular classes and activity programs."

(7) Full-Time Special Class

The following classes may be approved:

Nursery Special	Kindergarten Special	Primary Special
Ages: 3-4	Ages: 5-6	Ages: 7-9
Intermidate	Junior High	Senior High
Ages: 10-12	Ages: 13-14	Ages 15-21

"Combinations of these classes may be approved by the Division of Special Education ...,(provided that plan size)...shall be limited to allow the teacher to meet the individual needs of each student enrolled. Composition...shall be determined by the behavioral and learning compatibility of the students."

G. Programs for Students with Communication Handicaps

(1) Definition

Communication disorders may include any of the following:

(a) Articulation: This group includes all the speech deviations based primarily on incorrect production of speech sound.

(b) Fluency: "This group includes...stuttering and those which involve an abnormal rate of speech.

(c) Voice: This group of disorders...primarily (deals) with the sound of the voice - pitch, loudness, and quality.

(d) Language: A child who experiences difficulties in the use and/or comprehension of linguistic symbols may require the services of the speech and language clinician.

(2) Evaluation and Placement Procedures

PLACEMENT

Determination of appropriate placement in a program of communication disorders shall be determined on the basis of an evaluation by a certified speech, hearing, and/or a language clinician and the appropriate medical information, educational information and learning capability evaluation. All students who have symptoms...related to the communication disorder shall have an evaluation by a physician. A physician's statement...on file shall describe...the medical needs of these students and the consequent limitations to be imposed upon their training. After the decision has been made to place a pupil in...therapy, the parent...of the pupil involved...may appeal the decision as outlined in Section 2.

(3) Caseload

The caseload of each...clinician shall not exceed one hundred at any given time and shall be determined by the needs of the students, the number of schools, and the type of scheduling. Under intensive (block) or Resource Room scheduling, the caseload...shall be reduced from the...maximum to allow for the intensive nature of the program.

(4) Types of Programs

The following types of programs...may be approved:

(a) Intermittent scheduling

(b) Flexible scheduling

(c) Intensive (block) scheduling

(d) Combination scheduling or

(e) Resource room scheduling

Types of scheduling shall be subject to the approval of the immediate supervisor."

H. Programs for the Educable Mentally Retarded

(1) Definition

"The general rate of mental development of the educable mentally retarded pupil is approximately two-thirds that of a pupil of average intelligence...such student has the capability of becoming functionally literate. Vocationally, such persons have demonstrated the ability to participate successfully in the competitive work market without requiring intensive and constant supervision.

(2) Evaluation and Placement Procedures

Determination of appropriate placement...shall not be by IQ alone, but shall be determined by a case conference committee which will consider the results of a psychological evaluation as well as other school and health information. A written report shall include recommendations regarding eligibility...and admissibility...of the student to the most appropriate program.

PLACEMENT

The Director of Special Education shall coordinate results of necessary evaluations in such a manner as to aid the case conference committee in making proper recommendations.

(3) Annual Case Review

A case review of each pupil shall be made each year by a case conference committee...to...determine what, if any, additional data is required in order to assess the student's current and continuing needs. The committee...recommends... one of the following:

(a) Retention in the program

(b) Transfer to a different level of special education programming.

(c) Transfer to a regular school program.

(d) Transfer to an appropriate public or private resource.

(4) Special Programs for the Educable Mentally Retarded

Special programs may be operated upon approval of the Division of Special Education. The original request shall include a documented program description...submitted sixty days prior to the initiation of the program. The description shall include a program rationale, procedures for selection and placement of students, a plan for in-service education

of teachers...an organizational plan and general curriculum content, and a detailed system for the continuing evaluation of the student's progress. Program applications for succeeding years shall...include only annual changes made since the original program description was submitted. Alternate programs may take one or more of the following forms:

(a) Special Consultation: Special consultation programs may be established to serve...students whose needs may be met by remaining in regular classrooms when special consultation is related to the development of special, individualized sequences of instruction, management, counseling and guidance,...and is provided by professionally certificated special education teachers. The caseload of each special consultant shall be no more than forty students.

(b) Learning Resources and Tutoring Center: Students will remain in the regular class for the major portion of the day and be scheduled into a Learning Resources and Tutoring Center...for tutorial or small group instruction given by a special education teacher. No more than eight students may be scheduled during any individual period. No more than a total of forty students may be assigned to a full-time teacher.

(c) Part-Time Special Class: Students may be assigned to a part-time special education class for a major proportion of their instruction...and individually programmed into regular classes and activities as they demonstrate the potential for successful placement. No more than eighteen students may be assigned...for any given period. No more than a total of thirty-six students may be assigned to a teacher..."

PUPIL/TEACHER RATIO

(5) Classes for the Educable Mentally Retarded

"The following...classes may be approved:

Nursery Special	Kindergarten Special
Ages: 3-4	Ages: 5-6
Primary Special	Intermediate Special
Ages: 7-9	Ages: 10-12
Junior High School	Senior High School
Ages: 13-14	Ages: 15-21

Combinations of the above may be approved... The

special class shall be limited in size to allow the teacher to meet the individual needs of each student enrolled."

I. Special Classes for the Trainable Mentally Retarded

(1) Definition

"These pupils have a level of intellectual functioning which precludes an ability to become literate, yet can function semi-independently in society. Most trainable mentally retarded persons ultimately function in a sheltered or supervised work environment requiring little decision-making or diversification...

(2) Evaluation and Placement Procedures

Determination of appropriate placement shall not be... by IQ alone, but shall be made by a case conference committee which will consider the results of a psychological evaluation as well as other school and health information. A written report shall...include recommendations regarding eligibility... and admissibility of the student to the most appropriate program.

PLACEMENT

The Director of Special Education shall...coordinate... results of necessary evaluations in such a manner as to aid the case conference committee in making proper recommendations.

(3) Annual Case Review

A case review of each student shall be made each year by a case conference committee...to...determine what, if any, additional data is required in order to assess the student's current and continuing needs. The committee shall... recommend...one of the following:

(a) Retention in the program.

(b) Transfer to a different level of special education programming.

(c) Transfer to a regular school program.

(d) Transfer to an appropriate public or private resource.

(4) Types of Classes

The following types of classes may be approved:

Early Education Development Center:	Ages: 3-5
Primary:	Ages: 6-9
Intermedate:	Ages: 10-13
Advanced:	Ages: 14-17
Occupational Training:	Ages: 18-21

Chronological age range of no more than five years may be included in a special class. Exceptions...may be requested...of the Division of Special Education

PUPIL/TEACHER RATIO

The special class shall be limited in size to allow the teacher to meet the individualized needs of each student enrolled."

J. Special Classes for the Severely/Profound Mentally Retarded

(1) Definition

"The general capability of mental development of the severely/profoundly retarded pupil is that he/she can learn to communicate, can learn elemental health habits, and can profit from systematic habit training. It may be possible...to hold down a closely supervised position in a sheltered work environment...but some will not be able to hold down any supervised position but can develop limited speech and motor skills...

(2) Evaluation and Placement Procedures

PLACEMENT

Determination of appropriate placement...shall not be...by IQ alone, but shall be made by a case conference committee which will consider the results of psychological evaluation as well as other school and health information. A written report shall...include recommendations regarding eligibility...and admissibility...of the student to the most appropriate program.

The Director of Special Education...coordinates the results of necessary evaluations in such a manner as to aid the...committee in making proper recommendations.

(3) Annual Case Review

A case review of each student shall be made each year by a case conference committee... to determine what, if any, additional data is required in order to assess the student's current and continuing needs. The committee shall recommend... one of the following:

(a) Retention in the program.

(b) Transfer to a different level of special education programming.

(c) Transfer to a regular school program.

(d) Transfer to an appropriate public or private

resource.

(4) Classes for the Severely/Profoundly Mentally Retarded

The following types of classes may be approved:

Early Education Development Center:	Ages: 3-5
Primary:	Ages: 6-9
Intermediate:	Ages: 10-13
Advanced:	Ages: 14-17
Occupational and/or Other Intensive Training	Ages: 18-21

A chronological age range of no more than five years may be included in a special class. Exceptions...may be requested...of...the Division of Special Education.

The special class shall be limited in size to allow the teacher to meet the individual needs of each student enrolled.

(5) Facilities for Classes

Classes may be housed in buildings outside a regular school facility but shall meet minimum standards as approved by the Commission on General Education."

K. Administration and Supervision of Special Education Programs

"(1) Director of Special Education

A director of special education has responsibilities as the superintendent may direct. A school corporation or... corporations operating under a joint agreement program, which employs five to nine full-time, special education teachers, therapists, and/or clinicians in two or more areas of approved special education is eligible for reimbursement for a half-time director of special education. A school corporation, or corporations operating under a joint agreement program, which employs ten or more...such professionals if approved by the Division of Special Education is eligible for reimbursement for a full-time director of special education.

A school corporation...or corporations operating under a joint agreement program, which employ less than five... such professionals...is eligible for a half-time director for one year provided that the school corporation furnishes evidence that by the next year the school corporation will employ a total of five or more...such persons...in two or

more special education areas.

(2) Supervisor of Special Education

A supervisor, working under a director of special education, has supervisory responsibilities for an area of exceptionality in a total program of special education, and his/her role includes duties and responsibilities pertinent to this area as assigned by the director. A school corporation, or...corporations operating under a joint agreement program, which has a certificated director of special education and which employs five to nine approved full-time special education teachers (not including home teachers), therapists, and/or clinicians in any one area of exceptionality is eligible for a half-time supervisor in that one area. A school corporation, or...corporations operating under a joint agreement, which has a certified director of special education and which employs ten or more...such professionals...in any one area of exceptionality is eligible for a full-time supervisor who must have had a minimum of three years of teaching experience in the area of supervision and be professionally certificated in that area of education.

Future approval of supervisors will depend upon their meeting state certification patterns as promulgated by the Commission on Teacher Education and Certification."

L. Programs of Homebound Instruction and School-Home Telephone

HOME INSTRUCTION

"Homebound and/or school-home telephone programs provide instruction to students unable to attend school because of physical handicaps or special health problems. Homebound teaching should be initiated only after all other possibilities have been exhausted, with the goal of providing a public education for all children, regardless of the physical limitations.

An evaluation by a physician...which indicates that the child has an illness or injury requiring hospitilization or homebound care as part of medical treatment, is required.

A psychological evaluation is required for those students whose medical diagnosis is cerebral palsy, epilepsy, brain injury, hydrocephalus and other conditions which may

affect learning. This evaluation shall include an investigation of mental, physical, social, and emotional factors and an assessment in school subjects.

In cases of emotional disturbance, the school corporation shall submit a statement...that out-patient psychiatric treatment will be given during the period of homebound instruction.

To be eligible...,evidence shall be on file with the local school corporation... that the pupil will be homebound for at least eight weeks, or that a period of homebound instruction...will enable the pupil to complete the regular school work. Students who are enrolled in approved special education programs shall be eligible for homebound instruction providing the teacher is fully certificated to teach pupils with this disability.

If homebound instruction is approved, it may be continued through the summer...to meet promotion requirements.

The number of homebound pupils per teacher shall not exceed five at any one time. Approval for homebound teacher instruction is limited to one hour per day, five-days per week, twenty hours per-month for pupils in elementary schools...and equivalent time periods for...each subject in which the pupil is enrolled for junior high and high school students.

School-home telephone instruction may be provided for intermediate through high school students who meet the requirements for homebound pupils... School-home telephone and homebound instruction may be offered concurrently."

M. Psychological Services

"The psychological services of relevance here are those supportive to the special education program...

Approval may be given for psychological services (1) obtained by the...employment of school psychologists and/or psychometrists or (2) obtained on a contract basis.

"N. Related School Services

School health, counseling and guidance, and social work services are appropriate to complement psycho-

logical services."

O. Special Transportation

"Special transportation refers to any special or additional mode or means of transporting handicapped students to and from school which the school...provides...

Transportation, other than regular bus routes, may be approved for the following types of programs...

(1) Special programs...as defined in Section 2 of this rule.

(2) Handicapped pupils who attend special classes outside their normal school attendance area.

(3) Pupils with special health problems who are able to attend regular classes if special transportation is provided.

(4) Transportation of handicapped students within the school corporation or to another school corporation may be made.

(5) Handicapped pupils legally transferred to special education programs operated by school corporations, joint service and supply programs or joint schools outside the boundaries of the resident school corporation.

Only one round trip each day the pupil is in school shall be approved..."

P. Special Education Aides

"The special education aide would assist the teacher... in the preparation of instructional materials, in setting up and operating of audio-visual equipment, helping with room displays, attendance, in music, physical education, etc. Under the direction and supervision of the teacher, the aide will work directly with the student in areas that relate to his personal, social and learning needs.

The school corporation must provide each aide with intensive pre-service and in-service training which meet the following conditions:

(1) The training curriculum must be differentiated to meet the special needs and characteristics of the particular type and level of handicapped children being served.

(2) It...must be developed so as to bring about enhancement of the communicative and social interacting skills of the...aide and to increase his/her sensitivity to the special needs of the handicapped.

(3) It...must create an awareness of the ethical responsibility involved in working in schools, and an awareness of maintaining the confidentiality of personal information about any child.

The school corporation must provide an orientation period...to clarify the specific working relationships, roles and functions of the supervising teacher, the special education aide and the supervisors.

Written application from the school corporation proposing to use...aides must be approved by the Division... The application...shall include guidelines for selection and training, intended use and job descriptions of each...aide."

Section 3. Applications for Classes and Programs

"a. Application for a new special class or program shall be made to the Division...before the program starts.

b. Applications to continue special classes and programs which have been previously approved shall be made...by October 15 for a full-year program, and by February 15 for a half-year program. Pre-approvals... will be accepted July 15 for programs with fully certificated special education teachers. A corporation will be notified of approval or disapproval of all requests.

c. Application for approval of a psychological services program shall...include a description of the proposed plan for psychological services and in the case of contracted services, a copy of the contract...

d. Homebound instruction may be approved any time during the year."

HOME INSTRUCTION

Section 4. Facilities

Facilities for all special education programs shall meet standards as approved by the Commission on General Education. Adequate (and appropriate) equipment shall be provided for all programs.

Section 5. Certification

"A school corporation may be eligible for reimbursement for special education programs where the teachers, therapists, clinicians, school psychologists and psychometrists, directors and supervisors hold certification appropriate for the special work. Exceptions are listed below:

The homebound program...is taught primarily by regular classroom teachers. Teacher requirements are the same as those for teaching in regular classes...

Graduate students may be approved if they are in training working toward certification in school psychology or school psychometry at an approved training institution."

Section 6. Reimbursement

"Reimbursement will be granted only to school corporations which have approved programs..."

§ II, Ch. 1, Rule S-2,

Rule S-2. SPECIAL ORAL TRAINING CENTER CLASSES (Implementing Chapter 166, Acts of 1955)

"Section 1. Special classes...may be conducted by any approved public school corporation...provided, however, that there shall not be more than five oral training centers in the state and not more than a total of fifteen oral training units. Reimbursement cannot be made to any agency other than public school corporations. Application for oral training units must be submitted to the Commissions through the General Commission (Commission on General Education)... These applications must be submitted and approved before the class starts and in any case, by October 15 of each year.

Section 2. Special classes to be approved under these provisions...shall provide instruction for any pupils who are hearing handicapped which makes regular school room activity impractical or impossible, and who are not in residential attendance in any of the institutions of the state, but who, with the advantage of a special educational program, may be expected to benefit from instruction and training.

Section 3. An "oral training center" shall be any facility...for the oral training of hearing handicapped children. Special classes...shall be known as "oral training units."

They...shall consist of not less than six nor more than ten children. Oral training units shall consist of three divisions...oral nursery, oral elementary, oral advanced.

Section 4. Before a special class may be approved...the following information must be recorded:

a. Definite information secured by the examinations... as to the physical and mental ability of the pupils to be admitted to the oral training units.

MEDICAL EXAMINATION

b. The medical examination for such pupils shall include a complete otological examination administered by a licensed physician...

c. The psychological examination must be obtained through properly selected individual intelligence, achievement and other useful tests...administered to each pupil... with results interpreted by (a) properly certificated school psychometrist, school psychologist, or by an approved clinic... Only educable children of sound mind can be approved for class enrollment.

d. The name of the teacher to be employed and the type and number of certificates held; the time to be devoted to special class work must be furnished.

e. The oral training method and the amount of instruction to be given each pupil. The doctor's certificate... should indicate any restrictions.

g. The anticipated expenditures...

Section 4. Hearing handicapped children may be taught any subject taught in public schools and receive credit the same as other children...,

Section 5. The purchase of special equipment must be approved by the Commission on General Education...and the Hearing Commission before it is purchased if reimbursement is expected.

Section 6. A school corporation may receive reimbursement for any oral training unit only if the teacher holds the usual qualifications required of teachers...and a special teacher's certificate appropriate for the special work...

Section 7. Teachers hired to teach special education classes for hearing handicapped may teach other classes, or children, but will be reimbursed only for the time spent in oral training units under the provisions of this Act."

§ II, Ch. 1, Rule S-4

Rule S-4. GENERAL REGULATIONS FOR THE EXCLUSIONS OF CHILDREN WHO ARE MENTALLY OR PHYSICALLY UNFIT FOR SCHOOL ATTENDANCE (Implements Chapter 215, Acts of 1963)

"Section 1. General Procedure. The following ...shall be followed in considering children for exclusion from school attendance:

(1) The local school shall obtain a complete evaluation of each child.

(2) On the basis of...such an evaluation and a consideration of existing school facilities, the local superintendent shall make a decision on exclusion.

(3) The Division of Special Education shall issue a statement of approval or disapproval of each recommendation for exclusion.

(4) The approved exclusion of each child is valid for one school year.

Section 2. Specific Procedure

a. Evaluation

The complete evaluation...shall include these areas: (1) mental, (2) physical, (3) social, and (4) emotional."

CROSS REFERENCE

I. State Superintendent, Regulation VI, Ch. 2.c

2. Programs for Exceptional Children

Statutes

§220A.6

The state department of public instruction may exchange information with other public agencies in order to provide education, treatment, or support services to the "mentally handicapped person."

§257.25(9)(c)

Each school offering any of grades seven through twelve shall have "arrangement for special education services."

§263.9

The state board of regents, in conjunction with the University of Iowa, shall establish a hospital-school for the education and treatment of severely handicapped children.

§263.10

Every resident of the state, under twenty-one, who is "so severely handicapped as to be unable to acquire an education in the common schools" shall be entitled to received "education, care, and training" in the institution.

§269.1

SCHOOL FOR BLIND

"All blind persons and persons whose vision is so defective" that they cannot attend public school, who are Iowa residents, shall be entitled to a state-provided education in the Iowa Braille and Sight-Saving School.

§270.3

SCHOOL FOR DEAF

Any Iowa resident, under twenty-one years old, "who has a hearing loss which is too severe to acquire an education in the public schools" may attend the school for the deaf.

§273.1

"It is the intent of the general assembly to provide an effective ... means of identifying and serving children

from under five years of age through grade twelve who require special education"; to provide for "media services" for pupils in kindergarten through grade twelve and for children "requiring special education"; to finance the programs and avoid duplication of other programs and services.
§273.2

An "area education agency," governed by a board of directors, shall "provide for special education services and media services for the local school districts." The board may also provide "in-service training programs for employees of school districts," "educational data processing," "research .. and educational planning for children ... requiring special education," provided that these programs do not duplicate existing services.
§273.5

IN-SERVICE TRAINING

A division of special education of the area education agency shall be established which shall provide for "special education programs and services to the local school districts." The division of special education shall be headed by a "director of special education" who is certified by the department of public instruction. The director shall "identify children requiring special education," insure that each child "receives an appropriate special education program," supervise personnel, submit plans for services and programs to the department of public instruction.
§280.8

The board of directors of each public school district shall make "adequate educational provisions" for children requiring special education.
§281.1

"There is created within the state department of public instruction a division of special education for the promotion, direction, and supervision of education for children requiring special education in the schools."

The state superintendent is authorized to organize the division.

§281.2

Children requiring special education shall mean those children under twenty-one years of age who are handicapped in receiving an education because of "physical, mental, emotional, communication or learning disabilities." "Special education" includes home and classroom instruction, transportation and support services. School districts are required, "as an integral part of public education," to make provisions for children requiring special education. Children requiring special education shall, to the maximum extent possible, attend regular classes with children who do not require special education. Separate classes shall exist only when the handicap is so severe that the child cannot attend regular classes. "Every child receiving special education shall ... receive a level of education commensurate with the level provided each child who does not require special education."

§281.3

The division of special education shall organize and supervise the special education system; certify teachers in the program; prescribe curricula for special schools; certify the elegibility of children in the program; establish special education classes for children in hospitals, nursing homes, juvenile homes; establish special education research projects; co-ordinate programs and services with existing agencies; employ support personnel; and provide in-service training to personnel.

§281.4

Area education agencies and local school boards may provide special education programs. If an area education agency provides such services, the agency's board may establish special education classes; acquire and construct facilities for providing such services; co-ordinate

programs with participating school districts; employ special education teachers; and provide transportation for children. The board of directors shall employ certified teachers. The board of directors may establish and operate a "special education center" to provide "diagnostic, therapeutic, corrective, and other services" on a more comprehensive scale than can be provided by a single school district.

§281.6 -- .11

When special education services are provided, the parents of a child requiring such services must enroll the child in the program. "The school districts shall certify children requiring special education" and "provide examinations for children" before making certification. Final decision rests with the state superintendent of public instruction. "Exceptions to attendance" are made for children upon a determination that they can no longer profit from the program. Special education may continue for those over twenty-one years of age who have not been able to finish the program. Program plans submitted to the state department of public instruction (see Educational Courses and Programs, Special Education, Area Education Agency, §273.5) shall establish that:

(1) there are sufficient children requiring special education in that area;

(2) there are qualified agencies and personnel to administer the program;

(3) there is a planned course of instruction.

§299.18 -- .19

Children over seven and under nineteen years of age who are so deaf or blind or handicapped as to be unabel to obtain an education in the public schools, shall be sent to an appropriate state school. If the parents of such child does not comply, the state board of regents may compel the child's attendance.

RESIDENT SCHOOLS

§299.22

Deaf and blind children may be excused from attendance at a state institution only if such attendance would be futile, the child is diseased, or the child is receiving other adequate instruction.

REGULATIONS

§670.12.11 --12.10(§257, 280, 281)

It is the responsibility of school districts to assure adequate special education programs and services to meet the statutory requirements.

To the extent practicable, children shall be educated in the regular school program and attend classes with those who are not handicapped.

Three types of special education shall be offered: self-contained special classes serving pupils with similar needs; special class with integration serving those who can attend some classes with nonhandicapped students; resource teaching program serving pupils who require special instruction in a specific skill.

Instruction and appropriate special education shall be provided to children who cannot attend school at their home or hospital.

Special schools shall be provided by the school district or area education agencies for children who "cannot be effectively educated in the regular schools."
School districts shall implement activities designed to evaluate and improve special education programs and services. Districts should also cooperate in research activities designed to evaluate and improve these programs.

§670.12.12 -- 12.19(Special Education -- Area Education Agencies)

Area education agencies shall develop policy and provide special education programs and services and maintain the responsibility for the quality of such programs.

Each year they shall submit a plan for providing com-

prehensive special education programs and services setting forth the number of children to be served, the kind and type of programs and services required, and the goals and objectives of the program. The Department of Education shall evaluate and approve the plan based upon "whether it can reasonably be concluded that there are...procedures and resources to provide the [required] programs and services..." and other criteria cited in this section.

Each area education agency shall maintain an ongoing identification, assessment, diagnostic and placement program to assure proper identification and service to those children requiring special education. Approved screening models, referral systems and diagnostic procedures and instruments shall be used. A diagnostic-educational team shall be used to diagnose and place children and shall be responsible for recommending the type of program needed. Each placement shall be reviewed annually.
All screening, assessment and evaluation results shall be evaluated promptly and a full record made. These case records shall be confidential and terminated three years after the child completes the program or no longer requires services.

The Director of Special Education shall function as an advocate for children requiring special education. Instructional personnel may serve as resource teachers, special class teachers or exclusively serve the needs of children with a particular handicap. Professional support personnel shall be employed to provide special services to the handicapped child.

Each year an area education agency shall make a report covering the fiscal year and the Department of Education shall evaluate it. An area education agency shall be informed in writing if its report is unsatisfactory and the reasons therefor.

Pupils, parents and the general public are encouraged to participate and advise the area education agency concerning special education. Parents shall be notified of all screening and assessments conducted on their child and shall receive

a copy of all rules and procedures used by the state and local officials in this program.

IV.H.; Statute §299.5

2. Programs for Exceptional Children

Statutes

§72-853

The state superintendent of public instruction is authorized to expend available funds to send deaf, blind or otherwise severely handicapped children to any facility, school or institution within or without the state, providing a qualified program of education for such children.

§72-961 --72-965

The state board shall administer the Special Education for Exceptional Children Act. An exceptional child is a child of school age who differs "in physical, mental, social, emotional or educational characteristics" to the extent that special education services or specialized instruction is necessary to enable [him/her] to progress toward the maximum of [his/her] ability." Specialized instruction is "programs of life and social adjustment provided in a state institution under the jurisdiction of the secretary" of social and rehabilitation services.

STATE PLAN

The state board shall prepare the state plan in consultation with the state advisory council for special education. The state plan shall include: (a) a statement of objectives of state supervision of district special education; (b) provisions for operating special education services in school districts and state institutions; (c) required curricula; (d) criteria for diagnosing an exceptional child; (e) definitions of categories of exceptionality; (f) implementation dates for special education services for the various categories of exceptionality; and (g) standards for services to the various categories.

The state advisory council shall consist of nine members appointed by the state board for three year terms. Members shall represent persons and community organizations interested in exceptional children, local school districts, higher education institutions and state institutions.

§72-966

The board of education of every school district shall provide special education services for all exceptional chidren in the school district, and such services shall meet standards set by the state board and be operative not later than July 1, 1979.

§72-967

Each district board shall have the authority to establish and organize approvable special education services for exceptional children within its schools, or in the home, hospital or other facility; or contract with any school district for special education services, or any accredited private nonprofit corporation, or any public or private institution within or without the state which has proper special education services for exceptional children, for the purpose of education of exceptional children.

§72-968--72-969

The boards of any two or more districts within or without the state may agree to cooperative special education services for exceptional children. The agreement shall be for three to five years. The district, designated in the agreement as the sponsoring district shall apply for approval of the agreement with the state board. The state board shall approve the agreement if the services provided for in the agreement meet standards set by the state plan. No agreement shall be effective until the state board approves it.

§72-970

Special education services provided by state institutions for exceptional children shall meet standards set by the state plan and shall be approved by the state board. A state institution may contract with a district for special education services if the district's services have been approved by the state board.

§72-971

In order to obtain data necessary for review of

the progress in special education services, the department shall conduct an annual survey of the school districts showing the total number of exceptional children within the various categories of exceptionality in the state.

§72-972 -- 72-975

HEARING

Each child or his/her parent or guardian shall have the right to a hearing before the child is excluded or transferred from regular school on the ground that s/he is an exceptional child or placed or denied placement in special education services.

NOTICE

A written notice which describes the proposed action, the reason for the action, and states the right to a hearing shall be given to the parent or guardian of the child; the hearing shall be held not less than fifteen days nor more than thirty days from the date that the notice is received. The hearing must be requested within ten days of receipt of the notice. No action may be taken until this period has elapsed unless the parent agrees to it in writing.

DUE PROCESS

The hearing provided for in § 72-972 shall be closed unless the parent or guardian requests an open hearing. The hearing shall afford procedural due process, including the following: the right of the child to have counsel of his/her choice present, the right of the parent or guardian to be present, the right of the child and his/her counsel to hear or read the testimony of any material witness, the right of the child to present witnesses, the right of the child to testify in his/her own behalf, the right of the child to an orderly hearing and a fair and impartial decision based on substantial evidence.

The person conducting the hearing shall not be the same person who recommended the action. At a reasonable time prior to the hearing the parent or guardian or the child's counsel shall be given access to any information relating to the proposed action.

APPEAL

The child, his/her parent, or guardian, or his/her counsel shall receive written notice of the result of a hearing held pursuant to § 72-972 within twenty-four hours after the result is determined. The child or his/her parent or guardian may appeal to the board not later than ten days after receiving the decision. Within twenty days after the appeal is filed, the board or a hearing officer shall hear the appeal. The child and his/her parent or guardian shall be notified of the time and place of the hearing at least five days before it is to be held. The hearing shall meet the requirements of the hearing provided for in § 72-973. A record of the hearing shall be made either by mechanical or by an official court reporter. The board shall decide the appeal within five days after the hearing.

COSTS

The school district shall pay the costs of any hearing held pursuant to §§ 72-072 or 72-974. The board's decision of an appeal may be appealed to the district court.

§72-976

"[N]o school district shall be required to keep an exceptional child in regular instruction when the child cannot materially benefit from the work of the regular classroom, nor to provide such exceptional child with special education services for exceptional children in a regular school setting when it is determined that the child can no longer materially benefit therefrom, but needs specialized instruction.

§72-977

Every parent or guardian of a child determined by the school district to be exceptional shall enroll the child and see that the child attends "the special education services" provided by the school district.

§72-981

TECHNICAL ASSISTANCE

The state department of education shall assist local boards of education by (1) giving technical advice and assistance in connection with programs for

screening, diagnosis and certification of exceptional children; and (2) making recommendations concerning appropriate special education services.

§72-982

Any teacher, administrator, or other school employee participating without malice in the making of an evaluation of a student as part of the certification of exceptional children procedures or participating in a judicial proceeding resulting from an evaluation shall be immune from any civil liability that might otherwise be incurred from the evaluation.

LIABILITY

§72-8230

Two or more boards which enter into an agreement pursuant to § 12-2904 to provide education services shall be limited to providing services in the following areas: special education, vocational education, career education, media services, curriculum development, and in-service training for staff programs.

The legal entity created by the agreement shall be administered by a board of directors. The board of directors shall be composed of at least one member appointed by the board of each school district entering into the agreement.

Any agreement for special education or vocational education shall be for a term of from there to five years.

Any agreement shall be effective only after approval by the state board, and shall be subject to change or termination by the legislature.

The legal entity created by the agreement shall have the powers and duties of a unified school district for purposes of employer/employee relations and receiving and spending funds.

§74-6301; 74-6303; 74-6304

The Kansas coordinating council for handicapped children shall coordinate programs for handicapped children through the age of 18, shall maintain a directory of services for handicapped children, shall distribute

information about services, shall initiate coordinated planning between governmental and private groups, shall maintain records concerning handicapping conditions and handicapped chidren in Kansas, and shall make recommendations to governmental and private groups concerning improving services to handicapped children.

The council shall meet twice a year and shall make a yearly written report to the governor on its work. §76-1001a--1002; 1006; 1101a--1115

SCHOOL FOR THE DEAF

"The Kansas state school for the deaf," the state institution under the supervision of the state board of education; shall educate as day students or resident students, any resident of the state within the age of eligibility for admission as determined by the state board who is unable to materially benefit from attendance in the public schools because of a hearing impairment as determined by other provisions in this code. Nonresidents of the state may be admitted until maximum enrollment is attained, but not to the exclusion of any eligible resident of the state.

The state board shall appoint a chief executive officer of the school for the deaf. The superintendent shall manage the school and have any other powers and duties as specified by the state board.

The state board may approve the charging of student activity fees from students who are residents of the state. Tuition, fees and charges for maintenance shall be collected only from students who are nonresidents of the state.

The Kansas state school for the visually handicapped shall be controlled by the state board in like fashion as the state school for the deaf. The same admission requirements apply to the state school for the visually handicapped as apply to the state school for the deaf, except that the relevant handicap for admission is visual impairment. The same rules and regulations apply with respect to tuition and charges and the appointment of the superintendent.

"The state board is . . . authorized to establish . . . summer training program for visually handicapped persons" at the state school for the visually handicapped. Tuition and other charges for such program shall be set by the state board.

REGULATIONS

§91-17-8

HOME STUDY

Any person who supervises a home-study project shall file a weekly report to the certified classroom instructor describing the progress of any child under his/her supervision.

Regular attendance reports shall be filed monthly.

The teacher shall keep complete records as requested by the state department of education. The records shall be filed monthly with state and local boards of education.

Each school shall file on September 15 a report showing the school's compliance with L.1969, ch. 316, to the state board.

§91-12-20, 21

"In providing special education services for exceptional children, the board of education of every school district shall comply with the Kansas State Plan for Special Education as adopted by the state board . . . ."

Services for exceptional children shall be implemented at the age at which the local board provides educational services for non-exceptional children. Local funds and state special education categorical funds may be used for services to preschool children.

2. Programs for Exceptional Children

Statutes

§156.165

"The superintendent . . . is to inform all local school boards of the availability of funds for special education projects for the education of exceptional children . . . and to give priority to such projects as the department of education may be asked to approve."

§157.200

1) " 'Exceptional children' means persons under twenty-one years of age who differ in one or more respects from average or normal children in physical, mental, learning, emotional or social characteristics and abilities to such a degree that they need special educational programs or services for them to benefit maximally from the regular or usual facilities or educational program of the public schools . . . , or those children who, because of their intellectual or creative abilities or potentialities, require special educational programs or services . . . . Requirements of average daily attendance for exceptional classes will be regulated by statute, or . . . by departmental regulations. Categories of exceptionalities include . . . (a) physically handicapped children; (b) children with communication disorders; (c) educable mentally handicapped children; (d) trainable mentally handicapped children; (e) children with learning disabilities; (f) emotionally disturbed children; (g) multiple handicapped children; (h) intellectually gifted or talented children."

§157.220

"The state department of education is . . . designated as the agency for cooperation with the state and federal governments, the approved treatment

centers and local schools of Kentucky . . ." to carry out the provisions of the statutes relating to special education. It "shall make necessary rules and regulations" to provide for the administration of the statutes, "including, but not limited to establishment of classes, eligibility and admission of pupils, the curriculum, class size limitations, housing, special equipment and instructional supplies . . . .

Local supervision of special education facilities for exceptional children shall be approved by the division of special education according to rules and regulations approved by the state board of education."

§157.221

"The state board of education shall create a 'bureau of education for exceptional children' in the state department of education," to supervise and direct a state program for exceptional children . . .

The . . . board . . . shall establish appropriate divisions within the bureau . . . . These divisions shall include, but not be limited to . . . learning disabilities, communication disorders, mental retardation, physically handicapped, and emotionally disturbed.

It shall be the duty of this bureau to recommend rules and regulations for adoption by the state board of education, and generally carry out the program provided for . . ." in the statutes.

RULEMAKING

"This bureau shall have an assistant superintendent of public instruction and necessary assistants appointed by the superintendent of public instruction." The assistant superintendent of public instruction must hold a masters degree in education, with emphasis in one or more areas of exceptionality. [She]He shall also "have had successful supervisory experience in the education of exceptional children." Any director within the bureau must have taken at least thirty semester hours of graduate work, twenty of which "shall have been in education of one or more areas of exceptionality.

[She] He shall also have had successful teaching or supervisory experience in the education of exceptional children."

§157.224

Kentucky "is committed to providing a comprehensive educational program for its exceptional school age children. The bureau of exceptional children . . . coordinates, directs and monitors that program. State direction and implementation of [the] . . . program is manifested in the biennial appropriation of funds to finance a particular number of such classroom units.

All . . .[local] . . . boards of education shall operate special education programs to the extent required by . . . a plan which has been approved by the state board of education. If any . . . [local] . . . board of education fails to operate and implement special education programs in accordance with an aforesaid plan, the application of said . . . board of education for minimum foundation payments may be considered insufficient."

§157.230

1) "If parents of as many as eight trainable mentally handicapped children living in a school district desire special education classes for their children, school boards of any school district shall establish and maintain such classes, subject to any limitation(s) . . ." in these statutes or specified in regulations of the state board of education.

2) "School boards of any school district may subject to any [statutory] limitation, . . . establish and maintain special educational programs for exceptional children . . . .

3) School boards of any school district may admit on preapproval and certification any physically handicapped child into special education programs at any time after the child has attained the age of three years."

4) Local school boards "may admit on proper approval and certification any educable or trainable mentally handicapped child into special education programs at any time after the child has attained the age of six years; provided however, that educable and trainable mentally handicapped children shall not be enrolled in the same special class."

§157.240

1) "No physically handicapped child shall be allowed special education facilities except upon a certified diagnosis of a physical defect by competent and appropriate professional authorities acceptable to the superintendent of public instruction.

2) The director of special education, upon the approval of the superintendent . . . shall prescribe rules, regulations and tests for determining what children shall be classified as educable mentally handicapped or trainable mentally handicapped, and questionable cases shall be decided by the director after adequate examination and consideration of specific case histories."

§157.260

"The director of pupil personnel of each school district shall ascertain annually all children within his[her] district who are handicapped and shall report the same to the department of education."

§157.270

"If in any district there are exceptional children not able even with the help of transportation to be assembled in a school, instruction shall be provided in the child's home, or in hospitals or sanitaria . . . however, a minimum of two visits a week with a minimum of one hour of instruction per visit, by a teacher provided by the board of education . . . [shall be]. . . equivalent to the attendance of one child five days in school."

§157.280

If for some reason a school district does not provide a special education program for a particular classification of exceptional children, "the board shall provide a program by contract with another . . . district or private organization that maintains a . . . program approved by the state board of education for that exceptionality . . . ." Where such a contract is instituted "the district of residence of these pupils shall share the total cost of the . . . program in proportion to the number of pupils as in accordance with contract agreement . . . ."

2) The "home" school district shall pay for the student's "transportation to and from the program in the other school district or to the private organization." If transportation is provided by the other district or the private organization, "the cost of transportation shall be included in the total cost."

3) If a child's attendance is required, either by statute or regulation, at the Kentucky School for the Deaf or Blind, "the district in which the child resides shall provide transportation to and from the school on a regularly scheduled basis at intervals of no less than once each month . . ." either individually or in cooperation with other school districts on a regional basis "as approved by the state board of education upon recommendation of the superintendent . . . ."

SCHOOLS FOR DEAF/BLIND

§157.285

"Local boards of education may contract to provide 'related services' to exceptional children and their families when the desired services are not available through a public or private agency."

RELATED SERVICES

§157.290

"The local superintendent of schools shall present to the superintendent of public instruction an application for tentative preapproval of a plan for special education programs for exceptional children."

§157.295

TESTING

"The superintendent of public instruction shall employ two additional supervisors for the purpose of testing and classifying the mentally retarded, and two additional supervisors to supervise programs for all other exceptional children."

§159.050

SCHOOLS FOR DEAF/BLIND

"In school districts that generate [special] schools for the education of children who are blind or deaf . . . such children between the ages of seven and sixteen whose mental condition permits application to study shall be enrolled in and attend such schools regularly for the full term of the schools or until discharged by the board of education of the district." If no special district school is provided, "The suprintendent of public instruction, on recommendation of the state director of pupil personnel, may cause the child to be enrolled in one of the state institutions for the education of such special groups."

§167.015 -- 035

SCHOOL FOR THE DEAF

The state board of education shall manage and control the Kentucky School for the Deaf. They "shall have possession and the responsibility and authority for preservation, repair and control of the buildings and grounds . . . ." They may, subject to specific statutory limitations, "sell any property held for the use and benefit of the school, and purchase other property deemed . . . to be suitably and conveniently located, and erect buildings necessary for carrying out the purposes of the school. The board may adopt rules and regulations to carry into effect its powers . . . and may require from the superintendent of the school any reports and information it desires as to the condition of the school."

The board "may employ, prescribe and direct the

duties and conduct of a superintendent, professors, teachers, and all other necessary agents and employees for the . . . school. The superintendent shall be a person with at least five years experience in the education and training of the deaf.

APPOINTMENT

There shall be established a Kentucky School for the Deaf Advisory Board composed of five members appointed by the governor . . .[who] . . . shall serve without compensation but shall be reimbursed for necessary expenses incurred in the performance of their duties. The . . . board shall act in an advisory capacity to the state board of education and the superintendent in conducting the activities of the school."

§167.090-120

DEAF CHILDREN

Except as provided herein "every person residing in this state who has custody, control, care or supervision of any deaf child between the ages of seven and sixteen years shall cause the child to attend some public, private or parochial school for the hearing or in which deaf children are taught, for the full term each year.

This shall not apply to a person tutored in the home by a "qualified instructor," nor to any child certified as "not in [the] proper mental or physical condition to be sent to school.

If it is satisfactorily shown to the court at the time of prosecution" for violation of this statute "that the schools . . . that provide . . . education for the deaf, are taxed to capacity and there is no room or means of taking care of or instructing the child, the person accused . . . shall be dismissed from liability.

No person shall, with the intent to evade . . . [this statute] . . . make a false statement concerning the age of a child, or the length of time the child has attended a school."

§167.130

SCHOOL FOR DEAF

Any school at which the deaf are educated "shall . . . receive any deaf child sent to the institution, unless . . . the institution is taxed to its capacity, and there is no room or means of taking care of the child, or that the physical condition of the child is such as to prevent study or to constitute a menace to the health of the other pupils . . . or that the child is mentally deficient and incapable of successfully pursuing the prescribed course of study . . . or that the habits and practices of the child are such as to constitute a detriment to the welfare of the other pupils . . . ."

§167.140 -- 170

SCHOOL FOR BLIND

"The Kentucky School for the Blind . . . shall be managed and controlled by the state board of education. The board shall have the possession, preservation, repair and control of the buildings and grounds belonging to the state and dedicated to the school. The board may . . . sell any property held for the use and benefit of the school, and purchase other property deemed . . . to be suitably and conveniently located, and erect buildings necessary for carrying out the purposes of the school. The board may adopt rules and regulations to carry into effect its powers . . . and may require from the superintendent of the school any reports and information it desires as to the condition of the school."

RULEMAKING

The board "may employ, fix the compensation and prescribe and direct the duties and conduct of a superintendent, physician, matron, professors, teachers and all other necessary agents and employees of the . . . school . . . . The board may remove at pleasure any person so employed by it. The superintendent shall be a person with at least five years experience in the education and training of the blind.

REMOVAL

The board may prescribe the course of education and rules for the government and discipline of pupils in the school, and fix and regulate tuition fees" and out of state admission policies, "but no charge shall be made for the admission of pupils from this state."

TUITION

An advisory committee may be appointed by the superintendent of the school to "assist him in conducting the activities of the school.

The state board of education shall alone have the power to expel a pupil from the . . . school . . . no officer or employee of the school shall be permitted to inflict corporal punishment on any of the pupils."

EXPULSION

§167.210 -- 240

"Deaf-blind children includes any child whose combination of handicaps of deafness and blindness prevents him[her] from profiting satisfactorily from educational programs provided for the blind child or the deaf child.

DEAF/BLIND CHILDREN

The state department of education is . . . authorized to expend available funds for the purpose" of educating deaf-blind children at a qualified institution. "Such funds may be spent for evaluation and diagnosis, room, board, tuition, transportation, and other items which are necessarily relevant to the education of such children.

The division of special education of the state department of education is . . . authorized to determine if deaf-blind children should be educated in a facility, school or institution within or without the Commonwealth." They "shall cooperate with existing agencies . . . in the coordination of their educational activities for such children.

The state department of education is authorized to adopt and promulgate such rules and regulations as it deems necessary and proper for carrying out the purposes of . . . this section."

704 KAR 3:250

There exists a Work-Study Program for Exceptional Children and Youth which includes "instruction in the classroom and placement in actual on-the-job working situations under the supervision of a work-study program coordinator . . . . [His/her] responsibility is to "supervise exceptional students between the ages of fourteen (14) and twenty-one (21) who are enrolled in a special education program and/or enrolled in regular classes . . .[He/she] shall hold a valid special education teaching certificate or a special education supervision certificate."

707 KAR 1:003

"[The] Kentucky State Plan for the Administration of the Education of the Handicapped Act shall be prepared and approved by the State Board of Education . . . ."

707 KAR 1:005

"The experimental program in the utilization of para-professionals and teacher aides in special instructional services for exceptional children shall be operated . . . [provided] applications . . . shall be submitted when local school districts submit applications for classroom units for teachers of exceptional children . . . ."

707 KAR 1:010

"Local boards of education shall operate programs for pupils with hearing impairment . . . ."

HEARING IMPAIRMENT

All personnel shall be required to have appropriate state certification. Eligible pupils are those whose "primary handicap is a hearing loss ranging from mild to profound to such a degree that he[she] does not use normal communications skills effectively . . . ."

Program memberships shall vary from six pupils to ten pupils per teacher, whether they be under the special class

plan, the resource room plan, or the itinerant teacher plan.

"An Admission and Release Committee established by the local school district shall be responsible for the placement and release of pupils in programs for pupils with hearing impairment. The committee shall consist of a minimum of two . . . permanent and two . . . temporary members. The superintendent or his[her] designate shall be one . . . of the permanent members.

Every child shall be given an appropriate audiological and speech and/or language evaluation by a qualified examiner(s).... The teacher shall maintain an ongoing objective and subjective assessment of the pupil . . . .

Programs shall be organized and operated under one or more, or a combination of the following:

(a) A special class plan shall be a classroom based program in which the handicapped pupil is enrolled. The chronological age range for pupils enrolled in the special class shall not exceed four...years. The pupils shall participate in the regular class whenever possible.

(b) A resource room plan shall be a program which serves hearing impaired pupils who shall be enrolled in the regular class and shall be able to do part of their classwork in the regular class. The pupil shall go to the resource room for special services not available in the regular class.

(c) An itinerant teacher plan shall incorporate a teacher who travels to the pupil's school(s) on a regularly scheduled basis to work with pupils either individually or in small groups. Pupils shall be enrolled in a regular class and shall receive a portion of their instruction in the regular program . . . ."

ITINERANT TEACHER

707 KAR 1:020

"Private organizations having programs for exceptional children and youth shall apply to the State Board of Education for approval if they wish to enter into contract agreements with local school districts. [Their] educational programs shall

meet the requirements of appropriate section(s) of Kentucky Revised Statutes and State Board of Education regulations. In the event that a private organization located outside of Kentucky desires to provide contractual services, it shall be approved in the area of exceptionality involved by the Department of Education in the state where the organization is located and doing business."

707 KAR 1:040

Programs for deaf-blind children shall be operated pursuant to the following criteria:

1) "Before educational placement for deaf-blind children can be considered appropriate evaluations of the child shall be made by qualified personnel . . . . The Kentucky State Department of Education is authorized to expend available funds [administered by the Bureau of Education for Exceptional Children] for . . . providing [such] evaluation and diagnostic services....

If results of the evaluation indicate that the child should be enrolled in an educational facility for deaf-blind children, the parents or guardians shall make application to an appropriate school . . . ."

EVALUATION

A child shall be eligible for placement in a special educational facility for deaf-blind children if he/she "has both a vision and hearing loss so severe that he[she] cannot make educational progress in existing state residential programs . . . ."; if all efforts have been exhausted for providing special education programs in public school programs for the deaf or the blind; and for placing the child "in existing state-supported programs offering special adaptations of standard educational programs and practices . . . ."

PLACEMENT

707 KAR 1:050

"Local boards of education shall operate programs for exceptional children of compulsory school attendance age . . . .

Appropriate state certification [for personnel] shall

be as required . . . . The program plans for exceptional pupils shall be determined by the needs of the pupils in the local school district . . . . The length of the school day shall be the same as for non-handicapped children . . . Local school district personnel shall establish one district-wide Administrative Admissions and Release Committee and a School-Based Admissions and Release Committee (SBARC) in each school . . . ."

The AARC's principal functions shall be to:

(1) "Receive information on identified children not currently enrolled in the local school district who are thought to need special educational services and/or programs.

(2) Determine if the local school district can provide appropriate services if local programs must be changed to accommodate the identified child, if additional services or programs will be developed or if the child must receive services outside the local school district."

and

(3) "Follow due process procedures to insure that exceptional children and their parents are guaranteed procedural safeguards in decisions regarding identification, evaluation, and educational placement . . . ."

The main functions of SBARC shall include:

"[the receipt of] referrals on pupils currently enrolled in the school thought to need special educational services and/or programs."

2. due process procedures to insure that exceptional children and their parents are guaranteed procedural safeguards

3. appropriate evaluations on referred pupils.

4. "the referral of cases where appropriate services are not available within the school, to the AARC.

The local school district shall obtain written parental approval to administer any specific individual psychological, psychiatric medical and/or educational test for the purpose of placement of a child in a program for exceptional children. If the parent(s) refuse to give permission for the evaluation the local school district

shall either accept their decision or ... request an impartial hearing ....

A pupil shall be eligible for enrollment in a program for crippled and other health impaired if a licensed physician determined that he/she is physically unable to attend regular class. A medical statement by a licensed physician shall be on file in the central office. The Admissions and Release Committee shall review this statement as well as any additional reports, information and assessments deemed necessary for placement of each individual child in an appropriate educational program ...."

PUPIL/TEACHER RATIO

Program membership shall vary according to the different program plans, from six to fifteen pupils per teacher for the special class plan, to ten to twenty pupils per teacher for the resource room and itinerant teacher plans.

HOME INSTRUCTION

"An exceptional child shall be eligible for instruction in his[her] home, hospital, or sanitarium provided a signed statement is secured from the licensed physician, psychologist, psychiatrist, or public health officer, that the condition of the child prevents or renders inadvisable attendance at school or application to study ... Children with communicable diseases shall not be enrolled in a home instruction program ... Home instruction shall not be used as a substitute for a more appropriate educational placement for exceptional children."

Program membership shall vary from six to ten pupils per teacher in a home instruction program to six to fifteen pupils per teacher in a combined home and hospital instruction program.

"High school pupils on home instruction programs shall meet minimum State Board of Education requirements, follow the prescribed local course of study, and acquire the required number of units prior to graduation from high school ....

Pupils who ... obtain intelligence quotient scores between fifty and seventy-five on individual intelligence tests shall be eligible for enrollment in programs for the

educable mentally handicapped. [Upon recommendation of the appropriate Admissions and Release Committee], pupils whose intelligence score is borderline may be placed in a program for the educable mentally handicapped on a trial basis [a period of four months] ... The evaluation of pupils ... shall consist of:"

(a) The referring person's assessment of the pupil's specific strengths and weaknesses in the academic and behavioral areas.

(b) A behavioral observation of the referred pupil in familiar surroundings (i.e., classroom, playground, etc.).

(c) Formal and informal educational evaluation data composed of individual and/or group standardized academic achievement tests and assessment of basic skills areas such as reading, math and language.

(d) A developmental history.

(e) An individual psychological assessment utilizing a recognized standardized measure of individual intelligence.

(f) In cases where vision, hearing, or serious emotional disturbance is suspected to be the primary handicapping conditions, a referral for appropriate assessments by qualified professional(s) shall be made.

(g) Evaluations of referred pupils shall be completed by persons who are qualified to perform such evaluations.

EVALUATION

In these programs, there shall be ten to twenty pupils per teacher.

"Pupils who ... obtain intelligence quotient scores below fifty on individual intelligence tests shall be eligible for enrollment in programs for the trainable mentally handicapped ..."

A similar evaluation shall be conducted for the trainable mentally handicapped as for the educable mentally handicapped.

There shall be six to twelve children per teacher. "The chronological age range for the special class shall not exceed six years...."

PUPIL/TEACHER RATIO

Pupils with learning disabilities enrolled in special

programs shall be evaluated in the same capacity as other mentally handicapped children. There shall be eight to fifteen pupils per teacher.

"Pupils shall be eligible for enrollment in a program for the emotionally disturbed (behavior disorders) whose emotional and behavioral disorders indicate they can benefit from a modified learning environment and an instructional program compatible with their individual learning needs." These pupils must have demonstrated:

"(a) An inability to learn which cannot be explained by intellectual, sensory or health factors.

(b) A variety of extreme behavior patterns ranging from hyperactive, impulsive responses to depression and withdrawal.

(c) A general, pervasive mood of unhappiness or depression.

(d) A persistent inability to establish and maintain meaningful interpersonal relationships.

(e) A tendency to develop physical symptoms such as speech problems, pains and fears, associated with personal and/or school problems."

There shall be eight to fifteen pupils per teacher.

PUPIL/TEACHER RATIO

"Any pupil having a speech handicap/communication disorder shall be eligible for placement. Admission shall be based upon evaluation and/or recommendation by personnel certified by the Department of Education."

There shall be forty to seventy-five pupils per week in the program.

"A pupil shall be eligible for enrollment in a program for the visually handicapped if an eye specialist certifies that he[she] has a visual acuity of 20/70 or less in the better eye after correction ....

Program membership for the special class plan, the itinerant teacher plan and the resource room plan shall be from five to ten pupils per teacher ...."

2. Programs for Exceptional Children

Statutes

§17:234

"Every parent or tutor or other person having charge of mentally or physically deficient children (this applies to blind, deaf and spastic children) shall enforce the attendance of these children at special schools or classes provided by the state or parish and city school board . . . ."

§17:1941 -- 1942.1

It is the duty of every state, city and parish public school system to provide an appropriate, free, public education to every exceptional child. The legislative purpose is to provide a uniform system of special education; to provide a nondiscriminatory means of identifying and evaluating childrens' individual needs; and to conduct periodic evaluations of programs provided.

The special education program shall be funded by the state and administered by the Department of Education.

§17:1943

Included in the definition of "exceptional child" is any child who is defined as being mentally retarded, gifted and talented, hard of hearing, deaf, speech impaired, severe language disordered, visually handicapped, emotionally disturbed, orthopedically handicapped, hospital/homebound, other health impaired, learning disabled, educationally handicapped or slow learners.

"Special education" shall be any program of instruction within the elementary and secondary structure, specifically designed to provide for different learning styles of exceptional children. Instruction may be provided for children ages three to 21 years.

§17:1944

Special education services shall be administered by the Department of Education and by city or parish school boards. The superintendent of education shall establish, within the department, a division of special education

services to supervise and monitor all programs throughout the state.

The powers and duties of the division of special education services include the following: (1) assisting school boards in the evaluation and placement of children requiring special education services; (2) regulating and helping to develop special education programs; (3) collecting the required financial data from all schools receiving funds; (4) reviewing and analyzing data for purposes of evaluation; (5) promoting public awareness of available programs and services; (6) developing certification requirements for special education instructors; (7) investigating complaints and providing hearings; (8) involving parents in the planning and evaluation process; (9) insuring minimum standards for private agencies that provide special education services; and (10) enforcing compliance with state and/or federal laws, and rules and regulations.

The Department of Education shall issue regulations, written in cooperation with private agencies, teachers and families, to be published prior to the 1978-79 school year. RULEMAKING

§17:1945

Before placing, transferring or denying placement to an exceptional child, an evaluation must be conducted, by the Department of Education. A medical assessment must be made prior to the evaluation and notice must be given to the child's parents. Parental consent, in writing, is necessary before the child may be placed in a special education program. ASSESSMENT CONSENT

The evaluation is to be conducted by a multidisciplinary team, certified as qualified examiners by the Department of Education. The Department of Education is authorized to contract for evaluation services and may provide inservice training for the teams. EVALUATION

In order to locate and identify children with special education needs, educational assessment programs shall be established. Children will be placed, with parental consent, in a four to six week program, to determine

whether the child needs further evaluation.

REEVALUATION

Children placed in special education programs must be reevaluated at least every three years. The reevaluations will be carried out by certified multidisciplinary teams according to Department of Education procedures.

TESTING

The Department of Education will establish procedures to assure the integrity of testing and evaluation materials and to eliminate any racial or cultural discrimination.

An individual education plan shall be established for each child by the city or parish school board providing services. The plan will be reviewed and updated at least once a year. The plans are considered confidential and may not be released to the public.

Progress reports on exceptional children shall be made by all agencies providing services.

§17:1946

PLACEMENT

The Department of Education has authority to approve alternative education settings for special education programs, which may include the regular classroom or self-contained classroom, public or private school.

However, children requiring special education in special classes in alternative settings shall be placed there only when the nature or severity of the exceptionality is such that education in regular classes cannot be achieved satisfactorily. The Department of Education shall prepare regulations on the "least restrictive placement of exceptional children in alternative settings."

§17 1947

The responsibilities of local school systems include providing the following services for exceptional children aged three-21: (1) special education and related services; (2) alternative educational settings; (3) materials and supplies; (4) individualized education plans; (5) procedural safeguards; (6) evaluation and reevaluation; (7) parent participation; and (8) protection in evaluation.

Special education may be provided for children below age three who have serious handicapping conditions requiring immediate treatment.

All educational personnel must hold a valid degree or certificate as required by the Department of Education.

If best results can be obtained by providing cooperative services, school boards and districts shall implement such plans according to Department of Education procedures.

Transportation will be provided by parish and city school boards.

All new construction projects must meet government standards in providing accessibility to handicapped persons.

Local school boards shall employ a director of special education on a full or part time basis.

§17:1948

Local school boards shall submit an annual application for special education funds together with an annual evaluation of the prior year's program. The Department of Education shall establish criteria for the plans and reports.

APPOINTMENT

Each parish and city school system shall appoint a local advisory council to develop the plan. The council will be composed of a handicapped individual, a parent, a special education teacher and a local official. At least one public hearing is required to be held in each city or parish that submits application for funds.

HEARING

§17:1949; 17:1950

A parish or city school board may purchase services from any public or private agency, requiring that agency to provide free education to exceptional children. However, the agency must meet Department of Education standards.

CONTRACTS

The Department of Education itself may contract with school boards, and public or private agencies to provide special education services.

§17:1951

A special school district shall be established to provide special education for exceptional children enrolled in state operated programs. The special district will be administered by the Department of Education.

Each local system shall reimburse the special district for exceptional children it sends to the district

§17:1952

RULEMAKING

The Department of Education shall prepare regulations providing for parental participation in special education planning. The rights of parents will be protected by the following guarantees: (1) an opportunity for an independent evaluation of their child; (2) written notice of any proposed change in identification or placement of a child; (3) an opportunity to present complaints and a guarantee of due process rights in doing so.

§17:1953

In order to assure the availability of adequately prepared and trained personnel in special education, the Department of Education shall conduct a manpower needs assessment and submit a plan of its findings to the Louisiana legislature. The plan shall address the need for programs at all levels of personnel involved in special education.

§17:1954

APPOINTMENT

The Department of Education shall appoint a "state advisory council for the education of exceptional children," which shall include handicapped individuals, parents, special education teachers and program administrators.

§17:1955

CONFIDENTIALITY

The Department of Education shall establish procedures to protect the confidentiality of all information collected in providing special education. Parents are to be assured of a means of amending or challenging facts included in evaluation or individual education plans.

REGULATIONS

Policy and Procedure Manual of State Board of Elementary and Secondary Education, 3.01.63

Primary purpose of program is training of dependent retarded children. Training is instruction above custodial care but less

than the level of limited academic instruction. Local boards of education shall process applications from parents for such services. A child shall be eligible if he/she has an IQ of between 30 and 50, is not a danger to himself or others, is capable of controlling himself or others, and is ambulatory and between seven and eighteen years of age.

CLASS SIZE

Classes for these children shall be a maximum of ten students; if an aide assists the teacher the maximum class size shall be fifteen students.

Policy and Procedure Manual of State Board of Elementary and Secondary Education, 3.02.12

State School for the Deaf.

SCHOOL FOR DEAF

The state school for the deaf shall have a high school program. Visible English shall be the primary means of communication in all academic and extracurricular activities. Pupil teacher ratios shall range from one to four for speech classes to one through eight for junior-senior high classes.

The state school for the deaf shall be the state agency designated to coordinate programs for educating the deaf throughout the state. Any teacher or employee who "agitates or impedes the educational process or. . . contributes to the disruption [of the students] should be cited for willful neglect of duty and be subject to dismissal..."

DISMISSAL

Policy and Procedure Manual of State Board of Elementary and Secondary Education, 3.02.21

Children may be admitted who are between five and nineteen years of age. Preference will be given to younger children because they have a greater chance to benefit by attending the school. The number of bedridden and wheelchair pupils "should be held to a minimum" Pupils should represent "a wide geographical distribution" in the state.

Curriculum should contain "ordinary school subjects with emphasis on such vocational training as may fit each case." Therapy for each child must be worked out with the medical director and his staff.

Policy and Procedure Manual of State Board of Elementary and Secondary Education, 4.02.03

Policy Statement on the Right to Education for the Handicapped.

All handicapped children have the right "to a free appropriate public education." [The Board states the Federal regulations, goals, priorities and procedures of §612 and 613.] and the compliance provisions and policies of the board. These are set forth in the Amended Annual Program Plan for Special Education for 1978, 1:7-14-77 Louisiana Register, and Policy statements 2:10-27-77 Louisiana Register.

Policy and Procedure Manual of State Board of Elementary and Secondary Education, 5.01.50

Local school boards may use state funds to purchase services from private residential facilities for educable children if the school district does not provide such services. To be eligible, the children must have an IQ of between 30 and 50. The school district will be reimbursed not more than $600 per year from state funds. The private school utilized must be approved or licensed by the state and is required to submit a description of facilities, personnel, and program to the special education section of the state department of education.

Policy and Procedure Manual of State Board of Elementary and Secondary Education, 5.02.01

Local school districts may be reimbursed $5.00 per hour for part-time teachers of home bound students.

Policy and Procedure Manual of State Board of Elementary and Secondary Education, 6.00.70

Exceptional Children

Special educational services shall be provided in a special education classroom or resource rooms or through the services of an itinerent special education resource teacher. Teachers shall be certified in special education. They shall not be assigned a caseload of more than 27 students.

BULLETIN 741

POLICIES AND PROCEDURES

"Each school shall have a written policy concerning admission to and dismissal from Special Education Pro-

grams. The policy shall contain:

A statement that emphasizes the school's efforts to maintain the student in the least restrictive alternative environment.

CONSENT

A statement of written consent by the parent or guardian to place the student in a Special Education program.

A statement that requries students to receive a competent authority evaluation prior to being placed in a Special Education program, where possible . . . ."

EVALUATION

III.B.Director of Special Education: Regulation Bulletin 741

III.E.Teachers: Regulation Bulletin 741

IV.H.: Statute §17:226

2. Programs for Exceptional Children

Statutes

§3121

The state policy is to provide equal education for all children including exceptional children. Educational opportunities for exceptional children shall be provided by the addition of a suitable assistance program to regular educational programs. The only exceptions to this policy will be made after "supporting evaluative data, indicating that a child cannot be properly served in a regular program, have been submitted to and approved by the commissioner."

§3122

"Any exceptional child committed or otherwise legally admitted to any state-operated institution for the mentally ill or mentally handicapped shall have the right to attend the public school in the administrative unit in which such institution is located, or in any adjoining administrative unit."

§3123

"1. 'Exceptional children' means any persons who reach the age of 5 years on or before October 15th of any school year and until the end of the school year in which such persons reach the age of 20 years who require special services in the area of vision, audition, speech and language, cerebral or perceptual functions, physical mobility functions, behavior, mental development or maturation, or multiples of these functions, as defined by the commissioner, so that their educational progress and potential may be realized.

"2. 'Special education' means classroom, home, hospital, institutional or other instruction; educational diagnosis and evaluation; transportation and other supportive assistance, services, activities or programs, as defined by the commissioner, required by exceptional children."

"3. 'Special education facility' means a public or private school, or portion thereof, intended for use in meeting the educational and related needs of exceptional children."

§3124

It shall be the responsibility of each administrative unit operating schools to identify all children within its territory who require supportive assistance and special education. In addition, each "administrative unit shall provide educational diagnosis and evaluation as may be necessary for the planning and implementation of a special education program for each child . . . Activities related to identification, educational diagnosis and evaluation, planning and implementation, and the provision of services shall be conducted in accordance with guideline and regulations set forth by the commissioner.

"Nothing in this chapter shall be construed to authorize or require physical examinations or medical treatment of any child whose parent objects thereto on the grounds that he relies solely upon nonmedical remedial care and treatment in accordance with a recognized religious method of healing."

PHYSICAL EXAMINATION

MENTAL EXAMINATION

§3125

1. "Local programs": Administrative units operating schools shall establish appropriate programs for exceptional children. Such programs must be approved by the commissioner with respect to admission requirements, staff qualifications and certification, instruction, facilities, professional supervision and teacher-student ratio.

2. Two or more administrative units may enter into a cooperative agreement for the purpose of providing educational programs of supportive services for exceptional children. Such programs shall be approved by the commissioner. Cooperative programs are encouraged when they would be more effective than other programs.

3. Other programs may be implemented to insure

the education of all exceptional children in addition to those already in operation. All programs are subject to approval by the commissioner.

§3127

Administrative units will be denied any state aid if they are found guilty of not providing education to exceptional children who are legally entitled to it, effective as of July 1, 1976. Such action may be taken by the commissioner only after a public hearing by the state board of education and on due notice and record that establishes the failure of the administrative unit to provide suitable education for exceptional children.

§3128

Under guidelines and regulations set by the commissioners each administrative unit shall keep current records of exceptional children. "Each such administrative unit shall institute procedures which guarantee the confidentiality of such records as required by law."

CONFIDENTIALITY

"The commissioner shall make and keep current by annual review a state plan for the education of all exceptional children in Maine. This state plan shall be made available for public inspection on request."

§3129

Anyone using public funds to build facilities to be used for the education of exceptional children "shall obtain approval in advance from the commissioner." Approval will be granted by the commissioner if the facilities will adequately "meet the needs of its exceptional children."

§3131

1. "Due Process. The guidelines and regulations established by the commissioner shall establish procedures to assure and protect the rights of due process for all children referred to in this Title."

2. "Preschool Children. The commissioner may

authorize expenditures to institutions and organizations for speech and language education of hearing and language impaired children *who have not become of compulsory* school age."

§3161

In addition to money raised for the support of public schools, any administrative unit may appropriate money to educate teachers and other personnel to meet the educational needs of mentally retarded children. "Such appropriation shall be expended on a matching basis with any funds made available by the department for the same purpose."

Teachers and other personnel may be reimbursed by the department on a matching basis for money they spent on their own education in order to educate the mentally retarded.

§3162

The county commissioners may use county funds to construct or acquire buildings "for educational programs for retarded children" approved by the department and receiving state subsidies. Any proceeds received from selling these buildings which were originally built or acquired with county funds must be used solely for services and programs for retarded children.

REGULATIONS

Administrative Letter 42 7/22/77

Placement of Emotionally Disturbed Children in Private Facilities PLACEMENT

The Maine Dept. of Education and Cultural Services feels that the joint efforts of state agencies to plan for residential placement and provide services which are not reimburseable under special education guidelines should be continued and expanded. The following procedure should be noted by public schools in placing emotionally handicapped children in private schools. The student must be referred to a pupil

evaluation team by school officials, teacher, physician, psychologist, social worker, or parent. The pupil evaluation team shall determine the student's needs and recommend appropriate placement. If residential placement is required, the case shall be referred to the community mental health center. It shall determine the appropriate facility giving preference to in-state facilities.

If placement is not required, the CMHC may consider other alternatives such as in-school or direct family services.

The school administrative unit is responsible for educational costs and room and board at a fixed rate set by the Commissioner for up to 40 weeks. It shall provide costs for transporting children to and from school at the beginning and end of the school year and up to five trips during the year shall be reimbursed.

Parents unable to accept the administrative unit's recommendation for placement may request a due process hearing.

HEARING

STATE PLAN FOR THE PREPARATION OF PERSONNEL TO WORK WITH EXCEPTIONAL CHILDREN

Grant request 1975.

Purpose

"To improve the quality of programs for exceptional children through the development and implementation of a comprehensive system of personnel development ...designed to assure that all personnel necessary to provide services to exceptional children are adequately prepared and trained."

Key Features of the Plan

"The plan describes present in service and pre service activities, needs and descriptions of activities to meet the needs."

Administrative Letter No. 31 2/4/77

To: School Superintendents from the State Consultant for Gifted and Talented Education

Re; In service Training

A state consultant for gifted and talented children is available to assist teachers and school districts in designing programs for gifted and talented children. The consultant will conduct workshops at local schools and has information on model programs and other literature on the subject to make available to interested schools and teachers.

IIA2-ME
MAIN

INSERVICE TRAINI

2. Programs for Exceptional Children

Statutes

Art. 77 §55

The county board shall prescribe programs of training or instruction for mentally or physically handicapped children subject, however, to the policies and guidelines established by the state board.

Art. 77 §98C

The state board shall implement a program to evaluate each student entering first grade to identify learning disabilities. The state board shall guide and coordinate programs to assist the needs of the disabled students.

Art. 77 §99

The boards of education shall furnish information to the health departments of children with mental, physical or emotional handicaps. The health department shall recommend children who need help to the board of education which shall provide for appropriate educational facilities including transportation to such facility. If the facility is located outside the state or political subdivision in which the child resides, and if state aid provides for the child's education, the board shall pay the cost of transportation to the facility.

Art. 77 §100

The state board shall promulgate rules and regulations to examine, classify, and educate handicapped children. The standards shall include teacher qualifications, curriculum and equipment standards and supervision of the program.

The state department of health shall assist the state board in setting up the standards.

If a county inaugurates a special program of instruction to meet the needs of a handicapped child, the county shall receive $1,000 per child, or the actual cost whichever is less, from the appropriation made for this purpose in the state's annual budget.

If the county does not provide special programs and the parent must go outside the county or state to obtain appropriate instruction for the handicapped child, that parent shall receive $1,000 or actual cost as provided above.

Art. 77 §100A

If all locally available administrative remedies have been exhausted, the parent of a mentally, physically or emotionally handicapped child may request that the state board review the diagnosis, evaluation of educational programs provided, or exemption from school privileges. The state board shall establish a hearing board of at least three knowledgeable persons which has the authority to dismiss any complaint made without good cause, or confirm, modify or reject any prior diagnosis or program prescribed for the child. Appeal from the decision of the hearing board shall be to the circuit court for the county in which the child resides.

HEARING

Art. 77 §102

The governor shall include in the state budget an item stating that a handicapped child under 6 years of age may receive special education to help the child attain scholastic achievement as near normal as feasible. This program shall be administered under the state department of education.

Art. 77 §103

The Maryland department of education, county schools and the Maryland School for the Deaf, and the Maryland School for the Blind shall cooperate to meet the educational needs of children with those disabilities. Teachers working in the Maryland School for Deaf and for Blind shall be paid no less than public school teachers.

Art. 77 §§104,105

Each child who is unable to progress satisfactorily in school because of deafness or blindness shall

attend a school or class for the deaf or blind unless the child is receiving adequate comparable education elsewhere. Each parent or guardian of a deaf or blind child shall require the child to attend school or receive instruction.

Anyone who fails to comply with this provision shall be guilty of a misdemeanor and fined not more than five ($5.00) for each offense.

Art. 77 §§106D;E

(a) The state shall make available free educational programs for all handicapped children and the state board shall adopt standards for the "identification diagnosis, examination and education" of all children in the state through age 20. These standards of education shall not be lower than those of the public schools. "The term 'special educational services' means those services necessary to assure that all children with handicaps which impede their ability to learn are afforded the opportunity to attain appropriate levels of knowledge and learning skills consistent with their potential . . . ." The standards shall include qualifications for teachers, guidelines for curricula, provisions for residential centers, and coordination with government agencies.

(b) Each local board of education shall develop a plan to provide special educational services in accordance with state standards. However, the local plan may exceed the minimum standards imposed by the state board. Each local board shall consult with public and private agencies knowledgeable about the problems of special educational services prior to adopting a plan. Each plan submitted shall carry an estimate of the number of children who are to receive the services.

(c) The state superintendent shall review each plan and, if in accordance with state standards, shall recommend its approval to the state board. If the plan is not approved and if the local board does not resubmit an acceptable plan, the state superintendent shall develop a plan for the sub-

division.

(d) The state superintendent shall also adopt a plan for those children in state institutions.

(e) The state board shall annually review the approved plans.

(g) A child shall be placed in a non-public institution at public expense if the state approves. The approvals shall be based on standards it promulgates for this purpose. A court may not order a child sent to a non-public institution at public expense unless the placement is in accord with this subsection.

Art. 77 §§106F,G

Gifted and talented children are those identified by professionally qualified persons as having outstanding abilities in intellectual capabilities or in the creative, visual or performing arts.

The state board shall encourage the development of programs for these children and shall provide guidance and technical assistance to support programs to: train teachers to identify these children, develop new or modified curricula, and disseminate findings related to such programs.

Art. 77 §106G-3

Each county shall contribute the basic cost (average amount expended by the county from all public sources for the handicapped child) for each child receiving special education services who is domiciled in the county.

The state and counties shall share in a contribution of $100,000,000 ($100 million) as the public funding of the excess cost in accordance with the formula set forth by law. Excess cost is defined as the cost of providing special education services in excess of the basic cost but excluding federal funds received for this purpose or the cost of placing children in non-public schools.

In addition to any other requirement, the state shall contribute the full amount required for special education services in non-public schools.

REGULATIONS

13.04.01.01

"State and local education agencies shall provide free educational programs and services for all handicapped children . . . . The State Board of Education shall appoint a State Advisory Committee for Special education to review . . . special education standards. . . , programs and services . . . .

Handicapped children are those persons through the age of 20 who have been determined . . . as having temporary or permanent difficulties arising from cognitive, emotional, physical, perceptual factors . . . and who require special educational programs and services as an educational intervention." Economic and cultural disadvantages do not in themselves justify special education programming. Services may be either direct, as a "supplement to a child's regular program or an alternate program," or indirect, such as "consultation with regular teachers and parents, special alteration in plant or facility, additions of special equipment, or provision of special learning materials."

13.04.01.02

"The State education agency. . . shall . . . maintain State interagency coordination to ensure the development of interagency planning and implementation of programs for handicapped children." Local education agencies shall cooperate with other State and Local agencies for the same purpose.

"The local education agency shall submit annually to the State Superintendent of Schools a comprehensive five-year plan for the provision of special educational services. Local agencies shall inform the public about special education programs and services. Local agencies must

maintain and report to the State Department of Education a list of all children through age 20 who need special education. The local education agency shall . . . ensure the maintenance and confidentiality of . . . records of children receiving special education programs and services." Services to be offered under special education plans must either conform to the States' "Administrative Manual for the Continuum Program," or in its absence, "local education agencies shall provide an alternative variety of delivery systems . . . .

Children shall be educated in regular classes, with the use of supplementary aids and services, unless the nature or severity of the handicap is such that their education cannot be satisfactorily accomplished . . . . Services may include consultative . . . diagnostic/prescriptive . . .[and] itinerant services," and vocational programs and counseling.

"Children shall be educated in a special program only if the nature and severity of the handicap so indicates. Such programming may include . . parent/infant . . ., pre-school . . .[and] itinerant program, self-contained classes," vocational programs and counseling, "home and hospital instruction, special education centers, non-public educational institutions, State-operated day and residential schools and state-supported schools.

Local education agencies shall not assess nor assign children to special educational programs . . . solely on the basis of national origins, linguistic, or cultural differences."

Children may be enrolled in residential schools only if their handicap "is evaluated as severe or profound and its effect on the child's home and school environment requires total environmental support." Local and state education agencies may cooperate "to provide special educational programs and services which are impractical in a single school system . . . . Health services supporting special programming shall be provided."

13.04.01.03

"Parents or legal guardians of children with handicapping conditions shall have the right to review information pertaining to screening, educational assessment, the educational management plan, and exclusion or exemption from school privileges."

HEARING

Local boards of education shall provide a "hearing procedure for any parent(s) . . . of children . . . in or in need of special education programs when a request is made in writing, for good cause, to review (1) diagnosis, (2) evaluation of educational programs . . ., or (3) the exclusion . . . from school privileges of the child . . . . After exhaustion of all locally available administrative remedies," the parent or local board of education may request that the State Board of Education review the case.

"Parents or legal guardians have the right of prior informed consent regarding their child's psychological evaluation, confidential information usage, special education programming and placement."

13.04.01.04 -- 13.04.01.05

"The local education agency shall cooperate with local health agencies under the Department of Health and Mental Hygiene to implement . . . preschool screening procedures to identify potentially handicapped children." Children shall be screened "for potential learning problems" when they enter the primary grades. "The local education agency, jointly with the local health agency, shall administer to each child a minimum of two hearing and vision" tests and "shall provide for continuous screening of children" for learning problems.

"The local education agency shall provide an appropriate educational assessment for all children identified. . . as potentially in need of special education programs and services . . . . Results . . . shall be written and shall include academic achievement, developmental patterns, techniques of learning, and behavioral patterns."

Local education agencies shall establish "admission

review and dissmissal committees" which are responsible for evaluating "educational assessment reports;" and making recommendations on admission to or continuation in programs, program changes, "withdrawal of . . . services, and follow-up procedures." Members of the Committee should be "interdisciplinary personnel who are directly responsible for the special educational needs of the child" and should include a school psychologist if "self-contained program placement" is being considered. A child must "have both a written educational assessment and . . . management plan" before being admitted to special education programs. No more than six months should elapse between initial assessment and admission to programs.

"The educational management plan shall" be directly related to the assessment, "State and local curriculum goals," and the child's needs and abilities. The plan should "be periodically reviewed and modified."

13.04.01.06 - 13.04.01.14

"Local education agencies shall provide special education programs and services in accordance with specific program standards. Standards regarding maximum class size or caseload may vary only when indicated in the . . . agency's . . . five-year plan and approved by the State Superintendent of Schools . . . . Request for approval in variation of class size or caseload delineated herein shall include consideration of the age of the children, . . . the handicapping condition . . . services needed and staff utilization."

Standards are set forth for programs for four different levels of "intellectual limitation": mild, moderate, severe, and profound. "Intellectual limitation is defined as signficantly sub-average general intellectual functioning existing concurrently with deficits in adaptive behavior and manifested during developmental period. . . . Program eligibility is determined by "scores on standardized tests and "verification of variance of adaptive behavior from normal in . . ."sensory-motor . . . communication . . . [and] self-help skills . . ., socialization, . . . appli-

cation of basic academic skills . . .[and] of appropriate reasoning and judgment" in daily life; and "vocational and social responsibilities and performance." Class size and staffing ratios vary according to the level of intellectual limitation and the specific age-group program (parent-infant, preschool, primary, intermediate, junior high-middle school, secondary), and "in accordance with each local system's five year plan and shall show a phase-in from 1975 - 76 school year class sizes to those stated for the 1980-1981 school year."

PUPIL/TEACHER RATIO

Standards for class sizes and teacher ratios for learning disabilities also vary according to age group and should be implemented during the 1975 - 76 -- 1980 -81 period. "Learning disabilities are defined as deficits in association, conceptualization, attention, psycho-motor development, perceptual, receptive, integrative, or expressive processes which interfere directly with cognitive learning and which require special education programming." If it is verified by appropriate professional personnel that a child has one (or more) of these deficits and that intelligence is normal and "sensory acuity is not the primary deficit," the child is eligible for programs. "Visual impairment is defined as limitations in visual acuity which, following correction, interfere with successful functioning in the environment . . . . Hearing, language, and speech impairment, including deafness, is defined as deficit(s) in the communication process(es) which require special educational programs and services." These include language, voice, fluence, articulation, and learning impairments. "Program eligibility is determined by verification by an appropriate certified specilaist(s)." The standard for programs for physical disabilities are similar to those for other programs. "Physical disability is defined as neuro-muscular or medically restricting condition which interferes with moral learning processes and requires either temporary or permanent special educational provisions and/or habilitation or rehabilitation . . . . Program eligibility is determined by . . . diagnosis . . . by a qualified licensed physician . . .[and] verification through educational

assessment that the diagnosed physical disability interferes with normal learning processes."

Programs for emotional impairments fall under two categories -- "vulnerable" and "marginal adjustment." Standards are set forth in the same manner standards are established for other special education programs. "Emotional impairment is defined as behaviors which have developmental deviation in emotional functioning and which interfere directly with learning . . . . Program eligibility shall be determined by a certified special education teacher and a school psychologist . . . [and] shall indicate . . . marginal adjustment or vulnerability . . . . Marginal adjustment is defined as a level of functioning at which present skills, behavior and psychological attitude have weaknesses which directly interfere with learning"; for "vulnerability" functioning in the same areas is "so limiting that the pupil appears to be programmed for inevitable learning failure."

Similar program standards are set forth for multiple impairments, which are "defined as two or more handicapping conditions which, when taken together, require a combination of specialized programs and services . . . .

"Home and hospital instruction is a short term itinerant service" intended to support or supplement "school-based educational programs for children with physical disabilities . . .[or] severe emotional impairments requiring transitional programming, and . . . shall be one of the options available to pregnant students." The service is available to physically disabled children who are receiving medical treatment or convalescing in a hospital or other institution, and to emotionally impaired children on an emergency basis only (up to 60 days). "Home and hospital instruction shall never assure primary responsibility for the education of any student." To be eligible for the service the child's condition must be verified by an appropriate professional, the treatment program and prognosis must be taken into account, and "the child's home school principal and the local education agency superintendent of schools must approve."

"Non-public educational institutions for the handf-capped shall be approved" according to law and the bylaws of the State Department of Education. A child is eligible for such placement if the local education agency verifies that the child's handicap is such that he or she cannot be educated in "public . . . or State institutional schools." The local superintendent and State Superintendent of Schools must approve the placement.

"Educational programs offered by State institutions shall be approved" according to law and State Board of Education may require local education agencies to provide special educational services for handicapped children through age 20 residing in approved public residential institutions within their respective boundaries."

13.04.01.17

"The local education agencies shall provide administration and supervision . . .[and] certificated educational personnel" in order to implement regulations concerning special education programs and services.

13.04.01.18

"All handicapped children enrolled in an approved educational program shall be provided transportation . . . . Reasonable daily transportation or reimbursement shall be provided for attendance at approved non-residential facilities, and the State Superintendent of Schools shall establish . . . criteria for the frequency of transportation to be provided to residential facilities."

13.04.01.19

"The local education agency shall provide facilities for programs and services for handicapped children as an integral part of the school . . .[to] include highly structured areas for identification and educational program management."

13.04.01.21

"When all local available administrative remedies for providing special education programs for mentally, physically or emotionally handicapped children . . . have

been exhausted, the parent(s) . . . may request in writing from the Maryland State Board of Education a review of the case as it relates to the diagnosis, evaluation of the education programs provided by a local or regional board of education, or the exclusion . . . from school privileges of a child."

Parents making such a request are provided an official application by the State Department of Education, to be returned within 15 days to the State Superintendent of Schools, who then schedules an initial reviw.

The State Hearing Review Board determines if "there is sufficient cause to conduct a review hearing." If a hearing is granted, it must be "scheduled by written notice within 20 days.

"The parents . . . of a child for whom a placement action is proposed shall have the right to inspect . . . all records pertaining to the child of the local school system . . . . The child may receive independent medical psychological, and educational evaluations."

The Hearing Review Board conducts the formal hearing and must afford "each side . . . a reasonable time to present its case . . .

The Hearing Review Board shall consist of at least three persons, each of whom is knowledgeable in one of the areas significant to the educational review of the child . . . ."

Diagnosis, evaluation of programs and exclusion from school are the only areas to be addressed at the hearing. The Hearing Review Board may "confirm, modify, reject, or prescribe alternate special education programs for the child" in these areas

HEARING

"A formal hearing judgment shall be rendered by a majority vote of the Hearing Review Board members within ten days" of the hearing's conclusion, to include its findings and conclusion. The State Superintendent shall notify the parents of the decision. Appeal may be made to the apprpriate court of jurisdiction.

"Each local board of education shall establish . . . a hearing procedure" for the same reasons as outlined above. "After exhaustion of all locally available administrative remedies and procedures," the parents or local board may

request that the State Board of Education review the case.

Local boards shall notify, in writing, the parents; "before placing a child in a program of special education; . . . before transferring a child from one program . . to another significantly different program; . . . whenever a child is denied placement in a program of special education requested by the child's parent(s). . .; before excluding a child in or in need of a special education program from local free education programs." These are called "proposed placement actions."

Except in emergencies, "the parents . . . shall be given the opportunity to participate in an informal placement conference" before a "proposed placement action" is implemented.

Each local school system shall establish procedures insuring full cooperation with all parent(s). . . in . . . all matters . . . pertaining to the education and welfare of the child and the full evaluation and exploration of educational placements for the child."

HEARING

"When a hearing is requested . . . and the child is . . . enrolled in a free educational program," no change may be made "in the child's placement status without (1) the consent of the parent(s). . . or (2) pursuant to a decision of the hearing officer or panel, whichever occurs first, except in emergency situations . . . . Unless specifically stayed. . . , the decision of the hearing officer . . . shall be implemented as soon as practicable but in any event within 30 days . . . .

"When a hearing is requested . . . and the child is not currently receiving free educational services, a special expedited hearing schedule shall apply" as provided.

"In any disciplinary case initially deemed to warrant suspension or expulsion . . ., if credible evidence is presented . . . indicating that the child may be handicapped and subject to placement in a special education program, then an evaluation of such a child shall be initiated . . . at the direction of local school authorities. . . . If it is established that the child is handicapped and that the handicapping condition was a significant

cause of the behavior which prompted the disciplinary action, then any suspension or expulsion shall terminate. . . .

Each board of education shall develop hearing procedures which, at a minimum, meet the requirements of these regulations."

2. Programs for Exceptional Children

Statutes

15 §1 M; N

The powers and duties of the division of special education shall include: a) assist in identification and referral of special education children; b) development of special education programs; c) coordinate expertise of professionals; d) compile data; e) analyze and review programs; f) develop public information and standards for review; g) handle federal aid; h) to make recommendations to the board of education; i) develop certification standards; j) to receive and handle complaints; k)"to provide for the maximum practical involvement of parents;" e) to investigate denials of "equal educational opportunities"; m) to develop cost accounting and reporting procedures for schools and other vested educational agencies; n) to conduct research and development projects to improve the quality and efficiency of programs; and any other powers and duties set forth in the statute.

There shall be a sufficient number of bureaus within the division to carry out its powers and duties, at least one of which shall be responsible for holding hearings and conducting investigations.

15 §1 O

There shall be established in each regional office of the Department a regional branch office of the division of special education headed by a director with experience in educating children with special needs.

The branch office shall: (1) consult with and assist school committees in implementing the state's special education program; (2) "assist school committees in identifying, diagnosing and evaluating children with special needs and in developing . . . programs to meet . . . [those]. . . needs; (3) approve all special education placements by school committees . . . (4) assist and encourage the formation of joint agreements between . . . committees for the provision of special education" services; (5) "investigate and

evaluate . . . special education program[s] . . ." and (6) "maintain a list . . . of professional personnel within and without the region qualified to assess children with special needs . . . ."

15 §1 P

ADVISORY COUNCIL

A special education advisory council consisting of sixteen members appointed by the Department, shall be established in each region. At least eight of the members shall be parents whose children are enrolled in the special education program.

The council "shall advise the regional branch regarding all aspects of special education programs in the region" and shall annually submit a report "on the quality and adequacy of such programs." They shall also transmit complaints and suggestions to the state advisory commission.

15 §1 Q

A state advisory commission for special education shall be established in the department. Each regional advisory council shall elect two members to the commission, at least one of whom shall be a parent whose child is receiving special education.

"The commission shall annually submit a report to the department evaluating the quality and adequacy of special education programs . . . and recommending improvements . . . The department shall implement the[se] recommendations or shall state in writ[ing] . . . why . . . [they] . . . cannot or should not be implemented. [T]he bureau responsible for hearing complaints and conducting investigations . . . shall attempt to resolve the disagreement informally." If that cannot be done the state board "shall conduct public hearings to investigate the basis for disagreement and resolve any [such] dispute . . . ."

15 §6B; 6C

The state board of education shall appoint a supervisor of guidance and placement and an advisory commissioner on academically talented pupils.

15 §15 B

"There shall be established in the division of special education a library center for the acquisition, maintenance and distribution of books and other material deemed essential to the proper instruction and training of visually handicapped children."

19 §28

"Whenever a mentally retarded person qualifies for attendance at an educational, habitational or day care program or facility of the department of mental health, the department shall notify the school department of the [location] in which the person resides." The school department shall then pay transportation costs.

71 §10

"If the school committee of a town of less than five hundred families or householders not maintaining a public high school offering four years of instruction, pays, with the approval of the department, for the instruction of a pupil who by reason of physical disability is unable to attend a high school in another town, the commonwealth shall reimburse the town . . . for tuition . . . and . . . transportation . . . but not exceeding one hundred dollars a year."

TUITION

71B §2

The department shall promulgate, in cooperation with the departments of mental health, public health and welfare, regulations regarding programs for children with special needs which emphasizes each child's developmental potential so as to "minimize the possibility of stigmatization and to assure the maximum possible development" and further they shall be "sufficiently flexible to include children with multiple special needs." Children receiving special education shall be entitled to participate in any of the following programs: "(1) additional direct or indirect instruction consultation service, materials, equipment or aid provided children

RULEMAKING

or their regular classroom teachers; (2) supplementary individual or small group instruction or treatment in conjunction with a regular classroom program; (3) integrated programs in which children are assigned to special resource classrooms but attend regular classes to the extent they are able to function therein; (4) full-time special class teaching . . .;(5) teaching . . . at home; (6) full-time teaching at a special day facility; (7) teaching or treatment at a hospital; (8) teaching or treatment at a short or long term residential school; . . . (10) occupational and pre-occupational training in conjunction with full-time special class teaching in a public school building, at home, special day school or other day facility, hospital, or short or long-term residential school; (11) any combination or modification of programs (1) through (10) or other programs, services, treatments or experimental provisions which obtain the prior approval of the department."

Every child shall be assigned to a special education class after a determination of need and shall be entitled at least annually to a determination of continuing need.
71B §3

IDENTIFICATION

In accordance with the regulations of the department, every school committee shall identify the children who have special needs and based upon a diagnosis and evaluation, propose a special education program to meet those needs, provide for the program, maintain appropriate records of the program and make such reports as the department may require. "Until proven otherwise, every child shall be presumed to be appropriately assigned to a regular education program and presumed not to be a school-age child with special needs or a school-age child requiring special education.

No school committee shall refuse a school-age child with special needs admission" to public school "without the prior written approval of the department" and the provision for an alternative program if so desired

NOTICE

Within five days after the referral of a child "the school committee shall notify the parents or guardians of such child in writing in the primary language of the home of such referral, the evaluation procedure to be followed, and the child's right to an independent evaluation".

EVALUATION

Within thirty days after notification the school committee shall provide an evaluation including assessments of the child's educational status by his/her classroom teacher; his/her medical and psychological assessment; and other assessments by specialists as may be required. A specific record shall be kept of all evaluations and progress reports which shall be made available to the parents, guardians, or persons with custody of the child.

HEARING

The department may hold hearings regarding the evaluation. The parents may refuse the educational program suggested by the initial evaluation and request a hearing. If rejected, the program desired by the parents shall be provided the child except where such placement would "seriously endanger the health or safety of the child or substantially disrupt the program for other students.

PLACEMENT

No parent or guardian of any child placed in a special education program shall be required to perform duties not required of a parent or guardian of a child in a regular school program.

Within ten months after placement of any child in a special education program and at least annually thereafter the child's educational progress shall be evaluated." Evaluations and assessments are confidential.

713 54

School committees may join to provide special education or, enter into an agreement with any public or private school, agency or institution to provide the necessary special education within the school district. One school shall be designated "operating agent" to receive funds.

71B §6

School committees shall annually report to the department "the assignment by sex, national origin, economic status, race and religion of children by age level to special education classes and the distribution of children residing in the district by sex, national origin, economic status, race and religion of children by age level." If in any program there is a pattern of assignment on the basis of these aforementioned factors, which is substantially disproportionate from the distribution, [within the district] the department shall notify such school district of its prima facie denial of equal educational opportunities" and public hearings shall be held at which "the local school district must show that such disproportion is necessary to promote a compelling education interest of the children affected and of the commonwealth." If such showing cannot be made the district shall be required to submit a plan to eliminate such disproportionate representation. If such plan is deemed inadequate, the superior court may be petitioned to provide the necessary relief.

71B §7

"No results of standardized or local tests of ability, aptitude, affect, achievement, or aspiration may be used exclusively in the selection of children for referral, diagnosis, or evaluation. Such tests must be approved by the department in accordance with regulations issued by the board to insure that they are as free as possible from cultural and linguistic bias or, wherever necessary, separately evaluated with reference to the linguistic and cultural groups to which the child belongs."

71B §8

The school committee of the town where a special education child resides may be required to provide transportation for which they shall be reimbursed.

71B §9

The department shall define the circumstances in which school committees may be required to provide special education programs for school-age children with special needs and shall provide standards for class size, curriculum, personnel and other aspects of special education for such children.

71B §10

"The department may, on an annual renewal basis, upon the request of the parents and the recommendations of a local school committee and a regional branch of the division of special education, and with the approval of the secretary of educational affairs refer children requiring special education" to any institution within or without the commonwealth whose curriculum has been approved as being equivalent to that for comparable children in the public school.

REFERRAL

Before acting on a request the "department shall determine the nature and extent of a child's special needs, shall require the local school committee and regional advisory council to prepare and submit plans detailing the time needed to establish facilities" adequate for special education children. Expenses of instruction and support may be paid by the commonwealth in accordance with regulations issued jointly by the departments of education, mental health, public health, youth services, and public welfare. The per pupil cost shall at least meet that of the average pupil and parents should not be expected to provide funds beyond support of the child.

FACILITIES

71B §11

The division of special education shall establish recreation programs for school age children with special needs. The department shall reimburse half the cost of the program.

71B §12

The department shall maintain a department for school-age children in each institution under the control of the departments of mental health, public health and youth services "which provides support and care for resident children with special needs." The department shall have a director and staff whose salaries and benefits will be at least equal to that of the average statewide public school salaries for comparable personnel. The department may operate twelve months of the year.

The per capita expenditure on such programs "shall be equivalent to a higher than the average expenditure for special education programs in the public school."

71B §13

Costs of a special education program in excess of the average statewide per pupil expenditure shall be reimbursed by the commonwealth up to 110% of the difference between average regular and special education costs.

If a child attends a clinical nursery school, day care center or other institution for the retarded, the department shall reimburse the town in which the child resides for one-half the cost of transporting the child. If a retarded person attends "an educational, habitational or day care program or facility of the department of mental health," the department shall reimburse the town for one-half the cost of transporting a child and the full cost of transporting an adult to and from the facility.

76 §2 A

"Every person in control of a deaf child between seven and eighteen shall cause such child to attend some suitable school, approved by the department, where the deaf are taught speech and speech reading . . . [T]his section shall not apply to such a child whose mental . . . [or] . . . physical condition in other respects . . . is such as to render such attendance inexpedient or impractical, or who is being given private instruction,

approved by the department, during the time the public schools are in session." Failure for one month during any school year to attend shall be punishable by a fine of not more than twenty dollars.

REGULATIONS

Regulations of October 1, 1975

200. Administrator of Special Education

"Each school committee shall appoint a person to be its Administrator of Special Education. Such appointment shall be made in accordance with the following:

ADMINISTRATION

200.1 Each school committee with three thousand or more school-age children enrolled in its school system shall appoint a person qualified pursuant to statutory requirements to be its Administrator of Special Education. Such Administrator shall devote full time to the duties involved in supervising the provision of all special education programs and services in the school system . . . .

200.2 Each school committee with less than three thousand school-age children enrolled in its school system shall appoint a person qualified pursuant to statutory requirements to be its Administrator of Special Education. Such Administrator shall have the duties involved in supervising the provision of all special education programs and services in the school system . . . . Such Administrator may have other duties if the special education duties are not such as to require the devotion of full time.

201.0 Options available to school committees for satisfying the requirements of these regulations. . . .

201.1 Each school committee shall have the following options: . . .

201.1 (a) It may satisfy such requirements itself.

201.1 (b) It may enter into an agreement to satisfy such requirements through a collaborative.

201.2 (a) Any facility operated by a collaborative shall be treated . . . as if it were located within the jurisdiction of each of the school committees which are members of such collaborative.

IIA2 MA 10
MASSACHUSETTS

"201.3 Each school committee which desires to choose . . .(c) shall submit in writing . . . an agreement or contract and a plan for its implementation. The Division . . . shall communicate to the school committee its approval, or rejection, of the contract or agreement. No such agreement or contract shall take effect until approved . .

203.0 Each school committee shall insure that all communications with parents . . . pursuant to these regulations be in both English and the primary language of the home, if such primary language is other than English.

204.0 Implementation in a manner different from that required by these regulations. Each school committee may submit, in writing, a proposal for approval by the Division for the satisfaction of any requirement in these regulations in a manner different from that specified in these regulations. The Division may approve such proposal if it shows substantial promise of contributing to improvements in the methods for meeting the goals of these regulations and if such proposal does not conflict with any provision of Chapter 766 . . . .

205.0 Nothing contained in these regulations shall be construed to limit the right of parents to have their children educated at private schools, completely at private expense.

206.0 School-age children of ages sixteen through twenty-one: Consent of parents and children.

[T]hese regulations shall not be construed to require the attendance at school of school-age children of ages sixteen through twenty-one who have left school . . . .

208.0 Where these regulations require the participation of a parent and such parent fails or refuses to so participate, the school committee shall conduct an investigation of such failure or refusal. Such school committee shall make every effort to contact the parents.

209.0 Testing: Limitations on the use of tests. Each school committee shall insure that wherever testing of a school-age child is required or permitted by these regulations, the results . . . shall not be used exclusively or principally as the basis for any finding or conclusion. Such tests shall be as free as possible from cultural and linguistic bias and separately evaluated with reference to the linguistic and cultural groups to which the child belongs. Such tests shall be administered and interpreted only by persons specifically qualified to administer and interpret them. The Division shall periodically review the tests and testing procedures used . . . and shall "disapprove those tests and testing procedures which do not conform to the requirements of this paragraph. . . ."

TESTING

CHAPTER 3 - IDENTIFICATION, REFERRAL AND EVALUATION.

300.0 Each school committee shall maintain . . . a register in ever-current form of school-age children in need of special education services "resident within its jurisdiction listing the following information for each child entered to it:

300.1 Date of entry to the register.

300.2 Date of birth.

300.3 Full name of child.

300.4 Full names of parents.

300.5 Date and place of most recent evaluation by a CET.

300.6 Current program prototype and area(s) of need for special education services.

300.7 Beginning date of special education.

300.8 Place of special education.

301.0 Identification: Census. Each school committee shall file as part of the annual school report. . . and in the individual school report filed each year, a census of all school-age children in need of special education services resident within its jurisdiction.

CENSUS

303.0 Identification: Case finding; plan. Each school committee shall make a continuous and systematic effort to identify potential cases of school-age children in need of special education services. Each school committee shall submit for approval . . . a plan describing the specific manner in which the school committee shall make such effort . . . . The Division . . . shall communicate to the school committee its approval or rejection of the plan. The school committee shall implement such plan after it has been approved.

IDENTIFICATION

304.0 In order to identify the potential cases of . . . children in need of special education services, each school committee shall provide or arrange for the following:

304.1 Annual registration, optional on the part of the parents, of all children of ages three and four. The following shall occur at such registration:

304.1(a) Parents shall be requested . . . to submit a copy of the report of the most recent physical examination of their child and any other information relevant to determining whether such child has a substantial disability.

304.1(b) Parents shall be given information about the purpose and availability of orientation sessions and screening for their children.

304.4 Continuous screening of school-age children after they have entered school . . . ."

306.7 The screening may be waived if the parents arrange at their expense, for the results of an "equivalent screening or assessment, as determined by the person doing the school screening or assessment, to be presented to the school.

307.0 Identification: Kindergarten entry screening; parent involvement. Each school committee shall inform the parents of the results of the screening . . . and of the opportunity . . . to discuss such results with the appropriate school personnel. Where such results indicate a reasonable likelihood that a child . . . has need of special education services, the following shall apply:

307.1 The results of the screening shall be discussed fully with the child's parents and kindergarten teacher . . .[or] prospective kindergarten teacher . . . .

307.2 If the . . . teacher and parent both disagree with the results of the screening or otherwise believe that a referral for evaluation should not be made, such results shall not be used as an immediate basis for referral . . . . Such results may be used subsequently, if they are confirmed by further screening, after a reasonable time has elapsed to allow the kindergarten teacher and parent to observe the behavior in question.

307.3 Where the parent or kindergarten teacher agrees with the results of screening, or where such results are confirmed by a subsequent screening . . . the child shall be referred for an evaluation.

308.0 Identification: Continuous screening after kindergarten entry. All school-age children shall be continuously screened after entry to kindergarten. The following shall apply to all such continuous screening:

308.1 It shall consist, at a minimum, of those assessments prescribed by the regulations and forms for the physical examination of school children . . . .

308.2 Children identified by the continuous screening. . . as being children with a reasonable likelihood of having a need for special education services shall be referred for an evaluation.

309.0 Evaluation: Plan for conducting. Each school committee shall submit for approval . . . no later than May 1 . . . a plan describing the specific manner in which that school committee will conduct its evaluations . . . . The Division . . . shall communicate to the school committee its approval or rejection of the plan. The school committee shall implement such plan after it has been approved. Such plan shall contain the following:

EVALUATION

309.1 Specification of the personnel to be involved in the evaluation process . . . .

309.2 Specification of the projected number of school-age children who will receive intermediate and full core evaluations.

309.3 Specification of the places where evaluations will take place.

309.4 Specification of other public or private schools, which are projected to be involved in providing evaluations.

310.0 Evaluation: Administrator of Special Education; duties. The duties of the Administrator of Special Education . . . shall include the following:

310.1 Exercising general supervision over the identification, referral, evaluation and program planning for all school-age children in need of special education services.

310.2 Providing for the [required] register and census . . . .

310.3 Insuring that current records are kept of all information relating to evaluations required to be maintained . . .

310.4 Designating a chairperson for each CET.

"310.5 Assisting in the organization of the CET's.

310.6 Receiving referrals of school-age children for evaluations and assigning such children to individual full core or intermediate evaluations.

310.7 Maintaining a current list and description of program options available for . . . children in need of special education services.

310.8 Working jointly with the CET's to find the best combination of educational and other services for each school-age child in need of special education services.

310.9 Working jointly with the CET's in recommending to the Division placements of school-age children in need of special education services in the program prototypes . . . .

310.10 Working jointly with the CET's in carrying out any other duties required by these regulations.

311.0 Evaluation: CET's; composition for writing the educational plan. For each individual full core evaluation, the persons listed below shall meet to write the educational plan of the school-age child who has been evaluated. For each intermediate evaluation all of the persons who have conducted assessments, as well as the persons described in paragraphs 311.7 through 311.10, in 311.11 where an approved vocational educator has been invited to participate, and in 311.12 where the child is participating, shall meet to write such educational plan. No one person shall fill more than one of the positions listed; provided, however, that a registered nurse may fill the position described in paragraph 311.2 and may also act as the physician's designee; and provided, further, that the chairperson may fill any one of the other positions of the CET.

311.1 A chairperson who shall be designated by the Administrator of Special Education from among the members of the CET.

311.2 A registered nurse, or social worker with a master's degree in social work or a certified guidance or adjustment counselor.

311.3 A certified psychologist or one licensed to practice in Massachusetts.

311.4 A physician who is licensed to practice in Massachusetts or in another state having comparable or higher licensing requirements; provided, however, that the physician's report may be presented by a designee of such physician when such physician is unable to attend the meeting. . . . Such designee shall be another physician or a registered nurse.

311.5 A certified or approved teacher who has recently had or currently has the child in a classroom or other teaching situation.

311.6 An administrative representative of the local school department.

311.7 A parent of the child.

311.8 The teacher who will be primarily responsible for teaching the child ....

311.9 The primary person, if any, who will be assisting the teacher . . . in implementing the child's educational plan . . . .

311.10 Upon the request of the child's parents, and at their expense, any professional outside the school system who is currently working with such child.

311.11 An approved vocational educator, as deemed necessary by the CET chairperson, when the child to be evaluated is of ages sixteen through twenty-one. Where the CET intends to make a vocational education prescription for any such child, a vocational technical school director shall be consulted.

311.12 The child, at his/her request, if such child is of ages fourteen through twenty-one; the CET shall notify such child for whom an educational plan is to be written of his/her right to be present at and to participate in the writing of such plan and shall keep a written record of such notification and of the child's response. If the child is younger than fourteen, . . .[he/she may be invited] if the CET decides that such presence is necessary or desirable and in the best interests of the child.

312.0 Evaluation: CET's; composition; specialists. For the evaluation of any school-age child, specialists who are certified, licensed or board-registered shall be added to the CET, after a request for such specialists, . . . by a member of the CET who is conducting any of the assessments as part of the evaluation.
the following shall apply:

313.1 The school committee within whose jurisdiction such child resides shall provide or arrange for the provision of the evaluation.

314.0 Evaluation: Referral; limitation. Prior to referral of a . . . child for an evaluation, all efforts shall be made to meet such child's needs within the context of the services which are part of the regular education program. In addition, all efforts shall be made to modify the regular education program to meet such needs.

315.0 Evaluation: Determinations; required determinations. No later than five days after the occurrence of any of the conditions described in paragraphs 315.1 through 315.6, each school committee shall insure that the following categories of school-age children are referred to the person described in each such paragraph for a determination of whether a referral for an evaluation should be made:

315.1 A child in the regular education program, who, at mid-year, presents a substantial risk of non-promotion . . . [i.e.,]. . . if a child is failing in two or more non-elective subjects. The principal of the school attended by such child shall receive the referral and be responsible for determining whether a referral for an evaluation should be made.

315.2 A child in the regular education program who fails to be promoted at the end of the year. The principal . . . shall receive the referral and be responsible for determining whether a referral for an evaluation should be made.

"315.3 A child in the regular education program who has been suspended for more than five school days in any quarter or permanently excluded from school. The principal . . . shall receive the referral and be responsible for determining whether a referral for an evaluation should be made.

315.4 A child in the regular education program who has been absent without a medical excuse for more than fifteen school days in any quarter. The principal . . . shall receive the referral and be responsible for

determining whether a referral for an evaluation should be made.

315.5 A child who has been committed to, referred to, or detained by the Department of Youth Services, and who is currently under their jurisdiction. . . [T]he Department of Youth Services shall receive the referral and be responsible for determining whether a referral for an evaluation should be made.

315.6 A child who demonstrates a substantial negative change in alertness, learning or behavioral capacity within two weeks after returning to school after illness with the mumps, measles, chicken pox, encephalitis or other high fever, or after cerebral injuries involving loss of consciousness. The school nurse shall inquire into the condition of such child within such two-week period, and shall be responsible for determining whether a referral for an evaluation should be made.

316.0 Evaluation: Referral; who can refer.

A school-age child may be referred by any of the following to the Administrator of Special Education of the appropriate school committee for an evaluation:

316.1 A school official, including a teacher.

316.2 A parent of such child.

316.3 A judicial officer.

316.4 A social worker.

316.5 A family physician for the family of such child

316.6 A person having custody of the child.

316.7 Any other person, including a school-age child who wishes to be referred for an evaluation, may request one of the persons specified . . .[above]. . . who receives such a request may refer the child for an evaluation.

317.0 Evaluation: Referral; notice to parents.

No later than five days after a school-age child is referred for an evaluation by any of the persons listed. . . the school committee shall send a written notice to the parents of such child informing them of the following:

NOTICE

317.1 That a referral has been made including the name and position of the person making such referral.

317.2 The nature of the evaluation process including a description of the specific assessments of the child that will be conducted.

317.3 Whether a full core or intermediate evaluation has been recommended and of the right of the parent to a full core evaluation, upon request, regardless of the recommendation.

317.4 Of the date when the evaluation will begin and of the right of the parents to meet, with or without their child, with the chairperson of the CET or a designee of such chairperson, prior to that date to discuss the reasons for the referral and the nature of the evaluation including the possibility of a home visit, with parental consent.

317.5 That they have the right to be present at and participate in all meetings of the CET where the educational plan is being developed and written, . . . that their child also has the right to be present at and participate in all such meetings. . . .

317.6 That the evaluation, including a recommendation of a suitable educational plan for the child, shall be completed no later than thirty school working days after the date of the notice letter . . . .

317.7 That they may obtain an independent evaluation from an approved facility, or at private expense, from any specialists.

317.8 That the parents will be sent a written notice containing a thorough explanation of the results of the evaluation within ten days after its completion and that such notice will include a copy of the proposed educational plan and a complete statement of the right of the parent to meet with the CET liaison person . . . to accept such plan, to reject such plan, to resolve differences of opinion during a required thirty-day time period and to appeal, as well as their right to an independent evaluation.

A statement of the intended placement of the child during the evaluation process shall also be included.

317.9 A copy of the notice required by this paragraph shall also be sent by mail to the child where the child is eighteen years of age or older. Included in such notice shall be a description of the rights of such child. . . .

318.0 Meeting between parents and CET prior to evaluation. Each school committee shall insure that the parents of each child referred for an evaluation have an opportunity to meet, with or without their child, with the chairperson of the CET, or . . .[his/her] designee . . . prior to the . . . evaluation to discuss the reasons for the referral and the nature of the evaluation. . . .

319.0 Evaluation: Full core and intermediate. Within thirty . . . days after the date of notification . . . the school committee shall provide an evaluation of the . . . child . . . and shall write an educational plan for such child. Such evaluation shall be either a full core or intermediate evaluation in accordance with the following:

319.1 The Administrator of Special Education shall decide, based upon the recommendation of and the information provided by the person making the referral, whether a full core or an intermediate evaluation is required, subject to the following:

319.1 (a) An intermediate evaluation shall be required if, at the time of referral, the referred child is enrolled in a regular education program or is receiving special education in prototype 502.1 or 502.2 unless the parents request a full core evaluation . . . or school personnel recommend that a full core evaluation be conducted.

319.1 (b) A full core evaluation shall be required in any case in which a child is referred because of the suspected existence of a need for special education services which would require such child to be outside of the regular class for more than twenty-five percent of the time.

319.1 (c) A full core evaluation shall be required if the child's parents request it.

319.1 (d) A full core evaluation shall be required if the personnel who are administering the intermediate evaluation determine that a full core evaluation is necessary or desirable.

320.0 Evaluation: Full core: assessments. A full core evaluation shall consist of the following assessments adapted to the age of the school-age child being evaluated and performed by [qualified] personnel . . . .

320.1 An assessment of the child's educational status by an administrative representative of the school department . . .[including a review]. . . of the child's education . . . school progress and . . . current standing.

320.2 An assessment by a[n] approved teacher who recently had or currently has the child in a classroom or other teaching situation. Such assessment shall include:

320.2 (a) An analysis of the child's specific behavioral abilities . . . with a comparison of those abilities to the tasks which are contained in the regular education program.

320.2 (b) A statement of school readiness, functioning or achievement.

320.2 (c) A statement of the child's behavioral adjustment, attentional capacity, motor coordination, activity levels and patterns, communication skills, memory and social relations with groups, peers and adults.

320.3 A comprehensive health assessment, by a physician . . . .

320.3 (a) . . .[This] . . . may be waived if the parents arrange at their expense for the results of an equivalent assessment . . . to be presented to the school and if the person who conducted the equivalent assessment . . . agrees to attend the meetings of the CET.

320.4 An assessment by a psychologist, including . . .[a]. . . psychological examination, culminating in specific recommendations.

320.5 An assessment by a nurse, social worker or a guidance or adjustment counselor of pertinent family history and home situation factors including, with prior written parental consent, a home visit.

320.7 Each person completing [such] an assessment . . . shall summarize in writing, the procedures employed, the results and diagnostic impression, and shall define in detail . . . the child's needs offering explicit means of meeting them.

320.7(a) Such written summary shall recommend any prescriptive elements needed to meet the child's needs.

320.7 (b) Such written summary shall propose a date for review of the child's progress and state criteria by which, at that time, the effectiveness of the child's program may be determined.

320.8 Any assessment may be waived with the approval of the parent if an equivalent assessment . . . has been completed during the [prior] six months . . .

321.0 Evaluation: Educational Plan. The educational plan for each . . . child in need of special education services shall be written by the CET and the Administrator of Special Education in accordance with the following provisions:

EDUCATIONAL PLAN

321.1 Elements stated by the CET. After completion of all the assessments . . . and based on the results of those assessments, the CET shall meet to write the portion of the child's educational plan for which it is responsible. . . .

321.1(a) A specific statement of the child's performance level . . . .

321.1 (b) A specific statement of the measurable physical constraints on such performance . . .

321.1 (c) A specific statement describing the child's learning style.

321.1 (d) A specific statement of the educational objectives which the child can reasonably be expected to achieve during the following three months, six months, nine months, and where appropriate, twelve months.

321.2 Additional elements stated by the CET. For each of the objectives stated pursuant to paragraph 321.1 (d) the CET shall make the following statements as part of the child's educational plan:

321.2 (a) A statement of the types and amounts of services . . . which are necessary to enable the child to achieve the objectives, ...

321.2 (b) A statement of any parent-child instruction which is necessary to enable the child to achieve the objective . . .

321.2 (c) A statement, in accordance with . . . paragraph 507.0, of the types of materials and equipment necessary to enable the child to meet the objective . . . .

321.2 (d) A statement of the suggested methodology and teaching approach for meeting each objective.

321.2 (e) A statement of whether the particular services provided to the child should be provided in a classroom setting, in a small group, or on an individual basis.

321.2 (f) A statement recommending the daily duration of the child's program.

321.2 (g) A statement recommending the number of days per year on which the child's program should be provided.

321.2 (h) A statement of the child's transportation needs. . . .

321.3 Determination of need for special education services; choice of prototype and program. The Administrator . . . shall determine and state as part of the . . . plan, whether the objectives set by the CET require . . . special education services which are not available within the regular education program. The Administrator . . . shall state the reasons for the conclusion that the child does or does not require such services. If the child does require such services, the Administrator . . . shall complete the child's educational plan by stating the prototype through which the child's program is to be provided and the specific program within such prototype.

323.0 Meeting between parents, the Administrator of Special Education and CET liaison person after completion of the educational plan. Each school committee shall insure that the parents of each child for whom an educational plan has been written, shall have an opportunity, within fifteen days after it sends the written notice . . . to meet with the CET liaison person and the Administrator . . . to evaluate the adequacy of the plan.

324.0 Evaluation: Educational plan; notice to parents. No later than ten days after the CET and the Administrator . . . complete the evaluation and educational plan or make a finding of no need for special education services, the school committee shall send a written notice to the parents of such child . . . containing the following information:

324.1 A statement that the evaluation has been completed and that the parents have the right to meet with the CET liaison person and the Administrator . . . within fifteen days . . . to evaluate the adequacy of the educational plan . . . .

324.2 A copy of the educational plan or a statement that the child is without need of special education services.

324.3 A statement that all papers relevant to the evaluation . . . are available for inspection by the parents . . . .

324.4 A statement that, in the event an educational plan is rejected by the parents, there is a thirty-day required time period . . . to allow for efforts to resolve differences of opinion through informal discussion; and that during such period, the parents . . . shall have the right to meet with the Administrator . . .

324.5 A statement of the specific choices available to the parents . . .

324.6 A list of the names and locations of facilities which are approved for conducting independent evaluations and of the right of the parents to a choice of facilities . . . .

324.7 A statement detailing the entire appeal process and hearing procedure.

324.8 A form . . . for the parents to indicate their choice of options [shall]:

324.8(c) State that rejection of an educational plan or of a finding that the child is without need for special education services shall automatically constitute an appeal to the Division . . . .

324.8(d) State that such appeal can be withdrawn or need not be continued if an agreement can be made between the parents . . . and the school committee.

325.0 Evaluation: Educational plan; options available to the parents. No later than fifteen days after the end of the thirty-day time period provided for in paragraph 400.0, the parents of the school-age child who has been evaluated . . . shall exercise one of the following options:

325.1 To agree with the Administrator . . . and the CST upon a mutually acceptable plan during the thirty-day period . . .

325.2 To accept or reject the educational plan or the finding that the child is without need of special education services . . .

325.3 To postpone until the completion of an independent evaluation a decision on the educational plan or on the finding that the child is without need of special education services.

325.4 To reject the educational plan or the finding that the child is without need of special education services . . . .

326.0 Placement Pending Evaluation and Appeal. The following provisions shall apply to placement of school-age children pending evaluation and appeal:

PLACEMENT

326.1 Placement Pending Evaluation Between the time that a child is referred for an evaluation and the time the school committee receives the choice of options form . . . the school committee shall provide or arrange for the provision of a placement for such child. The nature of such placement shall be determined in accordance with the following:

326.1(a) A child who, at the time of referral, was in the regular education program shall remain . . . [there]. . . unless the school committee or the child's parents . . . submit a written statement to the Regional

Branch Office . . . showing that the child's remaining in such program endangers the health or safety of the child or substantially disrupts such program . . . . If such a showing is made, the Regional Branch Office shall approve an appropriate placement for the child.

326.1(b) A child who, at the time of referral, is in a special education program paid for by the school committee shall remain . . .[there]. . . unless the child's parents . . . wish the child to be in the regular education program in which case the child shall be placed in such regular education program; or unless the school committee submits a written statement to the Regional Branch Office. . . showing that the child's remaining in such special education program or being placed in the regular education program. . . endangers the health or safety of the child or substantially disrupts such program . . . . If such a showing is made, the Regional Branch Office shall approve an appropriate placement for the child.

326.1(c) A child who, at the time of referral, is not in either the regular education program, or a special education program paid for by the school committee shall be placed in an appropriate program as determined by agreement between the school committee and the child's parents . . . . When such agreement cannot be reached, the Regional Branch Office . . . shall select an appropriate program for the child.

326.2 Placement Pending Appeal or Postponement of Decision. If . . . a child's educational plan or a finding that the child is without need for special education services is rejected, or a decision . . . is postponed, the school committee shall provide or arrange for the . . . placement for such child during the ensuing appeal or postponement of decision.

326.2(a) A child who was placed, pending evaluation, in the regular education program shall remain . . .[there]. . . unless the school committee or the child's parents . . . submit a written statement to the Regional Branch Office . . . showing that the child's

remaining in such a program endangers the health or safety of the child or substantially disrupts such program. . . If such a showing is made, the Regional Branch Office shall approve an appropriate placement for the child.

326.2(c) A child who, pending evaluation, was not placed in either the regular education program or a special education program paid for by the school committee shall be placed in an appropriate program as determined by agreement between the school committee and the child's parents . . . . Where such agreement cannot be reached, the Regional Branch Office . . . shall select an appropriate placement for such child.

327.0 Evaluation: Independent evaluation. Where an independent evaluation of a school-age child is conducted pursuant to parental request . . . the following shall apply:

327.1 The parents . . . shall have the right to an independent evaluation which is equivalent to the content of the original evaluation.

327.2 The independent evaluation shall be completed no later than thirty school working days after the date on the form which the parents . . . return to the school committee . . . .

328.0 Evaluation: Independent evaluation, acceptance or rejection of original plan. No later than thirty days after the date on the statement of the results of the [independent] evaluation . . . the parents . . . shall accept or reject the educational plan resulting from the original evaluation by noting such acceptance or rejection on the form provided . . . .

329.0 Evaluation: Program provision or further appeal. Where the educational plan of a . . . child in need of special education services has been accepted by that child's parents . . . the child shall be placed immediately in the specified program.

330.0 Evaluation: Intermediate Evaluation. Where an intermediate evaluation is administered to a school age child . . . the following shall apply:

330.1 All of the requirements which apply to a full core evaluation shall apply to an intermediate evaluation except for the following:

330.1(a) A lesser number of assessments shall be required for the intermediate evaluation than the basic five assessments (paragraph 320.1-320.5) which comprise a full core evaluation.

330.1(b) The educational plan which is developed by the intermediate evaluation shall recommend placements only within the prototypes described in paragraphs 502.1 regular education program with modifications) and 502.2 (regular education program with no more than 25% time out) except for those placements described in paragraph 331.0.

330.1(c) The personnel involved in the intermediate evaluation shall refer the child for a full core evaluation . . . if they or the parents deem it necessary and desirable.

331.0 Evaluation: Intermediate evaluation: emergency evaluation and placement, placement upon new residence. An emergency placement can be made on the basis of an intermediate evaluation. Such placement can be made in the following cases:

331.1(a) The child shall be referred immediately by the Administrator . . . for an intermediate evaluation which shall be convened the same day and shall recommend no later than the following day, a temporary placement. . . not to exceed ten days.

331.1(b) The parents shall be informed immediately of the child's behavior and shall participate, if possible . . . in the placement decision. No such placement shall be made without the prior written consent of the child's parents unless an emergency situation exists, in the opinion of the Administrator . . . which would make prior consent impossible without resulting injury to the child or to others.

331.2 Where a school age child's family has moved, and such child was in a special education program in a former community of residence, the school committee with jurisdiction over the child's new residence shall place the child immediately in a comparable special education program upon agreement between the Administrators . . . of the new and former communities of residence and the child's parents.

332.0 Review of the child's progress: Ten-month and annual reviews. Each school committee shall provide for a review of the progress of each school-age child who has been placed in a special education program. Such review . . . shall be completed within ten months after the initial placement . . . and at least annually thereafter and shall be conducted according to the following: REVIEW

332.1(a) Whether the child has achieved the goals set forth in the educational plan.

332.1(b) Whether the child has met the criteria which indicate readiness to enter a less restrictive program. . . .

332.1(c) Whether the program the child is in should be specifically modified to render it more suitable to the child's needs.

332.2 A written summary of the review . . . shall be conveyed to the parents of the child within ten days after such review is completed.

333.0 Re-evaluation of the child. Each school committee shall provide, where necessary and . . . as recommended by the Administrator . . . and the CET after their review of the child's educational progress . . . for a re-evaluation of each child whose progress is reviewed pursuant to . . . paragraph 332.0. . . . (within the time intervals specified . . . in 332.0.)

334.0 New educational plan. The Administrator. . . and the CET which . . . reviews the progress of a . . . child who has been placed in a special education program shall write a new educational plan for such child. . . (within the time intervals specified . . . 332.0) . . . based

on the review of the child's progress and the re-evaluation of the child, and shall recommend that the program the child is in be:

334.1 Continued in a form substantially similar to its current form, with modifications to reflect the child's progress during the previous year.

334.2 Continued in a form which is substantially different from its current form.

334.3 Terminated . . . and that such child be placed in a new program. Where this recommendation is chosen, the person who would be primarily responsible for teaching the child in the new program and the primary person who would be assisting such teacher shall be added to the CET for purposes of writing the educational plan for the child.

336.0 New educational plan: Procedural requirements. Any new or modified educational plan . . . shall conform to all of the requirements for an original educational plan, and the rights of the parents with respect to such . . . plan shall be the same as those which apply to an original educational plan.

337.0 Ongoing review and re-evaluation: Ongoing modifications of educational plan. In addition to the requirements of paragraphs 332.0 through 336.0, each school committee shall provide for each child within its jurisdiction who is in a special education program, an ongoing review of such child's educational progress, an ongoing re-evaluation of such child where necessary, and, where necessary, ongoing modifications of the educational plan for such child.

338.0 Provision for transition where child approaches twenty-two years of age. Where a . . . child in need of special education services approaches high school graduation, or the age of twenty-two years, or as circumstances may require . . . the CET and the Administrator . . . shall recommend and the school committee shall provide . . . a transition for such child

into the care of an appropriate, available and capable agency . . . .

339.0 Applicability of this chapter to vocational technical schools.

339.1 Children attending vocational technical schools.

[T]he requirements of this chapter shall apply to school-age children who are enrolled in a vocational technical school, and the school committee for such school shall be responsible for fulfilling those requirements. . . .

339.2 Children who are not already attending, but are to be placed in vocational technical schools. Whenever . . .[a]. . . child in need of special education services is to be placed . . . at a vocational technical school which such child is not already attending, that school shall provide the members of the CET described in paragraphs 311.8 and 311.9 to assist in writing the educational plan.

339.3 Long range program planning for Children. The school committee of each regional vocational school district shall provide assistance to the school committees within its region in long range program planning for . . . children in need of special education services who . . .[may]. . . require vocational education services later in their school careers.

CHAPTER 4 -- APPEAL PROCEDURES

" 400.0 Efforts to reach a settlement through informal discussion. . . .[T]o encourage informal resolution of differences of opinion over educatioal plans, there shall be a thirty-day time period for informal discussion. During this period each school committee shall insure that the parents . . . shall have the opportunity to meet with the chairperson, . . . or the CET. . . to try to resolve such differences . . .

APPEAL

401.0 Appeal to the Bureau: Hearing process; notice to parents and child. No later than five days after receipt of a notice indicating that an educational plan or a finding of no need for special education services has been rejected, a school committee shall send a copy of such notice to the Bureau of Special Education Appeals . . . and to the Regional representative of such Bureau. No later than five days after receipt of such notice, the Bureau shall send a notice to the parents . . . and a copy to the school committee. Such notice shall contain the following

HEARING

401.1 A statement indicating the right to a hearing . . . with instructions for requesting a hearing. . . . . Such form shall contain a conspicuous warning that failure to request a hearing during the required time period shall constitute a waiver . . . .

401.2 A statement indicating the place of the hearing, if requested....

401.3 A statement indicating that the Bureau will give written notice of the date of the hearing when such date is determined.

402.0 Appeal to the Bureau: Return of notice; scheduling of hearings. No later than fifteen days after the date on the notice sent by the Bureau pursuant to paragraph 401.0, a parent . . . desiring a hearing shall

so indicate on the form provided . . . and return such form to the Bureau. No later than five days after receipt of such form the Bureau shall:

402.1 Schedule a hearing date on its hearing calendar . . . .

402.1(a) Hearings shall be scheduled in the order in which requests are received unless, in the opinion of the Division . . . the needs of the child on whose behalf the hearing is requested, are such that the health or safety of such child, or of other children, would be endangered by a delay. Upon such a showing, the Bureau shall expedite the appeal of such a child.

402.2 Send the written notice . . . indicating the date of the hearing; provided, however, that should the hearing calendar be full . . . the Bureau may designate an impartial hearing officer to conduct the hearing. Such designated hearing officer shall comply with all of the provisions of this Chapter.

402.3 Where a hearing is not requested, the hearing officer shall direct that all relevant documents and materials be forwarded by the Administrator . . . and a decision shall be rendered based on such documents and materials, as well as the result of any independent evaluation.

402.4 Hearings shall be held in the region of the Department of Education where the child resides.

403.0 Appeal to the Bureau: Hearings; rights of parents and child; notice to parents and child. The Bureau shall hold a hearing no later than sixty days after receipt of the request for a hearing . . . .

403.1 The parents . . . shall have the right to be represented by a person[s] of their choosing . . . .

403.2 The parents . . . shall have the right . . . to examine all school records pertaining to the school-age child, including the written record and clinical history of the evaluation provided by the CET and of any independent evaluation, and any other school records and papers upon which the proposed action may be based.

403.3 The hearing shall not be open to the public.

403.4 The parents . . . shall have the right to reject the decision of the hearing officer and to request placement of their school-age child in the regular education program. If such placement is requested, the school committee shall provide the school-age child with the educational placement chosen by the parents, unless such school committee can make a showing in the Superior Court . . . that such placement would seriously endanger the health and safety of such child or substantially disrupt the program for other children. Upon such a showing, such court shall be authorized to place such child in an appropriate educational placement.

403.5 The parents . . . shall have the right to reject the decision of the hearing officer and to appeal to the SAC where the parents . . . desire that the child be placed in a special education program, or in a special education program different from that recommended by the Bureau.

403.5(a) Pending the decision of the SAC the school-age child shall be placed in a program in accordance with the provisions of paragraph 326.0.

404.0 Decision of the Bureau. The hearing officer shall render a decision no later than thirty days after the completion of the hearing . . . or, if no hearing was requested, after the expiration of the fifteen-day appeal period . . . . Such decision . . . shall contain a specification of one of the following placements:

404.1 The placement recommended by the Administrator of Special Education.

404.2 The placement requested by the parents.

404.3 An alternative placement to that recommended by the Administrator . . . or the parents. In the case

of a decision which specifies this placement, the Administrator . . . and CET which completed the school evaluation shall write an educational plan incorporating the decision of the hearing officer.

405.0 Decision of the Bureau: Notice to parties. The decision of the hearing officer shall be in writing and shall be sent, not later than three days after it is rendered, to the parents and to their respresentative, if any . . . .

APPEAL

406.0 Appeal to the SAC. No later than fifteen days after the date of the notice sent to the parents . . . shall exercise one of the following options:

406.1 To accept the educational plan recommended by the Bureau by indicating their acceptance on the form provided . . . .

406.2 To reject the educational plan recommended by the Bureau and to have their . . . child placed in the regular education program . . . by indicating such rejection and choice of the regular education program on the form provided . . .

406.3 To reject the educational plan by indicating their rejection on the form provided . . . . Rejection. . . shall automatically constitute an appeal to the SAC . . . unless the . . . child is to be placed in the regular education program .

407.0 Appeal to SAC: Decision No later than thirty days after the next meeting of the SAC following receipt of the form sent by the parents . . . the SAC shall render a decision which does one of the following:

407.1 Orders the placement recommended by the Bureau.

407.2 Orders the placement recommended by the Administrator . . . and CET where it is different from that recommended by the Bureau.

407.3 Orders the placement recommended by the parents . . . .

408.0 Procedure following the decision of the SAC: Notice to parties. . . . [The decision of the SAC] shall

be in writing and shall be sent no later than three days after it is rendered, to the parents and to their representative, . . . to the Bureau, and to the school committee and its legal representative, if any.

408.1 That the parents can consent to the decision of the SAC, or appeal to the Superior Court.

408.2 That there is a time period within which such an appeal must be entered.[30 days].

408.3 That pending an appeal . . . the child will be placed according to the provisions of paragraph 326.0, pending further order of the Court.

409.0 Appeal to Superior Court. The parents . . . may appeal the decision of the SAC to the Superior Court with jurisdiction over the residence of such child . . . . The Superior Court shall be authorized to order the placement of the child in an appropriate educational program.

410.0 Placement of a child where a placement is agreed upon or ordered. Whenever a placement is agreed upon, ordered or otherwise required . . . such placement shall be made forthwith, without any unnecessary delay.

PLACEMENT

CHAPTER 5 -- PROGRAMS

501.0 Special education which each school committee is required to provide: Plan. Each school committee shall provide . . . each of the elements of the educational plan . . . in accordance with the applicable provisions of these regulations.

501.1 Each school committee shall take all steps necessary to insure compliance with all elements of the educational plans of school-age children in need of special education services.

501.2 Each school committee shall submit, for approval, to the appropriate Regional Branch Office . . . no later than May 1 of each . . . calendar year, a plan

describing the specific manner in which that school committee will provide special education during the . . . . [upcoming]. . . calendar year . . . . The Division . . . shall communicate to the school committee its approval or rejection of the plan. The school committee shall implement such plan after it has been approved. In such plan the school committee shall state:

501.2(a) The projected number of school age children in need of special education services to be served through each of the program prototypes . . . .

501.2(b) The special education programs and services available within the jurisdiction of the school commit ee.

501.2(c) The number and types of personnel assigned to special education programs and a plan for training regular classroom teachers when such training is recommended pursuant to paragraph 321.5(g).

501.2(d) The methods the school committee will use to evaluate special education programs during the next school year, in accordance with paragraph 506.1.

501.2(e) The specific manner in which the school committee will provide transportation for . . . children in need of special education services, in accordance with paragraph 901.4.

502.0 Program prototypes. This paragraph contains a list and description of the program prototypes.

502.1 Regular education program with modifications Each school committee shall provide a program within this prototype to each . . . child in need of special education services for whom an educational plan specifies such a program. Programs within this prototype shall have the following characteristics:

502.1(a) The child shall be assigned to a regular education program.

502.1(a)(i) Such child shall be eligible, on the same basis as such other children, for the auxiliary and supportive services provided as part of the regular education program . . . .

502.1(b) The special education component of the child's program shall consist of one or more of the following:

502.1(b)(i) Modification of the child's regular education program as specified by the CET . . . . made by the teacher who normally conducts the child's regular education program.

502.1(b)(ii) Any of the services listed in paragraph 503.1 which are specified by the CET to be provided directly to the child. Such services shall be provided within the classrooms in which the child's regular education program is being conducted.

502.1(c) The daily duration of the child's program shall be equal to that of the regular school day unless the Administrator . . . states that a shorter or longer duration is in the child's best interests. . . .

502.1(d) For each child placed in this prototype, the school committee shall make available . . . the personnel specified by the Administrator . . . .

502.1(e) Each school committee shall provide all aspects of programs within this prototype within public school regular education facilities.

502.2 Regulation education program with no more than 25% time out. All of the provisions of paragraph 502.1 shall apply to programs within this prototype; provided, however, that such programs shall have the following additional or different characteristics:

502.2(a) The child shall be removed from the regular education progam and classroom to receive any of the services listed in paragraph 503.1 which the CET specifies should be provided to the child . . . provided, however, that the child shall not be removed from the . . . classroom for more than 25% of the class time of each school day.

502.2(b) When children are removed . . . for [these] services . . . the number of children in any one instruction group shall not exceed the following limits and shall be less if the CET so recommends and the school committee approves such recommendation.

502.2(b)(i) Eight children for each teacher or other qualified professional.

502.2(b)(ii) Twelve children for each teacher or other qualified professional where . . . assisted by one aide.

502.2(b)(iii) Sixteen children for each teacher or other qualified professional where . . . assisted by two aides.

502.2(c) Each school committee shall provide all aspects of programs within this prototype in public school regular education facilities; provided, however, that a child in this prototype may be provided work study placement, occupational tryouts and job site visits outside of a public school.

502.3 Regular education program with no more than 60% time out. All the provisions of paragraph 502.2 shall apply to programs within this prototype provided, however, that the child may be removed from the regular education program and classroom, to receive services . . . for no more than 60% of the class time of each school day.

502.4 Substantially separate program. Each school committee shall provide a program within this prototype to each . . . child in need of special education services for whom the educational plan specifies such a program. Programs within this prototype shall have the following characteristics:

502.4(a) The child shall be assigned to a special class or classes made up entirely of . . . children in need of special education services.

502.4(a)(i) While . . . in the special class the child's program . . . shall be that specified by the educational plan.

502.4(a)(ii) In each special class the number of children for each teacher shall not exceed eight and, for each teacher with an aide, shall not exceed twelve. [This]. . . shall be less if the CET so recommends and the school committee approves such recommendation.

502.4(a)(iii) The ages of the youngest and oldest child in each special class shall not differ by more than thirty-six months, unless particular circumstances make it desirable to have a wider range of ages in one class, in which case a written request for approval of such wider age range shall be made to the Division . . .

502.4(a)(iv) The grouping of children in each special class shall be such that the methods and goals in the educational plan for each child shall not be incompatible with those for all of the other children in the class.

502.4(b) The child shall leave the special class to receive services and to participate in activities specified by the Administrator . . .

502.4(c) The daily duration of the child's program shall be equal to that of the regular school day, unless the Administrator . . . states that a shorter or longer duration is in the child's best interests. . . .

502.4(d) For each child placed in this prototype, the school committee shall make available . . . the personnel specified by the Administrator . . . .

502.4(e) Each school committee shall provide all aspects of programs within this prototype within public school regular education facilities.

502.5 Day school program. Each school committee shall . . . arrange for the provision of programs within this prototype to each . . . child in need of special education services for whom an educational plan specifies

such a program. Programs within this prototype shall have the following characteristics:

502.5(a) The child shall be placed in a program at a facility other than a public school regular education facility.

502.5(a)(i) The child's program shall be that specified by the educational plan.

502.5(a)(ii) The child's program shall be conducted for the number of days in the public school year, unless the Administrator . . . states that a program with a longer or shorter duration is in the child's best interests.

502.5(a)(iii) The child's program shall have a duration of at least five hours each day unless the Administrator . . . states that a shorter or longer duration is in the child's best interests.

502.5(a)(iv) The child shall return home each night.

502.5(a)(v) The site of the program shall be within on hour traveling time, one-way, from the child's home; provided, however, that where a school committee believes that a longer traveling time may be necessary it shall make a written request for approval of such longer time to the Division . . . .

502.5(b) For each child placed in this prototype the school committee shall make available . . . the personnel recommended for the child by the Administrator. . . .

502.6 Residential school program. Each school committee shall . . . arrange for the provision of a program within this prototype to each . . . child in need of special education services for whom an educatioal plan specifies such a program. Programs within this prototype shall have the following characteristics:

502.6(a) The child shall be placed in a program at a facility other than a public school regular education facility and shall live in such facility.

502.6(a)(i) The child's twenty-four hour program shall be that specified by the educational plan.

502.6(a)(ii) The child's program shall have a duration of the number of days in the public school year, unless the Administrator . . . states that a program with a longer or shorter duration is in the child's best interests.

502.6(b) For each child placed in this prototype the school committee shall make available . . . to implement the child's plan, the personnel specified by the Administrator . . . .

502.7 Home or hospital program. There are two distinct types of programs within this prototype: Type A and Type B. For both types, the . . . child's physician rather than an educational plan specifies the home or hospital program. In a Type A program the entire program is provided without CET involvement. In a Type B program, the CET performs an evaluation and the CET and Administrator . . . develop an educational plan.

502.7(a) Type A programs. Each school committee shall provide a Type A home or hospital program to each . . . child who, in the judgment of the child's physician, will have to remain at home or in a hospital on a day or overnight basis, or any combination of both, for a period of not less than fourteen or more than sixty school days during any school year, in order not to endanger the health or safety of such child or that of others. The school committee shall provide such physician with information presenting the programs which the school system could make available as alternatives to the home or hospital program.

502.7(b) Type B programs: Children who qualify for such programs. Each school committee shall provide a Type B program for each school age child who falls into

one or more of the following categories:

502.7(b)(i) A child who would qualify for a Type A program except that the child's physician has referred the child for an evaluation.

502.7(b)(ii) A child who, in the judgment of the child's physician, will have to remain at home or in a hospital for more than sixty school days . . . in order not to endanger the health or safety of such child or that of others. The Administrator . . . shall refer such child for an evaluation.

502.7(b)(iii) A child who has been in a Type A program for fifty school days and who, in the judgment of the child's physician, will be required to remain . . . for more than sixty school days. The Administrator . . . shall refer all such children for an evaluation. Such Administrator shall be responsible for advising the physician that such fifty-day period is about to expire.

502.7(c) Type B programs: Characteristics. Type B programs shall have the same characteristics as Type A programs; provided, however, that the content of the child's program and the personnel used to provide it shall be those specified by the educational plan.

502.7(d) Notification application to both Type A and Type B home or hospital programs. No school committee shall provide a home or hospital program to a school-age child without prior written notification to the Division . . . of both the . . . program to be provided and the exclusion of the child from a public school facility.

502.8 Parent-child instruction. Each school committee shall . . . arrange for the provision of a program within this prototype for each parent for whom a CHT recommends such a program. Programs within this prototype shall have the following characteristics:

502.8(a) They shall be supplemental to other programs . . . and shall not be the exclusive means of providing [required] special education . . .

502.8(b) They shall consist of training and support provided to parents to enable them to participate in educating or treating their child in need of special education services. Such training and support shall be that recommended by the CET.

502.8(c) No parent shall be required to participate . . . .

501.8(d) For those parents to whom training or support or both are to be provided . . . the school committee shall make available to provide such training and support the personnel specified by the Administrator. . .

502.9 Diagnostic program. Each school committee shall provide a program within this prototype to each school-age child in need of special education services for whom a CET recommends such a program

502.9(a) A CET shall recommend such a program for a child only when . . .[its]. . . assessments . . . of the child are so inconclusive that the CET is unable to set objectives for the child to achieve and is consequently unable to write an educational plan for the child.

502.9(b) Whenever a CET recommends a diagnostic program for a child it shall:

502.9(b)(i) Prepare a list of specific questions about the child which the personnel conducting the program shall attempt to answer.

502.9(b)(ii) Recommend diagnostic procedures for answering those questions.

502.9(b)(iii) Specify the types and amounts of services needed to conduct the program . . . based on the nature of the questions to be answered.

502.9(c) For each child placed within this prototype the school committee shall make available to implement that child's program the personnel specified by the Administrator . . . on the basis of the recommendations of the CET.

502.9(d)(iii) No child shall remain in a diagnostic program for more than eight weeks.

502.9(d)(iv) Five days before the end of the child's diagnostic program, the CET shall reconvene to write an educational plan for the child based on the findings made during the program. The personnel who conducted the child's program shall be added to the CET which writes the child's educational plan

502.9(e) A diagnostic program shall always be provided within a public school regular education facility unless the child being placed in such program has already been determined by the Administrator . . . to qualify for a placement in either prototype 502.5 . . . or prototype 502.6 . . . under the standards contained in paragraph 321.3, and the Division . . . has given prior written approval for placing the child outside a public school regular education facility.

502.10(b) Each school committee shall . . . arrange for the provision of the parent and child counseling services . . .(503.1(h) (i) when recommended by a CET to each parent of a . . . child in need of special education services, regardless of the prototype in which that parent's child is placed.

502.11 <u>Programs for school-age children in need of special education services who are ages sixteen through twenty-one</u>.

502.11(a). . . [C]hildren in need of special education services who are of ages sixteen through twenty-one, shall, subject to . . . paragraph 206.0, be eligible for programs within each of the program prototypes on the same basis as are other school-age children in need of special education services.

504.0 <u>Providing day school or residential programs</u>. Each school committee shall . . . arrange for the provision of all day school . . . and residential school . . programs in compliance with the following procedures and requirements:

504.1 <u>Placement within city, town or school district preferred</u>. Each . . . child in need of special education

services who requires a day school or residential school program shall be placed in a program within the city, town, or school district in which such child resides . . . .

504.2 Procedure for placements within city, town or school district. The following procedure shall be used for placing . . . [such] . . . children . . . in day school . . . or residential school . . . programs within the city, town or school district in which the child resides:

504.2(a) The Administrator . . . shall, with the assistance of the school committee and in consultation with the child's parents . . . determine whether there is available within the city, town or school district in which the child resides a program which complies with all elements of the child's educational plan.

504.2 (a)(i) If the Administrator . . . finds one or more programs which comply . . . he/she shall list them in order of preference based on which will be most beneficial to the child . . .[and] send such list together with all the information he/she has concerning the schools on such list and a copy of the child's educational plan to the appropriate Regional Branch Office . . . .

504.2(b) No school committee shall place a child in a day school or residential school program without the prior written approval of the Division . . .

505.0 Parent involvement. Each public or private school, agency or institution which provides special education for . . . children . . . shall make every effort to elicit the interest and encourage the participation of the parents of such children to the greatest degree possible in the special education programs or their children. Such efforts shall include compliance with the following requirements.:

PARENTAL INVOLVEMENT

505.1 Offering parents consultation regarding the development and future opportunities of their children.

505.2 Providing parents an opportunity to meet, at least quarterly, with the teaching staff involved in implementing their child's educational plan . . . .

505.3 Insuring that the person who is responsible for reporting . . . the child's progress to the CET or the school committee shall also make a written report . . . to the child's parents at least quarterly. Such report shall:

505.3(a) State the goals set by the CET for the child and the time set for the child to achieve those goals.

505.3(b) Specifically describe in behavioral terms the progress the child has made toward achieving such goals.

504.4 Insuring that any parent who is not satisfied with the progress of his/her child or with the child's program, shall have the right to meet with the person in charge of the school or institution . . . and the Administrator . . . for the school committee within whose jurisdiction such child resides, no later than five school days after requesting such a meeting.

506.0 Program evaluation.

506.1 Each school committee shall establish a system of evaluating the special education programs it provides . . . . Such system shall include a method for determining which programs are successful and which are unsuccessful in . . . achiev[ing] the goals set . . . . Any facility outside the jurisdiction of a shcool committee, with which that school committee contracts . . . shall be consulted in connection with the establishment of criteria for its evaluation, and shall be furnished a written copy of such criteria. The success of each program . . . shall be evaluated at least once each year.

EVALUATION

506.1(a) Each school committee shall submit to the . . . Division . . . a detailed description of the methods it will use to evaluate special education programs during the next school year.

506.2 Whenever more than ten percent of the . . . children . . . assigned to a particular program do not achieve those portions of their educational goals for which that program is responsible, the school committee shall take all necessary steps to ascertain whether the necessary correction may lie in the prescription or the program. If the latter, it shall improve the program so that the . . . children . . . achieve the goals set for them or abolish the program and replace it with a better one.

506.3 Each CET, whenever it reviews the progress of a . . . child shall retain and make available to the . . . Division a written record on each such child. Such record shall include the following items:

506.3(a) A statement of the goals set in the child's educational plan the preceding year and the program component responsible for helping the child to achieve each such goal.

506.3(b) A statement of whether the child achieved or did not achieve each such goal.

507.0 Materials and equipment. Each school committee shall provide . . . all materials and equipment which the CET states are necessary to implement the educational plan of each . . . child . . . . [M]aterials and equipment shall include items required . . . for the child to participate in the educational program and . . .[not]. . . items such as . . . leg braces which the child uses outside of the educational program.

507.1 . . .[They]. . . shall be of good quality and . . . suitable for the role they are to play in each child's educational plan.

508.0 Facilities for children in need of special education services. Each school committee shall comply with the following provisions . . .

508.1 Programs for . . . children in need of special education services shall be provided in rooms which are at least equal in all physical respects to the average standards of the rest of the public school in which those programs are provided.

508.2 The facilities in which programs for . . . children in need of special education services are provided shall be such as to maximize the integration of such children into the life of the school and to minimize the separation and stigmatization of such children. . . . [For example]:

508.2(a) Placing a . . . class of fourteen and fifteen-year-old . . . children in need of special education services in a part of the school building in which all the other classrooms are occupied by elementary school children would violate the rule of paragraph 508.2.

508.2(b) Placing a sign saying 'special class' on the door . . . would violate the rule of paragraph 508.2.

508.2(c) Placing all special education facilities together in one part of a school building would violate the rule of paragraph 508.2.

508.3 Children with limited mobility shall have access, free from barriers to their mobility, to those areas of school buildings . . . necessary for the carrying out of the educational plans of such children. . . .

508.3(b) Each school committee shall provide whatever equipment and make whatever physical adaptations in its public school facilities are necessary to comply with the provisions of paragraph 508.3.

508.4 Each Regional Branch Office . . . and each RAC shall make unannounced inspections of facilities . . . to insure that such facilities comply with the[se] requirements . . . .

CHAPTER 6 - SERVICES FOR CHILDREN OF AGES THREE AND FOUR

600.0 Identification of children with substantial disabilities. Each school committee shall comply with the following requirements for children of ages three and four with substantial disabilities:

600.1 It shall enter such children to the register . . . (300.0).

600.2 It shall file the information about such children . . . (301.0).

600.3 It shall make all reasonable efforts to identify such children and shall describe such efforts

in the plan . . .(303.0) to identify such children.

600.4 It shall make the efforts described in paragraph 304.0 to identify such children.

600.5 It shall conduct a screening program . . . comparable in content to the kindergarten entry screening program . . . provided, however, that screening of such children of ages three and four shall be optional on the part of the parents . . . and shall be designed for those children with a reasonable likelihood of having substantial disabilities . . . . [I]f the child is referred for an evaluation, the time limits specified in paragraph 317.0 for referral and evaluation shall be applicable.

601.0 Referral for evaluation of children with substantial disabilities. The provisions of paragraphs 316.0 through 318.0 . . . shall apply to children of ages three and four.

602.0 Evaluation of children of ages three and four. Evaluation of children of ages three and four shall be conducted by a CET composed of the persons doing the interview and assessments . . . and shall consist of a combination of procedures that are of sufficient diagnostic sensitivity to make a determination of substantial disability in one or more areas. Such evaluation shall consist of the following elements:

602.1 A parent interview . . . with special consideration of a home visit, with parental consent . . . . Such interview shall result in the completion of a standardized developmental history and shall include discussion of:

602.1(a) Information on the developmental and medical history of the child.

602.1(b) Information concerning the child's relationships and behavior with siblings, peers and significant adults.

602.1(c) Parental concerns and expectations relating to the child and a current description of the child.

602.1 (d) The evaluative procedure to be undertaken . . . .

602.1(e) This interview shall be conducted only by . . . persons with experience or training, or both, in working with three and four year olds and their parents. . . .

602.2 Assessments, appropriate to the age and development of the child, in the following areas provided by trained and qualified specialists with experience or training, or both, in working with three and four year olds, including a physician who specializes in early childhood disabilities:

602.2(a) Auditory functioning . . .

602.2(b) Visual functioning . . . .

602.2(c) Physical development . . . .

602.2(d) Emotional and social functioning . . . .

602.2(e) General intellectual functioning . . . .

602.2(f) Language and speech . . .

602.2(g) Observation of the child in a group situation . . . .

602.2(h) Assessments by any additional specialists who may be added . . . .

602.3 A final narrative report detailing all observations, assessment results and behavior descriptions . . . including a statement of the reasons why the child is or is not considered to have a substantial disability.

602.4 A conference with parents to take place at a point late in the process and designed primarily to discuss, explain and convey the results of the evaluation.

603.0 Post-evaluation procedures for children of ages three and four. The provisions of paragraph 321.0 are hereby incorporated . . . .

604.0 Evaluation: Educational plan; parent involvement. For each child of age three or four who is determined . . . to have a substantial disability, the members of the CET who conducted the interviews and assessments and the persons described in paragraphs 311.5 through 311.10 shall meet together to write their part of the educational plan for the child . . . [E]very

effort shall be made by the . . . CET to encourage in the child's parents . . . that they are competent to participate fully in the decisions that affect their child and to assume their responsibility in the educational process.

605.0 Evaluation: Educational plan; requirements The Administrator . . . and the CET shall write those parts of the educational plan which they are required to write . . . (321.0 and 322.0.)

606.0 Post-educational plan procedures for children of ages three and four. The provisions of paragraphs 323.0, 324.0 and 325.0- 327.0 through 329.0; and 332.0 through 337.0, and of Chapter 4, all adapted to reflect the fact that children of ages three and four are not in public school, are hereby incorporated into this chapter and shall apply to children of ages three and four.

607.0 Placement of children of ages three and four pending appeals. All parties involved in an appeal from a finding of no substantial disability or from an educational plan which has been rejected shall cooperate, with the assistance of the Division . . . to place the child in a program which is as appropriate as possible, pending a final resolution of the appeal.

608.0 Provision of programs; Program prototypes. Each school committee shall provide . . . each of the elements in the educational plans of children of ages three and four who have substantial disabilities. In implementing such . . . plans, each school committee shall provide . . . each of the following prototypes when such prototypes are recommended by an educational plan.

608.1 Home programs, which shall include the following characteristics:

608.1(a) Scheduled weekly home visits arranged with the family.

608.1(b) Instruction for parents including materials, demonstrations and discussion groups.

608.1(c) Provision of developmental toys and materials for the child.

608.1(d) Regularly scheduled group sessions for parents . . . .

608.1(e) The program shall be coordinated with other services which are being provided to the child.

608.2 Group day programs, which shall include the following programs:

608.2(a) Integrated programs . . . designed to serve the general child population and which include one or more children with substantial disabilities.

608.2(b) Specialized programs:

608.2(b)(i) Which serve only children with substantial disabilities and may have children in the same program who have different types of needs . . . .

608.2(b)(ii) In which a child leaves home for individual instruction . . . .

608.3 Family day care, ... Family day care shall have the following characteristics:

608.3(a) The total number of children in a . . . program shall not exceed six, including participating children living in the residence.

608.3(b) Family day care programs may care for a [wide] range of children . . . .

608.4 Residential programs which shall include nursing homes licensed for pediatric care . . .[and other approved] . . . residential facilities . . . . Residential placements shall be limited to [severely disabled] children . . . .

610.0 Program standards. The following minimum program standards shall be maintained for all approved programs for children of ages three and four with substantial disabilities, except for those within the home program prototype described in paragraph 608.1:

610.1 The program shall provide for parental participation . . .

610.1(a) Parents shall be provided complete information on the availability of programs and services.

610.1(b) Parents shall be provided opportunities for consultation with and guidance by school personnel on available programs and services.

610.1(c) Parents shall be provided complete information on the availability of opportunities for parent training and education.

610.1(d) The child's family shall be recognized as critical to the effective implementation of the educational plan . . . . [involving]:

610.1(d)(i) home visits, with parental consent;

610.1(d)(ii) regularly scheduled conferences;

610.1(d)(iii) participation in program activities.

610.1(e) Program staff and school department personnel shall assist parents in locating and arranging for needed supportive services . . . .

610.2 The program staff shall meet the minimum professional standards . . . .

610.3 A written plan shall be provided and implemented for staff training and development.

610.4 The ratio of children to staff shall be based on the needs of the children in the program; . . . [but] . . . shall not exceed a ratio of six children with substantial disabilities to one teacher.

610.5 Staff shall demonstrate competency in working with children of ages three and four with substantial disabilities in the following ways:

610.5(a) Documentation of quality of past performance.

610.5(b) Observation of present work by qualified persons selected by the CET and the Administrator . . . .

610.6 A written statement shall describe the philosophy of education underlying the program and how it is expressed through the program.

610.7 In writing and in observable content, the program shall demonstrate an understanding of the developmental sequences of growth as the base upon which

curriculum is modified and adapted to respond to the strengths and needs of each child.

610.8 In writing and in observable content, the program shall demonstrate the methods and techniques employed in modifying and adapting the curriculum.

610.9 The program shall provide a written plan expressing:

610.9(a) Methods for preliminary and ongoing evaluation of whether the program is meeting the child's needs.

610.9(b) A system for observing and recording behavior of children.

610.9(c) Long term goals and short term objectives for each child, specifying strategies for achieving . . . [them]. . . and criteria for evaluating the achievement of objectives by the child

610.10 The program shall provide equally for emotional, social, physical and cognitive growth and development.

610.11 Full time day or residential programs shall provide curriculum which includes the following areas: listening, speech and language; activities for developing gross and fine motor skills; creative expression; opportunities for socialization; family and community living; self-help skills.

610.12 In the case of contracted services the teacher . . . shall maintain a close professional association with the CET consisting, at a minimum, of quarterly written reports on the child's progress and regular meetings to discuss such progress.

610.13 In all cases the program shall maintain a close professional association with necessary support services.

610.14 The program shall maintain an active involvement with community resources.

610.15 For individual children, the selected program shall be that with the greatest potential for implementing the educational plan.

611.0 Procedures for placing children of ages three and four in programs. Whenever children of ages three and four who have substantial disabilities are to be placed in a residential program . . . the requirements and procedures of paragraphs 504.1, 504.2, and 504.3, (except paragraphs 504.2(b)(i), 504.2(b)(v), and 504.3(b)(v)), shall apply to such placements. . . . Such procedures and requirements shall not apply to placement of children of ages three and four who have substantial disabilities in programs within any other prototypes.

CHAPTER 7 - EDUCATION OF CHILDREN IN INSTITUTIONS UNDER THE CONTROL OF THE DEPARTMENTS OF MENTAL HEALTH, PUBLIC HEALTH AND YOUTH SERVICES.

700.0 Admission of a school age child in need of special education services to an institution under the control of the Department of Mental Health, Public Health or Youth Services. The following provisions shall govern: . . . .

700.1 A . . . child in need of special education services may be admitted to a day or residential program in a state school under the control of the Department of Mental Health if:

700.1(a) An educational plan has recommended . . . [it]. . . for such child; and

700.1(b) The procedures and requirements of paragraph 504.1 through 504.3 have been met; and

700.1(c) The superintendent of the state school has approved the admission.

700.2 . . . . [Such a child] may be admitted to a day or residential program in a state hospital under the control of the Department of Mental Health or to a state hospital or hospital school under the control of the Department of Public Health if:

700.2(a) A Type A or Type B hospital program has been recommended for such child by a physician as provided for in paragraph 502.7; and

700.2(b) The superintendent of the state hospital or hospital school has approved the admission.

700.3 A school-age child in need of special education services may be admitted to a day or residential program in an institution under the control of the Department of Youth Services if such Department approves the admission.

701.0 Provision of special education by the Division, through its Bureau of Institutional Schools, to school-age children in institutions under the control of the Departments of Mental Health, Public Health and Youth Services.

The Division, through its Bureau of Institutional Schools, shall provide . . . special education to . . . children in need of special education services in day and residential programs in institutions under the control of the Departments of Mental Health, Public Health and Youth Services. The duties of the Bureau . . . in providing such special education shall include:

701.1 Administering all federal and state funds allocated . . .

701.2 [Determination of]. . . . the method, from the options described in paragraph 701.5, . . . shall be made in consultation with the CET, and the Administrator of Special Education, the Assistant Superintendent for Children's Services . . . or with the supervisor from the education department . . . .

701.3 Establishing a monitoring and evaluating system for each method of providing special education.

701.4 Providing technical assistance to school committees and collaboratives in maximizing the utilization of state and federal funds . . . .

701.5 Providing . . . those educational services as defined in paragraph 701.1, recommended by CET's for all [such] school-age children in need of special education services . . . .

701.6 Monitoring the overall efficiency and quality of the educational component of the . . . programs . . . .

701.7 Insuring that the special education staff assigned to [such] institutions . . . meet the requirements for certification and approval of the Board of Education.

701.8 Insuring that the intent and purpose of this chapter, of these regulations and of the law governing the provision of special education to [such] school-age children . . . is fully carried out in [these] institutions. . . .

702.0 Supervisory persons and Assistant Superintendents for Children's Services. In each institution under the control of the Departments of Mental Health, Public Health, and Youth Services with less than sixty school-age children in a residential program, the staff providing education services . . . shall constitute the education department for such institution. The Commissioner of Education and the Superintendent of the institution shall jointly appoint a supervisory person from among the staff . . . and shall have the authority to evaluate and, if necessary, to dismiss such person. In each institution under the control of the[se] Departments . . . with sixty or more school-age children in a residential program, the Commissioner . . . and the Superintendent . . . shall jointly appoint a director of educational services . . . who shall have the title of Assistant Superintendent for Children's Services, and shall have the authority to evaluate and, if necessary, to dismiss such Assistant Superintendent. Such supervisory persons and Assistant Superintendents shall report directly to the Superintendent of the institution.

703.0 Duties of the supervisory persons and the Assistant Superintendents for Children's Services.

703.1 The Assistant Superintendents . . . in state schools under the control of the Department of Mental Health shall:

703.1(a) Supervise and monitor the provision of all services that are provided by the children's units in such schools, and shall direct the special education staff and the staff of the Department of Mental Health employed in those units.

703.1(b) Provide in-service training to members . . . who are employed in the children's units

and in any other units where school-age children may be residing.

703.1(c) Provide, for each school-age child not residing in a children's unit, jointly with the unit director of the unit in which the child is residing, a program which satisfies the requirements of the child's educational plan.

703.2 The Assistant Superintendent . . . and the supervisory persons shall:

703.2(a) Work with . . . staff of the institution to insure that the educational plan for each school-age child. . . in the institution is carried out and that any other services rendered to the child are consistent with such plan.

703.2(b) Provide in-service training to the special education staff and, if required by this chapter, to other staff.

703.2(c) Develop the special education program in the institution.

703.2(d) Attend meetings called by the Bureau of Institutional Schools to review plans for implementing services.

703.2(e) Provide such reports as required by the Bureau . . . for monitoring, evaluating and modifying each child's plan.

704.0 Involvement of parents. The Bureau of Institutional Schools, the Assistant Superintendent for Children's Services . . . and the supervisory person in each institution . . . shall make every feasible effort to elicit the interest and encourage the participation of parents . . . in the education program of their children while such children are in a day or residential program in [such] an institution . . . . Such effort shall include the following:

704.1 They shall offer to consult with parents regarding their children's development and future opportunities.

704.2 In all communications with parents, they shall. . . insure that the parents understand the educational programs of their children. . . .

704.3 Parents shall be afforded the opportunity to meet, at least quarterly, with the special education staff directly involved with their children. The Assistant Superintendent . . . the supervisory person . and the Bureau . . . shall inform parents, in writing, when and where such meeting will take place.

704.4 When children go home on visits for a weekend or longer, appropriate guidance shall be given to parents so that they can assist in continuing the education program of their children.

704.5 Regardless of their participation in the above, parents shall receive a written quarterly report of the educational progress of their children . . . .

704.6 Any parent who is not satisfied with the educational progress of his/her child, or with the child's program, shall have the right to meet with the Assistant Superintendent . . . the supervisory person . . . a designee of the Bureau . . . and the Administrator of Special Education of the school system with responsibility for the education of such child. Such meeting shall be scheduled within five school working days after a request for such meeting."

CHAPTER 9 - TRANSPORTATION

900.0 Transportation the school committee must provide. Each school committee shall provide or arrange for the provision of all transportation recommended by a CET pursuant to paragraph 902.0.

901.0 Transportation the school committee must provide: Further conditions.

901.1 No school committee shall be relieved of the obligation to ... arrange transportation . . . on regular transportation vehicles by the fact that various conditions specified by a CET have to be fulfilled before such child may be transported on such vehicles.

902.0 CET: Transportation plan. As part of the educational plan for each . . . child . . . each CET shall include the following:

902.1 The CET shall state all reasonably available transportation which the child requires . . . .

902.2 The CET shall state whether the child is able to be transported on regular transportation vehicles [or that]. . . the child's condition is such that no modification of such vehicles can feasibly be made which will allow the child to be safely transported on them.

902.3 If the child . . . may be transported on regular transportation vehicles, the CET shall state all conditions which must be fulfilled in order to transport the child safely.

903.0 Transportation provided by the parents. If the school committee arranges to have the parents of a . . . child . . . transport such child, it shall pay such parents the prevailing rate per mile for state employees for each mile which such parents actually transport the child at the request of the school committee. No parent shall be required to provide transportation, nor shall any school committee be relieved of the obligation to provide transportation . . . because of the inability or unwillingness of such parents to provide such transportation

905.0 Requirements with which school committees must comply. When providing . . . transportation . . . by anyone other than the parent of the child being transported, the school committee shall comply with the following requirements:

905.1 It shall arrange to have . . . children . . . who are confined to wheelchairs transported in vehicles which do not require such children to be removed from their wheelchairs in order to enter or leave the vehicles; provided, however, that this requirement shall not be applicable where . . .[such]. . . transfer in and out of conventional vehicles . . .[is]. . . for therapeutic or for independence training reasons.

905.2 It shall not permit any . . . child . . . to be continuously transported for more than one hour except with the written permission of a CET.

905.3 It shall provide an in-service training program for operators of vehicles . . . to acquaint such operators with the needs of the children they are transporting and to equip them to meet those needs. Such operators shall be required by the school committee to complete an in-service training course within the first six months of their employment.

905.4 It shall provide a qualified attendant on each vehicle which transports one or more children of ages three and four who have substantial disabilities or any school-age child in need of special education services who is prone to disturbing behavior which could distract the driver. Such attendant shall be an employee of the school committee. No transportation contractor shall receive any additional payments because an attendant rides in a vehicle operated by the contractor.

905.5 It shall ascertain . . . the nature of any need or problem which a . . . child . . . has which may cause difficulties during transportation . . . [and] . . . communicate such information to any person who operates a vehicle in which such a child is transported.

905.6 It shall make sufficient inspections of equipment and unannounced spot checks, at least once monthly, to insure compliance with all requirements of this chapter . . . .

905.7 It shall insure that someone is responsible for assisting . . . child . . . in and out of the home, on and off the vehicle and in and out of the classroom, when . . . necessary.

"CHAPTER 10 - <u>SPECIAL EDUCATION PROFESSIONAL STANDARDS</u>

1001.0 <u>Approval of persons performing psychological functions.</u>

1001.1 The following provisions shall apply to psychological personnel approved under the regulations promulgated pursuant to G.L.c. 71, s. 46:

1001.1(a) Persons approved as Supervising Psychologist and as Psychologist may perform the psychological functions required by these regulations.

1001.1(b) Persons qualified as Psychological Assistant . . . must meet any applicable certification requirements

1002.0 Personnel certified or approved prior to the effective date of the Regulations for the Interim Approval of Professional Personnel for Special Education.

1002.1 All persons issued certificate #56 (Teacher of Special Schools and Classes - Mentally Retarded) and/or #58 (Teacher of the Deaf) prior to July 1, 1973, may . . . teach school-age children requiring special education services only in a sub-group of a regular class, or in a separate room, unless such persons also hold an appropriate Massachusetts teaching certificate.

STAFF

1002.2 The certificates of all persons issued certificate #57 (Teachers of Speech and Hearing Handicapped) are valid for life subject to the conditions of the certificate.

1002.3 All persons approved as Teachers of the Visually Handicapped prior to the effective date of [the] Regulations . . . who hold an appropriate Massachusetts teaching certificate and provide evidence of successful teaching experience in a program for the visually handicapped, will qualify for interim approval as Teachers of Children with Sensory Handicaps in the area of Vision requiring special education services.

1002.4 Persons approved as Instructors of the Perceptually Handicapped . . . must meet . . . the new certification requirements established . . . to qualify for certification as Teacher of School-Age Children with Moderate Special Needs requiring special education services.

1002.5 . . .[T]o qualify for approval as an Instructor of Perceptually Handicapped children . . . a candidate must provide evidence of successful completion of two three-semester-hour college courses in this area, or their equivalent, in a public school training program affiliated with a degree granting institution.

1002.6 All approvals issued . . . between July 1, 1973, and August 31, 1974, inclusive . . .

and all personnel approved after September 1, 1974, must . . .[have met]. . . new certification or approval requirements by September 1, 1977.

1002.7 Those instructing . . . children . . . in the integrated program shall hold the appropriate elementary, secondary or special subject, or support certificate, or exemption. 'Instruction in the Integrated Program' is defined as assumption of full responsibility for instruction of all children in a regular classroom. It does not include special education services . . . provided to individual . . . children in need of special education services or small groups of such children within the regular classroom; provided, however, that personnel instructing . . . children with severe special needs . . . in separate programs (e.g., state institutions) need not hold Massachusetts elementary, secondary, special subject or support certificates, in order to qualify for approval as Teachers of School-Age Children with Severe Special Needs requiring special education services.

1002.8 The following shall apply to Administrators of Special Education:

1002.8(a) Personnel certified as in 1002.8(c) and employed within Massachusetts as Administrators . . . prior to September 1, 1974, . . . shall be issued approval as Administrator of Special Education by the Division of Special Education.

1002.8(b) Personnel employed as Administrators of Special Education on or after September 1, 1974. . . must meet by September 1, 1977 the requirements of the Regulations for the Interim Approval of Professional Personnel for Special Education, as an Administrator of Special Education.

1002.8 (c) Any person approved as an Administrator of Special Education must also hold a valid Massachusetts Elementary, Secondary, Special Subject or Support certificate.

1003.0 Approval of Special Education Personnel, from the effective date of the Regulations for the Interim Approval of Professional Personnel for Special Education, to September 1, 1977. In addition to the preceding paragraphs of this chapter, the following alternative plans shall apply:

1003.1 Plan A: Transcript evaluation. Applicants, previously certified, who complete a training program which fulfills the course and experience requirements specified in the applicable regulations . . . may apply to the Division for issuance of the appropriate approval and/or endorsement for employment in programs for school-age children in need of special education services.

1003.2 Plan B: Recommendation by approved or audited training program.

1003.2(a) Applicants who meet non-academic requirements and who successfully complete a preparational program that has been determined to be satisfactory by the Board of Education through the program audit process may be granted the appropriate Massachusetts certificate and/or approval upon submitting proof of completion of the program and the recommendation of the preparing institution. Program audits will be performed on the basis of criteria and procedures established by the Board of Education.

1003.2(b) Individuals who have gained competencies above preparational program entry levels in working with children in need of special education services may apply to an audited or approved program for assessment of these competencies and for an opportunity to complete such additional preparation as may be necessary to qualify for institutional recommendations.

1003.2(c) Recommendation by an audited program does not provide eligibility for interstate reciprocity under the Interstate Certification Compact.

1003.3 Plan C: Program Audit; interstate reciprocity. Applicants who meet non-academic requirements and who complete an approved program . . . shall be issued appropriate certification and/or approval for employment with school-age children in need of special education services. Such programs shall have been approved for preparation for the specific certificate or approval by the state agency responsible for teacher certification and preparation. The preparing institution shall issue official notice that the applicant has completed such program and is recommended for certification or approval in the specific category.

1004.0 Program approval of specialized programs which develop as a result of new needs in personnel. Individual programs which meet a specific need shall be individually audited for the purposes of interim approval.

1005.0 Non-educational professionals: Required qualifications. All non-educational professionals, not certified or approved pursuant to this chapter, who are required or permitted to provide services pursuant to these regulations, shall be appropriately certified, licensed, board-registered or otherwise approved to provide such services by the relevant professional standards board or agency for their profession.

1006.0 Teachers, administrators, and support personnel: Required qualifications. School committees shall employ . . . only those certified or approved, or both, in accordance with these regulations.

1100.0 Composition of RAC's. "There shall be established in each region of the Department of Education a RAC consisting of sixteen members. The following shall be members of each RAC;

1100.1 Eight members selected in the following manner:

1100.1(a) One who is a parent of a child with a substantial disability enrolled in a program for children of ages three and four, described in Chapter 6.

1100.1(b) From the program prototypes 502.1 . . . 502.2 . . . 502.3 . . . and 502.4 . . . six parents of school-age children requiring special education services in programs within these prototypes; provided, however, that each prototype shall be represented by at least one but no more than two parents.

1100.1(c) From any one but not more than one of the program prototypes 502.5 . . . and 502.7, . . . one parent of a school age child requiring special education services in a program within such prototype.

1100.2 A public school teacher teaching . . . in a regular education program.

1100.3 A public school teacher teaching . . . in a special education program.

1100.4 A public school administrator in either regular or special education.

1100.5 A member of the Advisory Council of the

Department of Education for the region represented by the RAC . . . by the Advisory Council of which that person is a member.

1100.6 An approved vocational technical administrator or teacher from a local or regional vocational school.

1100.7 A professional from an institution of higher education who prepares persons for professional employment in education.

1100.8 One other person with demonstrated commitment to school-age children requiring special education services.

1100.9 A member of a local Council for Children who shall be recommended . . . by the Director of the Office for Children.

1100.10 The Commissioners of the Departments of Mental Health, Public Health, Public Welfare and Youth Services and the Director of the Office for Children shall each designate a representative to serve ex officio on each of the RAC's

1103.1 The members of the initial RAC's shall serve the following terms:

1103.1(a) The six parent members described in paragraph 1100.1(b) for terms of three years each.

1103.1(b) The two parent members described in paragraphs 1100.1(a) and 1100.1(c), and three other members described in paragraphs 1100.2 through 1100.9, for terms of two years each.

1103.1(c) Five other members described in said paragraphs 1100.2 through 1100.9, for terms of one year each.

1104.0 RAC: Duties. Each RAC shall receive complaints and suggestions relative to the provision of special education in the region and shall submit to the SAC, on or before April 1 of each year, a written report including the following:

1104.1 A specific assessment of the qualitative and quantitative adequacy of all aspects of the provision of special education within the region.

"1104.2 A specific statement of recommended changes in any aspect of the provision of special education

in the region, with a detailed description of the process by which such changes should be accomplished.

1104.3 A detailed summary of the complaints and suggestions received during the year. Where complaints and suggestions have been repeated, or where a clearly discernable pattern has emerged, such repetition or pattern shall be emphasized.

1105.0 RAC: Additional duties. In addition . . . each RAC may:

1105.1 Advise and consult with the Regional Branch Office of the Division, on all aspects of the provision of special education within such region.

1105.2 Hold periodic meetings . . . to hear complaints and suggestions . . . .

1105.3 Submit interim reports to the SAC, as necessary, in addition to the annual report required by paragraph 1104.0. Such interim reports shall include references to complaints and suggestions received . . . .

1105.4 Designate a representative to serve on the Regional Review Board.

1106.0 RAC: Meetings. Each RAC shall:

1106.1 Meet at least once a month from September through June.

1106.2 Arrange the time and place for meetings so as to encourage the highest attendance of members and of the public.

1106.3 Give adequate notice of meetings, at least ten days in advance of such meetings, to members and the public.

1106.4 Conduct its meetings in accordance with G.L.c. 30A, s.11A (the 'open meeting law').

1106.5 Make decisions by vote of a majority of the persons present and entitled to vote; provided, however, that a quorum shall consist of a majority of the total membership of the RAC; and provided, further, that in the absence of a quorum, all decisions must be ratified at the next meeting when a quorum is present.

1107.0 RAC: Relation to the Division; supportive services. The Regional Branch Offices . . . shall assist the RAC's in carrying out their duties. Such assistance shall include doing the following, without charge, upon reasonable notice and subject to the availability of staff and resources as determined by the Director . . .: mailings . . ., typing . . ., duplicating of materials [and] provision of any other services and materials which are reasonably necessary for the carrying out of its duties by a RAC.

1108.0 RAC: Operating Structure. Each RAC shall conform to the following requirements:

1108.1 The officers shall consist of a chairperson, vice-chairperson, and a secretary.

1108.2 The officers shall be elected annually at the June meeting.

1108.3 The chairperson shall be the chief executive officer . . . and shall preside at all meetings. The chairperson shall name the members of all committees and shall appoint the chairperson of each committee.

1108.4 The vice-chairperson shall act for the chairperson in the event of absence or incapacity.

1108.5 The secretary shall be the recording officer . . . and shall be responsible for keeping complete and accurate minutes of the RAC meetings.

1108.6 The RAC shall appoint such committees, including an executive committee, as it deems necessary or desirable to carry out its responsibilities.

1108.7 All members . . . shall be installed and sworn to the faithful performance of their duties and shall be expected to attend meetings and perform such other duties as are incumbent upon them.

1108.8 Any member may resign from the RAC at any time. The Board of Education shall appoint a person to fill any vacancy which occurs for any reason.

1109.0 SAC: Election. Each RAC shall elect two members, at least one of whom shall be a parent whose child is receiving special education, to be members of the SAC. The Commissioners of the Departments of Mental Health, Public Health, Public Welfare and Youth Services and the Director of the Office for Children shall each appoint a representative to serve as an ex officio member of the SAC. Members of the SAC shall be reimbursed subject to appropriation, for expenses necessarily incurred in the performance of their duties.

1109.1 The members of the SAC shall serve for terms of three years each with no members serving for more than two consecutive terms; . . . .

1110.0 SAC: Duties; annual report. The SAC shall submit an annual written report to the Board of Education on or before June 1 of each year. Such report shall include the information for the entire Commonwealth, required to be submitted by the RAC's for their respective regions pursuant to paragraph 1104.0, and shall also include a specific statement of recommended changes in any aspect of the provision of special education . . . with a detailed description of the process by which such changes should be accomplished. Such report shall be based upon the reports submitted . . . and shall include a comprehensive summary and consolidation of the findings of statewide importance of such reports, with specific references to important matters peculiar to a given region. The Department of Education shall implement the recommendations of the SAC or shall state in a written reply to said SAC the reasons why such recommendations cannot or should not be implemented. In such circumstances, the Bureau of Special Education Appeals . . . shall attempt to resolve the disagreement informally; provided, however, if a settlement cannot be reached, the Board of Education shall conduct public hearings to investigate the basis for the disagreement and resolve any dispute between the Department . . . and the SAC.

1111.0 SAC: Appeals. In addition to the duties specified in paragraph 1110.0, the SAC shall decide appeals in accordance with Chapter 4. The SAC shall establish any procedures additional to those specified in said Chapter 4, which are necessary or desirable to enable it to determine such appeals.

1113.0 Regional Review Board: Composition. There shall be established in each EOHS region a Regional Review Board composed of the following members:

1113.1 A Director of a Regional Branch Office . . . who shall be the chairperson.

1113.2 A professional staff person appointed by the Commissioner of Mental Health.

1113.3 A professional staff person appointed by the Commissioner of Public Health.

1113.4 A professional staff person appointed by the Commissioner of Public Welfare.

1113.5 A professional staff person appointed by the Commissioner of Youth Services.

1113.6 A professional staff person appointed by the Commissioner of the Massachusetts Rehabilitation Commission.

1113.7 A person appointed by the Director of the Office for Children.

1113.8 A person appointed by the chairperson of the RAC, after consultation with other members of the RAC. Such person shall be a parent of a child requiring special education services.

1114.0 Regional Review Boards: Duties. The Regional Review Boards shall have the following duties:

1114.1 They shall consult with the Regional Branch Offices . . .on individual placements of school age children requiring special education services in day school . . . and residential school . . . programs pursuant to paragraphs 504.2(b) and 504.3(b).

1114.2 They shall approve private schools within the Commonwealth pursuant to paragraph 800.0.

1114.3 Pursuant to paragraph 503.1(1), they shall refer requests for services, materials or equipment to the Inter-departmental Children's Project Team and shall notify the school committee and the child's parents if such request[s]. . . cannot be provided . . .

1114.4 They shall assist school committees in implementing these regulations.

1114.5 They shall assist in insuring the coordinated delivery of services by the respective departments represented on each Regional Review Board.

1114.6 They shall assist in insuring the maximum use of federal funds . . . .

1114.7 They shall notify the SAC whenever a . . . child in need of special education services is

placed outside of the Commonwealth and shall recommend, for inclusion in the annual report of the SAC, the development of programs in the Commonwealth to meet the needs of such . . . children.

1114.8 They shall have such other duties as are specified in these regulations.

1115.0 State Review Board: Composition. There shall be established at the state level, a State Review Board composed of the following members:

1115.1 The Associate Commissioner of Special Education or a person designated by such Associate Commissioner, who shall be the chairperson.

1115.2 A professional staff person appointed by the Commissioner of Mental Health.

1115.3 A professional staff person appointed by the Commissioner of Public Health.

1115.4 A professional staff person appointed by the Commissioner of Public Welfare.

1115.5 A professional staff person appointed by the Commissioner of Youth Services.

1115.6 A professional staff person appointed by the Commissioner of the Massachusetts Rehabilitation Commission.

1115.7 A person appointed by the Director of the Office for Children.

1115.8 A person appointed by the chairperson of the SAC. Such person shall be a parent of a child requiring special education services.

1116.0 State Review Board. The State Review Board shall have the following duties:

1116.1 It shall approve private schools outside of the Commonwealth pursuant to paragraph 800.0.

1116.2 It shall consult regularly with the Regional Review Boards and shall prepare and submit to the Departments represented on the State Review Board an annual report based upon conclusions derived from such consultation.

1116 3 It shall consult with the SAC on decisions in individual appeals cases, upon request by the SAC.

1116.4 It shall perform at the state level, those functions specified in paragraphs 1114.6 through 1114.8, except that assistance shall be given to the Division rather than to school committees.

1116.5 It shall have such other duties as are specified in these regulations."

III.B.Teachers; Regulation #29

STATUTES

§380.1701

The state board shall: develop, establish and continually evaluate, in cooperation with intermediate boards, a state plan for special education, coordinating all special education programs and services; require each intermediate board to submit a special education plan to be approved by the state board; and promulgate rules setting forth requirements and procedures for plans.

§380.1702

If a school board claims a financial emergency rendering it unable to provide special education programs in compliance with §380.1751, it shall apply to the state board for approval to provide a special education program which does not comply.

If the state board determines that a district is not providing special education programs in compliance with §380.1751 and the local district has not obtained prior approval, the state board shall give the district a notice of non-compliance. Unless the district submits proof of compliance or of emergency within 30 days, the state board shall direct the intermediate board of which the local board is constituent to provide a complying program.

Special education programs which the state board directs an intermediate board to provide shall be funded as if provided by the local district, which shall contribute the unreimbursed cost of the programs.

§380.1703

The state board shall establish qualifications for special education personnel and rules concerning curriculum, eligibility, review procedures, size of classes and programs, equipment, and housing.

§380.1711

An intermediate board shall: develop, establish and continually evaluate, in cooperation with the constituent districts a plan for special education approved by the state board; contract for the delivery of special education programs and services; employ special education personnel and appoint a director; accept and use funds and contributions to provide special education programs; acquire vehicles, sites, and buildings, and equip them for special education use; maintain a record of each handicapped person under 26 years of age who is resident in its constitutent districts and who has not completed a normal course of study, and the special education services which the handicapped person is receiving; have the authority to place a handicapped person in appropriate programs or services; investigate and report failures to comply with contract or statute provisions or with the intermediate district plan; receive the report of a parent or guardian, or with a parent's or guardian's consent, of appropriate professional personnel that a person under 26 is or may be handicapped, and evaluate pupils.

§380.1716

The intermediate board shall appoint annually a committee of at least five persons consisting of two school superintendents and three board members who, with a designee of the state board, shall visit special education facilities and advise the intermediate board of their administration.

§380.1729

An intermediate board operating special education programs shall expend funds received under these statutes for special education purposes in accordance with state board rules.

§380.1741

An intermediate board operating special education programs may carry pupils in membership in the same manner as a local school district and shall be entitled to its proportionate share of state school aid available for these programs.

§380.1742

When employing additional personnel to implement a special education program, an intermediate board shall employ first an employee of a constituent district whose employment is discontinued because the constituent district is discontinuing a special education program. Such employees shall be entitled to all rights and benefits to which they would otherwise be entitled if they had been employed by the intermediate board originally, except that, at the option of the board, they may be subject to another probationary period of one year.

§380.1743

An intermediate board in providing special education programs previously provided by a state agency shall, before employing any additional personnel to implement the program, first employ an employee of a state agency whose employment is discontinued because a state agency is discontinuing a special education program.

Such employees shall be entitled to all rights and benefits to which they would otherwise be entitled had they been employed by the intermediate school district originally, except that they may, at the board's option, be subject to another probationary period of one year.

§380.1751

A local school board shall provide special education programs by either operating a program or contracting with its intermediate board, another intermediate or local board, a state agency, or a combination of these, for operating a

program. The intermediate district of which the local district is constituent shall be a party to each contract even if it does not participate in providing the program.

A local district contract for special education programs shall provide specifically for: buildings, equipment and personnel; transportation, or room and board or both, for participants; the contribution to be made by the sending local district if the program is to be operated by another party; and other appropriate matters.

Each program operated or contracted for by a local district shall accord with the intermediate district's plan, though it may provide more than required by the intermediate district.

This section shall be construed to allow operation of programs by departments of state government without local district contribution.

§380.1756; 380.1757

A local board shall provide transportation and room and board for a handicapped person who would otherwise be unable to participate in a special education program, except those operated by the Michigan school for the blind, the Michigan school for the deaf, the department of mental health, and the department of social services. The board may provide for weekend transportation of a handicapped person in residence at the Michigan school for the deaf and the Michigan school for the blind.

§388.1009a

ADVISORY COMMITTEE

The special education advisory committee is created to advise the state board in the field of special education. It consists of nine members, appointed by the state board, serving three sets of staggered terms of three years each. The person within the department responsible for special education shall be an ex officio member. The committee shall elect its own officers. Members shall be reimbursed for expenses.

§388.1093

The advisory commission on education of the gifted and/or academically talented is created. It shall consist of 20 members, appointed by the state board of which not more than half shall represent the education profession and including a director appointed by the state board, representatives of labor, business, or industry, a non-educational state agency, local and intermediate school board members and administrators, a community college district, a four-year college or university, a neighborhood education authority, a school psychologist, a specialist in the psychology and education of gifted students, a parent, a teacher, a counselor, a high school student, and a post high school student. The state superintendent or a designee shall be a nonvoting ex officio member and chairman.

The director shall be employed full-time in the department and carry out administrative and organizational functions of the commission. Other members shall serve without compensation except for expenses incurred in the performance of duties.

§388.1094

The commission on the education of the gifted and/or academically talented shall evaluate and report on current efforts in the state toward education of the gifted and/or academically talented, recommend guidelines and estimate the cost for a comprehensive education program for such students, and present proposed legislation in the regard.

The state board shall study this material and, by December 1, 1975, provide to the governor and legislature an estimate of the cost of such a comprehensive plan and legislation to implement it.

§393.1

The Michigan school for the deaf, at Flint, and the Michigan school for the blind, at Lansing, are placed under the jurisdiction of the state board. The superintendents of these institutions shall be appointed by the state board and the superintendents shall employ all employees of the institutions.

§393.21

The Michigan schools for the deaf and for the blind are public schools and shall not be regarded as charitable institutions. They shall have for their object the education of children who by reason of the impairment of their senses may not be advantageously educated in other schools of the state.

§393.31; 393.59

SCHOOL FOR THE DEAF

The Michigan school for the deaf shall continue to be maintained. The board of trustees shall, by the tenth day of September preceding the regular session of the legislature, present to the governor a detailed statement of the institution's operations for the two fiscal years closing on the thirtieth day of the preceding June, including the superintendent's report, the treasurer's report for all receipts and disbursements, and the number and names of all officers and regular employees and the salary or wages and other emoluments attained to each.

§393.60; 393.61

The board of the school for the deaf shall cause a full and accurate inventory, in duplicate, to be taken at the close of each fiscal year, and shall keep a regular account of all moneys received and disbursed and the receipts from and expenditures for each department of business and for the construction or improvement of buildings.

§393.62; 393.63

The board of the school for the deaf is authorized to draw from the state's general fund such amount of money as shall appear to the auditor general necessary to meet current expenses. The amount shall not exceed 1/4 the amount appropriated for the institution for the year preceding the regular session of the legislature. Amounts so drawn shall be considered as an advance to the institution on any appropriations made by the legislature at its regular session.

§393.64

Members of the board of the school for the deaf shall receive no compensation for their services, except their traveling and other necessary official expenses.

§393.65

The school for the deaf shall receive deaf and partially deaf children whose defective hearing prevents them from receiving instruction in other schools, to remain not beyond 21 years of age, who are in suitable physical and mental condition to receive instruction and who themselves or whose parents or guardians are residents of the state, without charge for tuition, boarding, lodging, washing, or health services.

Any enrolled child in need of medical attendance not available through the school's established program shall receive it at school expense.

The board of trustees may substitute transportation for residence for children who live within a radius of 10 miles of the school. The board may also admit persons over 21 years of age under appropriate conditions and out-of-state students at a tuition fee.

§393.66

Deaf persons who on account of poverty are unable to furnish themselves with suitable clothing and other necessities for attending the school for the deaf may be assisted at the discretion of the school's board by an amount not to exceed 60 dollars per annum for each person.

§393.101; 393.104

SCHOOL FOR THE BLIND

The Michigan school for the blind shall be maintained at Lansing. Pupils shall be educated in branches usually taught in the common schools and in useful arts and trades that they are best adapted to pursue.

§393.105; 106

Blind and partially blind persons, between the ages of 7 and 19, whose defective sight prevents their receiving instruction in common schools and who themselves or whose parents or guardians are residents of the state, shall be eligible to attend the school for the blind without charge for tuition, board, lodging, washing, and medical attendance. Out-of-state residents shall be admitted at a charge, at least 10 per cent more than sufficient to cover necessary expenses.

ELIGIBILITY

The board of control may, in their discretion, admit persons under the age of 7 or over 19.

§393.107

A pupil shall be entitled to remain in the school for the blind for 12 years, or, in the board of control's discretion, 14 years. The board may dismiss any pupil at any time for persistent disobedience, immoral conduct, or sufficient cause.

A child over the age of 18 may, with consent of the board of control, be transferred to the Michigan employment institution for the blind.

§393.109

Each school census enumeration shall make a list of all blind children, or children whose vision is so defective as to make it impossible to properly educate them in the public schools, which shall be verified by oath. The lists shall be forwarded to the state superintendent who shall prepare a report containing the name, age, and residence of each blind child and the names of residences of their parents and guardians. The report shall be forwarded to the superintendent of the Michigan school for the blind.

CENSUS

Every parent or guardian of any blind child between the ages of 7 and 19, shall be required to send that child to the Michigan school for the blind, unless the child is being educated at a private or parochial school, is incapable of being educated, is over 17 years of age and has been

taught and is employed at a trade, or is 18 years of age and employed at the Michigan employment institution for the blind.

The superintendent of the Michigan school for the blind shall furnish to the county commissioners of schools a list of blind children within their counties. Each truant officer, when notified that there are within the district children who come under this act, shall investigate such cases and report to the superintendent of the school for the blind and the county commissioners of schools. The superintendent shall determine whether the children are included or exempted from attendance at the school for the blind, and, if included, he/she shall notify the proper truant officer who shall take steps to enforce the provisions of this act.

When on account of indigent circumstances a parent or guardian is unable to furnish a child with transportation to and from the school for the blind, the school's board of trustees shall provide transportation for the child and, for a child under the age of 12, may include transportation for the parent or guardian.

Any one refusing to comply with this act shall, upon conviction, be deemed guilty of a misdemeanor and subject to prescribed penalties.

§393.111

The board of control and officers of the school for the blind shall make a biennial report to the governor and legislature on the condition and needs of the school and a detailed fiscal account of the preceding two official years, with estimates of the amount needed for support of the institution for the ensuing two years.

REGULATIONS

R 340.1721

A person shall be eligible for special education programs and services if identified as having one or more of the impairments as defined in R 340.1702 to R 340.1714, if he/she is not more than 25 years of

age prior to the fourth Friday after Labor Day of the school year of enrollment, if he/she has not completed a normal course of study, and if he/she has not graduated from high school. A person identified as having multiple impairments shall receive special education programs as recommended by the educational planning and placement committee or pursuant to the decision of the hearing officer on appeal of the recommendation.

R 340.1722

The local school district superintendent shall be responsible for making a change in the educational status of a handicapped person except where section 340.298c or section 340.613 of the Michigan Compiled Laws are applicable in which case the superintendent of the intermediate district is responsible.

PLACEMENT

The superintendent shall appoint an educational planning and placement committee.

PARENTAL INVOLVEMENT

The superintendent shall ask, in writing, the parent to participate as a member of the committee in developing a recommendation concerning a change in the educational status of his/her handicapped child. Upon request of the parent, all school records of the child shall be made available to the parent before the committee meeting.

The superintendent shall direct the committee to meet and recommend regular and special education programs and services, according to the educational, social, and physical needs of the handicapped person. The recommendation shall be based on all evaluative information requested by the committee or provided by the parent or handicapped person. The recommendation shall be made within twenty-five school days after receipt of the referral for possible special education services. This time limit may be extended by the state board upon demonstration of just cause in writing.

The superintendent shall direct an annual review of the programs and services provided each handicapped person. The superintendent and the parent of each handicapped person shall be advised of the findings of the review.

If a person has been enrolled in a special education program in another school district or institutional program, and if evidence is presented that demonstrates reasonable cause to believe the person is eligible for a special education program or service, the superintendent shall place immediately, upon written consent of the parent, the handicapped person in an appropriate program or service. The placement shall not exceed twenty-five days. During that time the committee shall meet and make a recommendation. If the parent does not consent, the committee shall expedite its reaching a recommendation by giving the case precedence over all other cases.

The superintendent shall place the handicapped person according to the recommendation of the committee or hearing officer in not less than five or more than fifteen school days after the parent has been notified.

"Any time limitation in this rule shall be construed so as to do substantial justice and may be varied upon approval of the state board of education for good cause shown."

R340.1724

HEARING

A parent who requests a hearing to contest a proposed educational placement or change in the educational status of a handicapped person shall have the right to a closed hearing upon request, one copy of a transcription of the hearing, to be represented by a person of his/her choosing, to present evidence, and to compel the attendance of witnesses.

The hearing officer's decision shall be made within twenty calendar days after the hearing and shall contain written findings of fact and conclusions of law.

A temporary change in the educational status of the handicapped person may be made for the period prior to the decision upon consent of the parent. If consent is not obtained, the state board may grant the temporary change. The state board shall notify the parent of this decision and the reasons for it. Any time limitation in this rule shall be construed so as to do substantial justice and may be varied upon approval of the state board for good cause shown.

R 340.1725

APPEAL

A parent may appeal an unsatisfactory decision on placement of a handicapped child by the hearing officer to the superintendent of public instruction. The deadlines for appeal to, and the decision by, the hearing officer set forth in R 340.1724, shall apply to an appeal to the superintendent. The superintendent may make a decision from the record below or review the decision de novo.

R 340.1731

Records shall be maintained by intermediate school districts for all handicapped persons 0 to 25 years of age, including those placed in state and privately operated facilities.

When a handicapped person changes residency from one intermediate school district to another, the original district shall transfer the person's records upon written request of the new district and the parent of the handicapped person.

Written consent of the parent shall be obtained before an intermediate school district provides a state board-approved agency with a handicapped person's records. If consent is not obtained

the district shall release the records with the name of the handicapped person and the name, address, and telephone number of the parent deleted.

R 340.1732

"A handicapped person under 26 years of age on the fourth Friday following Labor Day who habitually sleeps, keeps personal effects, and regularly lodges at a place not for the purpose of securing a suitable home but for an educational purpose, or who is lodged at a place as directed by an agency or institution under the auspices of a juvenile or probate court, the department of mental health, or the department of social services, such as a private home, group home, or a private or public institution, shall be a resident of the school district in which the person's parents reside...."

If a guardian has been appointed to provide the handicapped person with a suitable education, the person shall be a resident of the district in which the guardian resides.

If the handicapped person has no living parent, or guardian, or if the parent resides out of the state, the person shall be a resident of the district in which the probate court having control or custody is located.

A handicapped person, not covered by these rules shall be a resident of the school district in which the person habitually sleeps, keeps personal effects, and has a regular place of lodging for the purpose of securing a suitable home and not solely for an educational purpose.

If a handicapped person is placed by court order or at the direction of a child placement agency in a state institution, a licensed foster home, a licensed nursing home, or a licensed group residential facility, the local school district in which the

facility is located shall provide the person with special education programs and services and shall maintain the person's records. For all other purposes, including funding, the handicapped person's residence shall be determined according to the previous rules.

Notice of a disagreement between two school districts shall be given to the state board. The state board shall notify the districts involved and the parent of the handicapped person and shall consider the arguments they submit. Within fourteen days of notice of a disagreement the state board shall make a determination as to the residency of the handicapped person.

R 340.1733

"Rule 33. An intermediate school district, local district or other agency shall adhere to the following general requirements for all programs and services for handicapped persons:

FACILITIES

(a) Special education classrooms shall have at least the average number of square feet per student as compared to the average number of square feet per student in regular classrooms in the school district. Special education classrooms shall be located in schools housing regular education pupils of comparable age and grade level except for facilities designated and in use for this purpose prior to the effective date of these rules and except when special facilities are provided for severely mentally impaired or trainable mentally impaired, or for specialized vocational training for handicapped persons, or for emotionally impaired persons served in mental health facilities. Teacher consultants and special education supportive personnel shall have space designated on a scheduled basis in each building to afford individual and small group work. Each handicapped person shall be assigned to educational programs and

services which are housed in buildings which allow that handicapped person to participate fully in regular and special education services.

(b) A curriculum plan based upon individual student performance objectives shall be written for special education programs and services by the special education personnel in conjunction with other school personnel for each handicapped person in accordance with his/her needs in the cognitive, affective, and psychomotor domains with special attention to needs for personal adjustment training, pre-vocational and vocational training. The student performance objectives for special education programs and services shall be available to the parent and may be reviewed by the state board of education or its designee.

(c) The special education programs and services and methods of instruction shall be consistent with the performance objectives written for each handicapped person.

(d) Intermediate school districts or local districts may operate or contract for operation of pre-vocational evaluation of work activity center services or other necessary ancillary services.

(e) Intermediate school districts or local districts, or a combination of such districts, may provide for work study services and, with approval of the state board of education, assign special education personnel to the supervision of work study services. These services shall be available to handicapped persons regardless of their disability if either of the following conditions are met:

(i) They have received prerequisite personal adjustment training, pre-vocational education, and vocational training.

(ii) Within 1 additional school year, they will cease to be eligible as provided in rule 21 for special education programs and services.

(f) A written work study plan, signed by the parent, school, and employer, shall set forth the educational goals, job activities, related subjects, standards of attainment, time and duration of the program, and wages to be paid to the handicapped person. The superintendent of the district shall designate a staff member to visit the student and her/his supervisor at the job site at least once every 20 school days to check attendance, evaluate the handicapped person's progress, and evaluate the placement in terms of the health, safety, and welfare of the individual handicapped person.

(g) The instructional program for a school day shall focus on the individual needs of the handicapped person, as determined through the plan for each student.

(h) Special education programs and services shall be provided for at least the minimum number of hours and days of teacher-pupil contact in conformance with the child accounting rules, being R 340.1 to R 340.13 of the Michigan Administrative Code, but the number of hours and days for a special education program or service shall be not less than those required for regular education programs.

(i) The age range for persons under 16 years of age in a special education class shall not exceed 4 years at any one time except for severely mentally impaired, trainable mentally impaired, or severely multiply impaired.

(j) Handicapped persons qualifying for special education programs and services shall be provided supplies and equipment at least equal to those provided to other students in regular education programs and, in addition, those supplies and equipment necessary to meet their defined performance objectives.

(k) Physical therapy service shall be provided to a handicapped person if prescribed by an appropriate medical authority and recommended by the educational planning and placement committee as an essential component of the educational program.

(l) Occupational therapy shall be provided to handicapped persons if recommended by the educational planning and placement committee as an essential component of the educational programs.

(m) The expense of additional diagnostic services recommended by the educational planning and placement committee and required by the school district, including neurological, medical, and psychiatric and other professional services not provided by the school district, other public agencies or covered by medical insurance, shall be borne by the operating school district."

R 340.1734

A local district may request permission from the state board to deviate from a special education rule. The district shall notify the intermediate district of the request. Within seven days the intermediate district shall inform the state board of its position. The state board shall act on the request within thirty days of its receipt. The state board may grant the request for a period not to extend beyond the end of the school year or the end of the fiscal year, whichever comes first. The request shall be granted only when the board believes that the deviation is in the best interests of the handicapped person affected, and good cause is shown. A deviation shall not be granted so as to exclude or deny a handicapped person a special education program which he/she requires.

R 340.1735

"Evaluation of a handicapped person shall be made in the dominant language of the person's home. A bilingual aide may be employed to assist the evaluating personnel."

R 340.1736

"Paraprofessional personnel may be employed to assist special education professional personnel in accordance with the intermediate school district plan. Paraprofessional personnel shall include, but is not limited to, teacher aides, health care aides, bilingual aides, and instructional aides and program assistants in programs for severely mentally impaired and severely multiply impaired."

R 340.1737

Each type of handicapped person shall be provided programs and services according to the intermediate district plans and the requirements in R 340.1738 to R 340.1747, in addition to the program requirements for all handicapped children found in R 340.1733.

R 340.1738

"Rule 38. Specific requirements for programs and services for the severely mentally impaired shall be as follows:

PUPIL/TEACHER RATIO

(a) An instructional unit for the severely mentally impaired shall consist of at least 1 instructor or teacher and 4 instructional aides for a maximum of 24 pupils, with an average ratio of 1 instructional aide for 6 pupils. At least 1 full-time instructor or teacher and 1 full-time aide shall be employed in every program for the severely mentally impaired.

(b) A school year for the severely mentally impaired shall include a minimum of 230 days and 1150 clock hours of instructional activities.

(c) Persons employed in a severely mentally impaired program shall have the following responsibilities:

(i) Instructors or teachers shall be responsible for the instructional program and shall coordinate the activities of aides and supportive professional personnel.

(ii) Instructional aides shall work under the supervision of the instructor or teacher and assist in the daily training program for not more than 6 severely mentally impaired pupils.

(iii) Program assistants may assist the teacher or instructor and the instructional aides in the feeding, lifting, and individualized care of severely mentally impaired pupils."

R 340.1739

"Rule 39. Specific requirements for programs and services for the trainable mentally impaired shall be as follows:

(a) After August 31, 1975, all classroom programs for the trainable mentally impaired shall be provided in buildings constructed or renovated for use as school facilities.

(b) A classroom unit for the trainable mentally impaired shall be:

(i) One teacher and 1 teacher aide for a maximum of 15 pupils, or

(ii)One lead teacher with a maximum of 3 instructional aides for a maximum of 30 pupils, with not more than 10 pupils for each aide."

R 340.1740

"Rule 40. A specific requirement for programs for the educable mentally impaired shall be that not more than 15 students shall be in the classroom at any one time and the teacher shall have responsibility for educational programming for not more than 18 different students."

R 340.1741

"Rule 41. A specific requirement for programs for the emotionally impaired shall be that not more than 10 students shall be in the classroom at any one time and the teacher shall have responsibility for educational programming for not more than 15 different students."

R 340.1742

"Rule 42. (1) Specific requirements for programs and services for hearing impaired persons are as follows:

(a) A special class with 1 teacher shall have an enrollment of not more than 7 pupils.

(b) Group hearing aids, deemed necessary by the educational planning and placement committee for instruction, shall be provided.

(c) Communication skills and language shall be emphasized as an integral part of the curriculum.

(2) The Michigan school for the deaf shall be considered a part of the total continuum of services for hearing impaired persons through the following procedures:

(a) All applications for placement at the Michigan school for the deaf shall be submitted by the intermediate school district superintendent, or his designee, to the superintendent of the Michigan school for the deaf.

(b) Prior to application, the person shall have been identified by the referring school district as hearing impaired in accordance with part 1.

(3) The agency initiating a change of placement into or out of the Michigan school for the deaf shall be responsible for establishing the educational planning and placement committee. Representatives of the intermediate school district of residence and the Michigan school for the deaf shall be invited to participate in the educational planning and placement committee meeting."

"Rule 43. (1) Specific requirements for programs and services for the visually impaired are as follows:

(a) Class size shall be determined primarily by the severity and multiplicity of the impairments of the visually impaired. A special class with 1 teacher shall have an enrollment of not more than the equivalent of 8 full-time pupils, and the teacher shall have responsibility for programming for not more than 10 different students.

(b) The curriculum shall include instruction in orientation and mobility, assistance in early development of comprehensive communication skills, and pre-vocational and vocational experiences.

(c) An agency operating special education programs and services for the visually impaired may also operate a program of transcription of education materials into braille in accordance with R 388.261 to R 388.265 of the Michigan Administrative Code.

(2) The Michigan school for the blind shall be considered a part of the total continuum of services for visually impaired persons through the following procedures:

(a) Applications for placement at the Michigan school for the blind shall be submitted by the intermediate school district superintendent, or his designee, to the superintendent of the Michigan school for the blind.

(b) Prior to application, the persons shall have been identified by the referring school district as visually impaired in accordance with part 1.

(3) The agency initiating a change of placement into or out of the Michigan school for the blind shall be responsible for establishing the educational planning and placement committee. Representatives of the intermediate school district of residence and the Michigan school for the blind shall be invited to participate in the educational planning and placement committee meeting."

R 340.1744

"Rule 44. Specific requirements for programs for the physically or otherwise health impaired are as follows:

(a) The class size shall be not more than the equivalent of 15 fulltime pupils per teacher.

(b) Special classroom units serving physically or otherwise health impaired shall provide at least 60 square feet of floor space per person.

(c) Health care aides may be employed to serve in a supportive capacity to the nurse, physical therapist or occupational therapist."

R 340.1745

"Rule 45. Specific requirements for the programs for the speech and language impaired shall be as follows:

(a) Size and composition of groups shall be determined by the teacher of the speech and language impaired. Delivery of services shall be determined by the teacher of speech and language impaired in cooperation with the district director of special education or his designee, and the building principal of the school in which the pupils are enrolled.

(b) The teacher of speech and language impaired shall work with an active case load of no more than 75 pupils at any one time."

R 340.1746

"Rule 46. Specific requirements for programs for the homebound and hospitalized are as follows:

HOMEBOUND INSTRUCTION

(a) Homebound services for physically or otherwise health impaired shall be initiated no later than 15 school days after certification of a medical handicap which requires the person to be confined to his home.

(b) A teacher employed for a homebound or hospitalized program, or for a combination of these

programs, shall have no more than 12 pupils assigned to him/her at any one time.

(c) Progress reports for each person shall be recorded in accordance with the intermediate school district plan.

(d) A teacher of homebound or hospitalized persons shall instruct persons a minimum of 2 nonconsecutive hours per week. Therapists may supplement, but not substitute for, a teacher's instructional time."

R 340.1747

"Rule 47. A special education program serving learning disabled students shall have not more than 10 students in the classroom at any one time and the teacher shall have responsiblity for educational programming for not more than 15 different students."

R 340.1748

"Rule 48. Specific requirements for programs and services for the severely multiply impaired shall be as follows:

(a) An instructional unit for the severely multiply impaired shall consist of at least 1 instructor and 2 instructional aides for a maximum of 9 pupils. At least 1 fulltime instructor and 1 fulltime aide shall be employed in every severely multiply impaired program. Supportive services of a physical therapist, an occupational therapist, a speech therapist and a nurse shall be reasonably available.

(b) A school year for the severely multiply impaired shall include a minimum of 230 days and 1,150 clock hours of instructional activities.

(c) The program shall emphasize treatment of the total child rather than service to any single handicap in isolation.

(d) Persons employed in severely multiply impaired programs shall have the following responsibilities:

(i) Instructors shall be responsible for the instructional program, shall coordinate the activities of instructional aides and other supportive personnel and shall maintain a systematic method of home-school liaison.

(ii) Instructional aides shall work under the supervision of the instructors and assist in the daily program for not more than 3 pupils.

(iii) Program assistants shall be utilized where necessary and shall have the responsibilities indicated for program assistants in severely mentally impaired programs in rule 38; otherwise instructional aides shall have such responsibilities."

R 340.1749

"Rule 49. The teacher consultant for special education:

(a) Shall provide services to pupils who have been identified as handicapped according to rules 3 to 14.

(b) Shall provide services to pupils whose handicap is such that they may be educated effectively within a regular classroom if supportive service is provided to them.

(c) Shall provide consultation to regular classroom teachers who have handicapped pupils integrated into their classrooms.

(d) May provide educational services to handicapped persons in their home.

(e) May be employed as an itinerant staff person in 1 or more school buildings.

(f) Shall carry an active case load of not more than 25 handicapped persons, and all persons served under this rule shall be counted as part of the active case load.

(g) May work with a regular classroom teacher for a total of not more than 10 consecutive school days to evaluate the educational needs of a person suspected of having an impairment as defined in rule 2."

R 340.1750

"Rule 50. Each intermediate school district shall employ or contract for the services of a director of special education. Local districts may employ or contract for the services of a director of special education in accordance with the intermediate district plan. For the district to qualify for reimbursement, the director shall perform such full-time duties as the development, organization, and administration of special education programs and services, the planning and conducting of inservice education programs, the development and maintenance of continuous evaluation procedures for special education, the liaison with school staff and the community, the preparation of special education reports, and other duties related to special education as assigned."

ADMINISTRATION

R 340.1751

"Rule 51. A supervisor of special education instructional programs, or other equivalent title, may be employed and shall perform in an administrative, supervisory, or consultative capacity for the instructional phases of specific areas of special education. The persons shall perform such full-time duties as supervising and advising teachers providing instructional programs for the handicapped, assisting in the planning and conducting of inservice education programs, providing consultative services to the entire staff of the district and others concerning the instructional phases of specific areas of special education, and other administrative duties relating to special education as assigned. While primary responsibility is supervision of personnel providing instructional services in special education, duties may include the supervision of ancillary special education personnel."

R 340.1752

"Rule 52. A supervisor of special education ancillary services, or other equivalent title, may be employed and shall perform in an administrative, supervisory, or consultative capacity. The person shall perform such full-time duties as supervising and advising ancillary personnel providing services for the handicapped, assisting in the planning and conducting of inservice education programs, providing consultative services to the entire staff of the district, and other administrative duties relating to special education ancillary services as assigned."

R 340.1781

"Rule 81. For full or temporary approval by the state board of education a teacher shall meet the requirements in rules 82 to 89 prior to employment by an intermediate school district, constituent district or other agency operating special education programs and services."

R 388.222

IDENTIFICATION

"Rule 2. (1) Pupils shall be selected from each of the grades K-6 on the basis of having extraordinary need for special assistance in the basic cognitive skills.

(2) Pupils in grades 2-6 shall be considered to have extraordinary need if they meet any of the following criteria:

(a) They score 1 or more years below grade level in computation or communication skills on a standardized achievement test instrument administered between September 1 of the previous school year and October 31 of the year of selection.

(b) They demonstrate mastery of 40% or fewer of the objectives on the reading or mathematics tests of the Michigan education assessment battery for the previous school year.

(c) If neither criteria (a) nor (b) is available, they score 1 or more years below grade level on a standardized achievement test instrument administered prior to September 1 of the prior school year.

(d) If (a), (b), or (c) is not available, it is the attested judgment of a school teacher or school official that the pupil is in need of substantial improvement in basic skills.

(3) Pupils in grades K-1 shall be considered to have extraordinary need if it is the attested judgment of a school teacher or school official that the pupil is in need of substantial improvement in readiness skills. In making this judgment, a teacher shall consider available test information.

R 388.261, R 388.262, R 388.263, R 388.264, R 388.265

A school district, to be eligible for assistance in a program of transcription of educational materials into braille under section 388.622 of the Compiled Laws of 1948, shall administer an approved program for the blind or partially seeing or shall administer teacher counselor programs. The teacher counselors shall be certified and approved to teach the blind or partially seeing. Eligible school districts may jointly administer a program.

Only a person who is certified by the library of congress to prepare braille materials and who is an approved teacher of the partially seeing shall teach others how to prepare materials.

The department of education shall approve the costs of salaries for teachers to teach others to transcribe books into braille, the costs of books, and the costs of transcriptions.

The superintendent of the school district administering the preparation of instructional materials shall select materials according to the following guidelines.

The materials shall be of the same quality as materials used by the sighted and shall meet the standards of the library of congress or those of the department of education.

Identical materials or those proposed for reproduction shall not be readily available.

Permission for reproduction shall be granted, as indicated on an official list available from the American Printing House or the Library for the Blind and Physically Handicapped

in the department of education. A statement of intent and a list of reproduced materials shall be filed with the American Printing House for the Blind in the department of education.

Materials shall be suitable for the specific needs of eligible pupils.

A district shall submit a proposed budget annually for administering a program of transcription of materials into braille to the department of education for approval prior to any expenditure of funds. An audited cost statement shall be submitted to the department with the approved expenses incurred in transcription of materials.

R 388.411, R 388.412

A pupil shall be selected for learning disabilities services by decision of a local planning committee based upon a comprehensive psychological examination by a school psychologist. A learning disability means a disability which interferes with educational development of a pupil. It may be manifested in disorders of listening, talking; reading, writing, spelling or arithmetic.

The committee shall include but need not be limited to, the pupil's classroom teacher, the instructional program administrator, and a learning disabilities teacher.

A pupil shall not be eligible for service from a learning disabilities teacher if the pupil is provided with a special education program

R 388.415

"Rule 5. (1) The case load of a learning disabilities teacher providing fulltime direct supplementary instruction shall be not more than 50 pupils. If the teacher is employed less than fulltime in such instruction, the case load shall be proportionately reduced.

(2) Not less than 1 day a week, or its equivalent in time, shall be used by a learning disabilities teacher for consultation with school staff members and parents and for inservice training."

R 388.416

"Rule 6. A school district establishing a learning disabilities program under the state school aid act of 1972 shall submit to the state board of education a tentative budget, projected program objectives and evaluation design for the program as part of its application. The state board of education shall require reports and evaluations of such programs as it deems necessary."

2. Programs for Exceptional Children

Statutes

§120.17

Every district shall provide special instruction and services for handicapped children. "Special instruction . . . may be provided by one or more of the following methods: (a) "Special instruction and services in connection with attending regular elementary and secondary school classes; (b) The establishment of special classes; (c) Instruction and services at the home or bedside of the child; (d) Instruction and services in other districts; (e) Instruction and services in a state college laboratory school or university of Minnesota laboratory school; (f) Instruction and services in a state residential school or a school department of a state institution approved by the commissioner; or by any other method approved by him[her]; (g) Instruction and services in other states; (h) Contract with public, private, or voluntary agencies.

The state board shall promulgate rules relative to qualifications of essential personnel, courses of study, methods of instruction, pupil eligibility, size of classes, rooms, equipment, supervision [and] parent consultation . . . . RULEMAKING

If a district does not provide such special instruction the parent or guardian may apply to the commissioner for such instruction. If the instruction is outside the district of residence, transportation, board, lodging and tuition shall be paid for by the district of residence. The commissioner may set the tuition."

Districts may enter into agreements to provide special instruction for handicapped children. Parents may send handicapped children to the school of their choice.

Responsibility for the temporary institutionalization of a handicapped child shall be determined by: (1) the school district in which the child's parents are legal residents; (2) costs for instruction in the institution shall be borne by the department to which the institution is assigned.

If a child residing in an institution may "benefit from public school enrollment," his/her tuition and other costs shall be paid to the school which he/she is temporarily attending by the district where the child's parents are legal residents.

TUITION

Any unreimbursed special transportation costs shall be paid by the state to the school which the child is temporarily attending. When a school district of legal residence cannot be established because the parents reside outside the state, or because the parental rights have been terminated by court order, the child's legal residence shall be the school district in which he/she resides and that district shall offer the same program to the child as it provides for all resident handicapped children in the district.

§120.61

School boards, with the approval of the state board of education, may establish a flexible school year program for handicapped children.

§128A.02 -- 128A.03

The state board of education is responsible for the control, management and administration of the Minnesota school for the deaf and the Minnesota braille and sight-saving school. The board may promulgate rules regarding the operation of both schools and the individuals in attendance. The state board may employ personnel to provide services in the schools. Teachers employed at these schools shall be subject to the standards of the board of teaching and the state board of education.

SCHOOL FOR THE DEAF AND THE BLIND

The state board of education shall appoint an advisory council for the school for the deaf and for the school for the blind to advise the state board on policies per-

taining to the control, management, and administration of these schools. Each advisory council shall consist of seven members, and include parents of the children involved.

§128A.05

Any individual between four and 21 years old, who is deaf or hard of hearing may attend the school for the deaf if it is determined that the hearing impairment is such that education in regular or special classes cannot be achieved satisfactorily.

ADMISSIONS

The school for the blind is open to individuals between four and 21 who are blind or partially seeing, and who cannot achieve a satisfactory education in a regular or special classroom.

§128A.06

Each school shall have an admissions and discharge committee comprised of five members knowledgeable in the fields of hearing impairment or visual disability. The district where the child resides shall make application for admission to the committee, which shall review the child's records and needs. The progress of an individual in attendance at either school shall be periodically evaluated by the professional staff of the school. Actions and decisions of the admissions and discharge committee are subject to review by the commissioner.

REGULATIONS

EDU 120 -- 122

Handicapped children shall have access to free public education which is suited to each child's individual needs. Such students shall be educated with non-handicapped students whenever possible. An assessment of the students' needs, goals, performance and procedural safeguards whenever changes occur in placement or service shall be provided by the district.

Classrooms and facilities used by handicapped children shall be constructed, designed or renovated to meet their needs.

Districts shall submit plans for providing special instruction and services for handicapped pupils to the commissioner.

EDU 124 -- 127

School districts shall develop systems for categorizing all handicapped children with regard to age and educational placement. The district shall designate a team for determining the educational needs of handicapped children and the development and content of program plans. Periodic review of these programs shall be conducted. The performance or refusal to perform such an assessment shall be communicated to the parents or guardians of handicapped children and a written response of approval or objection shall be allowed the parent.

PLACEMENT

EDU 128 -- 129

If a written objection is made the school district shall arrange a conference to review the reasons for the proposed change of a student's program. If conciliation is not reached, a hearing must be held.

HEARING

STATUTES

§37-23-1

"The purpose (of the sections relating to exceptional children) is to provide competent educational services and equipment for exceptional children for whom regular school facilities are not adequate. This specifically includes but shall not be limited to, provision for day schools for the deaf and blind . . . under six years (of age), where early training is in accordance with the most advanced and best approved scientific methods of introduction, always taking into consideration the best interests of the child and his[her] improvement...."

SCHOOLS FOR DEAF/BLIND

§37-23-3

"An exceptional child shall be defined as any child of educable and trainable mind . . . under twenty-one years of age for whose particular needs institutional care and training are not available in this state or who cannot or should not pursue regular classwork because of defective hearing, vision, speech, mental retardation or physical handicap or because of the possession of an exceptionally high degree of intellect, ability or creative talent. Such children shall be determined by competent professional persons in such disciplines as medicine, psychology, special education, speech pathology and social work . . . . Such professional persons shall be approved by the state department of education."

§37-23-5

"The state department of education is . . . empowered to foster, inspect and administer a program of education for exceptional children . . ."

§37-23-7

"Any school district where properly interested persons or agencies or parents or guardians of five or more of any one type of exceptional children or of

types which may be taught together, with the exception of those children possessing an exceptionally high degree of intellect, ability, or creative talent, petition . . . the governing board of the district for . . . special . . . classes, the school authority shall request . . . the state department of education to cooperate in securing a screening team, approved by the state department of education, to diagnose and evaluate the exceptional children . . ."

EVALUATION

If the screening team recognizes five or more exceptional children of any type that can be taught together, the appropriate school authority shall request the state department of education to assist in establishing necessary classes. "Two or more school districts may join and contract to establish 'special classes'".

§37-23-31

When at least five children of "educable mind under the age of twenty-one cannot have their needs met in a "regular public school program due to "deafness, aphasia, emotional disturbance and/or other low-incidence conditions," and a program geared to their special needs is not available in their local school district, "a state-supported university or college" shall be empowered to provide an educational program for these children, provided the program is approved by the state department of education. The "state-supported university or colleges shall then be empowered "to provide facilities, employ and contract with teachers, supply textbooks and other instructional equipment and appliances," and otherwise furnish and supervise an educational program pursuant to rules and policies of the state board of education.

Any state supported university or college that conducts a full-time medical teachers program approved by the state board of education may contract with "any private school or non-profit corporation supported

institution, the Mississippi school for the deaf, or any state-supported institution [furnishing] special education . . . provided the private school or institution" has conducted such a program at "standards acceptable to the state department of education" for at least one year before the college or university wishes to contract for "special educational services."

§37-23-63

"Every child who is a resident citizen of the state of Mississippi of educable or trainable mind under twenty-one years of age, who cannot pursue regular class work due to reasons of defective hearing, vision, speech, mental retardation or other mental or physical conditions as determined by competent medical authorities and psychologists, who has not finished or graduated from high school, shall be eligible to receive state financial assistances."

§37-23-65

The state department of education shall administer the financial assistance program "consistent with the maintenance of high quality programs for the benefit of the exceptional children served."

§37-23-69

"The state department of education shall have the power to determine and pay the amount of . . . financial assistance . . . and . . . to prescribe classifications of applicants and programs developed. Financial assistance shall not exceed the actual amount of tuition and fees and shall not exceed one thousand dollars per child annually.

§37-23-91; 93; 95

Certain counties may establish children's development centers for county children "who are mentally or physically retarded or are otherwise unable to attend public school, including, but not limited to any child of educable or trainable mind under twenty one years of

age for whose particular educational needs institutional care and training are not available in such county, or who cannot pursue regular classwork due to reason or reasons of defective hearing, vision, speech, mental retardation or physical conditions, as determined by competent medical authorities and psychologists who are approved by the state board of education . . . .

Any such child . . . in such county shall be eligible to attend the center regardless of the school district within the county in which he[she] lives . . . ."

The county board of education is empowered to employ teachers and personnel to manage the child development center.

§37-23-123

The intent of the legislature in enacting the provisions below "is to develop and make available to children of this state who are experiencing learning problems or show evidence of potential learning problems a comprehensive program of services that will raise the quality of education for all children . . . who are in need of such services.

The intent of the legislature is not to displace existing screening teams, but to organize, mobilize and coordinate existing resources in the state for diagnostic services, while going into remote areas and rural sections where such resources are not available or within reasonable proximity. This service is extended to complement the services presently available from the state department of education and other agencies."

§37-23-125

"The department of education shall adopt and promulgate . . . rules and regulations . . . necessary to implement and administer" the program to detect learning problems.

RULEMAKING

§37-23-127

(1) "The state superintendent of education shall appoint a learning resources advisory committee

not to exceed thirty members as the superintendent . . . deems proper from . . . the following groups:

(a) Professional educators actively engaged in the education of children or youth in the administration of programs for exceptional youth and children;

(b) Professional educators in higher education dealing with exceptional children and youth and related areas,

(c) Parents of exceptional children or youth."

(2) The committee shall meet regularly and it and it shall be purely advisory.

§37-23-131

To implement the special education provisions, the department shall have the following duties:

(a) "To establish in various areas of the state . . . a team of full-time professional qualified persons trained . . . in the disciplines of psychology, speech and hearing, special education and social work." One team shall be assigned to each area and shall provide "diagnostic, screening and prescriptive services to all children " or youth (needing) such education related services;

SCREENING

(b) To contract for or purchase services of clinical and medical specials . . . when . . . needed.

(c) To consult with school personnel, parents and agencies concerned with children and to serve as resource personnel to which such persons or agencies may consult [with]. . .

(d) To serve as a resource in programs of preservice and inservice training of teachers.

(e) To disseminate information to the public with regard to children who experience learning problems."

§37-23-151

This section establishes a program to register children under twelve with impaired hearing or eyesight

with the intent that such identification may assist them "in obtaining education, training, medical attention and other assistance to enable them to become more productive citizens . . ."

§43-5-3

SCHOOLS FOR DEAF/BLIND

"The government and control of the Mississippi School for the Deaf and the Mississippi School for the Blind shall be vested in a board of trustees consisting of nine members."

§43-5-7

SCHOOL VISITS

The board shall inspect the schools for the blind and deaf frequently. The two school superintendents shall be required to report monthly on the status of the schools and their pupils.

§43-5-13

BRAILLE

LIP-READING

"Braille print . . . shall be taught in the school for the blind." Lip-reading shall be taught at the school for the deaf.

§43-5-15

Both the school for the blind and for the deaf shall be open to those eligible to attend. Students generally shall not be admitted to either school if their auditory or visual acuity would be sufficient to attend regular public school. Children under the age of six may not attend the school for the blind. Neither institution shall admit a pupil "who is not a bona fide resident of this state or who is not of good moral character."

2. Programs for Exceptional Children

Statutes

§161.162

"The state board of education shall establish a section of special education within the division of public schools. Special education includes all schools and classes pertaining to the exceptional child. The board shall appoint, upon the recommendation of the state commissioner, a director to head the section of special education. The board shall define his[her] duties and fix his[her] compensation."

APPOINTMENT

§162.670 -- .710

Missouri public schools are required to provide all handicapped and severely handicapped children within 21 years of age a gratuitous education. Handicapped and severely handicapped children shall be educated with non-handicapped children in regular classes: "Each child assigned to a special education program shall be fully reevaluated on a regular basis." Children shall be placed in programs which best suit the needs of the child. The state board of education shall adopt regulations governing eligibility of children to attend half day. An advisory committee consisting of representatives of community organizations shall review special educational services. "The board of education . . . of each district shall take . . . special census of handicapped and severely handicapped children under twenty-one residing in the district. The state board of education may withhold state aid until the census results are received. If a school district fails or is unable to provide special educational services they shall contract with a nearby district for such services or with nonprofit organizations which meet standards established by the state board of education.

REEVALUATION

RULEMAKING

The state board of education may withhold any portion of state aid for failure to provide educational services. Transportation shall be provided for all

handicapped children residing within the district, including transportation to and from contracted day classes.

§162.715

"State aid shall not be granted unless professional personnel employed in special educational programs have been specially trained for work in the programs." The quality of programming and services shall be at least equal to that provided for children attending school in the district. Teachers are employed in accordance with standards established by the state board of education.

§162.720

Where there are a sufficient number of gifted children requiring accelerated programs, the district may establish special programs for such gifted children.

§162.725

The state board of education shall provide special education services for all severely handicapped children residing in school districts not included in special districts, providing they are unable to provide appropriate programs for severely handicapped children. Special educational programs shall be designed to develop pupils so that they may adjust to society as well as possible considering their handicap. Where special districts have been founded children shall be educated in their programs.

§162.730

The state board of education shall establish schools to provide special educational services for all severely handicapped children residing outside special school districts or in other districts providing such programs. Such programs shall be referred to as "state schools for severely handicapped children." The state board of education shall govern the state schools for the deaf and blind.

SCHOOLS FOR DEAF/BLIND

"The course of study of these schools shall be

of a character to develop the mental, physical, vocational, and social abilities of the pupils and to prepare those students capable of advancing for admission to post-secondary programs."

§162.735 -- .750

"The state department of education may assign severely handicapped children, except those residing in special school districts, to state schools for severely handicapped, blind, or the deaf. The state board of education may contract with another public agency or private agency when it is determined the arrangement would be in the best interest of the child. The parent or guardian of the child may appeal the assignment. Children not residents of the state may be admitted to these schools, if they have the capacity to receive them, and upon payment of full tuition and costs.

APPEAL

TUITION

§162.760 -- .770

"The state board of education shall appoint a section head and the other personnel to implement, effectuate and supervise programs for severely handicapped children, shall appoint the superintendent of the Missouri School for the Blind, and Missouri School for the Deaf, and upon the superintendent's recommendation appoint teachers, and employees, determine the number of teachers and employees, and fix their monthly compensation. The superintendent shall transmit desired reports to the board.

APPOINTMENT

§162.775

SCHOOL FOR BLIND

"The superintendent of the school for the blind shall have the eyes of every pupil admitted to the school carefully examined by the school physician or a certified opthamologist. If . . . it appears that by medical treatment or by surgical operation sight may be improved or restored, the superintendent after obtaining the consent of the parents or guardian, . . . when it is practicable to obtain their consent, shall institute the medical treatment or shall have the surgical

EXAMINATION

CONSENT

operation performed which in his[her] judgment is practicable and advisable. If the treatment or operation is successful, the pupil shall be discharged from the school . . . ."

§162.795 -- .805

APPOINTMENT

Five members of the board of advisors for the Missouri School for the blind and Missouri school for the deaf shall be appointed by the governor for terms of four years, and shall act in an advisory capacity in matters relating to the conduct, and improvement of the schools. Members shall be compensated $100 per annum and for their expenses. The commissioner of education shall appoint such state and area advisory committees . . . to make recommendations for various state schools for severely handicapped children."

§162.815

"In all areas of this state the voters may organize and create a special district for the primary purposes of: (1) educating and training handicapped and severely handicapped children residents within the special district and (2) providing vocational education for residents of the special district."

§162.825 -- .840

Special school districts for the education and training of the severely handicapped may be created through an election by the voters upon the initiation of a request by a petition signed by the voters equal to 5% of the votes cast in the last school board election.

§162.855

"The board of education of a special school district shall consist of six members . . . and is subject to the same liabilities as the board of a six-director school district. The board is vested with power to: "(1) establish and operate programs for the education of handicapped and severely handicapped children residing in the district subject to rules and regulations of the state board of education and the state department of education . . . (2) establish and

operate programs for the vocational education of residents of the district; (3) employ teachers and other personnel necessary to provide these programs . . ."

§162.880 -- .890

If there are a sufficient number of handicapped, severely handicapped, blind and deaf children in the district, the board of education of the special district may establish schools within the district, and determine whether a child is eligible for their programs. The special districts have exclusive responsibility and "shall be required to establish schools or classes for the training or education of handicapped or severely handicapped children under any other existing law."

§162.900

A special school district is entitled to state transportation aid for handicapped and severely handicapped children, and for the vocational education program. Free transportation shall be provided for children under 21 who reside in the special district and attend classes.

§162.915

"The board of education of a special school district may acquire by purchase, lease, gift, bequest, eminent domain or otherwise all necessary lands, buildings, equipment, and supplies including transportation facilities" for the education of handicapped, severely handicapped children and programs for vocational training. If the board for any reason cannot secure title, the board may condemn the property and in which case title shall rest in the special school district. School sites may be located in places within the district as deemed in the best interest of the district.

§162.940

"[T]he board of education of a special school district shall require of all resident students over twenty-one years of age and all nonresident students

desiring to participate in the programs of the special school district a tuition fee in an amount approved by the state department of education."

§162.945 -- .950

The board of education of the responsible special school district shall notify parents or guardians of every child diagnosed, evaluated, reevaluated or assigned to programs for the handicapped, blind or deaf, and of the recommended assignment. A parent or guardian will be permitted to inspect resources pertaining to the diagnosis and will be entitled to a hearing on the action pertaining to the child's record.

HEARING

§162.965

PLACEMENT

"The decision of the board of education regarding placement of a handicapped child of the district or the state board of education shall be final, except that any person aggrieved by the decision may appeal . . . [A] copy of the board's decision together with a copy of its findings of fact shall be mailed . . . to the parent or guardian . . . ."

APPEAL

§162.970

Handicapped children in programs provided by the division of mental health shall have the right to gratuitous education services for handicapped and severely handicapped children and shall not be denied admission to appropriate public schools or special school district where the child resides, because he/she is in a program provided by the division of mental health, and they shall not be precluded from providing services to such children.

§167.033

Handicapped and severely handicapped children between the ages of seven and sixteen years shall attend regularly some day school provided they receive special educational services. Home instruction shall be substantially equal to instruction given in special educational programs.

HOME INSTRUCTION

§178.710

The board of education of the special school district may establish schools or classes within schools for handicapped children. All costs of instruction shall be paid by the special school district. Children attending schools shall be included in the attendance records of the special district for the apportionment of funds in the same manner as 6 director school districts. The special school district may contract with any other public school district to integrate children in a special school district class.

§179.100

The county superintendent of schools, shall conduct a special census each year of all children within the county who appear to be physically or mentally handicapped, and information on those under 21 shall be recorded by the state department of education. The school boards of all three director school districts and the superintendents of all six director school districts shall assist in reporting those handicapped living in the districts, and the special census shall choose which children are receiving special training. Upon completion of the special census concerning the number of handicapped children residing within the district, the report shall be forwarded to the state department of education.

REGULATIONS

5 CSR 70-720.010

SPECIAL EDUCATION

Missouri School for the Deaf

SCHOOL FOR DEAF

To be admitted, the applicant must have a "severe-to-profound hearing loss;" be between the ages of 5 and 20; and the parents of the child must be bona fide residents of Missouri.

5 CSR 70-742.020

Each local school district is responsible for guaranteeing an "appropriate" educational program for every handicapped student and for providing appropriate special education services to these children.

TESTS

Pertinent records and tests must be obtained for each child prior to placement, and formal reevaluation of the placement shall be made every three years.

Local districts may provide programs for severely handicapped students. Approval of these programs will be based on the quality of the local program.. If no program is provided the local district shall refer severely handicapped students to the state division of special education. The local district shall pay a portion of the expense of state institutionalization of these students equal to the average per student cost spent by the local district.

5 CSR 70-742.030--.110

The State Board of Education shall provide services for severely handicapped students including a state school for the deaf and blind and a sheltered workshop facility.

To receive state approval, a local school district must offer a special education program that is "at least comparable" in quality, staffing and services to that offered to normal students in the district. Each district must formulate and implement a plan for special education. The plan should include diagnostic and screening provisions; employemnt of qualified special education personnel, ancillary professional personnel and teacher aides; appropriate vocational programs and support services.

Persons shall be responsible for maintaining records of handicapped students, education, health and progress. The responsible teacher shall write reports on each such student and develop a final written report at the end of the year or termination of the program.

If a child's needs would be better met by a part-time attendance, the superintendent shall develop procedures to

meet the educational needs of the child.

An educational resource teacher, one who assists the regular teacher in the diagnosis and educational programming for handicapped students, shall serve a class of between 15 to 25 students. Itinerent teachers, those who travel from class to class serving handicapped students, shall also handle a class of 15-20 students. The resource room teacher shall serve 10 to 15 students on the secondary level. The resource room teacher handles children who need special education only in specific subject areas.

The services of ancillary professional personnel may be provided for a period equal to 1/4, 1/2 or 3/4 of the school.

Local school districts may receive state reimbursement for transportation provided to handicapped students to the extent that such costs exceed the average cost of transporting regular students. The local district shall be reimbursed 1/2 of such excess costs.

Each local school district must file a census with the State Dept. of Educ of all handicapped children to include diagnosis information and current education status.

State financial assistance is available to school districts to develop early childhood special education programs for students 3-4 years of age. Those who have been diagnosed as having a mental physical or emotional disability are eligible.

5 CSR 70-742.120

A maximum of five percent of the district enrollment may be included in a gifted/talented program. Multiple criteria shall be used to identify such students. Instruction and educational experiences provided should be "individualized" and the curriculum offered should be "above and beyond the established curriculum" Each local program shall be submitted to the State Department of Education for approval and evaluation. Those approved shall be eligible for state funding.

STATUTES

§75-7510

If a pupil is unable "to attend school due to the isolation of his [her] residence or . . . mental or physical incapacity," district trustees "may provide supervised correspondence study." The district or county superintendent is responsible for supervision of the course.

CORRESPONDENCE STUDY

§75-7802 — 75-7804

"The conduct of special education programs shall comply with the policies recommended by the superintendent of public instruction and adopted by the board of (public) education. These policies may include . . . regulation of class size, class grouping, curriculum, methods of instruction, teacher qualifications, distances of travel to classes . . ., necessary equipment and other special services." The superintendent of public instruction "shall supervise . . . the conduct of special education in the state by:"

(1) recommending policies to the board and administering board policies; (2) "certifying special education teachers on the basis of . . . qualifications . . . prescribed by the board;" (3) identifying children needing special education, "determining the type of instruction required . . . and preparing appropriate curriculum guides . . . [and] "seeking appropriate medical . . . and psychological assistance from . . . public agencies" in identifying and diagnosing children and planning programs; (4) recommending special education programs or classes to districts and approving classes or programs in compliance with state law, board policies and the regulations of the superintendent of public instruction; (5) supervising and "consulting with district superintendents, principals, teachers and trustees . . . and . . . co-operating with parents;"

(6) co-ordinating federal, state and other public agencies and "private bodies on matters concerning special education . . . and . . . establishing regional special education services." The superintendent of public instruction shall be assisted in identifying children, planning programs, and "generally supervising and co-ordinating special education" by the state department of health, the department of institutions, and the state school for the deaf and blind.

§75-7805

District trustees must operate "at least one applicable special education program" if there are at least ten educable mentally retarded children, at least seven trainable mentally retarded children, and/or at least ten physically handicapped children in the district. After July 1, 1979 all district boards must provide "a special education program for every handicapped person . . . between the ages of six and twenty-one . . . who cannot benefit sufficiently from the regular programs of instruction by reason of . . . mental, physical, emotional or learning problems." A district board may establish its own program, a co-operative program, or participate "in a regional services program" to "meet its obligation to serve handicapped persons." Eligibility for special education programs is "determined under regulations of the superintendent of public instruction."

§75-7806 -- 75-7807

District trustees may establish a special education program for: (1) four or more educable or trainable mentally retarded or physically handicapped children, or "educationally handicapped persons between "ages 6 and 21; (2) individual children requiring . . . home or hospital tutoring . . . or other individual programs;" (3) educable or trainable mentally retarded and educationally or physically handicapped children under age 6, if the superintendent of public instruction determines that such programs will assist the child to

participate "in the regular instruction of the district, or . . . provide other . . . educational advantages which will . . . benefit the child;" (4) educable mentally retarded and educationally or physically handicapped persons between ages 21 and 25 if "such programs will assist a person . . . to better participate in society."

Parents of four or more persons requiring one kind of special education program may petition a district board to establish a program. Parents living in several districts may petition each board to establish a co-operative program. "The inter-local co-operative agreement . . . may be used to establish a multi-district special education program."

§75-7808 – 75-7810

"In lieu of providing special education in the district the trustees may arrange" for a child to attend a program in another district of the state or a "program offered outside of the state." No tuition is charged to the resident district if the child attends a program in another district of the state; if the program is out-of-state, the "trustees may negotiate the . . . payment of tuition." If a child attends a state institution, the resident district or county is not required to pay tuition; however, if "such child attends classes conducted by a school within a local district, the resident district or county of the child's parents must "pay tuition to the district or county operating the school . . . . Transportation payments shall be made for students enrolled in such classes or receiving training . . . at the state institution."

TUITION

§75-7811

"The determination of the children requiring special education and the type of special education needed . . . shall be the responsibility of the superintendent of public instruction," who must approve any program or class that the trustees of a district wish to establish. "Each special education class or

program must be approved annually."

§75-7812

"No mentally retarded . . . or physically handicapped child shall be excluded from an approved special education class or program unless" class enrollment has reached its maximum, or "the child's intellectual ability, age or behavior pattern is not compatible with the class, as determined by the superintendent of public instruction" with appropriate assistance. In the latter case the trustees must arrange for provision of "adequate protection and care" with the local welfare department and department of institutions, "so far as the parents are willing to accept such services."

§75-7815

Districts operating special education programs and providing transportation in compliance with the regulations of the superintendent of public instruction are eligible for transportation reimbursement. The state provides two-thirds and the resident county one-third of the reimbursement.

§75-7816

A "district operating an approved special education class or program" for children under six or persons between 21 and 25 years of age is eligible for state financial assistance and transportation reimbursement.

§80-110

When taking the required school census, districts "shall use reasonable diligence to ascertain the number of blind and deaf children" between ages five and 18 resident in the district. The names and addresses of all such children and their parents shall be forwarded by the county superintendent to the superintendent of the Montana state school for the deaf and blind.

§48-2.18(1)-S1800

A planned and coordinated program of special education is required by the Board of Public Education. The special education program shall provide opportunities for comprehensive services to handicapped children and youth. The program, supervised and coordinated by the Superintendent of Public Instruction, shall be developed in cooperation with school district personnel and others from the educational community. The program shall incorporate the many educational arrangements which can be designed to integrate young handicapped persons, whenever possible, into the regular educational program and eventually into the mainstream of society. The program shall assure that careful and systematic procedures are used to identify and diagnose young handicapped persons. The program shall include measures to assure fiscal accountability of funds provided for the operation of special education.

The Special Education program shall assist all handicapped children and youth in developing their maximum education and social potential. The Board of Public Education encourages special education programs that enable handicapped youth to become partially or completely self-sufficient in our increasingly complex society. The Board of Education's intent is that young handicapped persons will be given opportunities to become contributing, confident, dignified and self-reliant human beings. The policy is based on the premise that the right of a young handicapped person to the special education he or she needs is as basic as the right of any other young citizen to an appropriate education in Montana schools.

§48-2.18(1)-S1810

Special education should be considered one component of the regular education program. Services provided through special education should supplement rather than supplant the regular education program. Equal opportunity to an education does not mean identical programs

EQUAL OPPORTUNITY

for all individuals; it means the use of special methodologies and strategies to develop the full educational potential of a handicapped individual. The handicapped student may require the assistance of special professionals, unique curriculum content, and alternative procedures and materials to develop this full potential and to be assured equal educational opportunity.

§48-2.18(2)-S1820

The conduct of special education in the public schools must comply with the policies recommended by the Superintendent of Public Instruction and adopted by the Board of Public Education.

§48-2.18(2)-S1830

PROGRAM APPROVAL

Authority for approval and disapproval of programs is given to the Superintendent of Public Instruction. Programs must be in compliance with the laws of Montana, Board of Public Education policies, and regulations of the Superintendent of Public Instruction.

Trustees of local school districts cannot operate any special education program without approval from the Superintendent of Public Instruction.

In the event that special circumstances exist which prohibit a local district from following the regulations of the Superintendent of Public Instruction, a special request must be sent to, and approved by, the Superintendent of Public Instruction prior to implementation.

§48-2.18(2)-S1840

ASSESSMENT

If a school district encounters difficulty in assessing children on a timely basis with staff employed by the district, funds may be approved for hiring staff to perform assessment of children during the summer if:

(a) evidence of a need for assessment during the summer is provided.

(b) a special request is made by the district to the Superintendent of Public Instruction indicating the number and type of persons to be employed during

the summer; the estimated number of children to be assessed; the estimated length of time assessment persons are required and the total cost of the summer assessment program.

§48-2.18(6)-S1850; S1860; S1870; S1880; S1890; S18000; S18010

"Special education" means specially designed instruction, given at no cost to the parents or guardians, to meet the unique needs of a handicapped child, including but not limited to classroom instruction, instruction in physical education, home instruction and instruction in hospitals and institutions. It includes speech pathology, audiology, occupational therapy and physical therapy.

"Handicapped child" means a child evaluated as being mentally retarded, hard-of-hearing, deaf, speech-impaired, visually handicapped, emotionally disturbed, orthopedically impaired, other health-impaired, or as having specific learning disabilities, who because of those impairments needs special education and related services.

"Mentally retarded" refers to a person with significant subaverage general intellectual functioning, which originated during the developmental period and who does not exhibit acceptable adaptive behavior. All three criteria must be met before a person is so classified. Subaverage general intellectual functioning is regarded as approximately 1.6 standard deviations below the population mean (I.Q. of approximately 75) for the age group involved as determined by an individual test of general intellectual functioning.

"Orthopedically impaired" means a severe orthopedic impairment which adversely affects a child's educational performance. The term includes impairment caused by congenital anomaly, impairments caused by disease and impairments from other causes.

"Other health impaired" means limited strength, vitality, or alertness due to chronic or acute health problems such as a heart condition, tuberculosis, rheumatic

fever, nephritis, asthma, sickle-cell anemia, hemophilia, epilepsy, leukemia or diabetes.

§48-2.18(10)-S18060

EXEMPTION

The compulsory attendance law applies to all children including handicapped children. To exempt a handicapped child from compulsory attendance, an excuse providing specific rationale demonstrating that the child cannot attend school because of the child's present bodily or mental condition is to be issued at the request of a parent or guardian. The excuse may be issued by the district superintendent or county superintendent when there is no superintendent employed by the district.

§48-2.18(10)-S18070

All handicapped children in Montana are entitled to a free appropriate public education provided in the least restrictive alternative setting. To the maximum extent appropriate, handicapped children, including children in public or private institutions or other care facilities, shall be educated with children who are not handicapped. Separate schooling or other removal of handicapped children from the regular educational environment may occur only when the nature or severity of the handicap is such that education in regular classes with the use of supplementary aids and services cannot be achieved satisfactorily.

The board of trustees of every school district must provide or establish and maintain a special education program for every handicapped person between the ages of 6 and 18 inclusive. After September 1, 1980 such services shall be provided for all handicapped children between the ages of 3 and 21, inclusive.

The board of trustees of any school district may meet its obligation to serve handicapped persons by establishing its own special education program, by establishing a cooperative special education program, or by participation in a regional services program.

§48-2.18(10)-S18090

The parents of persons requiring special education may petition the board of trustees to establish an individual district special education program. Parents residing in several districts may petition the board of trustees of each district to cooperatively establish a special education program. The interlocal cooperative agreement authorized by statute may be used to establish a multi-district special education program.

§48-2.18(14)-S18100

"Parent" includes a parent, a guardian, a surrogate parent or a person acting as a parent of a child in the absence of a parent or guardian. The term includes persons acting in the place of a parent, such as a grandmother or stepparent with whom a child lives, as well as persons who are legally responsible for a child's welfare.

IDENTIFICATION

Local school districts shall advise parents annually of the procedures for identification, location, referral and screening of preschool and school age population. Such notice must be given through newspapers, student handbooks or letters to parents to ensure that parents of all children are informed of the procedures.

NOTICE

All written notices must be in language understandable to the general public and provided in the native language of the parents, unless it is clearly not feasible to do so. Where the native language of the parents is not in written form, interpretation shall be provided in the native language. When necessary, arrangements shall be made to facilitate communications with hearing and visually impaired parents.

§48-2.18(14)-S18110

If there is reason to believe that a preschool or school age child is in need of special education services, written permission must be obtained by the local agency from the parents before the process of individual

EVALUATION

evalution, interviewing or formal testing can begin, and again upon reevaluation. The annual review of the Individualized Education Program is exempt from the requirement for parental approval for evaluation.

Written parental approval applies only to those procedures used selectively with an individual child and not to basic tests administered to all children in school.

NOTICE

Prior to an evaluation or a reevaluation, a written notice of intent to conduct an evaluation/reevaluation shall be delivered to the parent during a personal conference or by certified mail. The written notice must be written in language understandable to the general public and provided in the native language of the parents. Where the native language is not in written form, interpretation shall be provided orally in the native language. Oral interpretation shall always be made available in the native language of the home and in English. When necessary, arrangements shall be made to facilitate communication with hearing and visually impaired parents.

(a) The notice of Intent to Conduct an Evaluation must include a full explanation of all of the procedural safeguards available to the parents; a description of the action proposed or refused by the agency, an explanation of why the agency proposes or refuses to take the action, and a description of any options the agency considered and the reason why those options were rejected, a description of each evaluation procedure, test, record or report the agency uses as a basis for the proposal or refusal and a description of any other factors which are relevant to the agency's proposal or refusal.

(b) The notice of Intent to Conduct an Evaluation must be written in language understandable to the general public, provided in the native language of the parent or other mode of communication used by the parent, unless it is clearly not feasible to do so.

(c) If the native language or other mode of communication of the parent is not a written language,

the local educational agency shall take steps to insure that the notice is translated orally or by other means to the parent in his or her native language or other mode of communication, that the parent understands the content of the notice and that there is written evidence that the requirements in (a) and (b) have been met.

Written parental consent to conduct the evaluation must be obtained prior to the evaluation process. In addition to written parental permission to evaluate and reevaluate, the local agency should obtain written parental acknowledgement of receipt and understanding of the notice of intent.

§48-2.18(14)-S18120

PLACEMENT

Within 30 days after completion of the Child Study Team evaluation, a designated school district official shall inform the parent in an appropriate mode that a change in the educational status of the child is proposed or that a requested change in placement is denied. Notification shall be made by personnel conference, or if that is not possible, by certified mail. Written notifiction must be in language understandable to the general public and provided in the native language of the parents. The child should be informed of and helped to understand, if capable, the educational change. The parent must be invited to participate in the conference for developing the individualized education plan if the child is to be placed in a special education program. The form to be used to notify parents of the proposed change in the educational placement/program or to deny initiation of a requested program should be included.

The notice of placement/program change should include a description of the proposed educational program, the reasons why the proposed placement is deemed appropriate or why the requested program is being denied and the reasons why it is the least restrictive program setting appropriate for the education of the child; a description of any tests, reports or evaluation procedures on which

the proposed education placement is based or the requested educational program is being denied; a statement that the school reports, files and records pertaining to the child shall be available for inspection to the parents or their designee as indicated in writing; a description of the right of the parent to obtain a hearing if there are objections to the proposed action or nonaction emphasizing that the parent need not accept the proposed decision when there is disagreement with the proposed alternative program; a detailed description of the procedures the parent should use to appeal a hearing decision; an explanation stating that if the proposed action is rejected by the parent, the child shall continue, temporarily, in the current placement unless the current placement endangers the health or safety of the child or other children and/or substantially disrupts the education programs of other children.

A child shall continue, temporarily, in the current placement whenever parents do not give written consent for a change in their child's educational program, except in a case where the current placement endangers the health or safety of the child or other children and/or substantially disrupts the educational programs of other children or if applying for initial admission to a public school, shall with the consent of parents or guardian, be placed in the public school program until all such legal proceedings have been completed.

§48-2.18(14)-S18130

CONFIDENTIALITY

School records and confidentiality of information must follow the same provisions established for regular education under the Family Education and Privacy Rights Act.

§48-2.18(14)-S18140

PUBLIC NOTICE

The Superintendent of Public Instruction shall, through the state's five major newspapers advise the public of policies and procedures that have been established by the Superintendent's office to protect confidentiality

of child identification data collected and maintained through the state's annual identification and location of handicapped children and youth. Data items to be collected and maintained by the Superintendent of Public Instruction on an ongoing basis will be limited to the children's initials, birthday, sex, school district and handicapping condition, except for programs in state-operated schools.

Educational agencies shall provide public notices advising the public of procedures established by the local school district board of trustees to protect confidentiality of the children's records. Data items to be collected and maintained by local school districts will include, professional diagnostic information, services needed and provided, and items related to cost accounting. If other personally identifiable information is to be collected in the future, the district shall advise parents. Parental consent is needed if data is to be used for a purpose other than for which it was collected.

Each participating school district and/or other participating agencies will be required to provide the Superintendent of Public Instruction with a written notice which will assure the Superintendent that personally identifiable data collected by that agency will be maintained in a confidential manner.

In accordance with local board of trustees policies, each educational agency must establish written procedures to ensure that parents or the student after reaching the age of majority shall have the option to request destruction of their or their child's confidential records five years after termination of special education services, after reviewing them. Otherwise the LEA shall keep the records for 5 years beyond legal school age (21). Reasonable effort shall be taken by the agency maintaining personally identifiable data to provide parents with notification 60 days prior to its destruction and the parents will be offered the opportunity to receive a copy of such records.

Standards 161 and 162, Standards for Accreditation of Montana Schools shall also be followed by Montana schools.

48-2.18 (14)-S18150

PROTECTION IN EVALUATION PROCEDURES.

"(1) Each educational agency shall establish procedures to assure that. . .procedures used for evaluation and placement of handicapped children are selected and administered so as not to be racially or culturally discriminatory. . .

EVALUATION

PLACEMENT

(2) The procedures. . .shall be established in accordance with the following criteria:

(a) Evaluation and placement procedures are administrated in accordance with. . .[statutory]. . .safeguards. . .

(b) The determination of a child's need for special education. . .is based on a comprehensive evaluation, which may include. . .:

(i) an individual psychological examination,

(ii) relevant physical information,

(iii) appropriate achievement testing and evaluation of classwork,

(iv) direct observations in a variety of functioning environments,

(v) assessment of the social skills and emotional status and

(vi) interviews with, or information provided by, important and involved persons in the child's life.

(c) Tests and other materials and procedures used. . . have been properly and professionally evaluated. . .

TESTING

(d) The evaluation materials and procedures are provided and administered in the child's native language or mode of communication,. . .

(e) Steps are taken to assure that. . .test[s]. . . accurately reflect. . .the child's ability in the area tested and not the child's impaired communication skill or the fact that the child is not skilled in English.

(f) Whenever individual intelligence tests are administered, steps are taken to assure that judgments about the child's placement are not based solely on an I.Q. score. . .

(g) The cultural differences of a child are taken into account. . .

(h) No single test or type of test or procedure is used as the sole criterion for determining. . .[placement]. . .

(i) The. . .determination of the educational placement of the child is made by a team or group of persons.

(j) All relevant information with regard to the functional abilities of the child is utilized in the placement determination."

48-2.18 (14)-S18160

INDEPENDENT EDUCATION EVALUATION.

INDEPENDENT EVALUATION

"(1) Parents shall have the right to an independent educational evaluation of their child. . .

(2) Requests. . .should be made to district superintendent. The parents must state the reason(s) for their request. . .The local school district. . .is responsible for the financial expense of the independent evaluation. . .

(3) The following is a delineation of responsibility of the parents, district or county superintendent and the Office of Public Instruction in an independent education evaluation:

(a) Parents.

(i) The parents must direct. . .[the]. . .request. . . stat[ing] the reason(s). . .[therefore]. . . .

(ii) The parents must allow the local school district to complete a current evaluation. . .before requesting an independent evaluation.

(iii) The parents must sign a consent for[m]. . .

(iv) The parent must sign a release of information. . . [form]. . .All records and information from the independent evaluation become part of the child's school record.

(b) District Superintendent

(i) Within 10 to 15 days of a request. . .the school district must submit a letter to the Office of Public Instruction stating. . .the parents' reason for an independent evaluation.

(ii) When necessary, the school district will contract

for the independent evaluation. This contract must have the prior approval of the Office of Public Instruction.

(c) Superintendent of Public Instruction

(i) The superintendent. . .will assist the school district and parents in securing an appropriate independent evaluation(s).

(ii) The Superintendent. . .will approve or disapprove the contract for independent educational evaluation. If. . . disapproved, an alternative independent evaluation(s) will be offered.

§48-2.18(14)-S18170

Each educational agency shall set forth procedures to assure that each child's individualized education program is reviewed and revised at least annually and that a comprehensive educational revelation of the child is conducted whenever conditions warrant, at least once every three years. A comprehensive educational evaluation will be made at the request of the child's parents or teachers.

REVIEW

§48-2.18(14)-S18190

Individual programs involving the use of restraint, shock, or seclusion shall be conducted only with the written consent of the affected student's parents and at the recommendation of the child study team and shall be described by specific behavioral objectives. Chemical restraint may never be used for punishment, for staff convenience or as a substitute for a program. Each use of physical restraint, aversive techniques or environmental seclusion shall be recorded in the student's file. This record shall include description of behavior to be modified, evidence that less aversive measures have been tried, expected behavioral outcome, actual behavioral outcome, a list of possible secondary effects, data for review or termination and written parental permission.

SHOCK THERAPY

§48-2.18(14)-S18200

Child Study teams shall assign a diagnostic label

DIAGNOSTIC LABEL

for each handicapped child following comprehensive evaluation. The label is to be used for reports required by the Office of Public Instruction. Educational agencies should not refer to students, teachers or rooms by diagnostic labels. Parents shall be informed of the diagnostic category as it relates to the handicapping condition of their child.

NOTICE

§48-2.18(14)-S18210

When parents question or express dissatisfaction with the details set forth in the notices that an educational agency provides them, the local education agency and Superintendent of Public Instruction shall attempt to clarify the question or resolve the difference directly with the parents by informal negotiation or procedure other than a formal due process hearing.

COMPLAINT

§48-2.18(14)-S18220

Each agency shall establish written procedures which provide for parental presentation of complaints with respect to any matter relating to the identification, evaluation, educational placement of the child, or the provision of a free appropriate public education for the child.

HEARING

§48-2.18(14)-S18230

"Whenever a complaint has been received, the parents shall have an opportunity for an impartial due process hearing.

APPEAL

§48-2.18(14)-S18240

Any party who has exhausted all administrative appeals and who has been aggrieved by the findings and decisions made in the hearing, or any party aggrieved by the reviewing officer's decision shall have the right to bring civil action with respect to the complaint presented.

COURT

The action may be brought in any state court of competent jurisdiction or in a district court of the United States without regard to the amount in controversy. The court shall receive the records

of the administrative proceedings, shall hear additional evidence at the request of a party, and basing its decision on the preponderance of evidence, shall grant such relief as the court determines is appropriate.

§48-2.18(18)-S18250

ASSESSMENT

Each school district must screen and develop criteria for further assessment for its students annually to determine potential candidates for special education and report the screening process to the Superintendent of Public Instruction. Each school district is responsible for developing a referral process. Youth who have been or are being considered for retention, delayed admittance or exclusion from school in the regular program shall be considered as a possible referral to a Child Study Team.

§48-2.18(18)-S18260

ASSESSMENT

No child shall receive special education service until a Child Study Team has performed an appropriate comprehensive assessment which yields evidence that the child has learning and/or behavioral problems requiring a specialized service not afforded by the regular program.

Areas of assessment shall include, when appropriate, scholastic, physical, and adjustment. Assessment results shall be summarized in writing, dated and signed by the individuals responsible for conducting the assessments. The report shall be kept with the child's permanent records.

Summaries shall include procedures and instruments used, results obtained and apparent significance of findings as related to the child's instructional program. Assessments in each of the areas stated shall take into account the age, maturation and cultural background of the child.

Since conditions which cause a child to be handicapped can have the effect of depressing or distorting standardized intelligence and achievement test scores, these scores should not be used as the only criterion

in determining a child's need for services. A Child Study Team in conjunction with the parents will determine the appropriate educational program for a handicapped child.

TESTING

Individual tests of mental measurement (IQ results) done by an agency recognized by the Superintendent of Public Instruction may be utilized by a Child Study Team. Psychologists participating on such a team must be approved by the Superintendent, too. When a school psychologist and Child Study Team utilize the test results of another agency or person, that school district assumes responsibility for accuracy of the psychological information.

An evaluation of the child, based on procedures which meet statutory requirements is conducted every three years or more frequently if conditions warrant or if the child's parent or teacher requests an evaluation.

§48-2.18(18)-S18270; S-18280

CHILD STUDY TEAM

A Child Study Team shall consist of a regular classroom teacher, principal, or designee, and the special education person who may serve the child. Parents may participate in the child study process. Generally, school psychologists and speech pathologists will complement any team. Utilization of other expertise is recommended and required in many instances. The Child Study Team may determine what other specialties may be needed to complete an appropriate evaluation.

Secondary school Core Child Study Teams will require other individuals at the discretion of the parents or agency to accommodate a particular student's needs.

Child evaluation relates to a process which involves a group of persons including the parents, who are charged with the responsibility of gathering all of the pertinent data possible regarding an individual child to determine whether the child is handicapped, what the child's education needs are and what service options might be best utilized to deliver the services to the child.

Individual members of each Child Study Team shall

conduct their part of the evaluation as appropriate to their professional skills and training, and shall summarize in writing their evaluation results, identify the instruments or methods used to gain the data, and make recommendations for providing services to the child. The summary of the evaluation and recommendations are to be filed in the student's educational records, interpreted to parents and made available to the chairperson of the Child Study Team for educational planning.

Once a decision is made by the Child Study Team that a child is handicapped and is not receiving an appropriate education, the district has 30 days in which to initiate the appropriate changes in the child's program.

§48-2.18(18)-S18290

CHILD STUDY TEAM

In addition to the core team the composition of specific child study teams shall include the following:

(1) A school psychologist for a mentally retarded child.

(2) A physician's report and pertinent medical information obtained and utilized in the development of the child's individualized education program for the orthopedically impaired.

(3) A vision consultant should be utilized by the Child Study Team for a visually handicapped child when so indicated by the severity of the handicap. A current evaluation from an ophthamologist or optometrist shall be utilized also.

(4) A consultant for the hearing impaired, audiologist, and speech pathologist may be needed for a deaf and hard-of-hearing child. A physician's report and pertinent medical information shall be utilized.

(5) A speech pathologist for a speech/language impaired child. The speech pathologist may be the special education person on the core team.

(6) Other personnel as determined necessary for other health impaired children. Eligibility for the home-bound program must be documented by a physician.

(7) A school psychologist, a teacher or administrator with training or knowledge in the area of specific learning disabilities, a speech therapist when the speech therapist considers participation necessary and other appropriate professional individuals for children with specific learning disabilities.

(8) A qualified psychologist and/or a licensed/certified psychiatrist for the emotionally disturbed.

§48-2.18(18)-S18300

CHILD STUDY TEAM

Each Child Study Team member shall sign the Child Study Report and file in the child's folder. If a team member disagrees with the majority in a placement decision, a statement is to be prepared, signed, dated and included in the child's folder by the dissenting member. The statement is to be viewed as a potentially helpful alternative for the child.

§48-2.18(18)-S18310

EVALUATION

APPROVAL

Services provided directly to a child via special education shall begin only when a comprehensive Child Study Team evaluation has been conducted and when written parental/guardian approval of the written individualized education program has been developed. Written parental consent for special education placement shall also be obtained annually prior to placing the child in the program. The data gathered from the comprehensive educational evaluation conducted by the Child Study Team shall be utilized in the development of the individualized education program.

"Individualized education program" means a written statement for each handicapped child developed in a meeting by a representative of the local educational agency who shall be qualified to supervise the provision of the specially designed instruction to meet the unique needs of handicapped children, regular and/or special education teachers who have direct responsibility for implementing the child's individualized program, the parents or guardian of the child, and whenever appropriate, the child. The statement shall include at least: a statement of the

present levels of educational performance of such child (baseline data); a statement of annual goals; short term instructional objectives (psychomotor as well as basic academic and life skill objectives); a statement of the specific educational services to be provided to such child and the extent to which such child will be able to participate in regular educational programs; the projected date for initiation and anticipated duration of such services; and appropriate objective criteria and evaluation procedures and schedules for determining at least annually, whether instructional objectives are being achieved.

INDIVIDUALIZED PLANS

When individualized education plans are developed for secondary special education students it should be carefully considered whether a total basic skills focus is still realistic, whether the service thrust and focus should be development of compensatory and adjustment skills, and whether utilization of a vocational program is appropriate.

§48-2.18(18)-S18320; S 18330

RECORDS

Each agency shall maintain records of the individualized educational program for each handicapped child. Such program shall be established, reviewed and revised.

Each agency and parents shall establish or revise an individualized education program for each handicapped child before the beginning of each school year. They will then review and, if appropriate, revise its provisions at least annually. Parents shall have the opportunity to review their child's individualized education program and be given the opportunity to assist in scheduling the meetings at a mutually agreed time and place.

REVIEW

The conference shall be summarized in writing, dated and signed by persons present. Content of the summary shall follow the outline of the individualized education program. A copy of the summary shall be provided to parents.

§48-2.18(18)-S18340

PLACEMENT

A child may not receive service under special education without an annual review which determines the program's appropriateness for the child. Short-term placement (six week maximum) is permissible for diagnostic teaching and/or trial speech therapy. Written parental approval, as well as an evaluation by the appropriate Child Study Team, is required for short-term placement.

§48-2.18(18)-S18350

PLACEMENT

If a student transfers to a school district and has previously been in a self-contained special education program, the district may place the child in a similar program on a temporary basis (maximum of six weeks) provided parental consent is obtained to provide the district time to complete a comprehensive evaluation and establish the Child Study Team process to determine the handicapping condition as well as the most appropriate placement.

§48-2.18(18) - S18360

PROMOTION

Promotion of handicapped students from elementary to junior high and from junior high to senior high requires that systems of communication and information exchange are developed and function between each level of educational instruction. Chronological age and physical development should be a strong factor in the decision to move a student from the junior to the senior high. Consideration also must be given to the least restrictive educational principle in planning for promotion.

If a student is in a non-graded educational program (not classified as being in a certain grade, yet doing the work customarily assigned in that grade), the school district's responsibility will change from the elementary to the high school beginning the school year which follows the student's 14th birthday. The high school district must then determine, based upon the recommendations of a child study team composed of appropriate high school personnel plus elementary personnel who have provided

direct services to the student in the past, the most appropriate educational placement for the student.

§48-2.18(18)-S18370

PARENT PARTICIPATION

Parents shall be afforded the opportunity to participate in the Child Study Team process, individual planning conferences and periodic educational program reviews and to assist in scheduling the meetings at a mutually agreed on time and place.

The Child Study Team may evaluate the child with written parental consent. Planning conferences and periodic program reviews may be conducted without the parent in attendance only if there is sufficient documentation of attempts/efforts to arrange a mutually agreed on time and place or if the parents waive their right to participate, in accordance with due process procedures. If it is not possible or practical for the parent to attend, other alternatives may be attempted including individual or conference telephone calls. An interpreter may accompany the parents to allow communication in their native or primary language.

§48-2.18(22)-S18380

Individual assistance for a handicapped student shall be accomplished through utilization of the least restrictive educational alternative. Under this alternative, handicapped students shall be educated, whenever possible, with students who are not handicapped. Removal of handicapped children from the regular educational environment will only occur when the nature or severity of the handicap is such that education in regular classes with use of supplementary aids and services cannot be achieved satisfactorily.

To meet the needs of each handicapped person, districts should afford children access to a variety of instructional and service options. Every district cannot be expected to have all the necessary resources to develop as many services as are necessary to meet the needs of handicapped children in the district. Services will be

developed as availability of qualified staff permits. Small school districts with a minimal number of handicapped students should seek to serve those students with programs and services coordinated with nearby districts and/or through regional resources.

§48-2.18(22)-S18390-S18410

RESOURCE SERVICE

Instruction from a resource service requires that the special education teacher be available to provide direct service to handicapped students who are enrolled in the regular instructional program. Resource instruction may be provided by a resource teacher working with handicapped students in the regular classroom or by removing the students to a separate resource room for some part of the school day. A student should not be removed from the regular classroom to a separate resource room unless the move is essential in meeting the specific needs of a child. The resource teacher is responsible for ongoing consultation and communication with the child's regular classroom teacher regarding specific needs and recommendations of materials and instructional procedures and to exchange information for parent conferences. The resource teacher and the regular instructional staff should coordinate their best efforts and expertise frequently and systematically to best serve the student.

The special education teacher assigned to a resource program is responsible for assisting in Child Study Team assessment, translating strategies, preparing materials, providing instruction, maintaining appropriate records of progress and conferring with parents and regular teachers. The resource teacher should periodically follow up on children who have been phased out of special education programs to determine their progress in the regular classroom.

A teacher of a resource service should have a minimum caseload of eight handicapped students before establishing a full-time service.

If a school district is considering adding resource services, it must first establish the maximum of handi-

capped students able to be accommodated in existing services. Once each resource service is filled to the maximum, the school may provide service on a part-time basis by prorating the number of additional handicapped students, until the minimum of eight is reached. Then, an additional full-time resource service may be utilized.

A resource service may serve a combination of handicapping conditions as long as the needs of the children assigned to the service are appropriately met through this option.

The caseload for a speech pathologist, suggested to be in the range from 15 to 60 children depends on the severity of the handicapped students to be served.

The teacher in a self-contained program is responsible for assisting in the Child Study Team assessment, translating assessment findings into appropriate educational objectives and implementing and evaluating instructional procedures necessary to achieve these objectives. To ensure that capable students have an opportunity to return to the regular instructional program, a thorough system of referral, assessment, programming and termination must be developed. Communication, with the regular instructional staff, particularly with the regular classroom teacher, is of utmost importance.

The age range of children assigned to a self-contained classroom should be considered in establishing the composition of the class. Chronological age range greater than six years is not recommended. The actual range should be determined by the school administration utilizing the recommendations of the Child Study Team.

A minimum of four handicapped students needing removal from the regular instructional program for more than 50% of the school day is required for a self-contained class. The school administration shall determine the number of students assigned to the program by utilizing the recommendations of the Child Study Team.

Once a self-contained class reaches the maximum number of students as recommended by the Child Study Team,

the school administration must give consideration to providing the teacher with additional child management help, such as an aide, so that the class may accommodate more handicapped students.

A self contained service may serve a combination of handicapping conditions as long as the needs of the children assigned to the service are appropriately met, through this program option.

Services to any homebound and/or hospitalized students may be provided when a medical doctor verifies that a student is hospitalized or provides medical documentation and reasons for the students' need to remain out of school. When the Child Study Team has completed a comprehensive education evaluation, the service may be extended to the student.

§48-2.18(22)-S18420

CONTRACTED SERVICES

A school district may serve a handicapped child through diagnostic and/or instructional contracted services. When instructional services are to be contracted, the educational objectives must be stated in the proposed contract and sent to the Superintendent of Public Instruction for approval.

§48-2.18(22)-S18430

PLACEMENT

If a school district is unable to provide services for its resident handicapped students or unable to provide services through cooperative services or regional services, the school district may have to use out-of-district placement. The decision to place a child out-of-district must be recommended by the resident district Child Study Team and approved by the resident district board of trustees. Placement made independently of the public school by the parents and/or other agencies relieves the public school of all financial obligations.

When a child is handicapped to such a degree that a totally controlled environment is needed, residential school placement may be essential. When an out-of-district placement involves the payment of tuition or board and room, the placement must be approved by the Superintendent of Public

Instruction.

A district must, first, make a reasonable attempt to secure and utilize in-state resources before out-of-state placement will be approved.

It is the resident district's responsibility to convene the Child Study Team and set the time and place for conducting a review of the child's needs and educational placement.

The receiving district is responsible for providing program monitoring and assisting the resident district with conducting an annual review of the child's program and progress. The receiving district shall provide pertinent data regarding the child's program and progress to the resident district and parents.

The resident district and receiving district should form a Joint Child Study Team to consider the evaluation data and explore program options.

A regional service staff may provide supportive services when such services are not available through the local district.

To ensure that the request for an out-of-district placement is appropriate and follows the Special Education Rules and Regulations:

(a) The resident school district will assure that all students considered for out-of-district placement shall be processed by a resident Child Study Team and approved by the board of trustees; and that the Child Study Team, in recommending such placement, has identified service options outside of the district, outlined reasons why services cannot be provided by the resident district and specified the date requested for placement. The resident school district will also investigate placement options and assure that the selection of placement is in keeping with the least restrictive alternative, make transportation arrangements, specify criteria for the student's return to the resident district and outline provisions for program monitoring and annual review.

(b) The receiving school district will form a Child Study Team to determine acceptance and whether appro-

priate services can be offered, and conduct periodical review and report results to the appropriate official of the resident district.

(c) The resident school district will conduct an annual review of each child placed out-of-district. It will, through the Child Study Team, make recommendations annually for either continued out-of-district placement or termination. Based on the Child Study Team reports, the resident school district will submit a recommendation to the Superintendent of Public Instruction for continued out-of-district placement.

§48-2.18(26)-S18450

The program narrative must describe the total special education program within a given district and shall include the following components:

(a) Identification (screening and number of students receiving services)

(b) Referral (Sources of student performance information and referral contact)

(c) Staffing (Pre-staffings, Child Study Team and Staffing format)

(d) Personnel (Administration, Teachers and Supportive Personel)

(e) Evaluation (Student and Program)

(f) Facilities

(g) Needs or Deficiencies

(h) Additional Information

If a school district does not provide special education services and does not submit a budget, it still must screen its students annually for handicapping conditions. This process must be described in narrative form and submitted to the Superintendent of Public Instruction for approval.

§48-2.18(26)-S18460

"Program units must be received by the Superintendent of Public Instruction on or before October 10. Current information regarding enrollment, as well as the status of professional personnel, is required to ensure that each district is meeting the service needs of handicapped

students.

§48-2.18(26)-S18470

PROGRAM EVALUATION

All special education programs must be evaluated with both objective and subjective measures. Objective measures must be appropriate in terms of reliability and validity to assure reasonably accurate information. Subjective data may be used to substantiate, clarify or enrich the evaluation results. The evaluation design must be concise and measure the degree to which the stated educational objectives have been accomplished. Results should be reported in a manner conducive to decision making by all educational agencies and evaluators. Evaluation should be an ongoing process with reporting completed at least once a year. The district should make these reports available to the public on request.

§48-2.18(26)-S18480

PROGRAM APPROVAL

Special approval from the Superintendent of Public Instruction is required before certain programs may be operated. Examples follow:

(a) A program for homebound or hospitalized students. To get special approval for such a program, the school district is to submit to the State Superintendent's office, a program unit application requesting permission to operate the program.

(b) Room and Board Expenditures. Approval by the Superintendent as needed in addition to budget authority approval. The school district must submit a written request to the Superintendent of Public Instruction to send a special education student to another district (or agency).

(c) Preschool Programs. To develop educational programs for handicapped children aged three through five. The school district is to submit a letter briefly describing the program, identification process, and/or number of handicapped children and types of handicapping conditions to be treated, to the Office of Public Instruction requesting permission to operate such a program.

(d) Extended Year Programs. Programs consisting of

instructional services providing pupils with special education service beyond the regular school year. They should only be considered for a small percentage of handicapped students who require concentrated assistance to present skill regression. The program should clearly focus on the maintenance of skills and should not generally be considered as an ongoing developmental program. To start such a program, dates for the program, a brief outline of the program, an estimate of the cost for the program, an explanation of how children are selected for the program, a list of staff members for the proposed program, a letter of program approval from the Office of Public Instruction and proof that the budget authority has been established in the school year in which the program is to be operated must be provided.

(g) Special Education Child Eligibility for Transportation. Approval of the Superintendent of Public Instruction is required. Transportation shall be provided by the resident district when the child is enrolled in a special education class or program operated by either the district of the child's residence or some other Montana district or the child is enrolled under an approved tuition agreement in a special education class or program operated outside of Montana on an approved tuition agreement in a private institution.

§48-2.18(38)-S18650; S18660

SPEECH PATHOLOGIST

The caseload for a speech pathologist depends on the severity of the handicapped students to be served. The suggested range is from 15-60 children. The caseload must be verified by a fully licensed speech pathologist before it will be approved by the Superintendent of Public Instruction.

A full-time audiologist must serve a minimum school population base of approximately 10,000 regular students.

§48-2.18(38)-S18670

PSYCHOLOGIST

A full-time school psychologist must serve a minimum population base of approximately 1500 regular students.

§48-2.18(38)-S18680

For budgeting approval, a full-time supervisor of special education must have a minimum of at least twelve full-time special education personnel or a regular student population of 3000 regular students. School districts are encouraged to establish cooperative special education programs under the direction of one supervisor of special education in order to meet minimum approval levels. Consideration should be given to include rural schools under the individual's supervisor even if the rural school does not have a special education teacher.

For school districts that have special education personnel in excess of the minimum stated, additional supervisors may be added upon request to and approval of the Superintendent of Public Instruction.

§48.2.18(38)-S18690; S18700

SOCIAL WORKER

A full-time social worker must serve a minimum population base of approximately 3000 regular students and/or have an assigned caseload of 25-60 families per year.

COUNSELOR

A full-time counselor serving only special education must serve a minimum population base of approximately 3000 regular students.

If a school district budgets for and provides counseling services to handicapped students under special education, all of the students involved must also receive instructional special education service.

§48-2.18(42)-P18720

HEARING

A parent or employee of a school district may apply for a hearing before the trustees of a school district of:

EVALUATION

(a) a child residing in the district or being served by the district is being considered by employees of the district for evaluation and permission has not been granted by the parents.

PLACEMENT

(b) a change in the educational placement of a child is planned by a district or has been requested by the parent.

and the parents and the district disagree concerning the proposed change.

(c) a request for an extension of a temporary placement of a child being served by a district has been filed.

(d) the parents desire to present complaints with respect to any matter relating to the identification, evaluation or educational placement of the child or the provision of a free appropriate education to such child.

Either the personnel serving a district or a parent of a child residing in or served by the district may request in writing addressed to the chairman of the board a hearing before the board of trustees. The parent or his[her] designee established in writing shall be allowed access to school reports, files and records pertaining to the child and shall be allowed to obtain copies at the actual cost of copying. Upon receipt of a request for a hearing, the chairman of the board shall direct the appropriate special education personnel serving the district to schedule a conference within 5 days with the parent for the purpose of settling the controversy, and avoiding the hearing. If attendance of the parent at an informal conference cannot be obtained within 5 days of receipt of request for a hearing or no agreement is reached at the conference, the chairman of the board shall set a date, time and place for the hearing convenient for all parties. The hearing shall take place no later than 10 days after the receipt of the request for a hearing, unless the parent agrees in writing to a later date, but no later than 20 days after receipt of request.

The chairman shall notify all other trustees, the special education personnel serving the district and the parents of the child of the date, time and place of the hearing. Notice to the parent by certified mail shall be written in language understandable to the general public and in the native language of the parent or other mode of communication used by the parent, unless it is clearly not feasible to do so. If the native language is not a written one, the chairman shall direct the notice to be translated orally or by other means to the parent in his[her] native language.

The child shall remain in his[her] current educational placement until the board enters a decision following the hearing unless the health and safety of the child or other children would be endangered or the child's presence substantially disrupts educational programs.

RIGHT TO COUNSEL

At the hearing the board shall hear witnesses and take evidence. The parent and the personnel serving the district may present evidence and may be represented by a legal counsel. The hearing shall be closed to the public unless the parents request an open hearing.

In the case of a placement question, the personnel must demonstrate why placement is being recommended or denied and why less restrictive placement alternatives would not adequately and appropriately serve the child's educational needs.

No transcript need be made of the hearing. At all stages of the hearing, interpretation shall be provided, when necessary, at public expense. After all the witnesses have been heard, the board shall render its decision.

Within 10 days of the hearing, the chairman shall send by certified mail a copy of the decision and the reasons entered in the minutes to the parent in language understandable to the general public and in the native language of the parent unless it is clearly not feasible to do so. If the native language is not a written language, the chairman shall direct the decision to be translated orally.

APPEAL

Within 10 days of receipt of the decision, the parents may appeal to the county superintendent in writing. The county superintendent shall promptly send a copy of the notice to the chairman of the board whose decision is being appealed. Upon receipt of the notice of appeal, the chairman of the board shall have sent to the county superintendent two copies of the decision of the board after hearing and reasons as entered in the minutes. The decision of the board shall be adhered to pending outcome of the appeal unless the board grants a specific waiver to the parent.

APPEAL

The County Superintendent shall hear appeals from the decisions of boards on any matter concerning the provision of a free appropriate public education to a handicapped child as provided in the procedures for a hearing before the board of trustees.

Upon receipt of a notice of appeal the county superintendent shall determine a date, time and place for the hearing convenient to all parties. The hearing shall be held within 10 days of receipt of the appeal, unless the parent agrees in writing to a later date, but no later than 30 days after receipt of request. The county superintendent shall notify the person appealing and the board which rendered the decision of the date, time and place of the hearing not less than two days before the date of the hearing. Notice to the parent sent by certified mail shall be written in language understandable to the general public and in the native language of the parent, unless it is clearly not feasible to do so. If the native language is not a written language, the county superintendent shall direct the notice to be translated orally or by other means.

NOTICE

After receipt of a notice of appeal, the county superintendent shall not communicate with any of the parties or their representatives concerning any substantive matter at issue in the appeal without giving notice and the opportunity to be present to all parties.

The county superintendent shall preside over and conduct the hearing in a fair and impartial manner so that all parties have the opportunity to present relevant evidence.

The county superintendent shall decide the appeal within 10 days of the end of the hearing. The written decision shall include findings of fact, conclusions of law and an order. If a decision is to disapprove an educational plan, it shall state what would be an adequate and appropriate educational plan for the child. If the decision approves a plan, it shall state why less restrictive placement alternatives could not adequately and appropriately serve the child's educational needs. The decision shall inform

the parties of the right to appeal to the State Superintendent.

Upon making a decision, the county superintendent shall send by certified mail a copy of the findings of fact, conclusions of law and order to the parent in language understandable to the general public and in the native language of the parent unless it is clearly not feasible to do so. If the native language is not a written language, the county superintendent shall direct the information to be translated orally to the parent.

The county superintendent shall cause a record to be made of each hearing containing the record submitted by the board in an appeal, a copy of the notice of appeal and all intermediate notices and rulings, all exhibits offered into evidence, a verbatim record of the hearing (in typewritten form at the request of either party or if either party appeals to the Superintendent of Public Instruction), proposed findings of fact, conclusions of law and orders if requested, and the findings of fact, conclusions of law and order of the county superintendent.

A person or board may appeal a decision of the county superintendent to the Superintendent of Public Instruction by sending a notice of appeal to the Superintendent within 15 days of the receipt of the decision. A copy of the notice of appeal shall be sent to the county superintendent and other parties to the controversy. The notice of appeal shall contain the name of the party appealing, the names and addresses of other parties to the hearing, a copy of the findings of fact, conclusions of law and order being appealed, a brief statement of the grounds for the appeal and the signature and address of the party appealing or representatives.

Appeals to the Superintendent of Public Instruction shall be conducted in accordance with the rules governing contested cases before the Superintendent. APPEAL

§48-2.22(1)-S2200

The Montana School for the Deaf and Blind is encouraged to enter into cooperative agreements with

other districts (School District #1) when such arrangements are determined to be in the childrens' best interests.

§48-2.22(1)-S2210

SCHOOL FOR DEAF/BLIND

The Board authorizes the Montana School for the Deaf and the Blind to provide regional services of itinerant consultants and instructional tools, materials and books, and that these services shall be made available to all school districts in the state.

§48-2.22(1)-S2220

With the Board's approval, the Montana School for the Deaf and Blind may conduct instructional and/or educational programs during the summer months.

§48-2.22(1)-S2230

The Board establishes a policy that the Montana School for the Deaf and Blind shall adopt a yearly calendar of at least 180 but not more than 186 instructional days.

§48-2.22(2)-S2240

APPOINTMENT

SUSPENSION

The Superintendent of the school for the deaf and blind shall appoint an admission and suspension committee. Upon receiving a formal application from the parent or guardian, a medical examination form and a personal conference with the parent or guardian, the committee shall make recommendations to the superintendent for the admission of students. In cases of suspension, the committee shall examine all other alternatives, confer with the parents or guardian on the reasons for and length of suspension.

§48-2.22(2)-S2260

Only Montana residents may be admitted to the school.

CROSS REFERENCES

III.B. Teachers; Regulation §48-2.18(34) - S18620; S18630

IV.G.; Statute §75-6303

2. Programs for Exceptional Children

Statutes

§79-204

All state residents between ages 7 and 16 who are unable to attend the public or private schools of the state "by reason of partial or total blindness or deafness" must attend either the Nebraska School of the Visually Handicapped or the Nebraska School for the Deaf "until graduated or discharged" by the school's superintendent. This does not apply if "such persons are being . . . otherwise educated, or . . . by reason of mental or physical handicap" may not be admitted to these schools.

SCHOOL FOR BLIND

SCHOOL FOR DEAF

§79-339

The State Department of Education is authorized "to employ a special consultant . . . in . . . special education for gifted children, "who shall work with all state schools to develop programs for gifted children. "Gifted children" are those whose abilities are such that they "need special facilities or educational services or both . . . to assist them to achieve more nearly their potentials."

GIFTED CHILDREN

§79-1409; 79-1410; 79-1414

A school board may obtain permission from the Department of Education "to establish . . . one or more day schools having an average attendance of not less than five pupils for the instruction of deaf persons over the age of five years, whose parents or guardians" are state residents. A school board maintaining such a school must report annually to the Department of Education and at other times as required.

SCHOOL FOR DEAF

For the purpose of these sections "any person who, by reason of defective hearing, cannot profitably be educated in the public schools . . . shall be considered deaf."

§79-1901 — 79-1906

"All educational programs for acoustically handicapped persons of suitable age and capacity from birth until completion of "an educational program, including the Nebraska School for the Deaf, are under the general control of the State Superintendent of Education.

The purpose of the Nebraska School for the Deaf is "to provide general and special education for persons" up to age 21, until they have completed an educational program. All state residents who are acoustically handicapped and unable to attend regular schools, "are of suitable age and capacity, and . . . good moral character" are entitled to a free education at the Nebraska School for the Deaf. Non-residents who meet admission requirements may be admitted and charged for attendance.

The school's physician must visit the school daily and otherwise as required, make sanitary inspections and report to the State Board of Education on the school's sanitary conditions.

Pupils at the school shall be instructed "by the oral, aural and lip-reading method, and not by the deaf alphabet and sign language method, except where they are" mentally or physically incapacitated. "All pupils . . . shall be taught . . . by means of special conversational courses" as far as possible.

§79-1907 — 79-1908

The parents or guardians of a pupil at the Nebraska School for the Deaf must furnish clothing, transportation to and from school, and "support the pupil during the summer vacation." The school's superintendent shall supply clothing or pay a pupil's transportation home if the pupil has not been furnished these things, and charge the expense against the parent or guardian, if the pupil is a minor, or against the pupil if he or she has no parent or guardian or is not a minor. If the parent or guardian cannot pay and the "pupil is a

pauper, then the account shall be paid from the county general fund."

§79-1912 — 79-1913

The State Department of Education is responsible for providing "a comprehensive education program for acoustically handicapped children . . . to be operated as a satellite program by the Nebraska School for the Deaf . . . . Such program shall be designed to serve acoustically handicapped children at the preschool and primary level of education. Any . . . child whose needs are not . . . met by such program shall be referred to the Nebraska School for the Deaf."

The State Department of Education is responsible for coordination of the curriculum and instruction methods of this program with that of the state school. The department shall adopt rules and regulations necessary to implement the program.

§79-2001 — 79-2005

SCHOOL FOR BLIND

"The State Department of Education shall have . . . general control of all programs of education and welfare for visually handicapped persons of suitable age and capacity from birth until completion of a suitable program of education to include . . . the Nebraska School for the Visually Handicapped." The state school provides "general and special education" for visually handicapped persons up to age 21, until completion of an educational program. It also is "the state resource center for all educational programs for visually handicapped children . . . and shall provide services such as in-service training of teachers, itinerant teaching, counseling services, the loan of equipment, books and learning media to local school districts and educational service units."

The State Department of Education is "responsible for the education and welfare" of visually handicapped persons who are unable to attend regular public schools "and who are not otherwise provided for, and . . . are of suitable age and capacity, and . . . good moral character

without charge." Nonresidents may attend the state school if they meet admission requirements and pay a fee. The State Department of Education must "provide such professional and medical services . . . as . . . necessary for the health and welfare of visually handicapped persons" in educational programs.

§79-2006 — 79-2007

The parents or guardians of a pupil at the Nebraska School for the Visually Handicapped must furnish clothing, transportation to and from school, and "support the pupil during the summer vacation." The school's superintendent shall supply clothing or pay for a pupil's transportation home if the pupil has not been supplied with these, and shall charge the cost against the parent or guardian, or against the pupil if he or she has no parent or guardian. If the parent or guardian cannot pay and the "pupil is a pauper, then the account shall be paid from the county general fund."

§79-2010 — 79-2011

With the approval of the Commissioner of Education, the Nebraska School for the Visually Handicapped "may contract with a local school district, educational service unit, or public institution . . . for educational services which cannot be provided more effectively by the school."

Visually handicapped children under age 16 must attend "an approved program provided by a local school district, . . . an educational service unit . . . or nonpublic school or" attend the state school. The State Department of Education shall "determine the need for and adequacy of," and approve, educational programs for the visually handicapped in all schools.

REGULATIONS

3-(1) - 3(2)

Gifted and talented children are those with demonstrated abilities of high performance capability in

intelligence, academic aptitude, and creative thinking, and in order to realize their potential, need programs and services which will accommodate their individual differences beyond those provided by the school system.

GIFTED CHILDREN

Identifying gifted/talented students is the superintendent's responsibility and must be accomplished by a combination of intelligence tests, parent nominations and records of past performance.

EVALUATION

Eligibility shall be determined by administrators, parents, teachers, and students. A school district must identify students by general intellectual ability and specific academic aptitude. Eligibility shall be determined by test scores on standardized achievement and aptitude tests.

3-(3) — 3(4)

Before receiving State Department of Education appoval, programs for gifted/talented students must meet certain requirements. The programs must contain the following: (1) specific identification and selection procedures; (2) clear objectives; (3) a definite curriculum, teaching methods and materials; (4) guidance and counseling services; (5) a specific evaluation plan; (6) a three-year evaluation conducted by an evaluation team selected and approved by the State Department of Education; and (7) internal evaluation during the years when the external survey is not required.

A school system seeking State Department of Education approval for a program or wishing to continue a previously approved program must submit its application to the State Department of Education before June 1 each year.

3-(5)

Each school district should appoint one professional staff member to coordinate the gifted/talented program. Although there are no specific certification requirements for teachers in this area, it is recommended that careful attention be given to staff selection. Teachers hired

should be those who demonstrate an interest in and understanding of gifted/talented children.

3-(6)

Program approval is based on the evaluation reports required by the State Board of Education.

14-(11)

The school system shall develop policies and procedures for special education programs.

14-(47)

Each secondary school shall develop policies and procedures for special education programs.

51-(2)

Each school district is required to have on file with the State Department of Education a two-year projection of special education plans, number of children to be educated, and budget requests. The State Department of Education shall review the school district's reports and budgets.

Each plan must include: (1) a description of services to be offered; (2) a five-year projection of needs for each service group; (3) a detailed description of the methodology to be used in evaluating the results of programs; (4) a description of procedures to be used for placement.

The school system shall have developed policies and procedures for special education programs which ensure that: (1) efforts to identify children who need such programs are made at least annually; (2) services will be provided or contracted for; (3) parents are given due process rights; and (4) the district will follow-up and monitor the progress of pupils placed in these programs.

All special education programs will be reviewed at least biennially by the State Department of Education. Continuing evaluation will be conducted by the Department, taking into account such factors as numbers and types of students, class sizes, qualifications of staff, and other appropriate factors.

Special education programs and services are available to students ages five to eighteen.

51-(3)

Special education programs are designated at three different levels. Level I programs are those which can be maintained in a regular classroom, through the provision of 1-3 hours of supportive services. Level I programs may include: resource teacher programs for diagnosed children; speech programs; aural rehabilitation programs; psychological and diagnostic programs; home-school liaison programs; special reader programs; and physical or occupational therapy programs.

Level II programs are those services established for the handicapped child who requires a special education program outside of the regular class program for a time period exceeding three hours per week. Level II services are provided by licensed and/or certificated professional personnel.

Integration into a regular class program shall be determined in relation to the objectives established for handicapped children. A trial period may be undertaken to evaluate the child's adjustment before the change becomes final.

Level III programs are those provided for a handicapped child who attends a program outside the district. These services may be provided by contracting with another school district or by some combination of school districts.

51-(4)

Each school board shall identify all children who would benefit from special education services. No child will be referred for professional diagnosis without written parental consent. Final verification of each handicapping condition will be made by appropriate licensed personnel. Each school board shall provide diagnostic data on each child to the State Department of Education.

IDENTIFICATION

51-(5)

There are three requirements that must be met before a school board shall authorize placement of children in special education programs: (1) consultation with parent or guardian; (2) consultation with a child's most recent teacher; (3) diagnosis and recommendation by appropriate licensed personnel.

PLACEMENT

The child's parent or guardian must approve placement in a special program. The child's progress shall be reviewed annually. Notification of continued, modified or terminated placement of a child shall be communicated to the parent or guardian.

51-(6)

RIGHT OF REVIEW

The parent or guardian shall have the right to review the child's placement. If a child is denied placement in a special education program, his/her parents shall be promptly notified and advised of their right to a review of this determination. A request for review shall be made to the superintendent of the school district. If the parent believes the diagnosis of the child is wrong, he/she may secure an independent diagnosis. The parent or guardian shall have access to all records, reports, or other materials concerning the child's placement and upon which the board based its decision.

The review shall be in the form of a conference between the parent and school district personnel. After considering the evidence presented by both sides, the school district officials shall make their recommendation to the parents. The notice of decision shall inform the parents of their right to a review of the placement decision by the State Department of Education.

NOTICE

The request for a state-level review must be made to the school district superintendent who shall communicate this report to the State Department of Education. The State Department of Education will name a hearing officer to review the matter.

2. Programs for Exceptional Children

Statutes

§388.440; 388.450

The basic statutory support guarantee "establishes financial resources sufficient to insure a reasonably equal educational opportunity to handicapped minors." "Handicapped minors" are those people under 18 years old who deviate "either educationally, academically, physically, socially or emotionally so markedly from normal growth and development patterns" that they "cannot progress effectively in a regular school program." The board of trustees of a school district shall make such special provisions as may be necessary for the education of handicapped minors and shall establish, subject to state department of education standards, uniform rules of eligibility for instruction under such special education programs.

§388.460

"No minor shall be required to take advantage of the special provisions for the education of handicapped minors if the "minor's parent or guardian files a statement with the board of trustees of the school district showing that the minor is receiving adequate educational advantages."

§388.470

"Before any child is placed in a special program for handicapped children a consultation shall be held with his[her] parents or guardian," and an examination shall be conducted in accordance with state department of education standards, to determine the extent of the handicap. A psychiatrist may be consulted if the board of trustees deems it necessary.

EXAMINATION

§388.490

Except as otherwise provided, "handicapped minors may be admitted at the age of 5 years to special programs established for such minors, and their enrollment or attendance may be counted for apportionment purposes."

The following handicapped minors may be admitted to special programs and have their enrollment counted for apportionment purposes: (1) aurally or visually handicapped minors "at any age under 5"; (2) academically talented minors "at the age of 4"; and (3) mentally retarded minors "at the age of 3."

§388.500

UNGRADED SCHOOL

"Handicapped minors may be instructed in special ungraded schools or within special programs established for the instruction of handicapped minors. Boards of trustees of school districts may purchase sites and erect buildings for such purposes, rent suitable property at an economical rental for special or ungraded rooms," and "accept gifts or donations of sites and buildings for such purposes."

§388.510

"The board of trustees of a school district may provide for the transportation of pupils assigned to special schools or programs for handicapped minors."

§388.520

"The state department of education shall prescribe minimum standards for the special education of handicapped minors," including those aurally, visually, physically, speech, mentally, educationally or multiple handicapped, and those academically talented. State funds will not be apportioned to school districts for special education programs until the programs are "approved by the state department of education as meeting the prescribed minimum standards."

§395.010

The superintendent of public instruction may (1) arrange with institutions of the visually or aurally handicapped in other states for the "admission, education, and care" of the visually or aurally handicapped of Nevada; (2) pay for placement of such persons, if they meet the qualifications of 395.020, in a residential

facility with an education program in a county of Nevada, if their own county does not have such a program; and (3) "make all necessary contracts and agreements to carry out provisions of this chapter."

§395.020

A visually or aurally handicapped person may receive educational benefits if (a) he or she is physically and mentally capable of receiving education; (b) he or she has no "offensive or contagious diseases"; (c) he or she and his or her parents, guardian, or next of kin are unable to pay for admittance to an institution for visually or aurally handicapped; (d) he or she is a Nevada resident under 21 years old during the enrollment period for the school year.

REGULATIONS

Standards and Instructions for Administration of Exceptional Pupil Education Programs
Re: NRS 385.080; 388.450; 388.470; and 388.520

"It is the policy of Nevada that school districts provide programs of instruction for students who deviate either educationally, academically, physically, socially or emotionally so markedly from normal growth and development patterns that they have not progressed effectively in a regular school program, and, therefore, need special instruction or special services."

Increased funds will be available to school districts that establish special education programs. School districts shall establish uniform rules of eligibility for the programs, as well as examination procedures and minimum standards for instruction and special services.

Teachers shall hold a certificate in "Exceptional Pupil Education with an endorsement in the area of their major teaching responsibility." A committee consisting of a teacher, principal, and a psychologist or counselor, shall determine student placement.

V HEARING
PLACEMENT
NOTICE

Standards and Instructions for Administration of
Exceptional Pupil Education Programs
Re: NRS 385.080, 388.450, 388.470, and 388.520

The parents of a handicapped child have a right to a hearing on the proposed placement or non-placement of the child in handicapped education. The parents (or guardian) shall receive notice 30 days prior to the hearing, including the district's reasons why the child's "best interests" are served by the district's placement decision. The parents have a right to examine all pertinent school records prior to the hearing.

Standards and Instructions for Administration of
Exceptional Pupil Education Programs
Re: NRS 385.080, 388.450, 388.470, and 388.520

Teachers in the special education programs must hold a certificate in Exceptional Pupil Education, except for those who teach the academically talented. Individual assessments for each child shall be made annually with "goals and objectives written in measurable terms." Students placed in "educable mentally retarded programs" and in "learning disabilities programs" should be "reviewed at least yearly and written recommendations be made available to State Department personnel."

2. Programs for Exception Children

SCHOOLS FOR DEAF

Statutes

§132:17

The state board of education shall furnish the parents of deaf children with information on "schools for the deaf" or public schools which have "special classes for instruction for the hard of hearing."

§186-A:1 --186-A:2

The state policy is "to provide the best and most effective education to all handicapped children." A "handicapped child" is one who is physically, intellectually, or emotionally handicapped and less than twenty-one years old. "Emotionally handicapped" includes persons with "behavior and/or learning problems" due to "internal emotional conflicts, home conditions or general environment".

§186-A:3

"The state board of education is authorized to establish a program of special education."

§186-A:4

"Every school board" must make an annual report to the state department of education giving "the number of handicapped children in its school district."

§186-A:5

The state board of education shall assist the school districts in "developing an approved plan" for special education.

§186-A:6

"Every handicapped child" who may benefit by instruction "shall attend an approved school or program". If the child applies for "continued education facilities," the instruction may continue until the child reaches the equivalent of a high school education or the age of twenty-one.

§186-A:7

"A school district shall establish programs for handicapped children" or pay tuition to another school district which has an approved program.

TUITION

§186-A:8

Any handicapped child who attends an approved, special school either within or outside of New Hampshire, shall have a portion of his or her tuition paid by the school district where he/she resides. Handicapped children may be assigned to "approved schools" by the board of education.

TUITION

§186-A:10

The state board of education is authorized to "receive and expend" federal funds for special education.

§186-A:11

The state board of education has authority to appropriate funds to school districts for special education programs which meet "the standards set by the state board of education."

§186-B:1

SERVICES TO THE BLIND

"To enable the state to more effectively provide services to the blind of all ages in the state," the "education, training, [and] vocational rehabilitation . . . of the blind" are placed under one administration. The department of education assumes responsibility for the "education and training of all handicapped children in the state."

§186-B:2

APPOINTMENT

"The state board of education shall appoint the director of blind services".

§186-B:3

"The department of education shall establish a program for the education, training, and vocational rehabilitation for the blind of all ages . . . ." The services provided shall include "vocational guidance and training" and "placement of blind persons in employment".

§186-B:4

The "director for blind services" shall keep a "register of the blind" listing all blind persons in the state and their "capacity for education and industrial training". The director shall act as a source of "information and industrial aid for the blind".

§189:11-b

"The school board of each school district may provide the services of a learning disability teacher".

CROSS REFERENCES

III.A.1.; Regulation, Minimum Standards and Recommendations - Elementary School, #319.13, pp. 3--24

IV.D.; Statute §186-A:9

IV.H.; Statute §193:3

STATUTES

§18A:46-5

Each county child study team shall cooperate with the local boards of education pertaining to: (a) identification and diagnosis of children needing special educational services; (b) development and approval of public school programs for handicapped pupils; (c) supervision and coordination of such programs; (d) social case work and psychological evaluation; (e) remedial instruction; and (f) additional responsibilities determined by the commissioner.

§18A:46-6;7

IDENTIFICATION

Each board of education shall identify which pupils cannot be "properly accommodated through the school facilities usually provided because of handicaps." The board shall report annually to the county superintendent of schools, who shall report to the commissioner, the number and classification, as well as the names and addresses of children enrolled in special educational programs and those not attending school. The reports shall be available to state agencies involved with the handicapped.

§18A:46-7.1

Each year the board of education shall distribute, to parents of the handicapped children of the district, copies of Chapter 46 and any current rules and regulations relating thereto.

§18A:46-8

Each handicapped child shall be identified, examined and classified according to procedures prescribed by the commissioner under one of the following categories: "mentally retarded, visually handicapped, auditorily handicapped, communication handicapped, neurologically or perceptually impaired, orthopedically handicapped, chronically ill, emotionally disturbed, socially maladjusted or multiply handicapped.

CLASSIFICATION

§18A:46-9

Any child classified as mentally retarded shall be further classified as either: (a) "educable mentally retarded children;" (b) "trainable mentally retarded children;" (c) children "eligible for day training."

§18A:46-10

Pupils needing special educational services to "ameliorate or to prevent the development of learning handicaps" shall be classified according to their ability to benefit from specified services. Such services shall include, but not be limited to: (a) case work with pupil at home or school; (b) counseling or guidance; (c) remedial instruction; (d) special scheduling of a school program, including part time attendance in special or regular groups; (e) referral to other agencies for services; (f) special grouping in school for children who probably will return to the regular program; (g) arrangement for direct services therough the county department of child studies.

PSYCHOLOGICAL EXAMINER

§18A:46-11;12

Each board of education or boards of education jointly shall employ a "psychological examiner" to "administer the procedures for diagnosis and classification required by this chapter" or the board or boards may use the psychological services of a clinic or agency approved by the commissioner under suitable standards.

§18A:46-13

Each board of education has a duty "to provide suitable facilities and programs of education" for all handicapped children "except those so mentally retarded as to be[eligible for day training] . . ." "The absence or unavailability of a special class facility in any district" does not relieve the board of its responsibility to provide education for handicapped children.

§18A:46-14

The facilities and programs required by this chapter shall be provided by: (a) a special class or classes in the district; (b) a special class in the schools of another district or another state; (c) joint facilities or classes in institutions provided by two or more districts; (d) a joint commission program; (e) a state operated program; (f) instruction at school supplementary to the regular program; (g) individual instruction at home or at school.

When a child is confined to a hospital or institution and is enrolled in a special education program, the board shall pay his/her tuition.

TUITION

The board may also furnish facilities and programs for people over 20 who do not have a high school diploma, or children under 5.

§18A: 46-16 -- 18

ADMISSION

A pupil may be "refused admission to, or be excluded temporarily from" school pending his/her examination and classification.

Upon the advice of the psychological examiner, the superintendent of schools may exclude a child classified as eligible for day training.

RE-EXAMINATION

Any such child shall, upon request of the parent or guardian, be reexamined one year after the last previous examination.

The names of such children shall be reported to the secretary of the board of education. The city superintendent shall furnish a list of these children to appropriate institutions and agencies, although such lists shall not be made public.

An exclusion or refusal of admission shall continue until "set aside by action of the board of education or lifted as a result of a reexamination."

§18A: 46-29 -- 36

A county board of education may establish a "county special services school district" for handicapped children. The State Board of Education shall prescribe rules and regulations for the special service schools. The county schools may accept pupils from other districts and charge for their tuition. The courses of study for such schools shall be subject to the Commissioner of Education's approval, and shall provide programs that are not elsewhere available in the county.

TUITION

Each special services school district shall have a board of education consisting of the county superintendent of schools and six other persons appointed by the county board. The board members must be residents of the county for at least two years prior to appointment and must demonstrate an interest in children with learning disabilities.

APPOINTMENT

§18A:61-1

A state school for the deaf shall be maintained and shall be supervised by the commissioner of education. Deaf persons of suitable age (not over 21) who are state residents shall be admitted to the school. Proof of residency must be submitted with the application for admission.

SCHOOL FOR DEAF

REGULATIONS

§6:28-1.2

Children declared eligible for special education shall receive, upon recommendation of a child study team employed by a local board of education, the same educational opportunities as non-handicapped children.

§6:28-1.3

A child study team shall consist of a school psychologist, a learning disabilities specialist, and a school social worker.

CHILD STUDY TEAM

§6:28-1.5

Members of the child study team shall be employees of the board of education or the State Board.

§6:28-1.8

IDENTIFICATION

Local boards shall be responsible for the iden-- tification of handicapped children between the ages of five and 20 who are residents of their school district and are not attending nonpublic schools. Local boards may assume such responsibility for children below the age of five and beyond 20.

The identification process may involve the judgement of teachers, medical and health professionals, school administrators, special services personnel, parents, and/or agencies concerned with the welfare of children.

§6:28-1.9

The identification, evaluation and classification procedures shall include provisions for parental notification and participation.

IDENTIFICATION

Identification: The parent shall be notified in writing in the dominant language of the home when a child has been referred to a basic child study team for evaluation. Such notification shall state the reasons for the referral and shall contain a statement of the parent's rights to challenge the referral.

The chairperson of the basic child study team or designee shall inform the parent of the classification, educational plan and the recommended education program at a conference prior to their implementation. A summary of the classification, educational plan and educational program shall also be provided the parent in writing in the dominant language of the home.

At the conference and in writing the parent shall be informed of the right to dispute the classification, educational plan and educational program and to invoke the mediation process or hearing described in the New Jersey statues.

§6:28-1.10

EVALUATION

All identified pupils shall be provided an evaluation by the basic child study team to determine if they are handicapped and in need of special education programs as a prerequisite to any board of education action on exclusion from the public school.

Parents of pupils attending public schools, who have been identified as stated above, shall be provided copies of the law and the regulations relating to the handicapped by the local school district, and shall be fully informed of the procedures to seek redress for any issue arising under said law or regulations by which they feel aggrieved.

Parents who challenge the findings of the child study team have the right to request an independent educational evaluation of their child from the Branch of Special Educational and Pupil Personnel Services, State Department of Education. The Department of Education shall provide, without cost to the parent, all neccessary professional evaluation services for this purpose.

§6:28-1.11

REVIEW

An administrative review process may be made available to attempt to resolve disputes. Such process should consist of the following: (1) an informal conference between the parents and members of the child study team and such other professional staff member as may be appropriate and such representatives as the parent may reasonably wish to include; (2) an opportunity for the parent to meet with the local board of education; and (3) consultation with and review by special services personnel of the office of the county superintendent and regional child study teams or with the branch of special education and pupil personnel services, State Department of Education.

In addition to this review process, a review shall be made available upon request to the local board of education and shall include the following: (1) a full hearing before an impartial hearing examiner, conducted at a time

HEARING

and place convenient for the parents, with a verbatim record of the hearing kept; (2) full access by the parent to all records, findings and recommendations of the child study team reasonably in advance of the hearing; (3) the parent shall have a right to the presence of the legal counsel and other representatives; (4) an opportunity for the parent to be heard, to present witnesses, and to cross-examine witnesses appearing on behalf of the child study team or the chief school adminstrator or designee; and (5) a decision shall be made promptly and in writing, be based solely upon the evidence presented at the hearing, and a copy shall be made available to the parent.

APPEAL

Any party may appeal this decision to the Commissioner of Education. The decision of the Commissioner of Education may be appealed to the State Board of Education. The decision of the State Board of Education may be appealed to the New Jersey Superior Court, Appellate Division.

PLACEMENT

No recommendation for placement, change in placement or exclusion from placement of a handicapped child shall be implemented before a hearing is held on a parental challenge to such recommendation and a decision entered; provided a request for a hearing is made within ten days of notification of such recommendation, except that such recommendation may be implemented if the chief school administrator demonstrates with clear and convincing proof that failure to effect such implementation will harm the child or other children.

§6:28-2.2

DIAGNOSTIC EXAMINATION

Local boards of education shall provide for such diagnostic examinations as are neccessary to determine the need of special education programs for pupils who manifest disabilities in one or more of the following areas: mentally retarded, visually handicapped, auditorily handicapped, communication handicapped, neurologically or perceptually impaired (neurologically impaired or

perceptually impaired), orthopedically handicapped, chronically ill, emotionally disturbed, socially maladjusted or multiply handicapped.

Examination and classification shall include the following:

PHYSICAL EXAMINATION

1. A comprehensive physical examination, designed to assist in the classification process, shall be given by a physician employed by the local board of education. If a parent or guardian of the child employs his own physician, a report of such physical examination which is acceptable to the school physician shall suffice.

PSYCHOLOGICAL EXAMINATION

2. A psychological examination shall be given by a certified school psychologist and shall include, but not be limited to, a comprehensive battery of evaluation instruments which are intended to assess the intellectual, social and emotional development of the child.

EDUCATIONAL ASSESSMENT

3. An educational assessment shall be made by an approved learning disabilities specialist and shall include, but not be limited to, an evaluation of the nature and causes of learning disabilities as well as determination of the individual's education competencies on the functional level.

SOCIAL CASE STUDY

4. A social case study shall be made by a certified school social worker and shall include, but not be limited to, an evaluation of the family and community factors which contribute to the child's problem and which serve as supportive resources.

When a school district is unable to employ a basic child study team, the school district shall utilize the services of an eligible approved clinic or agency or professionals in private practice, representing basic child study team disciplines, to classify handicapped children. This shall be done only with the advanced written approval of the Commissioner of Education.

§6:28-3.1

Handicapped pupils shall be afforded educational programs according to how they can best achieve success in learning.

Whenever possible handicapped children are to be grouped with non-handicapped children as part of their educational programs.

PLACEMENT

The chief school administrator or designee shall be responsible for the placement of handicapped pupils based on the recommendations of the basic child study team employed by the local board or the findings of a clinic or child evaluation center... Parents shall be consulted on all placements.

§6:28-3.19

SUPPLEMENTAL INSTRUCTION

Supplemental instruction shall be provided handicapped children which is given to complement their regular instructional program. Supplemental instruction shall be provided at a school or other facility operated and controlled by the local board.

The teachers providing supplemental instruction shall be appropriately certified or approved and shall be employed by the board.

§6:28-3.2

All school districts shall provide a continuum of educational services including programs of instruction complementary to the regular classroom.

Handicapped children shall be served in an educational program on any of the following basis but priority shall be given to the program which offers the student the least restrictive environment.

1. Instruction at school which complements regular class program; supplementary instruction; and resources room and/or learning center.

2. A special class program in the district.

3. A special program in the public schools of another district; a county vocational and technical school; a county special services district; an education services commission or a jointure commission.

4. Public school programs in hospitals, convalescent homes or other private institutions provided by agreement between one or more school districts.

5. A State of New Jersey operated program.

6. Sheltered workshops in conjunction with other educational programs in the local district on a part-time or full-time basis.

7. Sending children capable of benefiting from a day school instructional program to privately operated day classes, in New Jersey or an adjoining state or a nearby state and within 400 miles of Trenton or, with the approval of the Commissioner, to meet particular circumstances, at a greater distance from Trenton, the services of which are nonsectarian whenever in the judgment of the board of education with the consent of the Commissioner it is impractical to provide services.

PRIVATE INSTRUCTION

8. Individual instruction at home or in school whenever in the judgment of the board of education with the consent of the Commissioner it is impractical to provide a suitable special education program for a child.

INDIVIDUAL INSTRUCTION

§6:28-3.20

The board shall furnish daily transportation within the state to handicapped children. The board, when providing this transportation, is to exercise the upmost care for the child's safety.

§6:28-3.3

Teachers instructing handicapped children shall provide instruction designed to correct or compensate for the disability as well as work cooperatively with other teachers who may provide other portions of the pupil's educational program.

In programs other than special class the instructional reponsibility shall be shared between teachers holding general and special education certificates.

§6:28-3.4

CLASSROOM AIDES

Classroom aides, under the supervision of a principal, teacher of the handicapped, general education teacher or other personnel, appropriately certified, may assist the teacher in special classes or other special programs.

§6:28-3.6

EXTRA-CURRICULAR ACTIVITIES

Handicapped children shall not be denied access to participation in extracurricular, intramural, and interscholastic activities as well as health, recreation and social services activities.

§6:28-3.9

The local district, independently or in concert with other school districts, shall provide an appropriately sequential program, kindergarten through secondary school completion, for all classified handicapped pupils.

A handicapped child must be certified as having completed the elementary special education program. The child's program responsibility then passes to the secondary school.

§6:28-3.10

A special program shall be defined as one planned for individual handicapped children under the supervision of an appropriately certified or approved teacher who regularly provides instruction to the children and shall plan and implement the program of these handicapped children which may include instruction by other teachers.

The following requirements pertaining to health and safety shall be observed: (1) suitable health services shall be part of the school program, (2) adequate provision by the local board of education for continuing child study team services appropriate to the children's disabilities, and (3) provisions for rest, lunch, and special training in accordance with the needs of the pupils.

Adequate building facilities shall be provided.

A course of study or training, adapted to the special needs and abilities of the pupils with emphasis on their capabilities shall be offered.

The teacher or teachers assigned to the program shall hold an appropriate teaching certificate as prescribed by the State Board of Education.

Instructional materials and educational media suitable to the education or training of handicapped children shall be provided in consideration of ability and age levels, and in recognition of educational and social needs.

Any joint provision for supervision of programs, facilities, examinations or transportation shall meet statutory provisions.

Supervision of education programs for the handicapped in local school districts shall be performed by appropriately certified and qualified supervisors of instruction.

CLASS SIZE

Class size and grouping shall be appropriate to the disability and need of the children involved. In the following categories or subcategories the maximum class size shall not exceed: chronically ill - 20; orthopedically handicapped - 15; educable mentally retarded - 15; trainable mentally retarded - 10; socially maladjusted - 12; communication handicapped - 10; neurologically impaired - 8; perceptually impaired - 12; emotionally disturbed - 8; visually handicapped - 8; auditorially handicapped - 8; and multiply handicapped - 8.

Factors of chronological and mental age shall be weighed in the formation of special classes, as well as factors of social adjustment.

Participation in a regular school activity program shall be provided to the extent that the capabilities of the child permit as determined by the child study team.

Exceptions regarding group size, age range and classification restrictions for experimental purposes may be made with prior approval of the Bureau of Special Education and Pupil Personnel Services.

Reports of general and special examinations used in the identification, classification, placement or instruction of handicapped pupils and records descriptive of the child's needs, abilities and progress shall be available to the Commissioner of Education and his designated representatives.

§6:28-3.12

CONFINED CHILDREN

Children confined to their home, or to a hospital by a physician because of illness or injury shall receive an appropriate educational program at their place of confinement upon ascertainment and notification to the appropriate school adminstrator that such confinement is expected to extend to a period of at least two weeks.

§6:28-3.13

"Confined children shall receive instruction for not less than five hours per week..." These five hours shall be accomplished by no less than three daily visits by the teacher.

§6:28-3.15

HOME INSTRUCTION

Individual home instruction may be accomplished by telephone or television for confined children. Such instruction may consume all except two hours per week of instruction.

§6:78-1.1

SCHOOL FOR DEAF

The function of the School for the Deaf is to provide tuition free residential and day educational facilities and instruction for deaf children in the following areas: (1)preschool, (2)nursery, (3)elementary, (4)junior high school, (5)senior high school, (6)vocational-technical, and (7)post-seconday education.

Appropriate certificates and diplomas shall be awarded upon the completion of approved courses of study.

Applications for admission shall be made directly to the school through a written request from the parent or legal guardian with or without assistance from the child study team of the applicant's local school district.

All applicants must be deaf persons of suitable age and capacity for instruction, legal residents of this State, not over 21 years of age and meet the following criteria:

1. All applicants must have a residence other than the school.

2. All applicants must be classified as "auditorily handicapped" (deaf) in accordance with statute.

3. All applicants must be physically and emotionally capable of adapting to residential and educational requirements of the program.

4. All applicants under the age of 14 years must either be too remote from another approved program for the deaf for commuting purposes or be classified as capable of benefitting from a limited residential placement due to extenuating circumstances.

An applicant who is refused admission after following the admission procedures outlined above, may appeal such decision in writing to the Commissioner of Education.

2. Programs for Exceptional Children

Constitution

New Mexico Constitution Article XII, Section 13

"The legislature shall provide for the control and management of . . . the New Mexico School for the Visually Handicapped, the New Mexico School for the Deaf and the Northern New Mexico State School . . . by a board of regents for each institution."

Statutes

§73-23-3

Children who, on account of a visual handicap, cannot be educated in the public schools must be sent for 7 school years to the New Mexico School for the Visually Handicapped unless such children attend private school, are taught at home or are too physically disabled to attend.

SCHOOL FOR BLIND

§73-23-4

The superintendent of the New Mexico School for the Visually Handicapped shall arrange for payment for transportation of students to the school when students' parents cannot afford to pay.

§73-23-5

"Superintendents of all school districts in the state . . . shall report to the superintendent of the New Mexico Institute for the Blind whether or not there are blind children of legal school age within their . . . districts." The superintendent of the institute must then notify the parents of such children that, subject to exceptions their children are to attend the New Mexico School for the Visually Handicapped.

§73-24-5

Names and addresses of all deaf and hard of hearing school age persons must be reported by the district superintendent to the superintendent of the New Mexico School for the Deaf who, in turn must notify such childrens' parents to send the children to the School.

SCHOOL FOR DEAF

If this is financially not feasible the School for the Deaf will pay for a child's clothing and transportation. Deaf students are subject to the state compulsory attendance law.

§77-11-3, 3.1, 3.2

Exceptional children -- those "whose abilities render regular services of the public school to be inconsistent with their educational needs" -- must be provided with special education sufficient to meet their needs. Standards are developed by the state board. Programs are administered by the local district. The state department of education shall set standards for diagnosis and screening and educational offerings for the exceptional children. The state superintendent must approve the programs prior to distribution of funds.

§77-11-3.3

"The responsibility of school districts, institutions and the state to provide a free public education for exceptional children is not diminished by the availability of private schools and services." Local boards, with state superintendent approval, can make agreements with nonsectarian nonprofit educational training centers for educating exceptional children. Payment is made by the local board. It continues to be a state responsibility to see that "exceptional children receive the education to which the laws of the state entitle them."

Agreements between the board and private centers must provide for diagnosis, on-site evaluation of programs by the board and the department of education and must ensure that state standards are met.

2. Programs for Exceptional Children

Statutes

§4201 -- 4205

BLIND/DEAF PUPILS

Specified institutions for the instruction of the deaf and of the blind "shall be subject to the visitation" . . . review and evaluation of the commissioner of education. All deaf children who are three or over and have lived in the state for one year are eligible for appointment to such schools.

The commissioner of education may allocate funds for clothing for state deaf pupils when parents or guardians are unable to do so.

§4206 -- 4208

BLIND PUPILS

"All blind persons of suitable age and capacity" (resident in the state for one year immediately preceding application) are eligible for appointment to specified institutions for instruction of the blind.

"Each blind pupil shall be provided with board, lodging and tuition." The regular term of instruction is eight years, but may be extended.

The commissioner of education may allocate funds for clothing for state blind pupils when parents or guardians are unable to do so.

§4209

SCHOOLS FOR BLIND/DEAF

Pupils who are both blind and deaf or both blind and cerebral palsied shall be admitted as state pupils into one of the specified institutions for the instruction of the deaf and blind and under the same conditions of eligibility.

§4301 -- 4307

SCHOOL FOR BLIND

A New York State School for the blind is established "under the jurisdiction and control of the education department." The school's primary objective is to furnish the best know facilities for education of the blind and "to train them in some useful profession or manual art . . . ." The governor shall

appoint one member per year, who meets residence requirements, to serve a 7-year term on the "board of visitors" and shall appoint members, as necessary, to fill vacancies. Members shall serve without pay. Board members shall "visit and inspect" the school for the blind, and recommend the appointment and approve the removal of a superintendent . . . ." The superintendent shall "supervise and manage" the school. The commissioner of education is empowered to set "personnel procedures and conditions of employment."

APPOINTMENT

REMOVAL

§4308 -- 4310

"All blind persons of suitable age and capacity for instruction, who are legal residents of the state, shall be entitled to the privileges of the New York State School for the Blind, without charge, and for such a period of time . . . as may be deemed expedient by the education department."

SCHOOL FOR BLIND

Out-of-state pupils will be accepted as space allows, and will be required to pay tuition.

TUITION

Admission applications must be accompanied by an official certification of residence.

§4311

Parents or guardians of blind children must provide clothing and travel expenses for students. The department of education shall furnish the above if parents or legal guardians are unable or fail to do so.

Whenever it is "deemed necessary by the education department to permanently remove a pupil from the school" such pupil shall be removed by his/her parents or guardians.

REMOVAL

§4351 -- 4354

"The New York state school for the deaf is . . . established under the jurisdiction and control of the education department."

SCHOOL FOR DEAF

"The primary object of the school shall be to furnish children of the state suffering from deafness. . . who may be expected to profit from instruction, such

educational opportunities as will enable them . . . to be come useful and well-adjusted citizens of the state."

APPOINTMENT

"The regents shall appoint an advisory board of visitors . . . consisting of nine members," who meet residence requirements, for five-year terms. Vacancies will be filled by regents' appointment. Members shall serve without pay. It is the responsibility of the board of visitors to visit and inspect the New York state school for the deaf.

SCHOOL VISITS

APPOINTMENT

"The chief executive officer of such school shall be a superintendent," appointed by the regents, who has supervision and management of the school. The commissioner of education is empowered to set "suitable personnel procedures and conditions of employment."

§4355; 4356

SCHOOL FOR DEAF

"All deaf persons of suitable age and capacity for instruction who are legal residents of the state shall be entitled to admission to the New York state school for the deaf without charge for such period of time . . . as shall be deemed proper and expedient by the department."

"The board of education or trustees of each school district shall establish a committee on the handicapped" to annually "identify, review and evaluate . . . the status of each handicapped child." The committee shall "make recommendations . . . as to appropriate programs . . . evaluate the programs, services and facilities for handicapped children; report to the board of education, and provide for the transmittal of information . . . such as test results, to the child's home district or education district."

"The board of education or trustees of each school district shall be required to furnish suitable educational opportunities for handicapped children . . . ."

School authorities shall provide "suitable transportation to and from special classes or programs".

§4401; 4402

"The board of education or trustees of each school district shall ascertain . . . the number of handicapped children in such district under the age of 21 years and the nature of the handicapping condition of each such child . . ." ("A 'handicapped child' means a person . . . who, because of mental, physical or emotional reasons can receive appropriate educational opportunities from special services.)

§4403

REGISTER

The state department of education shall: "maintain a register of handicapped children and . . . use all means . . . necessary to adequately meet the physical and educational needs of such children . . .;" stimulate public and private efforts in this direction; and periodically inspect and evaluate such programs.

§4404

EVALUATION

HEARING

If a parent or guardian of a handicapped child objects to evaluations and program recommendations of the committee on the handicapped, he/she is entitled to a hearing before a hearing officer, subject to review by the commissioner of education.

§4407

When the department of education is satisfied that a handicapped child is not, because of an unusual handicap or combination of handicaps, receiving such instruction from which he/she can be expected to benefit the department is authorized to contract with an out-of-state facility for the child's instruction.

CONTRAC

§4408

SCREENING PROGRA

"The legislature declares that the establishment of a mandatory learning impediment screening program which will enable school districts to detect quickly and accurately the presence of handicaps likely to impede the learning process in individual children at

the earliest possible point during their schooling is an essential first step toward achieving the realization of its goal of maximizing the educational opportunities of all children in the state of New York."

REGULATIONS

§ 6.1 — 6.4

SCHOOL FOR BLIND

The commissioner of education has general control and management of the New York State School for the Blind. The commissioner shall determine admissions, and provide clothing and expenses for indigent children.

DIPLOMA

The board of visitors of each school shall study the needs of the schools and report to the commissioner. Diplomas shall be awarded to pupils who meet the requirements for graduation.

§ 149.4 — 149.5

School districts that receive additional State aid for pupils with special educational needs shall prepare and submit to the commissioner annual reports which describe the special education program objectives and activities. At the close of the school year, the school districts shall file an annual report describing the program and evaluating the results achieved.

§ 200.3

APPOINTMENT

Each board of education shall appoint a committee on the handicapped. Boards may also appoint subcommittees to assist the committee on the handicapped.

EXAMINATIONS

School districts shall provide a physical examination, a psychological examination, and other necessary evaluation in order to ascertain the physical and mental factors which contribute to the handicapping condition.

The formation of special classes shall depend upon "the severity of the children's handicaps, capabilities and educational, social or emotional needs."

Special classes for children handicapped because of severe physical reasons (including children who are blind, deaf, orthopedically handicapped or neurologically impaired) shall be organized as follows: (1) the age range of the children shall not exceed three years. (2) The class size shall not exceed 10 at the elementary level, and not above 15 at the secondary level.

Special classes for children handicapped because of severe emotional reasons: the age range shall not exceed three years and class size shall not exceed 10 at either elementary or secondary levels.

CLASS SIZE

Special classes for the educable mentally retarded: (1) age range shall not exceed 3 years; (2) register at the elementary level shall not exceed 15; at the secondary level it shall not exceed 18.

Special classes for the trainable mentally retarded: (1) Age range shall not exceed four years. (2) The total register for children through 12 shall not exceed 10; for children over 12, it shall not exceed 12.

Special classes for multiply handicapped children: (1) The register of children shall be based on the needs of the children as well as their ages. (2) Children in such classes will receive the services of certified specialist in two or more areas of special education.

The formation of resource programs shall depend upon the nature of the child's capabilities and individual needs. The total enrollment in a resource program shall not exceed 20. Each handicapped child in a resource program shall receive at least one hour of individual or small group instruction five days a week. The teacher shall be certified in the appropriate areas of special education. There shall

be resource programs for (1) educable mentally retarded, emotionally disturbed, physically handicapped; (2) visually impaired and partially sighted; (3) severely speech impaired; (4) hearing impaired; and (5) those with combined handicapping conditions.

HOME INSTRUCTION

Home and hospital instruction shall be available for handicapped children who are unable to attend school.

Each board of education shall provide for an individual education plan for each handicapped child. The individual education plan shall be written to meet the unique needs of each handicapped pupil. This plan shall be developed at the time the child enters the special education program, and shall be reviewed and revised periodically (at least annually).

REVIEW

The individual education plan shall include: a statement of the present educational level of such pupil; a statement of annual goals; a statement of the specific services and materials to be provided to the pupil; appropriate objective criteria and evaluation procedures and schedules for determining, at least on an annual basis, whether the instructional objectives are being achieved.

Planning conferences to determine the education plan shall be conducted as soon as possible, but not later than 30 days, after the child enters the special education program. The participants shall include the pupil's teacher, the pupil, and whenever appropriate, the pupil's parents.

§ 200.5

The parents and guardians of handicapped children shall be advised of any modification or change in a child's evaluation or special education placement. This is required whenever a committee on the handicapped decides that a child needs special educational services, or recommends a change in the child's placement, or recommends the continuation of the child's placement. The notice

EVALUATION

NOTICE

HEARING

APPEAL

to the parents must be in writing and shall include a detailed description of the committee's recommendations; the tests upon which the recommendation is based; state that school files and reports are available for inspection; describe the right to a hearing if there are objections to the recommendation; and include a statement on appealing any hearing decision. Within 10 days of receipt of a notice of recommendation, a parent or guardian may request a hearing. The board of education shall appoint a hearing officer to conduct the hearing. At the conclusion, the hearing officer shall submit her/his recommendation to the board of education which shall render a decision at its next meeting. The parents shall be advised that they have a right of appeal to the commissioner of education.

When a board of education is notified by a child's parent or guardian or by a physician that there is reason to believe that the child may need special education services, the board of education shall provide for an eligibility determination within 30 days of the notification.

§ 200.6

Applications to state-supported schools for the deaf, blind or severely physically handicapped shall be made by parents through the committee on the handicapped. If the committee recommends approval, the board of education shall forward the request to the commissioner. The commissioner will direct the parents to have the child evaluated at the State school and notify the parents, board, and committee of the results and recommend approval, if appropriate.

EVALUATION

The commissioner's approval of the State appointment will be based on the following:

(1) Only deaf, blind or severely physically handicapped students from ages 3-21, who are New York State residents, may be appointed to State supported

schools. (2) Appointments shall be on a day basis unless special circumstances prevent daily travel arrangements. (3) State supported schools must maintain a full program for at least 180 days. (4) A State-appointed pupil is entitled to the due process rights offered under State education law. (5) Confidentiality of pupil records shall be maintained.

SCHOOL YEAR

State-operated and state-supported schools shall submit annual budgets to the commissioner of education.

§ 200.8

If it is established that a child suffers from a handicap for which appropriate facilities do not exist within the State, state assistance may be given to send the child to an out-of-state school.

PLACEMENT

The out-of-state school must have a suitable education program and have been approved by the State where the school is located.

The commissioner must approve all out-of-state placements of handicapped children.

§ 200.12

IDENTIFICATION

The board of education shall identify all handicapped children from birth to 21 who reside in the district. A register of such children shall be maintained by the committee on the handicapped.

§ 203.1 (Statutory authority §207)

EXAMINATION

All school districts shall administer examinations to ascertain the physical, mental and social causes of children who "fail continuously" or who are "under-achievers." Such children are those who fail in two or more subjects in one year, or those who in a teacher's judgment fail to achieve their capacity for a year. The physical examination must be conducted by a licensed physician and shall

precede the other examinations. The results of the examinations shall be reviewed by the school authorities in order to determine the best procedures for removing the causes of failure or under-achievement for each child.

IV.D.; Regulation §156.13

IV.H.; Statute §3208

2. Programs for Exceptional Children

Statutes

§115-1.2

An annual census of "children with special needs" shall be [taken] by the Departments of Public Instruction and Human Resources. The census shall be conducted by local education agencies and its purpose shall be "to ensure that all children with special needs are identified and that appropriate programs are provided." CENSUS

§115-11.6 - .8

A "Council on Educational Services for Exceptional Children" is established as an "Advisory Council to the State Board of Education."

The Council on Educational Services for Exceptional Children shall periodically review the "exceptional child programs in the public schools," receive and review complaints regarding the programs and recommend "corrective actions and programming" to the State Board of Education.

§115-172 - 175

Every deaf or blind child between six and 18 years who is eligible for admission to a State school for the deaf or the blind, must attend an approved school. A blind child may however attend a public school. Parents and guardians of such children must see to it that the children regularly attend school. The superintendent of a school for the blind or the deaf may "exempt or discharge" a pupil whenever deemed "necessary or proper", but the parents of such a child may petition the school board for review. Failure on the part of the parents of such a child, to send the child to school shall constitute a misdemeanor. The names of parents of deaf or blind children shall be reported by county and city superintendents to the superintendents of schools for the blind and the deaf.

§115-315.23 - 115-315.26

A system of "Regional Educational Training Centers" is established to "provide in-service training to all special education teachers," to develop skills in elementary grade teachers "to detect potential special educational needs," to "provide in-service training and consultative services to a parent or guardian of a child with special needs," and to "conduct an in-depth evaluation of the impact of in-service training on the delivery of services to children with special needs within the public schools." The State Superintendent shall "develop rules and regulations" for the operation of the centers.

§115-321 - 115-342

SCHOOL FOR THE BLIND

All blind children "between the ages of six and 18 years" may be admitted to the state school for the blind. Transportation and clothing may be provided for children who are unable to pay for same.

SCHOOL FOR THE DEAF

The state school for the deaf shall receive children "between the ages of six and 21 years" who are state residents. The school for the deaf shall provide instruction in the "branches of study now prescribed . . . for the public schools" and students shall receive free textbooks.

REGULATIONS

§2E.0601

The division for exceptional children is responsible for the following:

(1) providing consultative services to local school systems in planning, establishing, and maintaining programs for the instruction of exceptional children; the following areas of exceptional children are provided services: crippled, emotionally disturbed, gifted and talented, hearing impaired, homebound, hospitalized, learning disabled, mentally retarded, multi-handicapped, speech and language impaired, visually impaired;

(2) assisting local school systems in utilizing available resources through the completion of the equal educational opportunities plans as set forth in the Equal Educational Opportunities Act;

(3) cooperating with other divisions in the department of public instruction and other departments, agencies and institutions of higher education to foster a collaborative effort on behalf of all exceptional children;

(4) disseminating information needed by parents, lay persons, legislators, organizations, and agencies, to keep them properly informed and to assist them in better understanding programs for exceptional children;

(5) coordinating and administering activities of three participating federal programs;

(6) providing staff development to improve and upgrade competencies of regular and special class teachers, administrators and support personnel.

§2E.0604

The placement of children in any program shall be based on a competent evaluation by qualified personnel and shall be in keeping with "the powers, procedures and placement in the least restrictive setting." The school-based committee should review the placement of each child so they may be placed in the most appropriate program for the following year.

PLACEMENT

Eligibility for enrollment in a public school program for the trainable mentally retarded, elementary and secondary level, a child must have attained his[her] sixth birthday but not his[her] eighteenth. A county or city board of education may enroll older youth between their 18th and 21st birthdays in a secondary class designed for eligible children in the 15-21 age group. Two or more units may join together in providing programs for children with special needs; instructional materials, supplies and equipment shall be provided by local boards of education for children with special needs.

ELIGIBILITY

Facilities and equipment used for children with special needs shall be designed and organzied to meet the particular needs of the exceptional children being served.

Transportation will be provided by local boards of education from special funds provided through the Director, Division of Transportation of the State Board of Education.

Psychologists will be used to identify, diagnose and evaluate children who are not succeeding in the regular school program, and to assure correct placement of these children. Psychologists shall meet either level 1, 2, or 3 certification as approved by the board and the division of certification and may settle students in grades K-12. First priority for services should be given to grades K-6, with emphasis on prevention and early identification and remediation of problems.

EVALUATION

Qualification of Personnel

Teachers of exceptional children shall hold as a minimum a class A certificate except in emergency cases one may hold less than a class A certificate but must be working actively toward "A" certification. Personnel employed for services to exceptional children in 1974-75 and each year thereafter have a maximum of three years to obtain exceptional children certification and must work at a rate of six semester hours each year of employment to be employed in these positions. Beginning speech, language and hearing specialists shall be certified in speech and language to be employed. Beginning on September 1, 1981, all teachers of the trainable mentally retarded shall be certified in special education.

STAFF

Teacher aides employed in the per pupil grant-in-aid program shall have training at least equivalent to high school graduation.

§2E.0605

"Local administrative units shall develop comprehensive plans, hereafter referred to as the Equal Educational Opportunities Plan, for programs and services for each school year to meet the special needs of all exceptional children."

In developing a plan of programs and services for children with special needs, local units shall include the

following: service forecasting; planning a continuum of services for children with special needs in the least restrictive alternative; providing procedures on referral, screening, assessment, placement and due process; drafting a plan to implement a continuing census of children with special needs; identification of new programs and services to be offered.

§2E.0607

Each local administrative unit shall establish and maintain services which meet the educational needs of children with handicapping characteristics or exceptional needs. To the maximum extent possible, children shall be educated in regular class settings. When the regular class environment does not prove satisfactory in meeting the needs of the children, other supportive services should be provided prior to removing them from the regular classroom.

Each local administrative unit shall document in writing the specific reasons a child's special education needs cannot be met in the regular classroom before placing him/her in a special class or school. Special education teachers should continue to deliver special services to the child in the regular classroom if needed until the regular teacher can take full responsibility for the child. No child should be returned to a regular class without follow-up services to him/her and the regular classroom teacher.

In order for a child's needs to be met a number of options should be made available ranging from the following alternatives: regular classroom; regular classroom programs with supportive services; part time special classes; full time special class; special day school hospital home services; and residential centers.

In the development and implementation of a continuum of program and service alternatives for children with special needs, the following supportive services need to be considered: psychological services, pupil personnel services, audiological services, public health services mental health services, social services, psychiatric

therapy, and remedial reading. A continuum of programs and services model for children with severe speech, language and hearing impairments should include a communication development program, a communication deviations program, and a communication disorders program.

§2E.0609

"Each administrative unit shall develop procedures for referral, screening, assessment, and placement of children with special needs. These procedures must be in keeping with the Equal Educational Opportunities Act and follow due process procedures."

§2E.0610

"Variations from placement procedures may occur when sufficient evidence exists to indicate that children can be properly identified and placed within the intent of the procedures. A written plan detailing the variations with reasons listed shall be submitted to the director, Division for Exceptional Children for approval prior to their implementation."

PLACEMENT

Referral

When a teacher recognizes that a child's educational needs are not being met, the teacher will provide in writing an assessment of the pupil's strengths and weaknesses. This will be given to the principal of the school who then may contact the chairperson (director or coordinator) of programs for exceptional children.

REFERRAL

The pupil will be observed in his/her regular classes by at least one of the following: the principal, the chairperson of programs for exceptional children, a teacher of exceptional children. A description of the child's behavior will be completed.

The regular teacher, the local chairperson and the principal will confer to determine if the regular program can be adapted to meet the needs of the child. If a special program or service is desired, reasons should be given in writing and referral made to the school-based committee.

Children with speech and/or language problems may be identified through mass screening and/or teacher-referral.

School-Based Committee

A school-based, biracial (at least one member of the committee shall be of the same race as the child) committee to be responsible for initiating screening and assessment of children referred to it should be selected.

The following information must be gathered on each child who needs special attention other than that available in the regular classroom. This information will be presented to the school-based committee:

Initial referral from teacher, principal, parent, surrogate parent or bona fide agency; local chairman and/or principal's observation of the child if needed; recommendations following the joint conference between teacher, chairman and principal requesting special services; the assessment of an exceptional child will be multifactored to provide a comprehensive view of the child from the perspective of the school, home and community.

A. Education Function

Screening and assessment will be the responsibility of the school-based committee. The assessment will include some or all of the following information:

ASSESSMENT

Screening. The child's existing school records including work samples shall be collected and analyzed.

Assessment. An assessment shall be made of the child's educational functioning in relation to the educational program of the school.

"Any classification of students for educational purposes should consist of a description of the types of educational programs and services needed by each child to learn to the fullest extent possible in the school setting, rather than just categorizing the child by some diagnostic label which is unrelated to educational programming."

B. Psychological Evaluation. The psychological evaluation shall include but not be limited to, the assessment of intellectual functioning and social and personal behavior, adaptive behavior and psycho-motor development, to be performed by a qualified examiner who is certified or licensed.

C. Vision and Hearing Screening can be conducted by school health nurses and other appropriate personnel. Speech, language and hearing specialists may conduct hearing screening. Medical evaluations of these functions should be conducted by a physician.

Adjustments shall be made for the socio-cultural and home environment of pupils when making assessments and selecting instruments, and when administering tests and evaluating the results.

The school committee is responsible for written recommendations to the receiving teacher on the strengths and weaknesses of the child based on collected data. These recommendations will be used in the re-evaluation process in determining continued or changed placement. If the committee's judgement is that more data is needed on the child, the parent or guardian must be informed of the need and give them written consent.

PLACEMENT

The administrative placement committee should have in its membership a person of the same race as the child being considered for placement. Placement is recommended by the school-based committee. The administrative placement committee will review reports and recommendations and then render a decision for placement. One of the following procedures should be followed: a conference is held with the parent or guardian; they are notified of the committee's decision and are given a description of the program or service to be provided; they are told of their right to review or challenge the data and provide additional data that could have effect on the placement of the child; and the parent is furnished a copy of the appeal procedures and is appraised of his/her right to appeal the decision.

A letter is sent to the parent or guardian containing the committee's decision concerning placement; a

written description of the program or service to be provided; a description of the rights of the parents; a list of agencies that could provide free evaluations if desired; and a copy of the appeal procedure. Each year the school-based committee should receive the placement of all children in special education programs in their school and make recommendations to the administrative placement committee concerning the future placement of the child. The parent or guardian must be notified of any changes in placement. After no more than three years of placement an in-depth re-evaluation is recommended.

NOTICE

A request to inspect or review a child's record either by the child or a parent or guardian should be honored within a reasonable time, but in no case more than 45 days after the request has been made, and a child or legal guardian has a right to a hearing to challenge the validity of the contents of the records. Parental consent is required prior to release of records.

REVIEW

Unusual circumstances may permit placement, after necessary evaluations, without parents' consent. In addition, such assignment shall be made only upon the recommendation of the administrative placement committee and with approval of the local superintendent. The parent is entitled to appeal this action following due process procedures.

CONSENT

Recommended and regional screening and evaluation before placement, and administrative guidelines are available for the following programs. Programs for crippled children; programs for emotionally disturbed children; programs for gifted and talented children; programs for hearing impaired children; programs for homebound children; programs for hospitalized children; programs for learning disabled children; programs for educable mentally retarded children; programs for trainable mentally retarded children; programs for severely and profoundly retarded children; programs for multi-handicapped children; programs for speech and language impaired children; programs for visually impaired children.

§2E.0611

The policies adopted by the State Board of Education for the Governor's School of North Carolina are as follows:

that the school be administered and financed by the State Board of Education as a part of and in connection with the division for exceptional children; the director of the Division for Exceptional children is responsible for coordinating the efforts of the Governor's School Director with the division and state agency and to coordinate the outreach activities of the school. An advisory board known as the Board of Governors, appointed by the State Board of Education will be composed of 10 citizens, one being always a state assistant superintendent, one being the administrative head of the institution or facility housing the school, with the rest being appointed by the state superintendent and approved by the state board for not more than two consecutive three year terms. A chairperson and vice chairperson shall be selected from that membership, and the board shall meet at least three times a year.

The School Director, under the Direction of the Director, Division for exceptional children, shall be responsible for the development and implementation of the curriculum of the school and also for recommending procedures which will insure the continuous evaluation of all aspects of the school and its program. The Director of the Governor's School periodically shall submit reports to the Director, Division for Exceptional Children on the status of the school and its outreach activities.

§2E.0612

A parent or guardian of a child must be notified any time a child has been or is about to be: NOTICE

(1) denied entry or continuance in a program appropriate to his/her condition and needs;

(2) placed in a program which is inappropriate, unsuitable, or inadequate to his/her condition and needs;

(3) assigned to a special program when he/she is not a child with special needs.

A parent or guardian of a child can initiate the review process if she/he feels her/his child is a child with special needs even when the state or local authority regards the child as fully capable of achieving his/her full potential in a regular program. The notice to the parent must contain:

a statement of the placement, or impending placement with a brief statement of the reasons for the actions taken; a statement informing the parent or guardian of his/her entitlement to a hearing for review; a statement indicating the name and address of the entity to receive the written request; a statement authorizing the parent that he/she has access to all the information on which the full determination was made; a statement informing the parents of all of his/her legal rights at the hearings; a statement informing the parent that the child may appear before the hearing.

HEARING

The initial hearing should be made before the local school board in all matters which are primarily educational. The parent may introduce any information which could have had some bearing on the correctness of the determination being made. The official who made the determination must be present.

Within seven days the school board shall make its determination, in writing, supported by explanation of the reasons for its decision.

The initial hearing shall be before the advocacy council in all "human resources matters," and shall follow the same procedures as the other hearings mentioned.

§2?.0613

APPEAL

The State Superintendent of Public Instruction shall designate a hearing officer to hear all appeals from decisions of local school boards concerning determinations made. He/she shall designate a hearing date; notify the parent or guardian of an affected child twenty days before the designated hearing; designate an alternate hearing date in case the hearing is delayed. The hearing before the hearing officer shall be informal. Technical rules of evidence need not be observed. However a complete record of the hearing shall be kept.

The hearing officer shall occupy the position of an impartial Judge taking under consideration the best interest of the child.

The determination of the hearing officer shall be designated the final administrative decision. It must be reached within twenty-five days, must be in writing and include reasons for the decision. The standard for reaching the decision shall be based upon a determination of what is in the best interest of the child. No child shall be excluded from receiving education or service for any reason whatsoever. All appropriate local officials shall be promptly notified of the final administrative decision and shall be directed to act in a manner consistent with such decision.

The final administrative decision is the decision of the State Superintendent of Public Instruction.

2. Programs for Exceptional Children

Statutes

§15-34.1-02

Any person who has control over a deaf child of at least four years of age, or blind or mentally deficient child of an age seven to twenty years, shall send such child to an adequate educational institution. Adequate means any school specializing in the training of the handicapped.

§15-47-34

"The state director of institutions, after consulting with the superintendents of the school for the blind, the school for the deaf, and the Grafton state school, shall determine whether those children under the age of twenty-one, who are deaf as well as blind, should be sent to the school for the blind, the school for the deaf, or the Grafton state school. If . . . there are not adequate facilities for the education of such children in this state the director . . . is authorized to determine whether such deaf-blind children, should be sent to any school or institution outside the state . . . providing a qualified program of education for such children."

The director may pay for such out of state education according to legislative appropriations. The director may promulgate any necessary regulations to carry out these duties.

§ 15-59-02, 15-59-03

ADVISORY COUNCIL

"The state board of public school education shall constitute the advisory council on special education". The superintendent of public instruction shall employ a director of special education.

School districts shall provide special education to handicapped children and may act jointly with one or more other districts. School districts may provide special education to gifted children. Every school district is required to keep a record of all resident handicapped children who are of school age.

§15-59-05

"The advisory council on special education acting through the office of the Superintendent of Public Instruction, shall establish general state policy within the provisions of this chapter and shall endeavor to ensure a cooperative special education program coordinating all available services. It shall cooperate with private agencies, soliciting their advice and cooperating in the establishment of policy and in the coordination and development of special education programs. With the approval of the advisory council and in accordance with the provisions of this chapter and the policy of the council, the director of special education shall prescribe rules and regulations for the education of exceptional children and for the administration of this chapter, and he [she] shall assist the school districts of the state in the inauguration, administration and development of special education programs, establish standards and provide for the approval and certification of schools, teachers, facilities, and equipment."

§15-59-06.1

The superintendent of public instruction shall enforce educational standards for all special education programs.

§15-59-07

A school district may contract with a private institution for the education of handicapped children if the district is not able to provide a special education program. The district of the student's residence shall be reimbursed by the state for sixty percent of the costs of this program.

§ 15-59.1--15-59.1-02

The county superintendent of schools shall appoint a county board of special education consisting of 3 to 5 members. The board shall annually prepare a program and a budget for special education programs.

§ 25-06-04, 25-06-09

SCHOOL FOR THE BLIND

In order to be admitted to the school for the blind, an applicant must be blind, of school age and capable of receiving an education. All public school superintendents are required to report the names of all blind persons under twenty-one to the superintendents of the school for the blind.

§ 25-07-04; 25-07-10

SCHOOL FOR THE DEAF

In order to be admitted to the school for the deaf, an applicant must be at least four years old, with her/his hearing impaired to such an extent that she/he cannot be educated in the public schools. All public school superintendents must report the names of all deaf children to the superintendent of the school for the deaf.

REGULATIONS

Chapter I: I.B.8.

Under the law and the regulations of the Division of Special Education, any school board may set up the additional educational services and facilities needed by exceptional children to benefit from public education.

The Division of Special Education is responsible for defining special education standards for children, teacher education, and facilities, for evaluating, approving, and reimbursing programs, and for advising and assisting local schools on special education matters.

Chapter III: III

Special education is the program through which the local school provides education to children whose educational needs are not adequately provided for in the regular school program because of physical, mental, emotional, or social conditions.

Chapter III: III.A

Approved special education programs may be initiated by county special education boards, local districts, or cooperatively by several districts.

Chapter III: III.B.

Any child enrolled in an approved special education program is considered regularly enrolled in school. Pupils in special education at junior high or high school levels should be integrated into regular classes; their curriculum will be individualized and coordinated by the director of special education or the special education teacher. Pupils with physical handicaps, learning disabilities or other conditions should be accommodated in the school program. When special classes are needed, the special education curriculum should include both work experience and academic subjects.

Chapter III: III.C.

All programs are locally administered, but must have prior approval by the Department and meet Department standards.

Chapter III: III.D.

When county funds are authorized for special education, the county special education board administers the funds to local boards or otherwise provides county-wide special education services, administered at the county level.

Chapter III: III.E.

Special education program areas are: educable mentally retarded; trainable mentally retarded; physically handicapped; speech defective, visually handicapped; hard-of-hearing (not deaf); those requiring instruction at home or in the hospital; socially and emotionally maladjusted; and specific learning disabilities.

Chapter III: III.G.

The school board should cooperate with local welfare and health agencies as they identify children who may be in need of special education programs.

Chapter III: III.H.

Only those children who meet the prescribed regulations for the classifications of exceptionality, based on medical, psychological, educational, and social education, may be considered for special class placement or service.

PLACEMENT

Chapter III: III.I.

Detailed information regarding each classification of exceptionality is available from the State Department of Public Instruction.

Chapter III: III.J.

Physically handicapped children and certain children with specific learning disabilities must attend private school if public school facilities are not available. Local school contracts with certain private schools for three times the state cost of education and funds from state foundation payment program are available to pay 60% of the contracted amount.

Chapter III: IV.

The programs under federal aid require prior approval by the division of the State Department responsible for the administration of that program.

Chapter V: IV.D.

Students enrolled in an approved special education program should receive regular recognition and diploma upon satisfactory completion of required work.

STATUTES

§3301 15

The state board of education or its representatives shall inspect all institutions of public welfare, mental health and mental retardation, rehabilitation and correction which employ teachers. A report shall be made annually to the directors of the above-mentioned departments and the governor on the teaching, discipline, and school equipment in those institutions.

INSPECTION

§3321.05

"A child of compulsory school age may be determined to be incapable of profiting substantially by further instruction," as determined by standards and examinations or tests of the state board of education. Such capacity shall be determined with reference to instruction available to the particular child in his(her)district of residence, or elsewhere in the public school system, special classes or schools, departments of special instruction, or individual instruction. The state board may enlist the assistance of department, bureau or university of the state supported wholly or partially by state appropriations in the formulating, applying and giving of such standards, examinations or tests.

If a child is determined incapable of profiting from further instruction, such child shall be placed under the supervision of a visiting teacher or attendance officer as long as he(she) is of compulsory school age. Records shall be kept of the names of all such children.

A child whose status has been so determined shall not be admitted to the public schools while such determination remains in force. However, such determination may be revoked by the state board of education for good cause.

§3323.02

The state board of education shall provide a program

of appropriate public school education for all handicapped children of compulsory school age regardless of the severity of the handicap. No state or federal funds shall be granted to any school district, board of mental retardation, or other education agency for a special education program which does not adhere to the procedures, standards and guidelines set by the state board. Such agencies may be required to provide documentation that they are in compliance with such requirements.

The superintendent of public instruction shall provide a status report on the implementation of such programs, which shall include, among other items: the number of identified handicapped children, the number placed in appropriate special education programs, and a summary of the reasons for nonplacement of handicapped children in such programs.

§3323.03

EVALUATION

"The state board of education shall ... establish standards and procedures for identification, location and evaluation of all handicapped children in the state, regardless of the severity of the handicap." No single method of evaluation shall be the sole determinant of the appropriate special program for the child. The state board shall require all school districts to locate and evaluate all handicapped children not receiving special education.

County boards of mental retardation and community mental health and retardation boards may transmit the names and addresses of handicapped children not receiving special education to the board of education.

§3323.04

PLACEMENT

The state board of education, with the department of mental retardation shall establish criteria for the placement of handicapped children in special educational programs. Evaluations shall take place at least yearly.

An appropriate educational program may include instruction in regular classes, a special education program, or

any combination of the two. As far as practical and appropriate, state guidelines shall try to assure that handicapped children shall be educated with children who are not handicapped, whether in public or private institutions or facilities.

HEARING

A hearing on the placement decision may take place if any agency directly affected by it objects. The decision of the hearing officer shall be final except where the child in question or his(her) parents files a complaint in accordance with this code.

§3323.05

EVALUATION

PLACEMENT

Handicapped pupils and their parents shall be guaranteed procedural safeguards concerning the identification, evaluation and educational placement by procedures established by the state board of education. These shall include, though not be limited to:

A) An opportunity for the parents to inspect all relevant records concerning identification, evaluation or placement, and to obtain an independent evaluation of the child;

B) Procedures to protect the rights of the child in the absence of the parent, or where the child is a ward of the state;

NOTICE

C) Written notice to the child's parents of any changes in identification, evaluation,or placement, or refusal to do so, and notice of all procedures under this section;

D) An opportunity for the child or his(her) parents to lodge complaints as to identification, evaluation or placement of the child. Upon a complaint, the superintendent may hold an informal hearing;

HEARING

E) An opportunity for a due process hearing, upon formal complaint, with an impartial hearing officer. A party to a hearing under this division shall be accorded:

RIGHT TO COUNSEL

1) The right to counsel and advice by trained individuals with respect to problems of handicapped children;

2) The right to present evidence, cross-examine witnesses and compel their attendance;

3) The right to a copy of the record of the hearing;

4) "The right to written findings of fact and decisions."

F) An opportunity to appeal to the state board of education, which shall review the case and issue a final order. An appeal of such order may be taken to the county court of common pleas.

APPEAL

§3323.06

A) "The state board of education shall develop, implement, provide general supervision of, and assure compliance with a state plan for identification, location, and evaluation of all handicapped children in the state, for the placement and provision of special education and related services for all handicapped children of compulsory school age, and for the availability of educational placement and special education for handicapped children not of compulsory school age." The state shall provide the means for monitoring, and assure compliance with, the program, as well as a system of personnel development and in-service training, and protection of the confidentiality of personal information of records collected under this chapter.

B) The state board may establish identification and diagnostic services for children under three years of age and counseling services for their parents.

C) The state board shall select competent persons to inspect all classes and programs provided under this plan and to report concerning class instructions, conditions under which classes are maintained, and the extent and nature of all related services for handicapped children."

INSPECTION

§3323.07

The state board shall establish education programs for all handicapped children of compulsory school age, and may establish such programs for children not of compulsory school age. The state board shall require all school districts,

and authorize the department of mental health and mental retardation or other educational agencies, to establish such programs.

§3323.08

Each school district shall have a special education program in accordance with the state plan and subject to state approval. Such plan shall:

A) provide organizational structure, staffing, and supervision for identification, placement, and educational programs for handicapped children;

B) provide identication , location, evaluation of all handicapped children, and educational placement of identified handicapped children of compulsory school age and may provide placement for children at least three years old, including:

1) individual psychological evaluation with written parental consent;

2) use of state board of education criteria for placement.

C) provide an individualized education program to be reviewed each year;

D) provide necessary programs and related services to meet the educational needs of all handicapped children of compulsory school age which meets state board established standards;

E) provide that the superintendent make accessible to the child's parents, the board's standards on special education, the district's comprehensive special education plans, criteria for placement, policy on confidentiality, and the child's individual program;

F) outline steps taken in compliance with the standards established by the state board.

A school district may arrange to provide such special education programs by cooperative agreement or contract with other districts, or non-profit agencies, subject to the approval of the state board of education.

School district plans for special education shall be submitted to the state board after approval of the county superintendent.

§3323.09

The division of mental retardation and developmental disabilities shall establish a special education program to be maintained by the county boards of mental retardation, and shall submit a comprehensive plan to the state board of education.

Such plan shall provide a program of education for mentally handicapped children under the age of twenty-two and the county board shall prepare a statement for each child receiving such instruction which includes name, district of residence, district providing special education and length of the program. After receiving such a statement, the state shall pay the county board tuition if the pupil was a non-resident.

§3323.091

The department of mental health and retardation and the Ohio youth commission may establish special education programs in institutions under their jurisdiction which shall conform to state standards. Such programs may apply for state funds under this code.

The superintendents of such institutions shall prepare a statement on handicapped students receiving special education. Upon receipt of such statements, the state department of education shall:

A) pay normal tuition less the amount of state funds allocated to the child's school district of residence; or

TUITION

B) require the child's district of residence to pay normal tuition, if state funds are insufficient.

§3323.10

An eleven member special education advisory council is herein created to advise the state board of education on

matters relating to special education of the handicapped. The members shall be appointed by the governor. At least four members shall be parents of handicapped children, four shall be persons with demonstrated knowledge of the needs of handicapped children, and three may be school district employees. Employees of the state board of education or department of mental health and retardation may not be members.

APPOINTMENT

Members shall be reimbursed for expenses in their official capacity.

§3323.12

Home instruction shall be provided for all handicapped children of compulsory school age who are unable to attend school even with the help of special transportation. Such instruction may be arranged through cooperative agreement or contract with the county board of mental retardation or other educational agencies.

HOME INSTRUCTION

Five hours of home instruction shall be equivalent to five days of school attendance for determining average daily membership in school districts.

§3323.13

When a student is required, by reason of his(her) handicap to attend school in a district other than the one in which he resides, the district where he(she) attends classes may require payment from the district of his(her) residence. Such payment shall not exceed the tuition of a normal child in the same grade.

TUITION

The district board may contract and pay for the pupil's transportation.

§3312.14

When the per capita cost of special education programs for non-resident pupils exceeds the amount received

by the district of attendance, under chapter 3317 of this code, and the amount received from the state board of education, the district of residence shall pay the excess cost of providing special education programs to the district of attendance by an approved formula.

§3323.15

The state board of education may arrange with any board of education maintaining classes for handicapped students or offering special instruction for students who do not reside in the district to pay for the board of such students under standards and restrictions set by the state board of education.

§3325.01

SCHOOL FOR DEAF

SCHOOL FOR BLIND

The state board of education shall be responsible for the control and supervision of the state schools for the deaf and blind, and shall appoint a superintendent for each upon recommendation of the superintendent of public instruction. They shall serve at the pleasure of the board.

§3325.011; 02

The state schools for the deaf and blind shall receive pupils who are blind, deaf, or blind and deaf who are:

1) residents of the state;

2) wholly or partially blind, or deaf, or both;

3) cannot be educated in the public school system in the judgment of the superintendents of public instruction and the appropriate state school; and

4) are suitable students for the methods of instruction used at the school.

The superintendent of the state school for the deaf may pay necessary expenses for students who are both blind and deaf in any suitable institution.

SCHOOL FOR DEAF

SCHOOL FOR BLIND

§3325.03

The superintendents of the state schools for the deaf or blind may return any student not making sufficient progress in school or industrial work to justify his(her) continuance as a pupil in such school to his(her) parent or guardian, or an appropriate agency.

§3325.04

The superintendents of the state schools for the blind and handicapped may, with the approval of the superintendent of public instruction and subject to regulations of the civil service, employ suitable teachers, nurses, and other necessary personnel to provide proper instruction and care for their pupils.

§3325.06; .07

The state board of education shall establish a program to train parents of deaf or hard of hearing preschool children. The aim of such programs is to aid these parents in "affording to the children the means of optimum communicational facilities."

Toward this end, the state board of education shall use any of the following instructional methods:

A) Classes for parents of preschool age children;

B) A nursery school where parent and child shall enter as a unit;

"C) Correspondence course;

D) Personal consultations and interviews;

E) By such other means or methods as the superintendent deems advisable that would permit a deaf or hard of hearing child of preschool age to construct a pattern of communication at an early age."

Educational programs for the deaf shall use the so-called oral system and, after a fair trial of nine months, any pupil unable to learn such method may be taught the manual method in a separate program.

§3301-51-01 -- 3301-51-08

Special education units designed to evaluate new instructional methodology or alternative procedures for educating exceptional children may be approved upon submission of a written proposal indicating the rationale for the experimental unit, the target audience, assessment and placement procedures, projected staffing ratios, facilities, materials and equipment, and the measurable objectives at the administrative program, teacher and child levels. Such programs must be evaluated annually.

Comprehensive programs at all grade levels shall be provided for hearing impaired children, crippled children, visually impaired children, multiple impaired children, neurologically and emotionally handicapped children, emotionally disturbed children, educable mentally retarded children, and children with speech disorders and hearing deficits. To be eligible, children must be of legal school age and be capable of profiting substantially from instruction as determined from a multi-factored assessment procedure. Crippled children must have a physical disability which prevents successful functioning in the regular classroom to be eligible. To be eligible for a program for neurologically and emotionally handicapped children a child must function within the normal range of intelligence, must be unable to meet the academic and social behavioral expectations of the regular instructional program as determined through an educational assessment that includes standardized test data and observational data. To be eligible for a program for educable mentally retarded children a child must function within the general intelligence range of 50 through 80 and be unable to meet academic and social behavioral expectations of the regular instructional program as determined through test data and classroom observation indicating a long-term need for a modified educational program.

The school district shall have written criteria for placement of exceptional children which shall include "priorities

PLACEMENT

to establish placement of students on the basis of individual need. Procedures providing for a conference with parents prior to placement and provisions for systematic procedures to reevaluate students in approved programs. Programs for exceptional children shall include provision of the services of appropriate specialists including occupational therapists, physical therapists, speech therapists, school psychologists, and work-study coordinators. Teachers of exceptional children shall hold that job as a full-time assignment. All necessary equipment and facilities shall be provided. Special education units shall be housed in regular school buildings housing children of comparative school age. Except for programs for children with speech disorders and hearing deficits, programs for educable mentally retarded children and programs for multiple impaired children "teachers shall incorporate assessment information, instructional objectives and evaluation data in the instructional program." With the exception of programs for emotionally disturbed childern, programs for educable mentally retarded children, programs for children with speech disorders and hearing deficits, exceptional children shall be integrated into regular classes to the extent they are able to succeed in those classes.

Properly qualified teacher aides and volunteers may be utilized in programs for exceptional children.

§3301-51-10

Boards of education may be reimbursed by the state for providing necessary transportation for handicapped children.

§3301-51-11

The Superintendent of Schools is responsible for providing home instruction for physically handicapped and emotionally disturbed children. Teachers shall be appropriately certificated. To be eligible to receive home instruction, children must either be physically unable to attend classes or incapable of progressing satisfactorily

in classes with others as determined by a current educational assessment.

Supplemental tutoring may be approved for those children "whose academic and/or social behavioral performance should show a measurable improvement through short-term, intensive tutoring instruction." Supplemental tutoring may be approved only if "there is no immediate appropriate special class placement available, the child has received instruction in an approved special education unit for children with learning and behavioral disabilty and has been returned to a regular classroom program [and] a current educational assessment indicates that the child can remain in a regular class and progress satisfactorily with [her or] his peers in all educational and social areas with the assistance of tutoring services."

Supplemental tutoring may also be approved for visual or hearing impaired children under similar conditions.

Experimental individual instructional services may be approved for a school district submitting a written proposal indicating the rationale, target audience, assessment and placement procedures, facilities, materials, equipment, and objectives of the experimental service. Experimental services shall be annually evaluated.

§3301-51-12

School districts may be reimbursed by the state for providing boarding homes for physically handicapped children, student reader services, and guide services for visually impaired children.

§3301-51-14

School districts may be reimbursed for the expenses of providing transportation for educable mentally retarded children.

§3301-51-15

Experimental programs to evaluate new methodology or alternative procedures for educating gifted or talented

children may be approved upon submission of an application by a school district to the state department of education including the rationale assessment and placement procedures, staffing ratios, facilities, materials, equipment, and measurable objectives of the experimental program. The experimental program shall be evaluated annually. Children functioning in the upper 3% of the student population or functioning 2 standard deviations above the mean on objective tests instruments, or having the potential of functioning within either of these groups shall be eligible.

"Areas of giftedness shall include the following: superior intellectual ability, specific academic aptitude, creative or productive thinking, leadership ability, visual and performing arts, psycho-motor ability."

School districts shall have written criteria for eligibility and placement which shall include "priorities to establish selection of students on the basis of individual needs.

Instructional programs shall stress critical thinking, problem solving, creative thinking, research skills, scientific method, independent study and research, mentorships, internships and other one-to-one exposure to experts, field trips and special seminars.

Options for programs include acceleration of instruction, ability grouping and instruction which expands rather than replaces the general education program.

§3301-51-16

EVALUATION

HEARING

Parents of handicapped children have the right to deny permission for any proposed evaluation activities prior to the holding of an impartial due process hearing at which an evaluation may be approved. Parents have the right to review records, have copies made at actual cost of copying and requests that amendments be made to the data. Parents have the right to obtain an independent evaluation of their child at their own expense and have the right to present complaints concerning evaluation or placement of

their child. At due process hearings parents have the right to an impartial hearing officer, counsel, and the advice of individuals with special knowledge of the problems of handicapped children. The right to present evidence, confront, cross-examine, and compel the attendance of witnesses, the right to a verbatim record, written findings of fact and decisions, and the right to be fully informed in written and oral form of all evaluation, placement, and review activities and decisions in the native language of the home. Parents have the right to obtain a description of facilities and program options and the right to a conference with any person participating in evaluation, placement or review decisions.

Handicapped children have the right to a free and appropriate public education and all the rights of their parents upon obtaining the age of majority except in cases where the child is legally determined to be incompetent.

EVALUATION

School districts shall obtain written parental permission before evaluating handicapped children unless no response is received to a request for permission within thirty days. Requests for permission to evaluate shall include reasons the evaluation has been requested, descriptions of any suspected problems, persons responsible for the evaluation, advantages and limitations of the evaluation, program options, procedures and instruments that will be used, and an explanation of how findings of the evaluation are to be used. The request for permission shall also indicate that the parent has the right to a summary of multi-factored evaluation data, the right to obtain an independent evaluation at their own expense and the right to deny permission for the evaluation pending the outcome of an impartial due process hearing. Where the parents of a handicapped child are unknown or unavailable, the superintendent shall determine if the child is in need of a parent surrogate and shall assign one (not an employee of the school district involved in the education or care of the child).

PLACEMENT

Placement of handicapped children shall be determined by a placement team conference. At the discretion of the chairperson anyone having a current demonstrated interest

in the placement proceedings may participate in the placement conference. The placement team conference shall produce a written report and recommendations for placement. Within fifteen days after receipt of the placement team conference report, the superintendent shall notify the parent that a change in educational status is proposed or that a requested change in placement is denied. The notice shall describe the educational plan proposed for the child, the method by which it was developed, reasons why it is deemed the least restrictive alternative for the child. The notification shall also state that no change in the child's placement will be made pending resolution of any parental objection unless the placement endangers the child's or other childrens' health or safety.

CASE CONFERENCE

A case conference may be requested by the parents or the school district at any time. Attempts shall be made to resolve complaints and disagreements by an informal hearing. "Every effort should be made in the review to resolve any disagreements and to avoid a formal hearing." All parties have the right to invite others to participate in the informal hearing including legal counsel.

HEARING

In the event a formal hearing is held, an impartial hearing officer mutually selected by the superintendent and the parent shall conduct a hearing within forty-five days of appointment. If the parents and superintendent cannot agree, the State Department of Education shall appoint a hearing officer. Parties to the hearing have the right to a full and complete listing of persons the other party will have at the hearing five days prior to the hearing. The burden of proof at a formal hearing shall be upon the superintendent. The hearing officer's decision shall be based solely on the evidence at the hearing and the decision may be appealed to the State Board of Education. The decision of the hearing officer shall be adhered to pending the outcome of the appeal.

The State Board of Education shall issue a final order within 60 days of receipt of an appeal. Education

agencies shall destroy all personally identifiably data within five years after the data are no longer needed to provide an educational program or services to the child except that directory information and attendance information may be maintained.

§3301-51-17

In consultation with "agencies having information concerning handicapped children and youth" each school district shall operate both in-school and out-of-school programs to "identify, locate and evaluate all handicapped children." Written policies concerning these programs and "child information management" shall be prepared and made available. The identification program shall include "written referral procedures for the purpose of obtaining appropriate multi-factored evaluations. . .standards for multi-factored evaluation, least restrictive placement and individualized educational plan." The district superintendent shall be responsible for the identification program which shall include "reporting a summary of the child data from the in-school child identification system to the Ohio department of education." "The out-of-school child identification system shall locate handicapped children from birth to twenty-one years of age." "Child information management procedures shall be implemented to assure that appropriate statistical data is available to readily determine where each handicapped child is in the identification, location, evaluation, placement and program review process. . . data shall be organized so that it can readily be determined whether the child is receiving an appropriate public education, a partial education or no education. . .the reason why the child is not receiving an appropriate public education shall be recorded." "The school district shall document that an attempt was made to contact every household within the school district at least once" and the identification system shall include a public awareness campaign including use of mass media, oral presentations to local organizations, and distribution of printed materials.

"An appropriate public education program. . .shall be provided for each handicapped child. . .in accordance with a district comprehensive plan."

"The parents shall be notified of intent to identify and evluate their child. . .and shall be provided an opportunity to submit any data. . . .Written parental permission shall be obtained before evaluation is initiated. The parents shall be provided a statement of their right to refuse permission for evaluation knowing that school district can request an impartial hearing. The parents shall be provided a statement that if no response is received to the request for permission to evaluate within thirty days. . . the school district may proceed with the evaluation.

EVALUATION

"Parents shall be informed of reasons the evaluation has been requested and the name of the person(s) who initiated the process; an accurate and concise description of suspected problems; the names of persons responsible for providing evaluation information; a description of the potential advantages and limitations of the proposed evaluation; a description of possible special education program options; general description of procedures and instruments that will be used; access to a summary of multi-factored evaluation data; a description of how the findings of the evaluation are to be used by whom and under what circumstances; a statement of the right of the parent(s) to obtain an independent educational evaluation at their own expense; a declaration that the child's education status will not be changed without the parent(s) knowledge or upon the decision rendered in an impartial due process hearing."

In performing multi-factored evaluations "descriptive evaluation data shall be compiled from as many of the following areas and other areas as deemed necessary for determining the child's educational performance including the learning characteristics and the child's unique educational needs; medical history and evaluation, educational and developmental history, personal/social/emotional functioning, cognitive

functioning, academic functioning, vocational/occupational needs, communication skills, gross/fine/sensatory motor skills, adaptive behavior."

Information provided by the parents shall be considered in the multi-factored evaluation.

"The school district shall place each handicapped child residing within the district in an appropriate educational program. . .[A] placement team. . .shall be designated by the superintendent of the school district of residence. . . [A] placement team conference shall beheld to: determine if the data is adequate, identify specific areas where additional evaluation is needed, recommend further evaluation where necessary, determine eligibility for special education programs or related services, determine the child's unique educational needs, determine the nature and degree of special education intervention needed including an estimate of the length of time such placement is expected to be appropriate, recommend placement in the least restrictive alternative. A written report of the results and recommendation of the placement conference shall be prepared. . .[and] shall be kept on file."

The chairperson of the placement team may allow "others who have a current demonstrated educational interest in the proceedings" to participate in the placement conference.

"Upon request the parents shall be given the opportunity for a case conference regarding their child's placement."

"Each school district shall establish and maintain written procedures to assure that to the maximum extent appropriate handicapped children, including children in public or private institutions or other care facilities, are educated with children who are not handicapped. . . . Each school district shall establish and maintain written procedures" to enforce this requirement and "the policy established by each school district shall include a continuum of alternative placements. . . .

"Each school district shall establish procedures which assure the development of an individualized educational plan for each handicapped child at least annually. . .the individualized educational plan shall be developed at a conference. . .in cases where it is not possible or practical for the parent to attend, other alternatives to assure parental participation must be attempted." If a parent waives the right to participate or unsuccessfully attempts to arrange a conference with the parent are documented, the conference may be held without parental participation. The conference must be held within the first thirty days of attendance or placement.

"The individualized educational plan shall contain the following: a statement of the present levels of educational performance of such child, a statement of annual goals including short term instructional objectives, a statement of the specific educational services to be provided to such and the extent to which such child will be able to participate in regular educational programs, the projected date for initiation and anticipated duration of such services, appropriate objective criteria and evaluation procedure and schedule for determining on at least an annual basis whether instructional objectives are being achieved and whether current placement is appropriate." The plan shall be available to the parent.

The effectiveness of the plan shall be reviewed annually and if appropriate revisions shall be made. The parent shall be invited to participate, but the review may be conducted without the parent if a written waiver is obtained or unsuccessful attempts to arrange a mutually agreed upon time and place are documented.

REVIEW

§3301-51-19

A school district shall provide through qualified personnel or a contract with a nonprofit agency transportation, developmental corrective, and other supportive services to assist handicapped children to benefit from

special education. These services shall be provided in accordance with a comprehensive plan approved by the State Board of Education.

IV.I.; Statute §3331.01 -- 3331.03; 3331.05; 3331.14

2. Programs for Exceptional Children

Constitution

OKLAHOMA CONSTITUTION, ART. XIII, §2

"The Legislature shall provide for the establishment and support of institutions for the care and education of the deaf, dumb, and blind of the State."

Statutes

§70-13-101 -- 13-102

Each school district and each county superintendent of schools is authorized, individually or in cooperation with other districts, to establish special education programs for exceptional children, including gifted as well as physically or mentally handicapped children. Any children served shall be residents of the state whose conditions make it impractical or impossible for them to benefit from regular classroom programs, and whose education requires a modification of the classroom program.

It shall be the duty of each school district to provide special education for all handicapped exceptional children residing therein. This duty may be satisfied by: (1) Directly providing special education; (2) Joining in a cooperative program with another district; (3) Joining in a cooperative program with a private or public institution; or (4) Transferring certified handicapped exceptional children to other school districts.

Each local board of education shall determine whether a child is eligible for special education under rules and regulations approved by the State Board of Education. Any child determined to be eligible shall be allowed to receive special education for at least twelve years. Eligibility of exceptional children shall be re-evaluated at least once every three years.

§70-13-103 -- 13-104

The State Board of Education is authorized to cooperate with school districts to make it possible for exceptional children to attend regular schools by providing transportation, special equipment, devices, books, supplies or other facilities, or special instruction within the regular school building. If unable to attend regular schools, exceptional or pregnant children may receive home instruction.

A school district may provide special classes or individual instruction to children in hospitals, sanatoriums, and preventoriums.

§70-13-105; 13-109; 13-111

The State Board of Education is authorized to determine and prescribe qualifications for all persons who teach exceptional children; to define standards of eligibility of all exceptional children; to fix minimum requirements for special education; and to make necessary rules and regulations.

The State Board of Education shall appoint, employ, and fix the compensation of all necessary personnel for this program.

The State Board of Education shall have the power and the duty to maintain a register of all handicapped children and to use all means and measures necessary to meet the physical needs of all educable and trainable handicapped children. It shall also be its duty to stimulate all private and public efforts to relieve, care for, cure, educate or train handicapped children in coordination with governmental agencies.

§70-13-112

Partially sighted children may attend a special education program created by the state board in selected school districts and governed by regulations promulgated for this purpose.

§70-18-110

If any school district fails "for any reason whatsoever" to provide special education for a handicapped exceptional child, the child shall be entitled to transfer to any nearby school district which does provide special education. The school district in which the child resides shall pay a special education transfer fee to the receiving district, or have its State Aid grant reduced by an equivalent amount.

§70-1210.171

It shall be the right of every deaf child to receive "an appropriate education" at the expense of the state. Each school district shall identify all deaf children according to regulations of the state board.

§70-1210.271 -- 1210.566

This Act is known as the Prescriptive Teaching Act of 1974.

The purposes of the Act are: to expand services of the present evaluation and prescriptive units to ensure that a student "with a particular learning difficulty or exceptional capability . . . will receive proper screening, diagnosis, and prescription in order that he or she may reach his or her maximum potential; to provide a screening program for all students K-6, to be completed over a 2-year period; to provide educational screening to every kindergarten, first and second grade student; to provide educational centers and coordination of services so that educational evaluative and prescriptive needs of every student are met.

The intent is for the state of Oklahoma to meet its responsibility to ensure that every student has the opportunity to achieve his or her "highest level of learning for the benefit of his [or her] future life in society."

It is further intended that the State Department of Education make available to all Service Centers the services of a physical and/or occupational therapist, to establish and coordinate therapy programs "in concert with individualized learning plans prescribed by the Service Centers."

Qualifications for all Service Center personnel shall be determined by the State Board of Education.

Service Centers shall ensure that every student is "screened" for determination of the existence of "exceptional learning needs." However, no child whose parent or legal guardian objects in writing shall be screened.

Every Service Center shall provide: (1) student appraisal, including "diagnostic and evaluative service" for students with learning problems, analysis of placement alternatives and recommendation for special class placement if needed. However, projective psychological, personality or adjustment tests shall not be used to collect information on a student's personality, home life, etc.; (2) appropriate media and equipment; (3) individualized learning plans, including prescriptive teaching plans to teachers, consultation for educators and parents, special education materials for teachers; (4) assistance in organizing staff development, including conferences and other inservice training programs for educators, assistance in emphasizing the "awareness, utilization and adaptation of appropriate materials, learning theory, research findings, etc.; and (5) coordination of educational evaluative and prescriptive services provided by any unit of government.

Each Service Center shall analyze the screening results and administer further evaluation to students having exceptional learning needs.

All results of individual student screening shall be confidential, available only to parents and professional personnel. No student shall be given individual evaluation without written parental permission.

In no case shall results of any student screening or evaluation be made a part of the permanent in-school records.

The State Board of Education is authorized to promulgate necessary rules and regulations to carry out this act, including regulations for the staffing and operation of Service Centers to "assure the uniform application and availability of all services." The Rules shall also provide for the withholding of funds from Service Centers to assure compliance.

RULEMAKING

The State Board of Education shall furnish curriculum materials for these programs, and hold workshops or short courses in various locations to assist local teachers in implementing these provisions.

REGULATIONS

General Regulations:

VIII. Special Education; p. 18

"Special education is a program . . . for the exceptional child who cannot satisfactorily profit from the instructional program offered in the regular classroom." The Oklahoma Legislature has provided for the establishment of special education programs and all pertinent laws and regulations are contained in the State Department of Education's bulletin, "A Program of Education for Exceptional Children in Oklahoma."

School districts operating approved programs are entitled to additional state aid. "Programs may be approved for the following categories of exceptional children, beginning at age four for a minimum of twelve years": physically handicapped, learning disabilities; emotionally disturbed; gifted; educable mentally handicapped; trainable mentally retarded; and speech handicapped. Children in the following categories "may begin school at birth for a minimum of twelve years:" multiple-handicapped; deaf and hard-of-hearing; blind and partially sighted. The regulation gives minimum and maximum class sizes for

self-contained programs for each category.

For each child there must be "written individualized program . . . and a yearly evaluation" of the program's effectiveness.

"All districts must . . . follow due process procedures in testing and placement of children in programs for the handicapped. Informed parental consent . . . must be obtained before a child may be placed in or removed from a special program."

As of 1977-78 all districts "must have an approved plan for the education of all handicapped children." Maximum program size "should be modified downward if the class contains several age or grade levels, or . . . many children with extremely severe problems." Instruction in self-contained classes is the "least desirable" educational option for children with special needs; if at all possible, "they should be integrated in the regular classes and school programs . . . .

"Senior high work-study cooperative programs involving vocational rehabilitation have proved to be the best means of working with high school mentally handicapped youth. . . . This program is also available . . . for learning disability and deaf or hard-of-hearing youth." Home bound instruction is another service available for handicapped children. The State Board of Education may "cooperate with any school district" to allow "an exceptional child to attend the regular school" by providing for transportation, special equipment, materials "or other facilities, or for special instruction within the regular school building." The local district is responsible for applying for these services.

IV.G; Regulation, High School Regulations: IV. Admissions; p. 82

IV.G; Regulation, Junior High School Regulations: VI. Admissions; p. 45

2. Programs for Exceptional Children

Statutes

§343.045

The superintendent of public instruction shall establish criteria for the development and operation of special programs, and certify these programs for reimbursement if they meet these criteria.

§343.055

The superintendent of public instruction, subject to the approval of the state board of education, shall administer all special education programs. The superintendent shall establish rules relative to such other qualifications of faculty and staff, curriculum, "admission, diagnosis, eligibility of pupils, size of special facilities, rooms and equipment, supervision, territory to be served, and such other rules as [are] necessary to administer" these programs.

ADMINISTRATION

The state board of education may: (a) purchase and prepare equipment and supplies to be loaned to approved programs for handicapped children in the public schools; (b) contract with an educational institution to provide educational services for children who are both deaf and blind.

§343.065

The superintendent of public instruction shall employ qualified personnel to assist the school districts, county and regional facilities and hospitals in the organization and development of special programs and in obtaining required services, equipment and materials, particularly where the number of children is too small to justify district purchase of equipment and materials.

§343.077

A person having legal custody of a child or

the school district may apply to an approved school district program, if the child is found eligible.

A child, thought to be eligible and in need of special education, shall not be placed in, transferred from nor denied placement in such a program unless the administrative officers of the school district have notified the parents or legal guardians of the proposed action, the reasons therefore, and of their right to a hearing before the school board if there is an objection to the action.

NOTICE

HEARING

Resident students may not be charged for participation in special programs, except those relating to driver education.

§343.221

The district school board of any school district in which there are children under 21 years of age who require special education: (1) must submit an annual statement of projected activities and cost of a special education program for handicapped children to the superintendent of public instruction; (2) shall provide special education for such children consistent with the projected activities and cost statement; (3) may contract for special education with other school districts if the district school boards jointly agree; (4) may contract with private agencies or organizations approved by the state board of education for special education; (5) may use the clinical services of public agencies which provide diagnostic and evaluation services for children.

§343.227

Eligibility for special education requires a determination made on the advice of qualified educational and medical authorities, which shall include a medical examination and parental consent.

ELIGIBILITY

Medical examinations must be given by a licensed physician.

§343.236

Where it is more economical or effective to do so, special education may be provided on a county or regional basis by the superintendent of public instruction or a school district delegated by the superintendent. The responsible district shall be reimbursed from special education funds.

§343.271

Centers may be established at institutions of higher education approved by the Teacher Standards and Practices Commission to assist in the preparation of special teachers and provide consultant, evaluative and instructional services in education to school districts and handicapped children. Funds "for the education of handicapped children may be used to help defray costs to such centers."

§343.277

The resident school district pays the cost of educating a child enrolled in another school district in order to obtain special education.

§343.287

ADVISORY COUNCIL

"There is created a state advisory council for handicapped children, consisting of not less than nine members appointed by the Superintendent of Public Instruction." Members must include parents, educators, and other persons associated with or interested in the education of handicapped children.

The council shall review the statewide program of education of the handicapped "and advise the superintendent of public instruction and the state board of education on such programs."

§343.293

Any school district or combination thereof, operating or planning to operate a special education program, "may appoint one or more local advisory councils

consisting primarily of parents of children being served" by the programs.

Each council selects its own officers and fixes their duties.

Each council reviews the special programs and reports to the district school board(s) involved. The local council makes recommendations as to appointments on the state council.

§343.295

A document certifying successful completion of program requirements shall be awarded to handicapped children, but shall not indicate that the document was issued by the program.

§343.395-401

GIFTED CHILDREN

"Educationally able and gifted children" are those children who have demonstrated or show potential of a very high level of academic or creative aptitude.

A written plan for the improvement of instruction for the educationally able and gifted may be submitted by any school district to the superintendent of public instruction. In determining which plans to approve, the superintendent shall consider: (a) "the adequacy and type of program proposed;" (b) "the number of children who will benefit by the proposed program;" (c) "the availability of personnel and facilities in the school district or districts;" (d) "the need for such a program in the district(s);" (e) whether the plan meets the requirements of the provisions in this chapter; and (f) "any other factors which will help accomplish the purposes of" this chapter.

To be approved, the submitting district must agree to pay an amount equal to a grant by the state out of district funds, "and to submit the completed program to an independent audit."

§343.975

Educational programs for children living in or under the care of state hospitals and training centers for the mentally retarded must be approved by and meet the standards of the state board of education.

The cost of such education shall be paid by the Mental Health Division of the Department of Human Resources.

§346.010

Free training and education services shall be provided for deaf or blind children, pursuant to rules of the state board of education.

FACILITIES

Facilities to serve as schools for the blind are to be chosen by the superintendent of public instruction. The purpose and use of available facilities may be changed in whole or in part to "better enable the state to meet its responsibilities for the education and training of deaf or blind children."

"The facilities shall be operated primarily for the provision of education and training services for sensory handicapped children who cannot be efficiently served under the [special education programs for handicapped children]."

§346.020

The superintendent of public instruction: (a) prescribes the course of instruction of students attending deaf or blind schools; (b) may drop any student for cause, "after it has been ascertained that the pupil has ceased to make progress or is not being benefited;" (c) "may deny admission to persons not suitable to be instructed therein."

Teachers, administrators and other personnel are chosen by the superintendent of public instruction.

"The superintendent of public instruction shall have control over persons enrolled in these facilities and shall direct their care and promote their mental, moral and physical welfare."

§346.040

Traveling expenses and the cost of all clothing necessary for their comfort shall be paid by the county in which they are residents for indigent deaf or blind students attending facilities for their benefit.

§346.051

Students enrolled in facilities for the training of the deaf or blind may be referred to a physician, clinic or hospital for "medical, surgical or dental treatment when such treatment cannot satisfactorily be provided at the facility." Rules and regulations governing such referrals shall be prescribed by the superintendent of public instruction.

§430.770 -- .790

The Mental Health Division may 1) contract with school districts to provide classes for trainable mentally retarded children if the contract is approved by resolution of any school district within the intermediate education district; 2) contract with private agencies to provide classes for trainable mentally retarded persons; 3) provide a contract with public or private agencies to provide diagnostic and evaluation services necessary for the mentally retarded; 4) provide counseling services to parents or guardians of mentally retarded persons; or 5) contract with public or private agencies or persons to provide such services.

Children participating in classes shall be considered in school in the district in which they reside for purposes of any financial aid to the school district that is based on or distributed according to enrollment.

Where a child participates in a class for the trainable mentally retarded in another district, the district in which the child resides shall contribute to the the school district providing, or causing to be provided, the classes, an amount equal to the per capita operating cost of the district providing, or causing to be provided,

the classes for each such child.

Any school district providing or contracting with an intermediate education district for classes for the trainable mentally retarded shall be reimbursed by the Mental Health Division.

Any intermediate education district providing or causing to be provided classes for trainable mentally retarded children shall be reimbursed by the Mental Health Division.

Programs offered pursuant to contract shall be reimbursed.

§430.810

The Mental Health Division determines: (a) Eligibility of persons to participate in programs for the trainable mentally retarded.

(b) "Qualifications for contracting with the division to provide any program for mentally retarded persons.

(c) Approved costs, considering expenses for staff, equipment and supplies, transportation of children and such other costs as the division may consider necessary.

All determinations of the division are final and are not subject to administrative or judicial appeal."

REGULATIONS

§581-15-015

School districts may provide home, hospital, institutional or other regularly scheduled instruction to any eligible student with a mental, physical, emotional or learning problem or to pregnant individuals.

HOME/HOSPITAL INSTRUCTION

Reimbursement for such service is subject to regulations governing reimbursement for special educational services.

In order to qualify to be placed in a home the pregnant student or handicapped student must be a resident student of the district. The State Board of Education determines eligibility to receive special education.

§581-15-020

Subject to the Superintendent of Public Instruction's approval, the district school board of any district with school age children who require special education may contract with private agencies for special education when economically feasible and in the interest of learning opportunities.

Subject to regulations, the district may be reimbursed under the Handicapped Child program.

PLACEMENT

Criteria for placement for a pregnant or handicapped student are that: (1) he/she is enrolled as a resident student of the district; (2) the private educational program is approved; and (3) the student meets minimum criteria established by the State Board of Education for determining eligibility to receive special education.

§581-15-025

Whenever a change is proposed in a child's educational program or when a parent requests a different placement for a child, the administrative officer of the school district shall give the matter a complete review and notify the parent of such proposed action.

NOTICE

The written notice regarding a proposed change in a child's education program should: (a) describe in detail the requested action and reasons for such; (b) specify any test or reports on which the action is based; (c) state that school files are available on request; (d) describe the right to a due process hearing; (e) state that the child will remain in the present educational placement until there is a decision reached in the hearing or the proposed placement is accepted by the parties.

HEARING

At a reasonable time prior to the hearing, the parents or their counsel shall be given access to all school district and other public office records pertaining to the child, including tests or reports upon which the proposed action is based. At a reasonable time prior to the hearing, the parents or their counsel shall have an opportunity to obtain an independent educational evaluation

ACCESS TO RECORDS

of the child. Full opportunity for examination and cross-examination shall be accorded each party. Within 30 days after the hearing, the hearing officer shall render a decision in writing, and it shall be filed with the school district and a copy sent by certified mail to the parents.

Pending a determination by the hearing officer, the school district shall take no action to place or to deny placement, or to transfer the child.

§581-15-035

In order to qualify for state reimbursement, special education programs must be approved by the Superintendent of Public Instruction. These programs shall strive to meet the individual needs of the students. School districts shall insure that such students shall enjoy the same rights and privileges provided to other students.

A district plan shall be on file with the Department of Education before a program can qualify for reimbursement. The plan shall include: procedures for locating handicapped children in the district, criteria for students' eligibility, provisions for review or modification of a handicapped child's special education program, staff roster containing certification and teacher's assignment, procedures to insure the confidentiality of the special education programs, and a special education organizational chart or description of the organization of the special education program.

§581-15-040

Special education programs shall meet the regulations prescribed by the State Board of Education in the minimum standards for Elementary-Secondary Schools. Districts providing programs for educable mentally retarded children shall utilize the state-adopted curriculum guide or other guides approved by the Superintendent of Public Instruction. In order for students to be eligible, parental consent must be obtained to conduct a diagnostic evaluation to

determine a child's educational needs and it must be verified that the child meets criteria established by the Department of Education.

EVALUATION

The school district shall be responsible for providing for the diagnosis of a child referred for special education. The diagnosis shall consider the physical, educational, and psychological needs of the child with primary emphasis directed toward factors of educational significance. If a child's primary language is other than English, he/she shall not be assigned to the special education program on criteria developed solely in the command of the English language. The parents shall be notified upon determining that the child is eligible for special education.

The special education facilities shall meet the State Minimum Standards for Elementary-Secondary Schools.

Supervisors of programs must possess the appropriate certificate issued by the Teacher Standards and Practices Commission.

School districts that have resident eligible handicapped children shall provide for their special education.

§581-15-050

The areas of handicapping conditions are: (1)blind children; (2) deaf children; (3) speech and language impaired; (4) physically handicapped; (5)learning disabled; (6) emotionally handicapped; and (7) mentally retarded.

Eligibility criteria for special education programs include examination and testing for each area. For children who suffer from learning disabilities, emotional handicaps, or mental retardation, the district shall be required to develop an individualized instruction plan based on the case study of the child. Periodic evaluation and assessment (at least once a year) shall be made.

ELIGIBILITY

EVALUATION

§581-15-115

The Superintendent initiates "standardization visits" to institutions providing educational programs for the mentally retarded on a regularly scheduled basis. The institution's educational program will be classified after an official standardization visit.

§581-15-125

The institution shall appoint an advisory board to review and make recommendations regarding educational programs. The advisory board shall consist of seven to nine members (appointed for terms not to exceed three years) including a staff member of the public school special education program and a parent of a resident child.

The advisory board shall annually review and make recommendations to the institution regarding its programs, goals and objectives.

§581-15-130

"The educational program shall adopt program goals to assure each child the opportunity to develop to the best of his or her ability." The goals shall be in writing and shall encompass the range of learner outcomes desired from participation in the program. The goals shall reflect the needs of each mentally retarded child in areas of communication, self-help, academics, and vocational skills, and shall follow the Department's Goals for Elementary and Secondary Education as closely as possible.

EDUCATIONAL GOALS

§581-15-135

Data on students' attainment of basic communication, self-help, functional academic, physical, social, community living, prevocational and vocational skills shall be collected and reported to the Mental Health Division.

§581-15-140

The educational program shall identify and set priorities for program needs. Such priorities shall be reviewed biennially by the educational advisory board.

"The educational advisory board shall recommend for adoption priorities determined through review of assessment data for each skill."

§581-15-145

The educational program staff shall develop a written plan dealing with needs of the highest priority in the educational program.

§581-15-150

The educational program shall prepare a written description of diagnostic procedures used to identify learners not attaining goals, identify learners requiring specialized goals and experiences, and describe the specific nature of functions interfering with learning environment.

§581-15-155

The educational program shall adopt and implement prescriptive procedures for each child which include

written individual performance objectives. The educational program shall maintain a written description of its provisions for prescriptive instruction based on the diagnosed needs of the individual student and maintain individual performance objectives and individual educational prescriptions.

§581-15-160

The educational program shall adopt and implement plans to meet instructional needs of students by providing learning activities dealing with individual learning strengths, learning problems, interests and special problems associated with handicaps in sight, hearing and physical and emotional development. Records shall verify that the learning activities are being carried out.

§581-15-165

Curriculum guides or class schedules shall specify regularly scheduled individualized instruction under the direction of a certified teacher in the following curriculum areas: communication skills, self-help skills, functional academics, physical skills, social skills, community living skills, prevocational skills, and vocational skills.

§581-15-170

Each child under age six shall receive three and one-half hours daily of preschool instruction.

Children age 6, 7, and 8 shall receive three and one-half hours daily of primary school instruction.

All other children receive 5 hours daily of school instruction. When, for medical reasons, a physician determines

a student cannot attend an off-resident educational program and such condition shall last thirty days or longer, a daily one-hour program shall be provided under the direction of certified educational personnel.

§581-15-175

"Upon reaching the age of 21 years old or completion of twelve years in an educational program, the student shall be awarded a document certifying successful completion of individualized program requirements.

Records shall specify those individualized program requirements successfully completed by each student."

§581-15-185

EQUAL OPPORTUNITY

Equal educational opportunities shall be provided which assure that mentally retarded and developmentally disabled children will have the essential educational services and activities necessary to achieve physical, mental, emotional, social and vocational development. Students shall be assured an opportunity to participate in educational programs with equal access to facilities appropriate to their ability.

§581-15-190

"The educational program shall complete and forward promptly all reports required by the Department."

§581-15-195

The educational programs shall provide a minimum of 175 days per year of appropriate educational instruction. Students remaining residents may attend summer programs.

Records of daily attendance shall be maintained.

SCHOOL TERM

§581-15-200

The educational program shall establish a written policy which contains guidelines in conformance with existing statutes for access to and dissemination of information contained in student records and provides for maintenance of permanent student records.

§581-15-205

Teachers and administrators who hold valid Oregon certificates shall be employed and assigned in accordance with their certificates. Certification and assignments shall be filed and maintained along with a job description. Certified substitute teachers will be assigned in the absence of a certified teacher.

STAFF

§581-15-210

Rules of the State Board of Education shall be followed relating to teacher aides. The educational program shall maintain written job descriptions showing duties to be performed by teacher aides and agendas of in-service programs showing that teachers aides have received suitable training.

§581-15-215

A pupil/teacher ratio at all instructional levels shall be maintained. All pupils enrolled shall have access to individualized instruction.

Reports and records of actual class enrollments shall be maintained. Language development, motor development, and behavior management shall be provided to individual students.

PUPIL/TEACHER RATIO

The Mental Health Division shall provide sufficient certified teachers to assure that all school-aged handicapped children meet the attendance requirements.

§581-15-220

A center offering organized media services shall be provided by the educational program. The center shall be located to serve the needs of the instructional program.

The educational program shall maintain job descriptions, staff assignment listing, or evidence of staff management responsibilities for the educational program's total media program; and written policies and procedures requiring and facilitating the selection of materials and recording of services on the basis of program goals and instructional needs.

§581-15-225

The educational program shall adopt written procedures for selecting and purchasing instructional materials.

§581-15-230

The educational program shall adopt procedures for coordinating evaluation and purchase of instructional

equipment to insure the quality of the equipment with needs of teachers and students.

§581-15-235

The institution shall insure the existence, use and practical arrangement of appropriate space and facilities necessary to support program goals and which assures the health, safety, and well being of the institution's students and employees.

FACILITIES

§581-15-240

The educational program shall provide equipment and supplies necessary in the instructional program.

The equipment shall be selected with consideration for the health and safety of students and employees.

§581-15-245

The institution shall obtain Department approval of the building program, preliminary hearings, and outline of site development particulars.

§581-15-250

"The institution shall be responsible for the management of a current comprehensive employee-student emergency plan and safety program for all educational departments and programs under its jurisdiction."

Safety procedures shall be posted in conspicuous locations. An emergency medical plan shall be posted for obtaining first aid, ambulance, hospital and doctors services.

§581-15-255

The educational program shall maintain reports of safety inspections of all property under its jurisdiction.

§581-15-260

"The educational program shall conduct an accident prevention in-service program as part of a regular orientation program for all employees and shall maintain agendas for all safety orientation sessions."

§581-15-265

An accident reporting system for accidents occurring on school property, or involving educational program employees, students or visiting public shall be maintained.

§581-15-270

The educational program shall provide necessary safety devices, safety equipment, and safety instruction for students and adults involved in activities where hazards may exist.

The program shall insure the presence of required first aid supplies and qualified first-aid personnel.

§581-15-275

Transportation provided the educational program at institution expense shall comply with applicable state laws and administrative rules adopted by the State Board of Education.

§581-15-280

"Buses used in educational programs shall be constructed, equipped, maintained and inspected in accordance with applicable statutes and rules adopted by the State Board of Education."

§581-15-285

"Bus drivers used by the education program shall possess a valid Oregon School Bus Driver's License and shall comply with rules governing operating procedures adopted by the State Board of Education."

§581-15-290

"Buildings and grounds used as part of the educational program shall be maintained to provide conditions conducive to the health and safety of all persons."

§581-24-020

EXPERIMENTAL PROGRAMS

In administering standardization programs, the Department will encourage districts to develop carefully planned pilot or experimental programs. When the program requires deviation from the standards, the district will submit a petition to implement the change.

When a district believes it is not feasible to meet the requirements of a specific standard, it may petition the Board and the Superintendent for a waiver.

The Superintendent shall recommend to the Board approval of deviations or waivers when satisfactory written assurance is provided by the district superintendent. All petitions for waivers or deviations shall have the approval of the district board. Petitions which modify

requirements specified in the Oregon Revised Statutes shall not be approved. The Board shall revive the Superintendent's recommendations and approve or reject petitions for deviations or waivers from these standards.

§581-24-070

The district shall determine the needs for specific services for all exceptional children; develop and use written plans to provide for the development and implementation of local programs and services for exceptional children; develop and use procedures for assisting local school districts to gather, analyze and appropriately report individualized testing data; and develop written plans for the evaluation of these programs, including the use of performance indicators.

2. Programs for Exceptional Children

Statutes

§9-971A

Speech and hearing correctional services are health services and are available on a general and even-handed basis to all school children in the Commonwealth.

The Secretary of Education, directly or through the intermediate units, shall have the power and duty to furnish free to nonpublic school students, upon the premises of the nonpublic schools which they regularly attend, services adequate for the diagnosis and correction of speech and hearing defects provided that such services are also afforded to public school students by the public school district in which the nonpublic school is located.

DIAGNOSIS

§13-1328

Every person having control or charge of any child of compulsory school age who is so handicapped as to make it impracticable to have such child educated in the public schools shall allow such child to be sent to some school where proper provision is made for the education of the deaf or of the blind or of crippled children or shall provide for the tuition of such child by a legally certified private tutor.

TUITION
TUTOR

§13-1371

It shall be the duty of the district superintendent, in accordance with rules of procedure prescribed by the Superintendent of Public Instruction, to secure information and report to the intermediate unit every exceptional child within said district. Following such report, the child shall be examined by a public school psychologist certified by the Department of Public Instruction and by any other expert which the type of handicap and the child's condition may necessitate. A report shall be made to the intermediate unit of all children examined and all children enrolled in special classes.

PSYCHOLOGIST
EXAMINATION

"The State Board of Education shall adopt and prescribe standards and regulations for proper education and training of all exceptional children. . . ." The Department of Public Instruction shall determine counties to be joined for such purposes. "Standards and regulations shall recognize such factors as: number of exceptional children, types of handicaps, facility of transportation, adequacy of existing provisions for exceptional children, and availability of school plant facilities."

It shall be the duty of the board of school directors to provide and maintain special classes or schools in accordance with the approved intermediate plan. The Superintendent of Public Instruction shall superintend the organization of such classes and other arrangements and shall enforce the provisions. If the approved plan indicates it is not feasible, the board of school directors shall secure such proper education and training outside the public schools of the district or in special institutions only providing for teaching the child in his/her home in accordance with Department of Instruction regulations. Homebound instruction shall be provided for children confined in detention homes for more than 10 days even though children are not exceptional.

HOMEBOUND INSTRUCTION

The intermediate unit shall have power and duty to provide, maintain, administer, supervise and operate such additional classes or schools as are necessary to provide for the proper education and training of exceptional children.

Where in the judgment of the Superintendent of Public Instruction the provisions have not been complied with or needs of children not adequately served, the Department of Public Instruction is authorized to provide classes and schools for the proper education and training of exceptional children. Pupil eligibility for enrollment in classes for exceptional children shall be determined according to State Board of Education standards.

§13-1373

The Secretary of the board of school directors shall make reports required by the Department of Public Instruction in regard to such special education maintained for the current school year for which approval is desired.

§13-1373.1

The services of such readers, helpers and guides for special education may be contracted and paid for by the school district.

The Department of Public Instruction shall establish such necessary rules and regulations as it deems necessary. RULEMAKING

§13-1374

Free transportation may be furnished any exceptional child regularly enrolled in a regular or special class. If transportation is not feasible, the Board of School Directors may pay for suitable board and lodging. If such transportation or board and lodging is not provided and the child is therefore unable to attend the class or center, the intermediate unit shall provide the transportation necessary. BOARD AND LODGING

§13-1376

The school district in which certain exceptional children between the ages of 6 and 21 reside shall pay 25% of the cost of tuition and maintenance of the child in a school or institution as determined by the Department of Education, and the Commonwealth shall pay out of funds appropriated to the department for special education 75% of the cost of their tuition and maintenance as determined by the Department. If the residence of the child in a particular school district cannot be determined, the Commonwealth shall pay, out of moneys appropriated to the department for special education, the whole cost of tuition and maintenance of such child. In no event shall the total cost of tuition and maintenance exceed $8,500 per year for blind, deaf, cerebral palsied and/or brain damaged and/or muscular dystrophied and/or socially and emotionally disturbed and/or mentally retarded TUITION

residential students, $5100 per year for blind, deaf, cerebral palsied and/or muscular dystrophied day students, and $3100 per year for tuition of brain damaged and/or socially and emotionally disturbed and/or mentally retarded day students.

The Department of Education is to be provided with data to determine the reasonableness of tuition and room and board charges made on Pennsylvania resident approved reimbursed students and shall disallow any charge deemed unreasonable.

When any person between 6 and 21 residing in Pennsylvania who is blind or deaf or afflicted with cerebral palsey and/or brain damage and/or muscular dystrophy is enrolled with the approval of the Department of Education as a pupil in any schools or institutions for people so affected under the supervision of or approved by the Department of Education, Pennsylvania shall pay to the school or institution out of moneys appropriated to the department for special education, the cost of tuition and maintenance of the person, as determined by the Department of Education, and the cost of instructing the parents of a blind child under six years old. The total cost of tuition and maintenance for a residential student is not to exceed $8500 per year, $5100 per year for deaf or blind and/or cerebral palsied and/or muscular dystrophied day students, and $4600 for tuition of brain damaged day students.

When any child resident between the ages of 6 and 21 who is socially and emotionally disturbed is enrolled in an approved day school of the Department of Education, the school district in which such child is a resident shall pay 25% of the cost of tuition of the child and Pennsylvania shall pay out 75%. Cost of tuition is not to exceed $4100.

No private institution receiving payment shall impose any charge on the student or parents who are Pennsylvania approved reimbursable residents for a program of instruction and maintenance appropriate to the child's needs unless programs not part of the school year are given.

Where the private institution provides special educationprograms for multihandicapped students which is adjudged necessary by the Department of Education the maximum rate payable shall be increased by 75% for the 2nd severe handicap, 85% for the third severe handicap and 100% for more than three severe handicaps.

§13-1379

NOTICE

The Superintendent of Public Instruction, "when in his[her] judgment the same is deemed desirable," shall inform the parent or guardian of the location of special schools and the nearest public school having special classes for the hard of hearing, with information concerning the advantages and benefits of such classes and the expenses involved.

§13-1380

The Department of Public Instruction is authorized to educate blind children under 8, whenever, from any cause, the parent(s) may be unable to properly educate them. With the written consent of the parents or the local authorities, the Department of Public Instruction may contract with any nonsectarian institution established for the education of the blind, whereby any such child may be educated until 8 years or beyond age 8 when for physical, mental or other proper reasons, such child needs special care longer. The contract may be cancelled and the child removed any time by the Department of Public Instruction.

§13-1381

The Department of Public Instruction is authorized to make provisions for defraying the necessary expense of any students who are blind or deaf and are regularly enrolled students pursuing any course of study in any school approved by the Department of Public Instruction.

§13-1382

The time for which pupils may be taught in institutions or schools for the instruction of the blind or deaf at the expense of the State, shall be determined by the Department of Public Instruction.

APPOINTMENT

An institution shall be provided for the deaf and dumb between the ages of ten and twenty. The Governor is authorized to appoint a commission to investigate and examine the school along with all the "buildings, grounds, equipment, affairs and accounts" of the school. The commission shall determine any indebtedness, liens against the institution and schools, including buildings and grounds, and any claims against the institution and schools. A report shall be made to the Governor.

HOME FOR DEAF MUTES

A commission shall be selected to locate a place for a home for the training of the deaf mutes and this commission shall plan the erection of the home.

REGULATIONS

§ 11.29

HOMEBOUND INSTRUCTION

A child of school age enrolled in the public schools who is homebound and unable to attend the public schools as determined by a medical examination, receiving approved homebound instruction or instruction in the home, shall be counted for attendance purposes as if in regular school attendance. The district or intermediate unit or both shall provide homebound instruction or instruction in the home if the homebound pupil is able to receive such instruction.

§13.2

It shall be the policy of the Board, through the Secretary of Education, to provide exceptional school-aged persons with quality special education programs and services which will ultimately enable them to participate as fully as possible in appropriate activities of daily living.

TESTING

All agencies shall insure that testing and evaluation materials and procedures used in classifying exceptional persons will be selected, administered and interpreted so as not to be racially or culturally discriminatory.

NONDISCRIMINATION

If the percentage of persons from any identifiable group (racial or ethnic) assigned to special education programs is significantly disproportionate to the

distribution of that group in the school district or intermediate unit, the Department of Education shall notify the school district or intermediate unit. To maintain the assignments, the intermediate unit or school district must then show evidence that the assignments are justified and the disporportion is necessary to promote a compelling education interest of the persons affected.

NOTICE

EVIDENCE

§13.3

The Secretary of Education shall establish standards for the education or training of all exceptional persons in the Commonwealth. Criteria for attendance, admission, absences and excuses shall apply to all approved programs and services for exceptional persons.

The Secretary may grant exceptions to this Chapter's provisions to meet certain unique programmatic needs of exceptional persons. Such exceptions will be evaluated annually by the Secretary and will be terminated at the Secretary's discretion.

PLANNING

Each school district shall include in its long range plan procedures for the education of all exceptional school-aged persons. Each intermediate unit shall prepare a comprehensive plan for the education of exceptional school-aged persons which includes the district plans, the intermediate unit plan and combination of the two plans. This plan shall include all programs and services available including welfare agencies, approved private schools and other private schools and agencies. The Secretary shall prescribe the format and content of the intermediate unit and school district plans.

§13.7; 13.8; 13.9

Professional personnel shall consist of individuals responsible for identification of exceptional persons and for provision of special education programs and services in accordance with the Public School Code of 1949 and the provisions of this Chapter.

Paraprofessional personnel shall consist of individuals under the direct supervision of the professional personnel. The duties and training of the paraprofessional staff shall be determined by the intermediate unit or school district.

MAINSTREAMING

Intermediate units and school districts shall mainstream those exceptional persons who can profit by an appropriate program of education or training in a regular class. If mainstreaming is recommended, specific supportive services, including staff orientation, necessary for appropriate education and/or training of persons placed in the mainstream shall be provided in accordance with the nature of the placement.

§13.11

HEARING
DUE PROCESS

All handicapped school-aged persons identified shall be provided with an appropriate program of education or training including the right of a due process hearing for mentally retarded or due process procedures for other handicapped school-aged persons to determine the appropriateness of the classification and program. The primary responsibility for providing an appropriate program of education or training shall be that of a school district. Where such school district board cannot provide an appropriate program effectively and efficiently it shall use the services of the intermediate unit. The services of approved private schools, state schools and out-of-state institutions may be used where intermediate unit boards and school district boards agree that they cannot provide services effectively and efficiently for handicapped school-aged persons. Intermediate units and school districts shall insure that handicapped school-aged persons are provided with an opportunity for placement in appropriate vocational education programs designed to meet their unique needs.

"The following priority order of educational placement for handicapped school-aged persons shall be followed except where a deviation is needed to meet the appropriate needs of the persons or the purpose of these regulations:

(1) A regular class in a regular school with supporting services.

HOMEBOUND INSTRUCTION

(2) A school district special education program in a regular school; including homebound instruction.

(3) A school district special education program

in a special facility.

(4) An intermediate unit program in a regular school.

(5) An intermediate unit program in a special facility.

(6) An approved private school program.

(7) A state school program.

(8) An approved out-of-state program.

(9) An intermediate unit program of instruction in the home.

EVALUATION

If a handicapped school-aged person has been re-evaluated and is found to no longer have the exceptional characteristics that require special education programs and services; the intermediate unit or school district shall prepare an appropriate program for the person to return to the regular school. If at the end of one year the individual demonstrates that the regular program is now appropriate, all records and materials identifying the person as exceptional shall be placed in a confidential file and shall be released only upon permission of the parent or guardian.

CONFIDENTIAL RECORDS

§13.12

PLACEMENT

The Secretary shall approve the placement of certain multi-handicapped school-aged persons in approved out-of-state institutions if there is no appropriate program for placement of such multi-handicapped school-aged persons in the school districts, intermediate units, approved private schools in the Commonwealth, or state school; the parent, school district superintendent and intermediate unit executive director agree that there is no appropriate placement in the Commonwealth; and there is no concurrence by the Secretary of Education with the decision of the school district superintendent and intermediate unit executive director.

If an appropriate placement for such persons has been identified within the Commonwealth, the Secretary of Education may initiate action for the return of such person, and the person shall be returned to an approved program within the Commonwealth.

§13.13

Special schools devoted exclusively to the education of handicapped school-aged persons may be established by the intermediate units or school districts upon approval by the secretary. Approval shall only be granted after the school district or intermediate unit submits written documentation that there is no appropriate existing or projected regular or special classroom space available in the area. Special schools shall be separate facilities which have been designated to meet the instructional needs of handicapped school-aged persons. To receive approval such facilities shall:

(1) Conform to regulations on school buildings in Chapter 21.

(2) Be located in close proximity to a school where regular class programs are available to permit as much integration and participation in regular programs as is feasible and desirable.

(3) Include special construction devices and equipment essential to provide an improved learning environment in relation to the nature and degree of physical or mental condition.

(4) Adhere to a plan for special education which enhances the possibility of providing a high quality of special education programs and services.

(5) Receive approval of the Secretary that such a facility is consistent with an approval plan and only where integrated facilities are not feasible.

§13.14

Approved private schools shall be recognized as a resource to the state school system in providing for certain handicapped school-aged persons. Approved private schools shall be:

(1) Licensed or accredited by the appropriate state board or state recognized accrediting agency.

(2) Approved in accordance with such standards and procedures as necessary to insure compliance with law and these regulations.

(3) Reapproved at least every three years by the Secretary of Education.

The Department shall furnish annually to each intermediate unit a listing of all approved private schools and the types of programs approved for each. Intermediate unit planning shall include provisions for use of approved private schools where appropriate to provide especially for multi-handicapped school-age persons. The use of approved private schools is not restricted to serving multi-handicapped school-aged persons.

"The Secretary may approve, as necessary, certain private schools to provide an appropriate educational program for persons in those areas of the state where such programs cannot be provided by the school district, intermediate unit or other state agency."

§13.15

Satisfactory completion of special education courses for exceptional school-aged persons shall be determined by the special education teacher in consultation with the principal of the school and the Supervisor of Special education. Each exceptional . . . school-aged person except trainable and profoundly mentally retarded persons satisfactorily completing special education programs at the high school level. . . shall be granted and issued a regular high school diploma by the secretary of education; trainable and profoundly mentally retarded persons shall be issued a certificate in accordance with standards established by the Secretary.

§13.16

Curricula for mentally or physically handicapped school-aged persons shall be conducted in accordance with standards established by the Secretary of Education and shall include provisions for:

(1) Admission, continuance, enrollment and pupil qualifications or eligibility, determined by the type and degree of mental or physical handicap.

(2) Facilities and materials, supplies and special

equipment, determined by the type of mental or physical handicap.

(3) Amount of supervision and special teaching determined by the type and degree of mental or physical handicap.

Curricula determined by type and degree of mental or physical handicap shall provide for an orderly sequence of instruction to permit the development of learning skills and compatible with age and ability levels of exceptional persons.

§13.21

DUE PROCESS

The due process procedures for exceptional school-aged persons other than those who are mentally retarded or thought to be mentally retarded shall be applicable to all gifted and talented school-aged persons.

§13.22; 13.23

Curricula for gifted and talented school-aged persons shall be conducted in accordance with standards established by the Secretary and shall include:

(1) Admission, continuance, enrollment and pupil qualifications or eligibility, determined by the type and degree of extraordinary mental abilities or talents.

(2) Facilities and materials, supplies and special equipment, determined by the type and degree of extraordinary mental abilities or talents.

(3) Amount of supervision and special teaching, determined by the type and degree of mental abilities or talents.

School districts may join in with other districts, intermediate units or the Department in a cooperative arrangement to provide programs for gifted and talented school-aged persons.

§13.31

DUE PROCESS

The due process procedures described in this section shall be applicable to all exceptional or thought-to-be exceptional school-aged persons not covered by Subchapter D of this Chapter including those who have

never had an educational assignment.

"The parent of any school-aged person shall upon presentation to the school district of written evidence that their child is an exceptional or thought-to-be exceptional person and receiving less than an appropriate program of education or training, have the right to request due process procedures. The educational assignment of every exceptional or thought-to-be exceptional person must be evaluated not less than every two years, or annually upon the request of the parents, and upon such re-evaluation, notice and opportunity to request due process procedures shall be provided. No exceptional or thought-to-be exceptional school-aged person shall be subjected to a change in educational status unless the district first informs that person and his/her parents about the opportunity for due process procedures.

EVIDENCE

DUE PROCESS

EVALUATION

NOTICE

"Due process procedures shall adhere to the following course of events:

(1) A parent conference shall be held for the purpose of detailed explanation of a contemplated change in education or major modification of any exceptional or thought to be exceptional school-aged persons program.

Upon request of the parent, a due process hearing shall be held before a hearing officer who shall render a decision.

HEARING

§13.32

The following procedures shall be complied with when the school district initiates due process procedure:

DUE PROCESS

When any exceptional or thought-to-be exceptional school-aged person is recommended for a change in educational status by a school district, intermediate unit or any school official, notice of the proposed action shall first be given to the person and the parent. If the parent desires the parent may, in writing, indicate satisfaction with the recommendation and waive the parent conference.

NOTICE

A parent conference shall be initiated at the

request of the school or the request of the parent within ten days of the receipt of the notice.

The parent may request complete evaluation by the school district or intermediate unit and if this has not been completed, it shall be complied with by the school district or intermediate unit prior to the parent conference.

NOTICE
DOCUMENTATION

Prior to the conference the parents shall receive by certified mail, all information pertaining to the conference including but not limited to documentation of the reasons for the change in educational status, such as, test used, results and the like, what change in educational status is being recommended and other alternatives that are available for the individual and why these alternatives were not recommended.

OUTSIDE EVALUATION

If the parent does not agree with the school evaluation, they may have an outside evaluation done at their own expense prior to the parent conference.

At the parent conference the Chief School Administrator or his/her designee shall chair the conference. The conference shall include but not be limited to the guidance counselor, the evaluator to explain the tests and procedures, the person and parent, and the evaluator that did the testing for the parent. Every effort shall be made to reach an amicable agreement keeping in mind the best interests of the individuals and in no way shall the parent conference take the place of the due process rights required in these regulations. If the conference does not resolve differences, the parent may request a due process hearing. A due process hearing shall not be granted more than once annually from the date of the hearing.

HEARING

If a due process hearing is called for, it shall be scheduled not sooner than 15 days nor later than 30 days after receipt of the request in the Department of Education, provided however that upon showing good cause

a reasonable extension shall be granted at the parent's request. The hearing shall be held in the school district at a place reasonably convenient to the parent of the person. At the parent's option, the hearing may be held in the evening; such options shall be set forth in the form requesting the hearing.

The hearing officer shall be assigned by the Secretary or designee, but shall not be an officer, employee or agent of any school district or intermediate unit in which the person resides.

The hearing shall be an oral, personal hearing, and shall be public unless the parent specifies a closed hearing. The decision of the hearing officer shall be based solely upon the evidence presented at the hearing.

The proposed change in educational status or modification for appropriateness shall be approved only if supported by substantial evidence on the whole record of the hearing. Introduction by the school district or intermediate unit of the official report recommending a change in educational assignment, provided a copy of such report was given to the parent at the time notice was given, shall discharge its burden of going forward with the evidence, thereby requiring the parent to introduce evidence in support of the parent's contention.

EVIDENCE

HEARING RECORD

A record of the hearing shall be made and kept for at least three years and be available to the parent or the parent's representative. The parent may be represented at the hearing by any person of the parent's choosing, including legal counsel.

LEGAL COUNSEL

The parent or the parent's representative shall be given reasonable access prior to the hearing to all records of the intermediate unit or school district concerning the person, including any tests or report upon which the proposed action may be based. The parent shall have the right to present evidence and testimony, including expert medical, psychological or educational testimony.

TESTIMONY

No later than 20 days after the hearing, the hearing officer shall render a decision in writing which shall be accompanied by written findings of fact and conclusions of law, which shall be sent by certified mail, return receipt requested, to the parent or the parent's representative.

NOTICE

There shall be no change in the person's educational status without prior notice and the opportunity to be heard, except that in extraordinary circumstances the department upon written request by the school district or intermediate unit setting forth the reasons, and upon notice to the parent, may approve an interim change in educational assignment prior to the hearing, in which event the hearing will be held as promptly as possible after the interim change. The department shall act upon any such request no later than within three days of its receipt.

Any time limitation shall be construed and applied so as to do substantial justice and may be varied upon request and good cause shown.

APPEAL

The decision of a hearing officer may be appealed to the Secretary of Education.

§13.33

DUE PROCESS

The following procedures shall be complied with when the parent initiates the due process procedures:

(1) Any parent who believes his/her school-aged child is appropriately classified as an exceptional person, is an exceptional person classified as non-exception, is a non-exceptional person classified as exceptional or is receiving less than an appropriate program of education and training, may forward to the school district written evidence which supports the parent's contentions.

EVIDENCE

(2) Upon receipt of the above documents, the school district superintendent shall initiate within 10 days, a parent conference.

(3) At the parent conference, the Chief School Administrator or his designees shall chair the conference. The conference shall include but not be limited to the guidance counselor, the evaluator, to explain the tests

and procedures, the person and the parent, and the evaluator that did the testing.

(4) Every effort shall be made to reach an amicable agreement keeping in mind the best interests of the individuals and in no way shall the parent conference take the place of due process.

(5) The school district shall prepare written evidence supporting the appropriateness of the person's classification and the program in which the person is currently enrolled and make this available to the parent or the parent's representative.

(6) Upon conclusion of the parent conference the parent may, if unsatisfied with the school district's explanation, request a due process hearing. HEARING

(7) If the parent conference does not resolve differences, the due process conference shall follow the same procedures listed in §13.32.

§13.61

No child of school age who is mentally retarded or who is thought by any school official, the intermediate unit, parents or guardian to be mentally retarded, shall be subjected to a change in educational status without first being accorded notice and the opportunity of a due process hearing. The provisions of this section also applies to any child who has never had an educational assignment. NOTICE HEARING

The following procedures shall be complied with:

(1) If any mentally retarded or allegedly mentally retarded child of school age is recommended for a change in educational status by a school district, intermediate unit or any school official, notice of the proposed action shall first be given to the parent or guardian of the child.

(2) Notice of the proposed action shall be given in writing to the parent or guardian of the child either at a conference with the parent or by certified mail to the parent, addressee only, return receipt requested.

(3) The notice shall describe the proposed action in detail, including specification of the statute or regulation under which the action is proposed and a clear and full statement of the reasons for it, including specification of any tests or reports upon which such action is prepared.

(4) The notice shall advise the parent or guardian of any alternative education opportunities available to their child.

(5) The notice shall inform the parent or guardian of their right to contest the proposed action at a full hearing before the Secretary, or designee, in a place and at a time convenient to the parent, before the proposed action may be taken.

(6) The notice shall inform the parent or guardian of their right to be represented at the hearing by a person of their choosing, including legal counsel, of their right to examine before the hearing their child's school records including any tests or reports upon which the proposed action may be based, or their right to present evidence of their own, including expert testimony, and of their right to call and question any school official, employee or agent of a school district, intermediate unit or the department who may have evidence upon which the proposed action may be based.

(7) The notice shall inform the parent or guardian of the availability of various organizations to assist them in connection with the hearing and the school district or intermediate unit involved shall provide the address and telephone number of the organization in the notice.

(8) The notice shall inform the parent or guardian that they are entitled under the Mental Health and Mental Retardation Act of 1966 to the services of a local center for an independent medical, psychological and educational evaluation of their child and shall specify the name, address and telephone number of the MH-MR center in their catchment area.

(9) The notice shall specify that if notice is given at a conference with the parent, the parent may indicate at that conference, their satisfaction with the recommendation and may waive the opportunity for a hearing by indicating so in writing to the school district or intermediate unit. If the parental decision is indicated at a conference, the parent shall be given a form which shall be mailed to the school district or intermediate unit within five calendar days if the parent desires to change the decision. There shall be no change in educational assignment during the five-day period. If notice is given by certified mail, the parent shall fill in the form requesting a hearing and mail the same to the school district or intermediate unit within 10 days of the date of receipt of the notice.

(10) The hearing shall be scheduled not sooner than 15 days nor later than 30 days after receipt of the request for a hearing from the parent or guardian, provided that upon good cause shown, reasonable extension shall be granted at the parent's or guardian's request.

(11) The hearing shall be held in the local district and at a place reasonably convenient to the child's parent or guardian. At the parent's or guardian's option, the hearing may be held in the evening; such option shall be set forth in the form requesting the hearing.

(12) The hearing officer shall be the Secretary, or designee, but shall not be an officer, employee, or agent of any local district or intermediate unit in which the child resides.

(13) The hearing shall be oral, personal and public unless the parent or guardian specified a closed hearing.

(14) The decision of the hearing officer shall be based solely upon the evidence presented at the hearing.

(15) The proposed change in educational status shall be approved only if supported by substantial evidence on the whole record of the hearing. Introduction

by the school district or intermediate unit of the official report recommending a change in educational assignment, provided a copy of such report was given to the parent at the time notice was given, shall discharge its burden of going forward with the evidence, thereby requiring the parent to introduce evidence in support of their contention.

(16) A stenographic or other transcribed record of the hearing shall be made, kept for at least three years, and shall be available to the parent or guardian or their representative.

(17) The child's parent or guardian may be represented at the hearing by any person of their choosing, including legal counsel.

(18) The parent or guardian or their representative shall be given reasonable access prior to the hearing to all records of the school district or intermediate unit concerning their child.

(19) The parent or guardian or their representative shall have the right to compel the attendance of, and to question any witness testifying for the school board or intermediate unit and any official, employee or agent of the school district, intermediate unit, or the Department who may have evidence upon which the proposed action may be based.

(20) The parent or guardian shall have the right to present evidence and testimony, including expert testimony.

(21) No later than 20 days after the hearing, the hearing officer shall render a decision in writing which shall be accompanied by written findings of fact and conclusions of law and which shall be sent by registered mail to the parent or guardian and their representative.

(22) There shall be no change in the child's educational status without prior notice and the opportunity to be heard, except that in extraordinary circumstances the State Director of Special Education, upon written request to such person by the district or intermediate unit setting forth the reasons and upon notice to the

parent may approve an interim change in educational assignment prior to the hearing, in which event the hearing will be held as promptly as possible after the interim change. The Director shall act upon any such request within three days of its receipt.

(23) Any time limitation shall be construed and applied so as to do substantial justice and may be varied upon request and good cause shown.

Notice and the opportunity of a due process hearing shall be afforded on and after the effective date of the stipulation to every child who is mentally retarded or thought to be by any school official, the intermediate unit, or parents before the child is subjected to a change in educational status.

EVALUATION

Any educational assignment to other than a regular class shall be automatically re-evaluated every two years. If requested by the parent or guardian, the assignment shall be evaluated annually. Upon each evaluation, the school district shall give notice and opportunity for a hearing.

A board of school directors shall not postpone or deny the admission of a child who has attained the chronological age established for admission to the district's schools without due process and hearing. However, when conditions warrant and subject to the due process procedures such child may be assigned in a timely manner to a free public program of education and training other than in a regular class.

§13.62

The Secretary, the Board, and the Intermediate Units shall cease and desist from applying sections 1304, 1318, 1326, 1330(s), 1371(1), 1372(3), 1375 and 1376 of the Public School Code of 1949 except as follows:

(1) §1304 means only that a school district may refuse to accept into or retain in the lowest grade of the regular primary school or the lowest regular primary

class above kindergarten, any child who has attained the mental age of 5. Any child whose admission to such grade or class is postponed, or who is not retained in such school or class is entitled to immediate placement in a free public program of education and training pursuant to §1371-1382 which provides alternative programs of education and training for exceptional children.

SUSPENSION

(2) §1318 means that the suspension of a mentally retarded child under the same circumstances as a typical child might amount to punishment for a ramifacation of the very disability which a public school program of education is attempting to remedy. To avoid such a result, a suspension or expulsion pursuant to §1318 is a change in educational assignment which would, except as provided in this section, require notice and a due process hearing.

EXPULSION

NOTICE

HEARING

(Since a disciplinary problem with a mentally retarded child may be so immediate or severe as to require summary action, after the approval of the State Director of Special Education an interim change in the educational assignment of a mentally retarded child in the form of suspension, expulsion or other placement may be made so long as there is a due process hearing as soon as possible after the change.)

(4) §1326 means only that the parents of a child have a compulsory duty while the child is between 8 and 17 years old, to assure that child's attendance in a free public program of education and training. If a parent does not discharge the duty of compulsory attendance with regard to any mentally retarded child between 8 and 17, then the Department shall take those steps necessary to compel the child's attendance pursuant to §1327 and any compulsory attendance regulations.

(5) §1326 does not limit the ages between which a child must be granted access to such a program. No school district or intermediate unit may deny access to a free program of public education to any mentally retarded child age 6-21 whose parents elect to enroll that child in such a program.

(6) §1330(2) means only that when a parent elects to voluntarily withdraw a child from public school attendance, that parent may be excused from liability under the compulsory attendance provision of §1326 when the parent acquires the approval of the local school board, the approval of the Secretary and a finding by an approved clinic or public school psychologist or psychological examiner that the child is unable to profit from further public school attendance.

(7) §1371(1) means children aged 6-21, and all mentally retarded children who have reached the age less than 6 at which pre-school programs are made available to other children either by the Department through any of its instrumentalities, such as local school districts of intermediate units, or by the Department of Public Welfare through any of its instrumentalities. Preschool programs are equally available to mentally retarded and typical children less than six years of age.

HOMEBOUND INSTRUCTION

(8) §1372(3) means that homebound instruction is one of the options available to a school district where placement in a regular public school class is not possible. For a given mentally retarded child, homebound instruction may be the only appropriate method for providing the free public program of education and training to which that child is entitled, even though this is the least preferable type of education program. Such instruction shall involve education and training for at least five hours a week. Pupils assigned to Homebound Instruction shall be re-evaluated not less than every three months with notice and opportunity for a hearing.

(9) §1375 means that insofar as the Department of Public Welfare will arrange for the care, training and supervision of a child certified to it, the Department of Public Welfare will provide a program of education and training appropriate to the individual capacities of that child. When it is found, on the recommendation of a public school psychologist and upon

approval of the local board of school directors and the Secretary, as reviewed in a due process hearing, that a mentally retarded child would benefit more from placement in a program of education and training administered by the Department of Public Welfare than from any program of education and training administered by the Department, the child should be certified to the Department of Public Welfare for the timely placement in a program of education and training.

TUITION

(10) §1376 means the term "brain damage" as used in this section and as further defined in the Board of Education's Criteria for Approval of Reimbursement". It includes all mentally retarded persons. There should now be available to them tuition for day school and tuition maintenance for residential school up to the maximum sum available for day school or residential school, whichever provides the program of education and training more appropriate to the mentally retarded child's learning capacities.

CROSS REFERENCE

II.A.1.; Regulation §3.71

2. Programs for Exceptional Children

Statutes

§16-21-13

The school committee of any town is empowered to establish within its limits open air schools for the instruction of such children of school age as in its judgment are not in such physical condition that they can be safely instructed in the ordinary schools of the town, and to furnish for the conduct of such schools such medical, food or other supplies as are necessary for the purposes for which such schools are or may be established.

§16-24-1

The school committee of each town shall provide special education to satisfy the needs of those children within the age range as designated by the regulations of the state board of education who are either mentally retarded or physically or emotionally handicapped to such an extent that normal educational growth is prevented.

§16-24-2

The state board of education shall issue regulations, including

RULEMAKING

"1. criteria to determine who shall be included in the category of exceptional child and all persons from the age of three to twenty-three who are mentally retarded and/or multi-handicapped must be included in establishing the category of exceptional child;

2. minimum criteria for establishment and/or reimbursement of special facilities for each category of exceptionability;

3. methods of reimbursement;

4. teacher-training recommendations, minimum teacher qualifications;

5. transportation, and

6. any other necessary regulations."

§16-24-3

The school committee shall annually ascertain the number of children in its town of school age and resident therein who are physically, emotionally or mentally handicapped.

§16-24-5

Wherever possible and practical two or more towns may organize to provide a district center facility for children in their towns who are in need of special care and individual instruction.

§16-24-8

"Each city and town where there are ten or more mentally retarded minors, who may be expected to profit from special educational facilities designed to make them economically useful and socially adjusted, shall establish such special classes as may be necessary to provide instruction adopted to the mental attainments of such minors."

§16-24-9

Each city or town where there are ten or more mentally retarded minors who cannot profit from ordinary classroom instruction but who may be expected to benefit from special education designed to educate and train them to further their individual acceptance, social adjustment and economic usefulness in their homes and within a sheltered environment shall provide classes and instruction adapted to the mental attainment of such minors.

§16-24-10

Each city or town with fewer than eight mentally retarded minor residents may contract with another city or town or may establish a special class for the education of such minors.

§16-24-16

"For the purposes of furnishing transportation

and providing incidental expenses for the education of mentally retarded children under the age of twenty-one a center approved by the assistant director of health for mental retardation shall be decreed to be a school as considered in this chapter."

§16-25-1

The governor, on recommendation of the department of education and upon application of the parent or guardian, may appoint any deaf or blind child being a state resident, who shall be a fit subject for education, as a state beneficiary at any state institution or school now or hereafter established.

§16-25-2

The department of education is responsible for supervising all such beneficiaries, and no child appointed as above shall be withdrawn from any institution or school except with the consent of the institution, or the consent of the governor; and said department shall report annually to the general assembly concerning the education of handicapped children.

§16-25-4

The department of education shall have the power to provide for the suitable care, maintenance and instruction of any child under school age who may be born blind or become blind, and whose parents can not properly care for, maintain or educate such children.

§16-25-5

For the purpose of providing such care, maintenance and education, the department of education is empowered to contract with any institution having or furnishing facilities for such care, maintenance and education of blind children in this state or any other state at a contract price within the amount appropriated therefor.

§16-25-7

The department of education shall provide readers

for blind students in institutions of higher learning; and the general assembly shall annually appropriate money necessary to carry out the purposes of this section.

§16-26-2

SCHOOL FOR THE DEAF

The state board of education shall have supervision, administration and control of the Rhode Island School for the Deaf.

§16-26-4

The primary object of the school shall be to furnish to the deaf children of the state instruction and the best known facilities for the enjoyment of such a share of the benefits of the system. The board of education shall have charge of the affairs of the school.

§16-26-5

"The board of regents shall appoint a principal for the School for the Deaf who shall...have charge of the education and internal affairs of the school, and shall also, upon the recommendation of the principal, appoint teachers, subordinate officers, servants and other assistants, prescribe their duties, terms, fix salaries, and for just cause remove any or all of them." The board shall likewise cause all furniture, school books, school apparatus and other supplies and equipment necessary for the school to be purchased in accordance with the law.

§16-26-7

ADMISSION

All children of this state, between the ages of three and twenty years who are deaf or whose hearing or speech, or both, "are so defective as to make it inexpedient or impracticable to attend the public schools," not being mentally or otherwise incapable, may attend the Rhode Island School for the Deaf, without charge, under such regulations as the board of education may establish. Residents of other states

may be admitted upon the payment of such rates of board and tuition as may be fixed by the board of education.

§16-42-1; 16-42-2

PROGRAMS FOR THE GIFTED

A Rhode Island area advisory committee on education programs for gifted children is created, consisting of one superintendent of schools from each of the areas of the state determined and appointed by the commissioner of education; three representatives-at-large from the superintendents and assistant superintendents of the state appointed by the commissioner of education and the president of the Rhode Island superintendents' association.

§16-42-3

"The state department of education will supply such technical, clerical and other assistance as shall be required by the area advisory committee" on education for the gifted.

§16-42-4

The advisory committee shall recommend to the commissioner of education:

"a) programs within a school for gifted and talented children; b) area programs for gifted and talented children; and c) outside school programs for gifted and talented children."

§16-42-5

The commissioner shall make regulations to implement this chapter, such regulations to include: "a) criteria for determining who is to be included in the category of the gifted or talented child; b) minimum criteria for the establishment of special facilities; and c) methods of reimbursement to the cities and towns."

§16-42-7

ELIGIBILITY

"Eligibility of programs for gifted children for reimbursement purposes shall be determined by the commissioner of education upon recommendation of the area advisory committee."

The general assembly shall annually appropriate money necessary for the education of gifted children.

REGULATIONS

REGULATIONS OF THE BOARD OF REGENTS GOVERNING THE SPECIAL EDUCATION OF HANDICAPPED CHILDREN (BR, 4/20/77)

Section I: General Regulations

III. "The school committee of each school district shall establish within its school district the special education required by these regulations and/or it shall provide for the free education of all resident handicapped children either through these programs or in other special education programs approved by the Commissioner of Education ... .

Unusual situations not specifically provided for in these regulations will be evaluated by the Commissioner of Education who shall prescribe a program designed to meet the needs of each individual case.

IV. A handicapped child shall be admitted to a special education program if he/she is deemed eligible on the basis of the evaluation process as prescribed hereinafter.

ADMISSION

To the extent practicable and in keeping with the findings of the evaluation process, the handicapped child requiring special education shall be educated in the regular school program of the local school district; shall receive instruction in classes attended primarily by normal children; and shall be furnished such supplementary equipment, facilities, and remedial or other supportive services as may be necessary to enable him/her to perform satisfactorily in the normal learning environment of the school ... . Special classes, facilities and services shall be provided outside of the regular school program only on the recommendations made through the evaluation process that proves that such other locations are necessary for the conduct of appropriate and efficient programs ... . Such segrated programs shall be conducted on the basis of homogeneous grouping according to the similarity of handicapping condition and developmental level.

Based on an annual review of the educational plan and reassessment, ...a handicapped child shall be continued in a

special education program as long as he/she remains eligible but only until he/she is ready to return to regular education. No handicapped child, however, should remain in a class with the same teacher for a period to exceed three years.

No handicapped child as specified by these regulations shall be excluded, suspended or withdrawn from any school-based education program for reasons deriving only from his/her handicapping condition. The sole exception to this regulation shall be when the superintendent of schools, upon substantial evidence, determines that the child will be an immediate danger to himself/herself or to others. A child so excluded shall be afforded home tutoring and counseling therapy as determined by the Core Evaluation Team in an effort to determine a reassignment to a program which can better meet the specific needs of such child ... .

V.1. Each school district shall submit to the Department of Education an annual census of handicapped children in accordance with forms and instructions supplied by said Department.

CENSUS

2. Each school district shall submit for approval to the Department of Education a written, comprehensive implementation plan for these regulations projected for an initial five-year period ... . It shall be annually updated in writing as appropriate and necessary, and shall be submitted to the Department of Education together with progress reports of the previous year's activities. Said plan shall include but not be limited to: provision for establishment of a systematic process for identification of student needs through active and continuous screening and identification of handicapping conditions for all children aged 3 to 21 (and) systematic approaches to referral, diagnosis, assessment, programming and annual review of all children referred for special education; provisions for parent involvement including establishment of an advisory committee, installation of procedural safeguards and training of surrogate parents to insure the protection of a handicapped child's human and constitutional rights; provision for assessing program needs and establishing

FIVE YEAR PLAN

priorities among those needs; provision for developing a statement of strategy and possible alternatives to be used in meeting established needs that would provide for an ... administrative structure that adequately facilitates the operation of special education programs, development ... of specific programs ... designed to allow an individualized curriculum experience for handicapped children, (and) orientation and inservice training of school personnel; (and) provision for ... evaluation of ... programs and ... services for handicapped children."

3. The procedure for determining eligibility for placement in special education shall be as follows:

"Referral for evaluation assessment. Each school system shall design ... and implement a referral system through which those pupils with suspected handicapping conditions can be brought to the attention of the appropriate school personnel for diagnostic work-up. The referral system shall include ... : development of a standardized referral form ... ; specific designation of the ... office which will receive ... the referral ... ; delineation of the steps which that ... office ... will undertake ... so that appropriate diagnostic intervention will commence ... (and) provision for reporting annually to the State Department of Education on the number of referrals received and the disposition of such referrals ... .

Referral of any child suspected of having a handicapping condition may be initiated by: the child's classroom teacher; anyone having professional dealings with the child; (and/or) the child's parent(s) or legal guardian(s) to ... office designated in the school referral system plan ... .

All school districts shall conduct systemwide screening programs. All preschool children (beginning at age 3) residing in the school district shall be eligible for screening for handicapping conditions .... All school-aged children ... shall be screened for vision, hearing, health, and speech ... (and) for any other handicapping conditions upon initial entry into the school district. All children suspected, as the result of the screenings ... of handicapping conditions shall be reported by the person in

SCREENING PROGRAMS

charge of the screening to the ... office designated in the school's referral system plan ....

REFERRAL

Referrals shall be made by the classroom teacher to the ... office designated in the school's referral system plan whenever a child exhibits any of the following characteristics: failure of the child in two (2) or more academic subjects at the end of a term; failure of the child to be promoted at the end of the school term; frequent suspension of the child from school; exclusion of the child from school; frequent unexplained absences of the child from school; (and) demonstration of any negative change in the alertness, learning or behavioral capacity of the child upon his/her return to school after an illness or accident ....

EVALUATION

Evaluation Assessment Process. Each school district by itself or in conjunction with other school districts, shall organize its professional personnel to function as an evaluation team chaired by an administrator of special education or his/her professional designee. Such team shall be composed of a core unit that includes a speech/language pathologist, a school psychologist, a school social worker and a special education teacher trained in diagnostic techniques and educational methodology. Said team shall also have readily available to it the services of a licensed medical practitioner, the classroom teacher of any child referred for evaluation, the principal of the school which such child attends and any other clinical or school personnel when deemed necessary by the members of the evaluation team and its chairman. The purpose of the Core Evaluation Team functioning in its entirety, is to provide a complete overall evaluation of any moderate to severe or profoundly handicapped child referred for possible placement in a self-contained special education class or residential school program ....

Evaluation-Assessment procedures, utilizing methods, techniques and materials which are culturally unbiased, insofar as possible, and which are appropriately adapted to each age level, shall be used in identifying and describing children with handicapping conditions. Assessments shall be individually administered in the child's spoken and written language, if possible.

Children referred for evaluation of suspected conditions such as learning disabilities, mild to moderate degrees of behavioral disorders or any other type of handicap which probably will not necessitate a self-contained special class placement shall receive a special education assessment which includes: classroom observation together with a differential psycho-educational examination individually administered by a trained diagnostic special education teacher, together with a school psychologist, the child's classroom teacher and where appropriate a speech/language pathologist and remedial reading specialist and any other additional specialists as deemed necessary by the examiners and supervisor of special education .... (Such an intermediate evaluation may result in a full-core evaluation whenever the ... examiners feel that test results are too inconclusive or inadequate to develop a sound educational plan provided that parental agreement is secured. Within five consecutive school days after completion of the evaluation of a child the examiners shall meet in conference with the child's parents and principal of the school which the child attends .... The purpose of the conference will be to review the results of the evaluation assessments and cooperatively develop an educational plan ....

Any child referred for evaluation of a suspected handicapping condition which probably will result in self-contained special class placement shall be given the following evaluation assessment ...: a general medical assessment, a psychological assessment, a sociological assessment, and a special education assessment as prescribed for Intermediate Evaluations. Additional specific assessments shall be required for certain handicapping conditions when determined as necessary by the examining physician and other respective members of the Core Evaluation Team. Such conditions are as follows: Behavior Disorder -- a psychiatric assessment; Orthopedic Disorder -- an assessment by a physical and occupational therapist as specified by the general medical assessment; Neurological Disorder -- a psychiatric assessment and a neurological assessment; Aphasic Disorder -- a neurological assessment, a psychiatric assessment, an audiological assessment administered by a licensed audiologist, an otological assessment, and a

diagnostic speech and language assessment administered by a speech/language pathologist; Hearing Disorder -- an audiological assessment administered by a licensed audiologist, an otological assessment, and a speech and language assessment administered by a speech/language pathologist, and psychological assessment administered by an appropriately trained psychologist; Speech or Language Disorder -- a diagnostic speech and language assessment and an audiological screening administered by a speech/language pathologist; Blind or Partially-Sighted -- an opthalmological assessment including exploration of the need for low vision services, examination of mobility and orientation skills and visual communication skills, (and) Other Handicapping Conditions --any additional assessments deemed necessary by the Core Evaluation Team.

...Within five consecutive school days after completion of a full-core evaluation, the Core Evaluation Team ... shall meet in conference with a child's parents and teacher, the principal of the school which the child attends, and a vocational educator if the child is sixteen years or more of age.

The purpose of the conference will be to review the results of the evaluation assessments and cooperatively develop an individualized educational plan ....

EDUCATIONAL PLAN

Educational plan elements (shall include:) detailed description of the child's academic ability levels ...; detailed description of the manner in which the child approaches a learning task, taking into consideration his/her attitude, behavior, attention span, and sensory modalities most often used; detailed description of the child's strengths and weaknesses in the ... areas (of) receptive and expressive language ability, visual acuity and perceptual ability, physical or sensory motor development, emotional maturity and social behavior, occupational and self-help skills; explanation documenting the effect that any of the above identified deficiencies may have on the child's educational progress and overall development; suggestions and rationale for teaching methods and techniques for combatting the child's learning difficulties; suggested services and rationale that would be supportive to the educational development of the child;

recommendations for program placement including specific reasons for amount and type of special education instructional and supportive services that the child may need; suggestions for program content including methods, materials, goals and objectives, and a means for review of each child's progress to be reported annually; (and) recommendations for involvement of the parent(s) in a child's program including any counseling services felt needed for such person(s).

PLACEMENT

Program Placement. Specific recommendations for program placement on the special education program continuum shall be made by the school district administrator of special education on the basis of the results and analysis of the overall evaluation process and the recommendations for program placement by the participants in the case conference and after consultation with the parent(s). A statement containing these recommendations shall be officially communicated and interpreted to the parent(s) .... Said notice shall contain the following: a listing of the types of evaluation assessments that were conducted and an explanation of the evaluation assessment findings; the details of the special education program placement or a statement that the child does not need a special education program placement ...; a statement that all documents and information relevant to the child are available for inspection by the child's parent(s), and/or designated representative; a statement that proclaims the right of the parent(s) to have independent evaluation assessments conducted at their own expense by professionals of their choice if they disagree with the evaluation conducted in accordance with these regulations; [and] a listing of names and addresses of local diagnostic facilities where independent evaluation assessments may be conducted [at present expenses].

REEVALUATION

Re-evaluation Procedures. No handicapped child shall remain in any special education program for a period exceeding one year without receiving a detailed analysis of the effectiveness of his/her special education plan .... Based on progress reports, personnel involved with a handicapped

child's special education program shall review progress with the child's parent(s) and determine the specific types of evaluation assessments which may be needed to modify the child's educational plan or a change in placement.

No later than thirty consecutive school days prior to the end of each academic year, instructional and supportive service personnel involved with each handicapped child shall develop a new educational plan which reflects the goals and objectives for the coming school year relative to the needs and progress of the child.

ANNUAL REVIEW

At least annually, the school district administrator of special education shall review the results of educational plans with the special education advisory committee in a fashion that preserves the anonymity of both student and teacher ...

The school term for special classes shall be the same as that for the regular education program in the public schools in the school district in which the classes are located, (except that) the school term for severely and profoundly retarded and multi-handicapped children shall consist of a minimum of 230 days per year.

SCHOOL TERM

The school day for special education classes shall be the same as that for the regular education programs in the public schools in the school district in which the classes are located.

The school day for classes for mildly to moderately handicapped pre-school age children shall consist of a minimum of a two and one-half hour session for five days per week exclusive of travel and lunch time unless otherwise directed by the evaluation process. The school day for such classes shall be extended to a maximum of a five-hour session when indicated as appropriate by the evaluation process.

The school day for severely and profoundly retarded and multi-handicapped pre-school age children shall consist of a minimum of a five-hour session for five days per week exclusive of travel and lunch time unless otherwise directed by the evaluation process.

All handicapped children shall be provided free trans-

portation in accordance with the severity of the handicapping condition, as determined by the evaluation process to and from home (door to door) to the educational program in which they are enrolled with the following exceptions: transportation, to and from home, to hospitals or residential schools where the children will reside overnight; transportation, to and from home, to clinical facilities for the purposes of medical or psychological evaluation assessments or therapy; (and) transportation, to and from home, and to regular class programs unless the child has a handicapping condition requiring special transportation services.

TRANSPORTATION

Vehicles used for the transportation of handicapped children shall comply with all safety regulations required for pupil transportation and shall include the following: seat belts ... to secure children while the vehicle is in motion; a minimum of one aide, assigned to each bus or other appropriate vehicle used specifically for handicapped children ...; (and) hydraulic lifts or other appropriate special devices ... on special selected buses to accommodate children with unique problems, whose lack of mobility to enter or exit vehicles would pose potential harm to themselves or those trying to help them.

School districts shall provide in-service training for administrative personnel, drivers and aides affiliated with special transportation services in order that they may effectively deal with handicapped children and understand the problems faced by the parents of such children ....

STAFF

All professional personnel ... for whom certificates or licenses are required by state law and/or regulations, shall hold appropriate certificates or licenses. Where no such mandates exist, such personnel shall show evidence satisfactory to the Department of Education that they have appropriate professional training and/or experience to perform satisfactorily and successfully in their respective areas.

A school district having 10,000 pupils enrolled in the public schools shall employ at least one full-time administrator of special education. A school district having fewer than 10,000 pupils enrolled in the public schools which does

not employ its own administrator of special education shall join with another school district ... in appointing a full-time administrator of special education to administer a regional special education program. A community or regional program which has more than 10,000 pupils enrolled in the public schools shall also employ a full-time assistant administrator of special education for every 2,000 students enrolled in excess of 10,000. A regional program having fewer than 10,000 pupils enrolled in the public schools which exceeds two communities shall employ a full-time assistant administrator of special education.

A school district having 1,500 pupils enrolled in the public schools shall employ one full-time psychologist or equivalent for each 1,500 so enrolled. In cases where the enrolled population of children, as determined by the Evaluation Team, to be served .... A community having a combined enrollment of 1,500 pupils enrolled in the public and non-public schools shall employ one full-time speech/language pathologist on a part-time basis in accordance with the needs, as determined by the evaluation process, of speech/language handicapped children to be served .... A school district having 2,500 pupils enrolled in the public schools shall employ one full-time school social worker or equivalent for each 2,500 pupils so enrolled. In cases where the enrolled populations of children falls between even multiples of 2,500 the school district shall employ a school social worker on a part-time basis in accordance with the needs of the handicapped children to be served .... The school committee of each school district shall employ one full-time physical and/or occupational therapist or equivalent for every thirty mild to moderately handicapped children identified as being in need of physical and/or occupational therapy. School districts which have less than thirty resident mild to moderately handicapped children in need of physical and/or occupational therapy may join with another school district(s) in providing a full-time physical and/or occupational therapist for every thirty such children identified. Each school district shall also provide a physical and/or occupational therapist at least one full day per week for every six resi-

dent severe, profound and/or multi-handicapped children identified as being in need of physical and/or occupational therapist at least one full day per week for every six so identified children.

In cases where the identified population of mild to moderately handicapped children in need of physical and/or occupational therapy should fall between multiples of thirty the school district shall employ a physical and/or occupational therapist on a part-time basis in accordance with the needs of such children as determined by the evaluation process ....

IX. Each LEA shall establish and maintain procedures to assure that handicapped children and their parents or guardians are guaranteed procedural safeguards with respect to the provisions of free appropriate education by such agency. Such procedures shall include but need not be limited to: written prior notice to the parent or guardian whenever the LEA proposes to initiate or change or refuses to initiate or change the identification, evaluation or educational placement of the child or the provision of a free appropriate education, (including) ... a description of the action proposed and of the reason for such action and of the safeguards afforded to parents or guardians and the procedures by which they may avail themselves of these safeguards, (and) ... a form to be signed and returned by the parents giving consent or objecting to the proposed action by the LEA or requesting a conference with the Supervisor of Special Education to discuss the proposed action, (and) ... specific information ... concerning the LEA staff person who will assist the parents in availing themselves of all safeguards ...; a procedure to protect the rights of the child whenever the parents or guardians of the child are not known, unavailable or the child is a ward of the State, including the assignment of an individual (who shall not be an employee of the State Education Agency or Local Education Agency which is involved in the education or care of the child) to act as surrogate for the parent or guardian; an opportunity for a conference with the local Supervisor of Special Education no later than ten school days after the request; (and) ... an opportunity to appeal to the School Committee if the decision of the Super-

PROCEDURAL SAFEGUARDS

intendent is not acceptable to the parents, (in which case) ... a hearing shall be held by the School Committee or its designated hearing officer and a decision shall be given not later than thirty days after the appeal ....

APPEAL

A parent or guardian not satisfied with the decision of the School Committee may continue his appeal under provisions of Chapter 16-39 of the General Laws of Rhode Island, 1956, as Amended.

Any party to any (such) hearing ... shall be accorded: the right to prior notice of the time and place of the hearing; the right to be accompanied and represented by counsel and by individuals with special knowledge or training with respect to the problems of handicapped children; the right to present evidence and confront and cross-examine witnesses; the right to a written or electronic verbatim record of such hearings, at cost to the party; (and) the right to written findings of fact and decision.

HEARING

During the pendency of any proceedings conducted pursuant to ... (the) above, unless the SEA or the LEA and the parents or guardians otherwise agree, the child shall remain in his/her current educational placement, or, if applying for initial admission to a public school, shall, with the consent of the parent or guardian, be placed in a regular class in the public school program until all such proceedings have been completed ....

In the event that a parent or guardian withholds consent to change the identification, evaluation or educational placement of a child, the Supervisor of Special Education shall arrange a meeting with the parent or guardian .... In the event that a parent or guardian ... shall fail or refuse to attend, then the parent or guardian's withholding of consent shall be deemed insufficient and the change proposed shall be accomplished ....

Notwithstanding any time limits prescribed above, parents or guardians have the right to request a conference with the local Supervisor of Special Education at any time when they believe that a decision substantially altering the educational placement of their child has been made ....

The Commissioner of Education shall appoint a State

Advisory Committee on Special Education ... composed of individuals involved in or concerned with the education of handicapped children. Parents of handicapped children shall compose a majority of committee membership. Also included shall be handicapped individual(s); teacher(s); state and local educational official(s) and administrator(s) of programs for handicapped children.

The State Advisory Committee shall provide advice to the Commissioner in matters concerning: unmet needs within the state in the education of handicapped children; rules and regulations proposed for issuance by the state regarding the education of handicapped children; procedures for distribution of federal and state funds for programs for handicapped children; (and) developing and reporting program data and evaluations required by the United States Office of Education.

ADVISORY COMMITTEE

The State Advisory Committee shall meet at least 4 times annually and additionally as requested by the Commissioner and shall submit such reports as are required ....

The State Education Agency shall provide assistance to the State Advisory Committee in developing the Committee's organizational structure and bylaws ..., providing technical and consultative services, ... (and) providing in-service training for Committee membership as required to carry out its functions.

Each Local Education Agency shall appoint an Advisory Committee on Special Education. However, if two or more LEA's join to provide special education on a regional basis, then those LEA's shall jointly appoint a Regional Advisory Committee with representation from each community ....

Each Local and/or Regional Advisory Committee shall be composed of individuals involved in or concerned with the education of handicapped children. Parents of handicapped children shall compose a majority of the committee membership, and at least 50% of this majority shall be selected by the parents of handicapped children. Also included shall be handicapped individual(s); teacher(s) of handicapped; local administrator(s) of public school programs for handi-

capped; regular classroom teacher(s) and/or other administrator(s) ....

The Advisory Committee shall provide advice to the LEA in matters concerning: the special education services currently offered; unmet needs of handicapped children; development and implementing future plans; local compliance with state and federal laws and regulations; applications for state and federal funding; (and) evaluation of special education services. It shall serve as an advocacy group for individual handicapped children and groups of handicapped children, and shall establish and maintain a procedure for providing surrogate parents when required by state/federal regulations.

It shall meet at least four times annually and shall submit reports as required to the local education agency.

The LEA shall provide assistance to the Advisory Committee ....

APPROVAL

To be eligible for approval by the State Department of Education, special education programs conducted in non-public schools shall meet the regulations of the Board of Regents for Education governing the approval of public school programs. Such programs shall be subject to visitation by the Commissioner of Education or his/her authorized representative as often as he/she deems necessary. Approval of such programs shall be on an annual basis ....

School districts shall make available to handicapped children the following continuum of special education programs: full-time placement in regular class with special education consultation ... to the regular teacher or subject matter teacher(s) and to the parent(s) of the handicapped child by itinerant or resource special education teachers, together with other appropriately certified specialists ..., part-time regular classroom placement with supplementary part-time placement for a portion of the school day or week in a resource room or other set-aside area for intensive, individual or small group instruction or treatment by a special education itinerant and/or resource teacher, together with other appropriately certified specialists ...; part-time

regular classroom placement with supplementary part-time placement in a self-contained special education class for the purpose of intensive and continuous support by a special education teacher, together with other appropriately certified specialists ...; full-time placement in a special education, self-contained classroom integrated in a school district building ... on the basis of homogeneous grouping ... for the purpose of providing constant and repetitive approaches to academic and social problems by a special education teacher, together with other appropriately certified specialists ...; home and hospital instruction provided by a special education teacher and/or appropriately certified personnel ...; special day school placement in a separate special public school facility or in a non-public special education program approved by the Commissioner of Education; residential school placement in a public or non-public facility whose special education program has been approved by the Commissioner of Education ...; (and) other programs, services and treatments (including) ... placement, part-time or full-time, in a Developmental Skill Program providing developmental training in physical, self-help and living skills for handicapped children ..., in a sheltered workshop or occupational training program ..., (and in) "hands on" vocational instruction and a cooperative industrial work experience where appropriate ....

PROGRAMS

Physical facilities for all special education programs shall conform to the provisions of Public Law 90-480 of the federal statutes related to architectural barriers and the stipulations of Chapter 17 of Title 37 of the General Laws, 1956, as amended, which relate to the standards of public financed buildings (schools) and to all regulations governing approval for nursery, elementary and secondary schools of this state and any other applicable federal or state regulations or statutes. Such programs shall be integrated wherever feasible in school buildings with regular classes. Such integrated programs shall be located on the same floor level (except where otherwise specified by these regulations) and in close proximity to regular classes.

FACILITIES

All handicapped students in any high school instructional

program who have satisfactorily completed the requirements for the twelfth year of their particular program, including those completing special education work-study programs at the senior high school level, shall be granted a standard high school diploma that does not differentiate in course or program or in any other manner from the diploma granted to graduates of regular twelfth year education programs.

Appropriate records of attendance, evaluation, suspension or withdrawal shall be maintained for each child, kept in a protected location, and treated in a confidential manner. Parents shall be permitted to examine the records of their child and such records shall not be disclosed to any party other than those personnel directly involved in a child's program without a signed release from the parent(s) in accordance with the rules of confidentiality ....

ACCESS TO RECORDS

II.1. All handicapped children in a preschool program shall receive an individual developmental program suited to their particular needs which shall include, but not be limited to, language development, symbol recognition, communication and socialization skills, health, perceptual and sensory motor development, art, music and physical education.

The maximum size of a special, self-contained class whether part-time or full-time for mildly or moderately handicapped children shall be limited to eight children if there is no teacher's aide. With a teacher's aide, the maximum size allowable shall be ten children. Maximum class size for severely, profoundly, and multi-handicapped children shall not exceed six children and shall have assistance from a full-time teacher's aide if the number exceeds three.

Severely, profoundly and multi-handicapped children shall receive supportive services from a physical and/or occupational therapist at least one full day per week unless otherwise indicated by the evaluation process. Such services shall include direct service to such children and also consultation with the classroom teacher and parent(s). Other services should be on an as needed basis ....

Supportive personnel, together with the teacher and teacher aide, shall participate and consult in an on going evaluation process ....

2.1 Self-contained, special classes whether part-time or full-time for mildly and moderately handicapped children shall be limited to eight children unless there is a teacher's aide, in which case the maximum number allowable shall be ten children. At the senior high school level when a work placement program is being conducted whereby half of the class is involved in out-of-school work placement, there shall be a certified special education teacher in the classroom and at least one other certified special education teacher employed in the coordination and counseling of work placement activities. When half the class is on work-placement, the maximum size of the class may exceed ten with an aide but in no case shall it exceed a maximum of twenty. Maximum class size for severely, profoundly, and multi-handicapped children shall not exceed six children and shall include assistance from a full-time teacher's aide when the number exceeds three.

Severely, profoundly and multi-handicapped children shall receive supportive services from a full-time physical and/or occupational therapist at least one day per week unless otherwise indicated by the evaluation process. Such services shall include direct service to such children and also consultation with the classroom teacher and parent(s). Other services should be on an as needed basis.

Placement of school age handicapped children in special classes shall not exceed a four year chronological age span and shall be based on the homogeneity of disability and developmental level ....

Each handicapped child shall have ready access to materials, equipment, and other services that are customarily available to children in regular classes ....

Teachers, teacher's aides, and supportive personnel shall participate and consult in an on going evaluation process ....

Programs involving twenty or more severe, profoundly and multi-handicapped children shall employ a full-time non-teaching supervisor of special education, trained in programming for severe, profound or multi-handicapped children and whose basic responsibilities shall be the overall administration and supervision of classrooms up to a maxi-

mum of no more than fifty such children.

2.2 Resource program personnel shall provide and/or participate in ... consultation and inservice training of teachers; performance of differential diagnostic/educational evaluations; behavioral analysis; development of prescriptive educational programs ...; individual and small group tutoring; (and) consultation with other professionals and parents.

Each such class shall have available the supportive personnel specified for each handicapped child by the evaluation process. Such class shall also serve as a transitional placement for handicapped children preparing to enter or re-enter a regular class.

Supportive personnel, together with the teacher, and teacher's aide, shall participate and consult in an on going evaluation process ....

Placement of handicapped children in the least restrictive environment shall include regular classes when determined by the evaluation process. Prior to placement of handicapped children in the regular classroom of any given school both the principal and classroom teachers shall be provided with adequate orientation to allow them to implement the child's individual education plan ....

PLACEMENT

The maximum number of handicapped children placed in any regular class shall be determined by the local school district in accordance with the findings and recommendations of the evaluation process.

No handicapped child shall be placed in regular academic classes or subject matter areas with normal children who are more than two years below the chronological age of such child unless such programs utilize heterogeneous grouping as a basis of meeting similar educational needs.

Each handicapped child placed in a regular class shall have available the supportive instructional and service personnel as determined by the evaluation process.

Any notable reversal in the academic progress or behavioral maturity of children in a regular class which occurs after placement of handicapped children in such class for 90 consecutive school days shall be cause for the local administrator of special education to initiate a re-evaluation of

such placement.

Homebound and hospital instruction shall take place on the specific recommendation of the school district administrator of special education. Such recommendation shall be based on a physician's diagnosis and statement that the child will be absent from school for more than thirty consecutive days ....

HOMEBOUND INSTRUCTION

In homebound instructional programs, the home atmosphere shall be conducive to learning. Special conditions recommended by the physician shall be observed. The minimum number of hours of instruction shall be three per school week at the elementary level of education and four at the secondary level unless fewer hours are recommended by the physician ....

A complete record of homebound teaching activities shall be maintained. Homebound instruction shall be coordinated with the work of the regular class ....

The use of the home-to-school telephone system should be employed whenever possible ....

Homebound children shall be provided with summer tutoring if they are unable to complete their current school year due to health reasons.

Teachers of the homebound shall hold Rhode Island teaching certificates in the area appropriate to the health impaired and physically disabled child and/or to such child's primary handicapping condition.

School districts shall not use home tutoring programs as a substitute for in-school programs nor as a means of excluding handicapped children from in-school programs.

HOSPITAL INSTRUCTION

Hospital special education instructional programs shall meet the same criteria as that specified for homebound instructional programs. . .

All teachers employed in hospital programs shall be trained and certified to provide special education . . . .

If a general hospital, organized to provide educational programs to children with normal intelligence who are physically disabled or health impaired, should receive children who have additional handicaps then such children shall receive the educational services prescribed by the public school evaluation process in a manner that will allow such services

to be tailored to the child's current medical condition and the uniqueness of the hospital environment.

Section Four: Supportive Services

SUPPORT SERVICES

"I. Supportive services to handicapped children shall include:
psychological services with specific responsibilities to administer psychological assessments and interpretation of those findings in regard to further referral for other types of assessments or to the recommendation of appropriate services and approaches which will be beneficial to the handicapped child's educational program, and to provide individual and group counseling and/or other psychological remedial measures appropriate to the needs of handicapped children. Any aversive techniques used in therapy or behavior modification programs shall be employed only on the written recommendation of a psychiatrist in concert with the Core Evaluation Team and shall be close supervised by the psychologist involved with the child. . . .
social work services with specific responsibilities to provide sociological case history assessments on children referred for core evaluations, identify those handicapped children who require home intervention, and provide social work services to parent(s) of handicapped children. . . .
occupational therapy services with specific responsibilities to provide occupational and self-help assessments when required by the evaluation process, and provide direct occupational therapy services to handicapped children as required by the child's educational plan.
physical therapy services with specific responsibilities to provide physical therapy assessment when required by the evaluation process, and provide direct physical therapy services to handicapped children as required by the child's educational plan.
speech, language, and hearing services with specific responsibilities to provide speech and hearing screening services . . . provide speech, language and hearing evaluative and/or therapeutic services as specified in the evaluation process, and provide annual re-assessment of all handicapped who have speech, language or hearing disorders. . . .

Other therapeutic or evaluative services not specified, heretofore, shall be provided to handicapped children by the school committee of the child's residence when deemed necessary by the Core Evaluation Team as a result of the evaluation process. Other supportive services provided to normal children in regular classes, such as music, art, remedial reading, math, and industrial arts, shall be provided to handicapped children in accordance with the recommendations of the Core Evaluation Team.

All supportive service personnel shall directly participate or consult as requested or specified in the evaluation process, provide direct individual evaluative and/or therapeutic services to handicapped children as specified by the evaluation process, and participate in professional, parent, and community education to further the coordination of educational, medical, and social concerns regarding handicapped children. . . .
. . . Each school or center where supportive services are provided shall meet the following criteria. . . Rooms provided for itinerant and permanently assigned staff shall be regularly available for their use, of adequate size with sufficient and appropriate work space, seating space and furnishings. . . Adequate storage space shall be provided. . . Physical mobility of pupils shall be considered in providing an environment that is architecturally barrier-free. Facilities used for supportive services shall permit privacy, be relatively free of extraneous noise and be accessible to pupils. All equipment ordinarily deemed necessary to carry out specific supportive services must be provided and maintained.

Specific recommendations for supportive services for any handicapped child shall be made by the school district administrator of special education on the basis of the evaluation process. Each of the specialists assessing a child shall develop goals and objectives for the particular service to be provided which shall be incorporated into the child's overall special educational program . . . .

School districts shall make the following supportive services available to children with the following types of handicapping conditions as part of the child's educational program when specified by the evaluation process.

Behavioral Disorders -- The school district shall have available for consultation a psychiatrist and a clinical psychologist or have a formal affiliation with a mental health, child guidance, or psychiatrically-oriented clinic responsible for observation and consultation on the behaviorial status of its school children.

Hearing Disorders -- The school district shall have available for consultation a speech/language pathologist, an audiologist and an otologist, or have a formal affiliation with a clinic employing such personnel.

Visual Impairments -- The Department of Education and State Services for the Blind shall cooperate in the development of preventative and rehabilitative measures for blind and partially-sighted children . . . . In addition, the school district shall make the following services available in consultation with the Department of Education and State Services for the Blind: special visual management programs including orientation and mobility training services; speech, language, and hearing services to all blind and partially-sighted children in need of such services; special reader and tutorial services for all blind and partially-sighted children whose educational development can be significantly assisted by the provision of such services: braillists and typists in appropriate quantity to facilitate the educational development for all blind and partially-sighted children in need of such services; and . . . a consulting opthalmologist and a consulting specialist in the education of the visually handicapped.

Orthopedic Handicaps or other Health Impairments -- The school district shall make appropriate consultation or assistance available to any teacher who has been assigned children with orthopedic handicaps or other health impairments in accordance with the recommendations of the evaluation process or the child's family physician.

Learning Disabilities (including aphasic and neurological impairments) -- The school district shall make available for consultation a clinical psychologist, a neurologist, an audiologist and a speech/language pathologist, or be affiliated with a clinic employing such personnel in accordance with the evaluation process."

IV.D.; Statute §16-24-4

2. Programs for Exceptional Children

Statutes

§59-5-140

Academic and vocational training at schools for the deaf and blind shall meet the standards prescribed by the state board of education and shall be administered by the state superintendent. Officials from the state department of education shall evaluate the program at each institution and report to the board of that institution.

§59-21-510 --59-21-580

The special education program is under the state department of education. The state superintendent shall expend the services of the division of instruction to include a more extensive program of special education, "and to provide for the mandatory establishment of education and training services for handicapped children." State aid shall be available to reimburse school districts for the salaries of teachers and other personnel employed to teach the physically, mentally or educably handicapped children as provided in this section. County superintendents are required to determine the number of physically and mentally handicapped children and report the information to the state superintendent.

The local officials shall test students to determine which pupils are eligible for special educational services. TESTING

A school district shall operate its own special education program either singly or jointly with other districts provided the plan is approved by the state board of education. It is eligible for state aid if the facilities and application are approved by the state department of education.

The state board of education shall establish rules and regulations to determine: which children are in need of special education services, certification RULEMAKING

requirements for teachers, application procedures for state aid, and any other matters necessary to carry out provisions of this article.

§59-21-550

No teacher shall be employed to teach special education unless the person holds a valid teacher's certificate and possesses the special qualifications the state board of education may require or holds a certificate in special education as developed by the state board of education.

§59-33-10

The general assembly finds that it is "necessary and proper to provide an appropriate education for all handicapped children and youth enrolled in public schools . . ." To achieve this goal, implementation of an intensive five-year program to expand and improve existing programs will be undertaken.

§59-33-30

The state board shall establish a program of specialized education for all handicapped children under the direction of the state superintendent. The board shall establish "screening, evaluating and placement procedures . . . and determine certification requirements for teachers" and standards for the physical plant and equipment.

PLACEMENT

§59-33-60

The general assembly shall appropriate funds to implement this program. The costs shall be shared with the school district on the same basis as costs for children attending public schools. These provisions are supplementary to all existing programs for education of handicapped children.

§59-33-80

It shall be the public policy of this state to provide, when feasible, an education for the handicapped individual "within the context of his[her] home and community." Residential treatment centers

shall attempt to "effect a meaningful return of institutionalized persons to the more normal environment of their homes . . . ." When parental consent to a return of an institutionalized person is not given, the treatment center "may place the individual in a foster home or other residence" designed to promote the growth and development of the handicapped individual.

§59-67-520

"The state department of education has the responsibility for transporting handicapped children within any school district to the nearest school in which a class is located serving the pupil's handicap."

REGULATIONS

§43-211

In elementary schools, each teacher of trainable mentally, orthopedically, or emotionally handicapped students in a self-contained classroom model and each teacher of a double session kindergarten unit shall have a teacher aide full time. A school district may employ secretaries and aides to be assigned as assistants to professional staff.

In middle schools, each teacher of trainable mentally, orthopedically, and emotionally handicapped students in a self-contained classroom model shall provide a teacher aide full time. A school district may employ secretaries and aides to be assigned as assistants to professional staff.

In secondary schools, a school district may employ teacher aides to be assigned as assistants to the professional staff.

§43-241

HOMEBOUND INSTRUCTION

Homebound instruction sponsored by State funds shall be limited to three weekly periods of one hour each. If more instruction is needed, the school district or other interested persons must provide the additional funds. There is no limit to the amount of instruction that may be

provided with funds other than State funds.

The teacher shall teach the homebound student or students in a room especially set aside for the period of instruction.

Students who because of illness, accident, pregnancy or congenital defect cannot, even with the aid of transportation, be assembled in a school are eligible for homebound or hospitalized instruction. A physician must certify that the student is unable to attend school, but may be expected to profit from instruction given in the home or hospital.

A student is eligible for homebound instruction on the day following his/her last day of school attendance or on the first day of the regular nine-month academic year of the school in which he/she would otherwise be enrolled if he/she is unable to begin the school year. He/she remains eligible until the day before he/she returns to school or until the last day of the regular academic year in the school year he/she would normally be enrolled, whichever occurs first.

All teachers of homebound students must hold a valid teacher's certificate in order to be reimbursed by the State Department of Education. The teacher providing instruction of students domiciled in South Carolina must hold a valid South Carolina teacher's certificate. A South Carolina school district may be reimbursed for the provision of instruction to a South Carolina student who is compelled to reside outside of the State to receive medical services for the cost of homebound instruction by the South Carolina Department of Education provided the teacher is certified by the Department of Education in the state where services are rendered.

§43-243

NEEDS ASSESSMENT

Each school district shall conduct a survey of the educational needs of all handicapped children in the district and devise an education plan based thereon. The district shall make an annual report to the State Department of Education, based upon this plan. The education of handicapped pupils must be recognized as a district-wide function.

Educational programs for handicapped pupils shall be provided for all handicapped children ages 6-21. The programs shall be interrelated with other school programs to the extent that handicapped pupils can benefit thereby. Local school districts may contract with other districts to provide programs and services.

The curriculum shall be adapted at all levels to meet the special needs of handicapped pupils. Counseling and guidance services, as well as appropriate occupational or vocational training services, shall be provided to handicapped pupils.

Pupil personnel records shall be maintained so as to clearly indicate the screening, evaluation and placement services used.

Each faculty member shall be certified. If the local district cannot secure properly certified teachers, it may hire teachers with certification in another teaching area who have completed certain minimal requirements in the special education field. Local districts shall conduct in-service training programs, whose primary purpose shall be to complete the certification of teachers who are teaching out of their field.

Facilities for special education programs shall be comparable in size and quality to regular school facilities. When necessary, the physical facilities used in these programs shall be specially adapted to the needs of the handicapped.

[Appendix B]

Each school district should design and implement a continuous screening program to identify all children in need of special education services. Pupils should be screened on the basis of: (a) teacher, parent, and/or physician referrals; (b) psychological services; (c) referral from community services; (d) group achievement and/or intelligence tests.

II.B.1.c.; Regulation §43-72

III.C.Education System; Regulation §43-130

IV.D.; Regulation §43-82

2. Programs for Exceptional Children

Statutes

§13-27-10

The school board must forward the names of all deaf children in its district to the superintendent of the state school for the deaf, and the names of all "visually handicapped children" to the state school for the visually handicapped. The superintendents of these respective schools shall "take all necessary action" to see that such children are "given the advantages of proper education."

SCHOOL FOR DEAF

SCHOOL FOR BLIND

§13-27-24 — 13-27-26

The parents of any blind or deaf child must comply with school board orders to send such child to the state school for the deaf or blind. If the parent refuse to do so, such attendance can be compelled by the circuit judge.

§13-28-12.1

When a child who is in a juvenile home, "under the responsibility of the bureau of Indian affairs," or in a "child care institution" is "assigned to . . . a special education facility," the state shall pay for all "auxiliary services . . . maintenance costs . . . and transportation costs."

§13-37-1

"Children in need of special assistance and children in need of prolonged assistance" means any person under twenty-one who is a state resident and who, because of his/her educational needs, is "not adequately provided for through the usual facilities and services of the school and requires special education."

§13-37-1.1

The state board of education shall "adopt rules governing" special education.

RULEMAKING

§13-37-1.2

The division of elementary and secondary education of the department of education is designated as the state agency with responsibility for the education of "children in need of special assistance and children in need of prolonged assistance." The division shall have "regulatory and co-ordinating authority" over any program pertaining to the special education of such children.

§13-37-2

"Special education" means the "educational . . . and auxiliary services" provided to "children in need of special assistance and children in need of prolonged assistance" and includes "school instruction conforming as nearly as possible to the school program . . . to the extent that the child in need of special and/or prolonged assistance is capable of profiting."

§13-37-4

To qualify for special education benefits, a child must present a certificate showing that he/she is an "exceptional child." CERTIFICATE

§13-37-5.1

Annual evaluations of the child's progress in special education programs will be made in order to determine whether the child will benefit from further instruction.

§13-37-8.6

The state board shall adopt rules specifying which types of auxiliary services may be provided to any school district's students by other schools or agencies, and specify the charges which may be made for such services. RULEMAKING

§13-37-14

The state board of education is "authorized and directed" to provide a "special education program for the state."

§13-37-14.1

The district school boards have the responsibility for providing "all . . . resident exceptional children with an appropriate educational program." Placing the child in a private program or in the program of another school district will satisfy this responsibility, "if it is unreasonable for the resident school district to provide the program."

§13-61-1

A school "for the visually handicapped" is established under the control of the state board of regents.

SCHOOL FOR BLIND

§13-61-4

"All state residents, between the ages of three and twenty-one, who, because of blindness or deaf-blindness, either partial or total, cannot "receive the full benefits of the public schools," are entitled to receive a free education in the state school for the visually handicapped.

§13-62-1

A state school for the deaf is established under the control of the board of regents, "and so managed as to afford an appropriate education to those entitled to its benefits."

SCHOOL FOR DEAF

§13-62-6

"All persons under twenty-one," whose "hearing impairment precludes" attendance in public schools, are eligible for admission to the state school for the deaf.

REGULATIONS

§24:05:02:01

SCREENING COMMITTEE

"Each district shall establish a screening committee for exceptional children. The committee shall consist of the school physician; speech, language, or hearing clinician; school nurse; school psychologist; teachers; guardians; director of special education; and administrator. If any of the above personnel are not available, the district administrator shall select a representative in that area of expertise or obtain approval from the division for a committee of different composition. The screening committee shall:

(1) Design or designate a questionnaire for guardians to assist in identifying exceptional children;

(2) Design or designate questions to be asked of teachers in conjunction with the needs assessment to assist in identifying exceptional children;

(3) Design or designate a formal diagnostic screening mechanism and determine the criteria to be used in selecting those children who shall be referred for evaluation."

§24:05:02:02

IDENTIFICATION

"Each district shall identify, through an initial screening, all children in the district, to select those suspected of being exceptional, who shall be referred for a formal screening. All new children shall be screened as they enter school. Preschool age children shall be included in the identification processes at the request of their guardian, or they shall be identified through a screening process designed by the committee for preschool age children."

§24:05:02:03

"The initial screening shall consist of a questionnaire to be filled out by the guardian of each child and a needs assessment to be completed

by the teachers. The guardian questionnaire shall request information on the medical and physical condition of the child as well as past educational experiences. Guardian and teacher consultations shall be held annually for those children demonstrating potential problems based on the initial screening."

§24:05:02:04

" The formal screening, with guardian permission, shall include, but not be limited to, one or more of the following problems: hearing; vision; speech; language; physical; emotional; and mental. All children with suspected exceptionalities as determined by the initial screening shall be provided a formal screening. The screening shall be performed by a person trained in the use of a standardized screening instrument."

§24:05:02:05

EVALUATION

The evaluation shall consist of procedures and assessment techniques determined by the nature and degree of the child's exceptionality. All children identified by the formal screening as potentially exceptional shall be referred, with guardian permission, for an evaluation. Pertinent information from the screening as potentially exceptional shall be referred, with guardian permission, for an evaluation. Pertinent information from the screening process and school records shall be made available to the appropriate evaluator with guardian permission. Every evaluation, when complete, shall provide data that can be used by the teacher and guardian in planning an instructional program for the child.

§24:05:02:06

"Personnel eligible to provide an evaluation shall meet the following South Dakota requirements in their area of evaluation, or the equivalent requirements in the state in which they are practicing:

"(1) An educational evaluator shall have a valid South Dakota teaching certificate and shall have had classroom teaching experience. The evaluator may be, but shall not be limited to, a teacher, guidance counselor, special education director, or school psychologist;

"(2) A psychological evaluator shall be a certified or licensed psychologist or psychiatrist;

"(3) A speech, language, or hearing evaluator shall have a valid South Dakota certificate as a speech, language, or hearing clinician, or a certificate of clinical competence in speech pathology or audiology from the American speech and hearing association;

"(4) A medical evaluator shall be licensed by the state board of medical osteopathic examiners;

"(5) An occupational therapy evaluator shall be registered by the American occupational therapy association;

"(6) A physical therapy evaluator shall be licensed by the state board of medical osteopathic examiners."

§24:05:03:01

PLACEMENT

"Unless otherwise specified, the following requirements shall apply to all placement programs for exceptional children:

"(1) Written consent shall be obtained from the guardian prior to placement;

"(2) Placement shall be based upon the needs of the child as determined by the evaluator;

"(3) The district shall have written policies for selection and placement of exceptional children into regular classes, and an exceptional child shall attend the district's regular education program as the child's individual needs permit;

"(4) A child whose primary language is other than English shall not be assigned to a special education program based on performance on tests which depend

solely upon command of the English language. If no adequate culture-fair test is available, the district shall provide an interpreter to assist the examiner and child."

§24:05:03:02

"A special education program for exceptional children shall be approved by the division only when complying with this section. A district with a program not complying with this section shall submit to the division a plan to comply with the rules and shall include a timeline. The requirements are as follows:

"(1) If there appears to be a change in the child's physical or educational behavior, a psychological or medical referral shall be made;

"(2) Instructional grouping for exceptional children shall consider chrononlogical ages, mental ages, and level of academic achievement by subject area. The instructional unit shall have an adjusted curriculum geared to the interests of the child's chronological age and to the life skills needed by the child. It shall also provide each child with academic, social, and occupational skills leading to independence as an adult;

"(3) Teachers shall incorporate assessment information, instructional objectives, and evaluation data in the instructional program. The teacher

shall maintain monthly records for each child's individual instructional program. Quarterly reports shall be made to the guardian regarding the child's academic progress and behavioral adjustment;

"(4) Library and media services and special equipment and materials shall be made available for each child as needs determine;

"(5) Physical facilities shall be equal to, or better than, those used to house regular educational classes;

"(6) Physical facilities shall be large enough to accommodate and store special equipment and materials. Physical facilities shall be adequate for small group sessions;

"(7) The classroom shall be located in a school building housing non-exceptional children of comparable chronological ages;

"(8) The teacher or clinician shall meet the requirements for certification as established by the state board of education;

"(9) A district may submit a plan for approval by the division for a program to evaluate new instructional methods or to evaluate alternative procedures for educating exceptional children. The division shall have the authority to approve the plan and may make exceptions to the requirements of subdivisions (1) through (8). A district requesting approval for such a program shall submit a written proposal to the division and receive written authorization before implementation. The application shall include the rationale for the experimental unit; description of the target population; screening, evaluation, and placement procedures for children; description of facilities; description of methods or procedures to be evaluated; list of measurable objectives at the administrative, program, teacher, and child levels."

§24:05:03:03

"In addition to the general requirements for placement and approval of programs, the following requirements shall apply to deaf or hard of hearing:

"(1) Prior to placement, a child shall receive a complete otological examination; a complete audiological evaluation which shall include puretone tests, tests for bone conduction, speech reception threshold and speech discrimination, a hearing aid evaluation, and recommendations for auditory training; and a thorough speech and language evaluation to determine competencies and needs for rehabilitation;

"(2) The program shall provide the following options for children, based on individual needs:

"(a) A special classroom unit with flexibility to enable children to receive maximum services on a part time to full time basis;

"(b) Supplemental tutoring by a certified teacher of deaf or hard of hearing or by a speech, language, or hearing clinician;

"(c) Part time placement into a class of deaf or hard of hearing children or instruction in specific academic areas;

"(d) Supportive services to assist teachers of hearing children to meet the educational needs of deaf or hard of hearing children;

"(3) A district program for the deaf shall be developed in consultation with the South Dakota school for the deaf."

§24:05:03:04

"In addition to the general requirements for placement and approval of programs, the following requirements shall apply to gifted and talented:

"(1) Placement of a child shall be based on a study of all available evidence of the child's ability and potential made by personnel qualified to administer and interpret appropriate standardized tests, judge demonstrated ability and potential, and recognize outstanding talent;

"(2) Selection for participation shall not be based solely on a fixed criteria. Items of evidence which shall be considered in determining student participation are:

"(a) Creative or productive performance;

"(b) Specific academic aptitude;

"(c) General intellectual ability; and

"(d) Demonstration of potential leadership ability, musical talent, artistic talent, psychomotor development, or other specialized talent areas;

"(3) Community resources shall be utilized;

"(4) Students shall not be set apart into separate classes on a full-time basis;

"(5) Students shall be given alternatives to regular course work, as appropriate, that will meet class requirements."

§24:05:03:05

"In addition to the general requirements for placement and approval of programs, the following requirements shall apply to the specific learning handicapped:

"(1) Prior to placement, a child shall receive an educational evaluation to determine present functioning in academic areas, and a psychological evaluation;

"(2) The program shall provide diagnostic and resource services for children, and supportive services to assist the regular classroom taecher;

"(3) There shall be no segregated classrooms for the specific learning handicapped child."

§24:05:03:06

"In addition to the general requirements for placement and approval of programs, the following requirements shall apply to the mentally handicapped:

"(1) Prior to placement a child shall receive a psychological evaluation to determine the presence of significant limited intellectual functioning; an educational evaluation to determine present functioning in academic, social, and vocational skill areas; and a complete speech, language, and hearing screening;

"(2) The district shall maintain written measurable educational objectives for each level of instruction and skill areas to include, but not be limited to, academic, social, and occupational; there shall be on-going written procedures to reassess educational objectives in light of analysis of the needs of the handicapped children in the program;

"(3) A comprehensive program shall provide the following options for eligible children based on assessed needs:

"(a) Instruction in academic areas by the special education teacher;

"(b) Participation with the general student body in selected school activities and nonacademic subjects;

"(c) Instruction in selected academic areas with general education teachers; provided, that the assessment of the child indicates his functioning level to be comparable to the level of academic placement in the skill area, and that placement has been made according to a written plan for the child indicating specific objectives to be reached as a result of the assignment, length of time the assignment is to continue and process for reevaluation;

"(d) Instruction in self care skills, social adjustment, and economic usefulness;

"(e) A work study program at the secondary level. The work study program shall provide each child with planned objectives leading to one or more occupational skills and an opportunity for practical work experience or occupational skill training;

"(4) Secondary students shall have an opportunity for, but not be limited to, instruction in physical education, home economics, industrial arts, career education, and driver's education. Course work shall be adjusted to the abilities of each child with the assistance of certified teachers and directors."

§24:05:03:07

"In addition to the general requirements for placement and approval of programs, the following requirements shall apply to the physically handicapped:

"(1) Prior to placement the child shall receive an evaluation by the appropriate medical specialist to determine any special medical or physical problems and to determine the needs of the child in the therapy areas;

"(2) The program shall be organized so that provision can be made for the child to receive a portion of his or her instruction from a special teacher and be integrated into regular classes in proportion to the child's ability to succeed;

"(3) Physical and occupational therapists shall provide treatment as needed;

"(4) Daily living skills, adapted physical activities, and counseling shall be provided;

"(5) The program shall be housed in a classroom in a public school building, or in a private school approved by the division;

"(6) Special equipment and furnishings necessary for the safety and treatment of physically handicapped children shall be provided."

§24:05:03:08

"In addition to the general requirements for placement and approval of programs, the following requirements shall apply to the behaviorally handicapped:

"(1) Prior to placement, each child shall be certified by a psychological evaluator as being unable to perform successfully in a regular classroom. A written report for each child enrolled shall be on file at the treatment facility or district, and with the division. The report shall include a social behavior assessment, psychological evaluation, educational evaluation, educational and treatment programs, prognosis, and a plan to return the child to the regular school program;

"(2) The program shall provide, but not be limited to, group living experiences, or individual and group therapy, or instruction in academic and vocational subjects,based upon the child's needs;

"(3) The instructional unit shall be housed in an institution, private or public school, or agency that provides for treatment or care program."

§24:05:03:09

"In addition to the general requirements for placement and approval of programs, the following requirements shall apply to speech or language impaired:

"(1) Prior to placement, each child shall receive a diagnostic speech evaluation including observation of the speech structures, audiometric evaluation, and language evaluation;

"(2) Records shall be maintained on all children screened, placed on waiting list, currently on active case load, and those dismissed from therapy;

"(3) Children dismissed from therapy shall be reevaluated at the beginning of the next school year upon teacher or guardian recommendation;

"(4) The clinician shall have a schedule for coordination of the program; for parent, staff, and agency conferences concerning students; and for staff development activities and related follow-up.

§24:05:03:10

"In addition to the general requirements for placement and approval of programs, the following requirements shall apply to visually impaired:

"(1) Prior to placement a child shall receive a medical evaluation;

"(2) The program shall provide, but not be limited to, the following options:

"( ) A special classroom unit with flexibility to enable children to receive maximum services on a part time or full time basis;

"(b) Supplemental tutoring;

"(c) Reader services; and

"(d) Support services to assist the regular classroom teacher adjust the instructional objectives, methods, and materials;

"(3) Textbooks of regular type and corresponding special texts to include, but not be limited to, Braille, large print, and tapes shall be provided;

"(4) Orientation and mobility instruction, Braille, daily living skills, adapted physical activity, and counseling shall be provided to all children needing the services."

§24:05:03:11

"In addition to the general requirements for placement and approval of programs, the following requirements shall apply to early childhood programs for exceptional children:

"(1) Each child shall receive services in accordance with the regulations for the child's exceptionality;

"(2) There shall be on-going evaluation for each child."

§24:05:03:12

"A child shall receive homebound instruction upon the recommendation of a medical or psychological evaluator. The instructional program shall follow

the program requirements, as nearly as possible, for the child's indicated handicapping condition."

§24:05:04:01

"Each district shall develop a plan for providing services to the exceptional children in the district based on results of a needs survey. The plan shall be revised each year to include changes, and this revised plan shall be submitted to the division for approval by March 1 of each succeeding year. The plan shall:

"(1) Describe the demographic, geographic, sociological, and economic characteristics of the district;

"(2) Include an administrative organizational chart as it affects special education programs;

"(3) Provide for a special education advisory committee which shall include guardians of exceptional children;

"(4) Describe how exceptional children will be served;

"(5) Describe how special education curricula will be developed; how the teachers will receive continuing professional training, and what the procedures will be for evaluating the special education programs and services;

"(6) Describe the procedure which will be used in developing a comprehensive information system of services for exceptional children to include, but not be limited to, screening and evaluation results, staff coordination, and referral sources."

§24:05:04:02

"Application for approval of programs by the division shall be made by May 31 of the year preceding the year of operation. Revisions in the program application shall be reported to the division by September 30 of the year of operation. Changes in

enrollment after that date shall be reported as they occur during the school year. Approval by the division shall be granted based on compliance with the placement and program requirements in the statutes."

§24:05:05:01

"Auxiliary services are provided to children on an individual basis to support a district program or in lieu thereof. Approval by the division shall be granted programs which meet the requirements of the statutes."

§24:05:05:02

EVALUATION

"Requests for evaluations to determine a child's eligibility for placement in a program shall be made to the division on a form provided by the division. Approved requests will be referred by the division to evaluators. This section shall not apply to a district who has an appropriate evaluator in their employ."

§24:05:05:04

"An exceptional child shall be assigned by the division to a private special education program if it is determined that the private facility can best meet the needs of the child. Such application shall be made by the district on a form provided by the division."

§24:05:05:05

PLACEMENT

"An exceptional child shall be placed in a program out of state only when no appropriate program is available within the state. The referring district, agency, or individual shall contact the division to initiate such placement. The request shall be reviewed and approved or rejected by an out of state placement committee."

III.B.Teachers; Regulation §24:02:03:21

IV.D.; Statute §13-37-8.9

IV.H.: Statute §13-27-5

§1730

"Compulsory school attendance shall be required of all blind children between the ages of 7 and 16 years." This does not apply to blind children who are mentally or physically incapable of benefiting from school attendance. This also does not apply to a student who has already graduated from elementary school or the Tennessee School for the Blind.

§1731 --1736

Blind children shall have the option of attending regular schools for sighted children or a private school or instructor, or the Tennessee School for the Blind.

SCHOOL FOR THE BLIND

The local superintendent shall certify to the department of education those blind students who either do not attend school regularly or who cannot "make satisfactory progress under the methods used for the sighted."

The superintendent may also recommend that a blind student who is incapable of progressing in a school for the sighted be placed in the School for the Blind.

Blind children shall be subject to the same truancy laws as sighted children. However, the Tennessee School for the Blind may reject any student who is so mentally or physically defective that he or she cannot effectively do the required work, and it may expel any incorrigible and unmanageable student.

TRUANCY LAWS

Parents or guardians who knowingly misrepresent a child's age or time of school attendance shall be guilty of a misdemeanor.

If a parent or guardian is unable to compel a child to go to school, he or she may be discharged from further liability and the child shall be proceeded against as a delinquent. No child declared incorrigible can be allowed to attend the School for the Blind without consent of the school's authorities.

§2902

With respect to exceptional children the state board of education may take steps necessary:

(1) "to adopt plans for the establishment and maintenance of classes . . ., to adopt teacher-pupil ratios for such classes, and to adopt methods of instruction . . .;"

(2) to establish minimum standards for admission, to study the curriculum and to provide for professional services in helping to determine the eligibility of exceptional children;

(3) to acquire special transportation, equipment, supplies and material for exceptional children;

(4) to provide for special attendant(s) when necessary;

(5) to contract for use of approved facilities and services for exceptional children;

(6) to cooperate with other agencies and institutions concerned with the "health, education and welfare of exceptional children."

§2912

The policy of the state is to see to it that special education services are provided "to meet the needs and maximize the capabilities of handicapped children." This policy shall be implemented in a timely fashion, "as an integral part of the policy of this state."

§2913

Corrective and supporting services required by handicapped children shall be provided by the state board of education. The commissioner of education shall "organize and supervise" schools and classes according to the regulations and standards established. Such schools shall be financed by the department of education.

As long as practicable, handicapped children shall be educated along with children without handicaps. Impediments to learning and to the normal functioning of handicapped children shall be overcome by use of special aids and services rather than by separate schooling. Children who are legally blind shall have the choice

between education alongside non-handicapped children and education at the School for the Blind.

"Physical aspects and specifications of schools, classrooms and other facilities . . . shall be related to [the handicapped children's] special physical, educational and psychological needs."

Local governments, school districts and the state shall respond as equally to the needs of handicapped children as to those of non-handicapped children.

§2915

The division for the education of the handicapped shall be headed by an assistant commissioner with a proper education, training, and experience. "This division shall assume the duties and responsibilities currently the function of the area of special education of the state department of education . . . . The assistant commissioner . . . shall be appointed by the commissioner of education."

§2916 -- 2918

"[A]n advisory council for the education of the handicapped . . . shall advise and consult with the governor, the commissioner of education, the state board of education and the director of the division for education of the handicapped."

The council shall be composed of nine members representative of community organizations, interested in the handicapped, and the general public.

ADVISORY COUNCIL

The council shall comment on rules and regulations, consider problems presented to it, review the state plan prepared, comment on it, and make an annual report to the governor, the legislature, and the state board of education.

§2919

A school district may independently provide education and services for handicapped children or it may participate in a special education services association to provide those services.

The association may perform all of the district's special education functions or only specified functions.

The school district shall provide those functions not performed by the association.

§2920 — 2924

A special education services association "may be established by resolution of each of the governing boards of the school districts participating in it."

Representatives of each participating local district shall be on the governing board of the association, each district having one representative. The association has the power to do such things as are necessary and incidental to the execution of any powers conferred upon special education services associations. These shall range from establishing educational programs to employing teachers, to accepting grants and other moneys, to providing transportation for handicapped children.

The association may establish and operate special education centers "to provide diagnostic, therapeutic, corrective and other services" for handicapped children. The services may be provided in regular public schools or in a center's own facilities.

Space may be used for dormitories and related facilities to make boarding available to the children who can not travel to and from home daily.

Special education services associations "shall provide education, corrective and supporting services for all handicapped children . . ." and "shall make arrangements with . . . private schools [and] institutions . . . for services to handicapped children" should such associations be unable "to provide satisfactory service[s] in [their] own facilities . . . ."

§2925

"A school district may qualify . . . as a special education services association, if it provides a full complement of educational, corrective, and supporting services . . . for all handicapped children resident within its boundaries." The state board of education shall determine whether it meets

statutory requirements governing special education services associations and is able to maintain "a full complement of special education facilities and programs."

§2926; 2927

Each special education services association shall have an interschool district agreement to work by, which shall be adopted by either affirmative vote of "each of the governing boards" of the participating school districts or by the electors in "each such school district."

The state board shall approve the agreement unless it finds it not acceptable.

The agreement shall contain provisions pertaining to "the internal management and control of the special education services association" and to the types of relationships "between the party school districts and the . . . association." Any such association, in forming, wishing to qualify for state aid, shall submit its agreement to the state board of education.

§2929

Nothing in these statutes shall prevent a school district from providing educational and other services for handicapped children "by contracting with another school district to provide such services for handicapped children from such other district."

§2930; 2931

A school district which is part of a special education services association may withdraw only with the approval of the director of the division for education of the handicapped, after it is determined that such withdrawal is in the interest of the children.

An association may be dissolved by its governing board, but dissolution shall not occur until the end of the school year.

§2932

The plan for the implementation of policies regarding special education shall include a census of the handicapped children and their geographic distribution; "provisions for

diagnosis and screening of handicapped children; an inventory of personnel and facilities; criteria for determining how handicapped children are to be educated; a program for the preparing, recruiting and in-service training of personnel; and any other matters that seem appropriate.

§2933

Each year each school district shall report to the commissioner of education and the state board of education the extent to which it is providing a special education to handicapped children required by the state and, if it is not fully complying, how it plans to do so.

§2934

"The state Board of education and each local school district shall strive to provide appropriate educational services for handicapped children at the earliest possible date."

§2935 — 2937

A three-phase incremental program shall be prepared by the local school boards.

The first phase will be a census of persons qualifying as exceptional children. Such data will be confidential and made available only to survey-takers, appropriate superintendents and staff and other approved persons. It shall also include a survey of the existing programs, services and facilities.

CENSUS

The second phase will consist of a training period for professional and paraprofessional personnel. Such training programs shall not be limited to new teachers but shall include those who are experienced in special education. All training should be "in house".

PROFESSIONAL DEVELOPMENT

The third phase of the incremental plan will be "the establishment of special education classes and/or the provision of special education services."

Each school board shall prepare such incremental plans, which will then be submitted to the state board for review and approval. If approved, the plan will be binding on the submitting school board.

If the plan is disapproved, representatives of the state board of education shall meet to put together a plan that can be approved. If no such plan can be devised, the state board shall devise one that will be adhered to within thirty days unless the school board files a suit "to retain the enforcement of such plan on the ground that it is arbitrary, impracticable, detrimental to the education of exceptional children, or invalid . . ."

§2938 — 2940

All plans shall consider the "advantages and disadvantages in providing special education to particular kinds of handicapped children through cooperative undertakings with other jurisdictions." Also, the state or school district "may enter into agreements with other school districts or states to provide such . . . education." These agreements shall contain any and all factors dealing with the education and well-being of the children. A provision shall be included stipulating that such children "shall continue to have all civil and other rights."

§2941

Every child in public and private school shall be tested to see whether such child is handicapped. This requirement does not apply to out-of-state students attending private school unless required by a previous agreement.

A list shall be kept of all handicapped children required to be tested and examined.

§2942; 2943

There shall be a unit in the division for the education of the handicapped called "Special Education Materials and Training Unit" which will assist in the education of handicapped persons. This unit may "develop, . . . acquire, . . . and make available, equipment, materials and special supplies and devices [used] in connection with the education of handicapped persons . . . .";

"provide instruction in the operation" of such materials; and "provide in-service training for teachers of handicapped persons . . . ."

Unless otherwise provided, this unit shall provide services "only to schools and systems, institutions, organizations, and persons in this state."

The state department of education may contract with other states and agencies to help provide for these services to the handicapped children.

§2944

The commissioner of education is authorized to enter into contracts to furnish equipment and supplies needed in the teaching of handicapped children.

Any articles or services contracted for by the commissioner may be made available to any school systems or entities entitled to them, as long as they serve the handicapped.

§2945

The special education materials and training unit may inspect the facilities of any applicant for or recipient of its equipment and materials and may examine only pertinent records.

The unit may also require an accounting of all such materials and supplies.

§2946

Unless provided, each school district shall establish a special education resources center "which shall perform the functions of procurement, maintenance, servicing and distribution of special education equipment, supplies and materials to the schools . . . ."

"It is the purpose of this section to promote the efficient and expert use of special education aids and to discourage their being positioned, kept, or made available for use by persons and under conditions not conducive to their proper employment. The division for the education of the handicapped shall develop, revise and keep in force regulations and guidelines for the operation of centers . . . ."

§2947 -- 2948

"A child or his[her] parent or guardian may obtain review of an action or omission by state or local authorities on the ground that the child has been or is about to be:" denied either entry or continuance in a special education program; placed in a program that is inappropriate; denied educational services because no suitable program of education or related services is maintained; provided with special education or other education which is unsufficient; or "assigned to a special education program when he[she] is not handicapped."

PLACEMENT

All records, reports and materials that the determination was based on shall be made available to the reviewing parent or guardian.

HEARING

The state board of education shall make all the rules and regulations concerning the conduct of the hearing.

"Nothing . . . shall be construed to limit any right which any child or his[her] parent or guardian may have to enforce the provision of any regular or special educational service."

§2949

If a school district fails to provide services to handicapped children, the state department of education may withhold all or part of the state aid for regular public schools. This denial may continue until the failure to provide special education has been remedied.

DENIAL OF AID

"No action pursuant to the first paragraph of this section shall be taken by the state department of education, except after public hearing on due notice, and on a record that establishes the failure of the school district to provide special education of adequate quantity and quality."

The state department of education may provide the special education services if the system fails to do so. Costs incurred by the department shall be paid for by the school district.

§2950

"The commissioner of education and the state department of education . . . shall provide technical assistance in the formulation of any plan [for handicapped children] or subsequent report required. . . ." Such assistance shall be advisory and consultative.

§2951

INSERVICE TRAINING

In-service training programs shall be available to any teacher of handicapped persons employed by a school system, institution, organization or program.

§2952 — 2953

The division for the education of the handicapped may give grants to professional personnel wishing to work in educational programs for handicapped children, to help qualify them for professional requirements.

The division shall be responsible for the administration of this program and shall keep records of each person approved for training.

The program shall not be limited to new teachers. The state board may also provide training grants "to personnel who are approved for participation as a paraprofessional . . . [in the state's] exceptional child program . . . ." The state board of education is to administer this program.

These grants are limited to those who work or agree to work in the exceptional child program.

§2954

All schools under construction or being renovated and remodeled shall be designed in such a way as to be accessible and usable by handicapped children, if indeed the school is used by handicapped children.

FACILITIES

No school or school-related construction shall get state aid unless it conforms with the previous subsection.

Plans for the schools shall be submitted to the state department of education for approval before awarding any construction contract. The plans shall "properly implement the stated educational and related objectives and functions . . . ."

§2955

"The state board of education shall issue . . . amend and revise rules and regulations . . ." concerning buildings and their construction.

A manual shall be published by the state board of education "containing educational and architectural standards to be met by special education facilities . . . "

§3001; 3002

SCHOOL FOR THE BLIND

The institution for the instruction of the blind shall be a body corporate called the Tennessee School for the Blind. Its powers are "(1) to sue in law and equity; (2) to take and hold property . . . for [the] . . . school; (3) to have a seal and such corporate rights and powers as are necessary and proper to effect the end of its creation -- the education of the blind."

§3005

"The state board of education shall have power (1) to appoint and remove officers and teachers . . .; (2) to prescribe the salaries of . . . officers and teachers; (3) to make such regulations . . . necessary . . . for the control . . . of the school; (4) to control and manage the household and domestic affairs . . .;" (5) to exercise the necessary authority in running the school; (6) to establish a work department and to provide boarding for the adult blind; (7) to do whatever is deemed necessary to establish a foundation for the school of the blind.

§3008; 3009

PLACEMENT

A blind child whose parents are citizens of the state may be placed in the institution for the instruction of the blind.

Non-resident students shall be admitted "by or under the . . . state board upon such terms as it may deem proper . . . ." Pupils who cannot pay have preference over those whose families can pay.

§3010

"The pupils shall be taught such branches of learning as they can acquire, and as are usually taught

to young persons, and such trades and handicrafts as the blind can learn and practice . . . ."

§3011

"The governing authority of the . . . school for the blind [can] . . . install facilities for training the blind in radio and television engineering." It shall train other blind students who wish to enroll in the course and may charge nonstudents for such training. Other handicapped persons may be admitted "at the discretion of the superintendent of the school for the blind. . ."

§3017

"The commissioner of education shall have the power to provide for the suitable care, maintenance, and instruction of blind children of school age" residing in the state and who, because of a lack of training, are not eligible to attend the school for the blind.

§3020

"The commissioner of public welfare shall prepare and maintain a register of the blind in Tennessee which shall describe their condition; cause of blindness and capacity for education and industrial training."

If after examination by an optometrist a person is found to be blind or "with correction 20/200 or less in the lesser eye" the optometrist shall report the results of the exam to the register of the blind.

The department of public welfare is empowered to establish rules and regulations regarding the "custody, use and preservation" of the files and records of the blind. Except for purposes directly connected with the administration of services to the blind, this list shall not be published.

§3026

The school for the blind, through its superintendent, can "provide and coordinate training for blind children of pre-school age and their parents throughout the state." The training shall be convened with instruction in physical and mental preparedness, to qualify them for admission to the school for the blind.

The state board shall have the power (1) to appoint and remove all officers and teachers of the school for the deaf; (2) to prescribe the salaries of officers and teachers; (3) to make all by-laws proper for the control and regulation of the school; (4) to control and manage household and domestic affairs; (5) to use the proper authority necessary to establish a foundation for the school.

REGULATIONS

pp.28 - 43

"[Each] local school system must plan a variety of programs to meet the educational needs of all students . . . . Alternative programs must be provided when the educational objectives cannot be met in the regular program ." The state school fund provides monies to finance such programs. "The State Commissioner of Education is authorized . . . to act for the State Board of Education in implementing its powers and duties in the areas of exceptionality[when] not otherwise provided. . ."

Special education options have been designed "to provide a series of progressively restrictive alternatives for meeting educational needs of verified handicapped children," whether they be assigned to regular programs (through a wide diversity of supportive services) or to full-time special programs (like individualized instruction in a special program or in a special day school or residential facility).

"Indirect services to support children in programs for handicapped children shall include supervisory and administrative services; evaluation of suspected handicapped children; and inservice education and teacher preparation."

Educational, social, and psychological evaluations, and/or medical diagnosis and information shall serve to determine a child's eligibility for special education services.

General eligibility standards exist for children who are mentally retarded, whose speech and/or language are impaired, who are deaf and hearing impaired, who are blind and visually limited, who are physically handicapped, who are learning disabled, behaviorally disordered, socially maladjusted, who have two or more functional disabilities, who are intellectually gifted, or whose handicaps do not correspond to those given above.

ELIGIBILITY

"All available data (referral, screening, assessment, including certification by a specialist) . . . should be compiled for consideration by the multidisciplinary team (M-team) [whose] purpose . . . is to recommend the appropriate educational program for the child through a careful evaluation of all data . . . ."

pp.43 — 44

"Children of educable mind who because of visual impairment . . . cannot be satisfactorily educated in the regular schools . . . shall be considered for admission to the Tennessee School for the Blind . . . . All children admitted shall be of sufficiently sound mind and body capable of receiving an education."

p 44

"Children who because of a severe hearing deficiency cannot be satisfactorily educated in the regular public schools and whose parents or guardians are residents of the State of Tennessee shall be eligible for admission to the Tennessee School for the Deaf . . . .

SCHOOL FOR THE DEAF

"Recommendation for admission shall take into consideration the percent of hearing loss, the age of onset of deafness, the facilities available to the child locally, the child's adjustment to his[her] handicap, the acceptance of the problem by the local school sytem, and the child's need for professional guidance and vocational training by

skilled workers with the deaf. All children having a hearing loss greater than 85 percent in the better ear according to the American Medical Scale shall be eligible for admission. All children admitted shall be of sufficiently sound mind and body to be capable of receiving an education."

p. 100-102

"The State Board of Education shall provide or cause to be provided by school systems all regular and special education, corrective and supportive services required by handicapped children to the end that they shall receive the benefits of a free public education appropriate to their needs."

"Each school system shall file with the State Commissioner of Education on or before July 1, a plan for the implementation of appropriate instruction and special education services for exceptional children ages 4 through 21, inclusive, and 3 year old deaf children who reside within the school district, including a reasonable procedure for obtaining certification of exceptional children by a specialist."

"The plan shall include:

(a) Procedures for referral, screening, assessment, and placement including certification by a specialist.

(b) Number of eligible children by handicapping condition to be served through the various program alternatives.

(c) Inventory of personnel and facilities available to provide instruction and other services to handicapped children.

(d) Certification that equal education opportunities be provided and that due process procedures established by the State Department of Education will be followed in the implementation of programs for handicapped children.

(e) Detailed budget for the expenditure of all funds available to provide special education services.

Each school district is required to comply with the following specific requirements:

(a) Use appropriate identification procedure to determine eligibility of children for special education, corrective, and supportive services.

(b) Employ personnel who meet applicable certification and employment standards.

(c) Develop an individualized education program adapted to the individual needs, interests, and abilities of each child.

(d) Provide appropriate physical facilities.

(e) Provide special equipment, materials, and supplies needed to implement the special program.

(f) Provide special transportation where necessary.

(G) Maintain appropriate records and reports to be used in planning and evaluation of special education programs and services."

School districts shall also be responsible for the expenditure of all state funds for handicapped children as intended, according to the local plan approved by the State Commissioner of Education.

IV.H.; Statute §1708 -- 1710

2. Programs for Exceptional Children

Statutes

§ 11.03

The Central Education Agency shall have exclusive jurisdiction and control over the Texas School for the Deaf, and it shall be the duty of the commissioner of education to appoint a superintendent for that school, subject to approval by the State Board of Education.

SCHOOL FOR DEAF

§ 11.05

The art of printing shall be among the subjects of study offered at the Texas School for the Deaf. A "competent, practical" printer shall be employed as instructor.

PRINTING

§ 11.051

The superintendent of the School for the Deaf "shall make the determination in [her] his sole discretion of which children are economically deprived" and thus "entitled to have their clothing and travel expenses paid [by the state]."

§ 11.052

With the approval of the State Board of Education, the commissioner of education shall appoint a Director of Education for the Visually Handicapped, who together with not less than three nor more than five qualified coordinators shall be primarily responsibile for the development and administration of a "comprehensive statewide plan for the education of the visually handicapped which will ensure that visually handicapped children have an opportunity for achievement equal to the opportunities afforded their peers with normal vision." The Director of Education for the Visually Handicapped shall be responsible for the evaluation of and the development of Standards and guidelines for special education, and the maintenance of effective liaison between special education programs provided by local school districts and related initiatives exerted by related state programs, agencies, or facilities. Also, the director

APPOINTMENT

shall encourage the use of all pertinent resources by assisting in the development of contractual arrangements between local school districts and other organizations and discourage interagency competition, overlap, and duplication in thedevelopment of specialized resources and the delivery of services.

The minimum components of this comprehensive statewide plan shall include but not be limited to the following: "(a) adequate provision for comprehensive diagnosis and evaluation of each school-age child having a serious visual impairment; (2) procedures, format and content of the individualized written service plan for each child; (3) emphasis on providing educational services to visually handicapped children in their home communities whenever possible; (4) methods to assure that. . .children . . .receive, prior to being placed in a classroom or within a reasonable time thereafter, the compensatory skills training, communicative skills, orientation and mobility training, social adjustment skills, and vocational or career counseling required in order for. . .students to succeed in classroom settings and to derive lasting benefits of a practical nature from the education . . .; (5) flexibility on the part of the local school systems to meet the special needs of children through. . .specialty staff and resources. . .contractual arrangements with other qualified agencies, public or private. . ., supportive assistance from regional service centers, field offices of the Central Education Agency, or adjacent school districts . . ., short-term or long-term services through the Texas School for the Blind. . .; (6) a statewide admission, review, and dismissal process; (7) provision for effective interreaction between the visually handicapped child's classroom setting and his home environment, including provision for parental training (8) a requirement for the continuing education and professional development of ...staff providing special education services (9) adequate monitoring and precise evaluation of special education

services (10) a requirement assuring that staff assigned to work with children have prompt and effective access directly to resources available through cooperating agencies in the area.

§11.06

SCHOOL FOR BLIND

The Texas School of the Blind is operated (1) to provide educational services on a residential basis to blind children who are unable to obtain adequate educational opportunities in their local communities (2) to provide short-term services to blind children and youth for the purpose of equipping them to be able to benefit from educational services available in their local communities; (3) to serve multiply handicapped blind children and youth who cannot be effectively assisted through community programs but whose developmental capacities are such that it may not be convincingly demonstrated that the children and youth should appropriately be admitted to residential institutions operated by the State Department of Mental Health and Mental Retardation; (4) to serve as the primary catalyst within the state for promoting greater excellence and relevance in educational services for blind individuals; (5) to serve as a resource to local school programs throughout the state in connection with their efforts to serve blind and visually handicapped individuals effectively; (6) to serve as a mechanism for training and ongoing staff development for those who are involved in providing educational and closely related services to blind or visually handicapped youth in local communities throughout the state; (7) to serve as a research and demonstration facility through which are developed new and innovative methods of applying the most advanced technology, scientific achievement, and psychological and social knowledge to solve the educational problems of blind and visually handicapped; and (8) to cooperate with any and all other public or private agencies.

§11.061 — .062

The principal governing body for the Texas School for the Blind shall be a five-member board designated by the State Board of Education from among its membership to be known as the Board of the Texas School for the Blind. The Board of the Texas School for the Blind shall be constituted annually and its

membership shall be designated according to the criteria of providing continuity and the development of knowledge and expertise about matters related to the operation of the Texas School for the Blind. The chief administrative officer of the School for the Blind shall be its superintendent, who is empowered to take "all necessary and appropriate action" to carry out the functions and purposes of the Texas School for the Blind. The superintendent is subject only to a requirement of reporting not less than quarterly to the Board of Texas School for the Blind as to his/her activities, progress in the implementation of general policies prescribed by the board, and such additional matters as the Board might request. The Board shall function in a capacity equivalent to the board of a school district. The Board shall establish a semiannual meeting with two advisory committees both of which shall be available to the superintendent for consultation and assistance on request at any time. An educational advisory committee will consist of two teachers employed in classroom settings at the School for the Blind, two teachers working primarily with blind and visually handicapped students in public school settings, and two staff of the School not employed in classroom settings. A consumers advisory committee will consist of the parents of two students attending the School for the Blind, the parents of two blind children enrolled in public school programs, one former graduate of the school employed in a profession other than education, and one former student of the school successfully engaged in a vocation not normally requiring college training. Members of the two advisory committees shall serve two-year terms, and shall be appointed by the Board of the Texas School for the Blind following consideration of such recommendations as might be made by the superintendent. Members of the advisory committees shall receive no salary for their services.

APPOINTMENT

§11.071

Economically deprived children attending the Texas School for the Blind shall be entitled to clothing and travel benefits paid for by the state.

§11.08

MEDICAL SERVICES

Appropriate ophthalmological or optometric services along with other specialty medical and psychological services shall be provided to examine and treat all students at the Texas School for the Blind in relation to their needs. Other specialty medical and psychological services shall be provided as needed.

§ 11.09

PRESCHOOL PROGRAM

"The Central Education Agency shall develop a special program for preschool children, [three years of age or older], who have a hearing loss sufficiently severe to prevent adequate progress in speech development. The purpose of the program shall be to prepare such children for entry in the first grade of the Texas School for the Deaf or the Texas public schools by providing them with a command of some form of communication with others. . The Central Education Agency shall establish the academic requirements for teachers who teach this program and shall issue certificates to teachers who meet such standards."

§ 11.091

EVALUATION CENTER

"With the advice of its technical advisory council, the Governor's Coordinating Office for the Visually Handicapped shall establish [and coordinate] a comprehensive diagnostic and evaluation center and program in Austin for the multiply handicapped blind children and youth." The center shall utilize resources of the State Commission of the Blind, the Texas School for the Blind, the Criss Cole Rehabilitation Center, the State Department of Mental Health and Mental Retardation, the University of Texas, and other public or private organizations in the Austin area.

"The purposes and functions of the [center] are: (1) to provide thorough diagnostic studies of multiply handicapped blind children and youth, to determine the nature and scope of special education and related services needed by the individuals, which studies shall at the minimum consist of a comprehensive evalu-

ation of pertinent medical, psychological, social, cultural, environmental, and related factors which bear on the individual's ability to benefit from educational services; (2) to develop scientifically valid instruments, methodologies, and procedures for measuring ... the total developmental assets and deficiencies that relate to the capacity of a multiply handicapped blind youth to benefit from educational programs and to prepare for a full and useful life as an independent, contributing member of society; (3) to test, develop, demonstrate, and help implement concepts, formats, and processes for establishing, executing, periodically reviewing, and... modifying individualized written service plans for all blind or visually handicapped children or youth participating in educational programs within the State...; (4) to stimulate and assist in the development of more adequate diagnostic and evaluative resources in other communities for blind and visually handicapped children... throughout the state, experimenting with a variety of new and innovative methods for providing [these] services at the community level with a view toward ultimately assuring timely and convenient access to the diagnostic and evaluative resources required for developing and carrying out individualized service plans with optimum effectiveness; and (5) to develop new and innovative methods for applying the most advanced medical technology, scientific achievement, and psychological and social knowledge to solve the educational problems of blind and visually handicapped children or youth.

INDIVIDUALIZED PLAN

Every blind or visually handicapped individual eligible for educational services through preschool, kindergarten, elementary, secondary, or vocational-technical programs within the State... shall receive the educational programs according to an individualized written service plan which: (1) shall be developed following adequate diagnosis and evaluation of all pertinent medical, psychological, social, cultural,

environmental, and related factors which bear on the individual's ability to benefit from educational programs; (2) shall be jointly represented by a representative of an educational program who is qualified and experienced in working with individuals handicapped by serious visual loss, by the blind or handicapped individual and her/his... guardian, and by representatives of other public or private organizations providing or capable of providing specialized services which tend to assure greater effectiveness of the educational effort exerted in behalf or the blind or visually handicapped individual; (3) specifies in measurable terms the goals and objectives to be accomplished as a result of the educational and specialized services to be provided by the various organizations working with the blind or visually handicapped individual; (4) specifies the time by which each service is to be initiated, the anticipated duration of each service, and the time within which the objectives and goals of the services might be achieved; (5) contains a procedure and schedule for periodic review and evaluation of progress toward established objectives and goals based on objective criteria and contains a record of the reviews and evaluations; (6) summarizes the views of the blind or visually handicapped individual, or as appropriate, her(his)guardian... concerning her(his) goals and objectives and special services being provided; (7) outlines the obligations undertaken by the individual's family in connection with the individualized written service plan, including family commitments regarding physical restoration services, procurement of optical aids, and related services; (8) provides assurances that the blind or visually handicapped individual has been informed of her(his) rights and the means by which she(he) may express and seek remedy for her(his) dissatisfactions, including but not limited to procedures for utilizing the ombudsman services of the Governor's Coordinating Office for the Visually Handi-

capped; (10) reflects that the individualized written service plan has been reviewed as frequently as necessary, but in no event less than once annually, by competent educational authorities, representatives of cooperating organizations, the individual and her(his)guardian, and that the plan has been modified, refined, or redeveloped in a manner consistent with determinations made through such review; (11) describes in detail the arrangements made to provide the blind or visually handicapped individual with orientation and mobility training instruction in Braille or use of large print, other training to compensate for serious visual loss, access to special media, and special tools, appliances, aids, or devices commonly utilized by individuals with serious visual losses; and (12) sets forth the plans and arrangements made for contacts with and continuing services to the blind or visually handicapped individual during periods in which she(he) might not be involved in school programs.

Whenever services are terminated under an individualized written service plan on the basis that the handicapped individual is not capable of benefiting from educational services, the following conditions and procedures must be carried out: (1) the decision shall be made only with the full participation of the blind or visually handicapped individual, her(his) guardian, and representatives of other organizations in the area in which individuals reside who are also providing services to the individual; (2) the rationale for the decision shall be recorded as an amendment to the individualized written service plan, certifying that the concerted provision of educational and related services has demonstrated beyond reasonable doubt that the individual is not capable of benefiting from educational services; (3) a copy of the individualized written service plan and the certification that the individual is not capable of benefitting from educational services will be sent to the Governor's Coordinating Office for the Visually Handicapped

for review and further investigation, following which, if it is determined that the termination of services is appropriate and justified, recommendations and referrals will be offered to the blind or visually handicapped individual and her(his) guardian regarding services to be considered through residential school programs, other state institutions, community facilities operated by the State Department of Mental Health and Mental Retardation, or other resources as appropriate to the case and as accessible to the individual's guardian; (4) until such time as when the individual whose written plan of services has been terminated attains the age of 21 years and is referred for consideration for vocational rehabilitation services, there shall be at least an annual review of the individual's case, during which the individual and her/his guardian will be afforded clear opportunity for full consultation in the reconsideration of the determination that the individual is capable of benefitting from educational services, except in situations where a periodic review is precluded because the individual has refused services or has refused a periodic review, or is no longer present in the state or cannot be located, or has a medical condition that is rapidly progressive or terminal."

§ 11.10

"(a) The Central Education Agency is authorized to approve the establishment and operation of county-wide special day schools for the deaf in all counties having a population of 300,000 or more inhabitants.... Such schools shall be administered by a centrally located school district designated by the Central Education Agency in each such county, and the districts accepted in the designation shall provide appropriate physical facilities, buildings, equipment, supplies, material, and transportation to all eligible children residing in the county without regard to school district boundaries. (b) The provisions of this section may apply to any

DAY SCHOOLS FOR DEAF

two contiguous counties whose cumulative population exceeds 140,000 but does not exceed 335,000 ... provided that such two county day schools shall be administered by one school district designated by the Central Education Agency. (c) School districts in counties contiguous to those authorized to operate a bi-county day school for the deaf may participate in the day school for the deaf program upon approval by the Central Education Agency of requests from a school district in a county contiguous to those counties authorized to operate the bi-county day school and the school district designated to conduct the school. (d)(1) All deaf children between the ages of 6 and 21, inclusive, residing in the county or multicounty providing day school program shall be eligible to attend the school designated by the operating district. Provided, however, no later than June 1 the governing board of any school district within a county or multicounty which has in operation an approved day school program may file with the Central Education Agency notice withdrawing for the next ensuing school year for such day school program to operate in lieu thereof an exceptional children program providing for the education of all its resident deaf under applicable laws. (e) Deaf children between the ages of 6 and 13 inclusive in such counties shall not be eligible for admission to the Texas School for the Deaf except upon recommendation of the superintendent of the operating district with the concurrence of the superintendent of the Texas School for the Deaf (g) children enrolled in the county-wide day school in such counties, who become 14 years of age on or before December 31, shall be eligible for admission to the Texas School for the Deaf or to continue their academic training and program of vocational planning, guidance and training in the special day school. (k) The central education agency shall approve the educational program for the countywide day schools and the program shall be comparable to that of the Texas School for the Deaf. (n) The legislature intends to continue a process of providing better education available to deaf children on a statewide basis and to afford all deaf children an opportunity for achievement more equal to their peers with normal hearing (O) the Central Education Agency shall employ a Director of Deaf

Education (at a salary not exceeding $30,000) with the responsibility to develop and administer a comprehensive statewide plan for deaf education services including continuing diagnosis and evaluation, counseling and teaching, and designed to accomplish the following objectives: (1) assisting and counseling parents of children of any age whose hearing is determined by professionally acceptable evaluation to be nonfunctional for education purposes, such assistance and counseling to be provided in each of the regional day school programs for the deaf... and admitting all children between the ages of 3 and 21 whose hearing is determined by professional acceptable evaluation to be nonfunctional for educational purposes to the regional day school programs for the deaf; and (2) Enabling a majority of as many as may be practicable of deaf children to reside with their guardians and be afforded compensatory education in their home school districts or in facilities or regional day school programs for the deaf; and (3) Enabling deaf children who are unable to attend schools of their place of residence and whose parents or guardians live too far from facilities of regional day school programs for the deaf for daily commuting or to be accommodated five nights a week in foster homes or other residential school facilities provided for by the Central Education Agency in order that such children may attend a regional day school program for the deaf; and (4) Enrolling children in the Texas School for the Deaf at Austin or any other educational facility for the deaf upon the joint recommendations of the Director of Deaf Education, the superintendent of the child's regional day school program for the deaf, and the Superintendent of the Texas School for the Deaf at Austin, admitting to the Texas School for the Deaf only those children whose needs can best be met in that institution, designating the Texas School for the Deaf as the principal regional school for the central region of the state and superintendent of the Texas School for the Deaf as the superintendent of the central region; and (5) encouraging children enrolled in regional day school programs for the deaf who have demonstrated ability to do so to return to regular school classes on a part-time, full-time or trial basis. Supplemental aid from the regional day school program for the deaf shall be made available to such children; and (6) Recognizing the need

for development of oral communications abilities in deaf children and the ability of many to achieve high educational excellence through that method, but also recognizing the mobility of some to gain their education successfully by this means, the comprehensive plan developed by the Central Education Agency will call for the use of methods of communication which will best meet the needs of each individual deaf child in this state, with each child to be examined thoroughly so as to ascertain his/her potential for communications through oral means. The state director and regional superintendents may establish separate programs to accommodate diverse communication methodologies.

(p) The Central Education Agency shall apportion the state into not more than eight nor less than five areas each furnishing a regional day school program for the deaf. (q) The Central Education Agency shall employ a superintendent for each regional day school program for the deaf. These superintendents shall be responsible to the Director of Deaf Education of the Central Education Agency. It is the intent of the legislature that the regional superintendent utilize the local resources to the fullest practicable extent in the establishment and operation of the regional programs. Regional superintendents are authorized and expected to contract with any qualified public or private organization or qualified individuals for diagnostic, evaluation and instructional services or any other services incidental to the education of deaf children including transportation and/or maintenance. Upon the recommendation of regional superintendents, the Central Education Agency shall employ educational and other personnel, may purchase or lease real or personal property; may accept gifts of real or personal property or services from any source, public or private, including independent school districts and institution of higher learning in the state for the purpose of establishing and operating regional day school programs for the deaf. The Central Education Agency may provide by rule or regulation that upon establishment of each regional school, the countywide schools in that region shall become a part of the regional school operation and that all equipment, classroom supplies, and other personal property owned by the countywide schools shall become the property of the

CONTRACTS

RULEMAKING

regional day school. When any such programs are combined the directors and employees of the former countywide schools shall be employed in appropriate substantially similar capacities within the regional day school programs for that region.

§11.101

CONTRACT

The Central Education Agency may contract with qualified private schools to provide education and training for eligible deaf children. Such contract shall provide for standards of education and training, and standards for buildings, equipment and facilities at least equal to those provided by the Texas School for the Deaf.

§11.15

APPOINTMENT

"The Advisory Council for Language-Handicapped Children shall consist of twelve members appointed by the Governor. The duty of the council is to study the problem of language-handicapped children and to advise the commissioner and the Central Education Agency in the development of programs designed to diagnose and treat the problems of language-handicapped children." Members shall be appointed "from the fields of psychology, medicine and education."

"The . . . Agency shall:

1) develop programs, with the advice of the council, designed to diagnose and treat the problems of language-handicapped children;

2) establish . . . at least three required experimental diagnostic facilities" providing them with rules and regulations for their operations, necessary contracts, funds, and other practicalities necessary for their continued operation.

§11.16;161

"a) The . . . Agency shall establish and develop a State program for the education of deaf [and/or blind] adults" whose purpose shall be "to provide primary and secondary educational opportunities to adults whose hearing or [sight] loss . . . has interfered with the attainment of

a level of educational advancement otherwise potentially achievable.

b) The program shall include:

1) criteria and standards . . . for determining eligibility.

2) criteria and standards for determining teachers' qualifications, curriculum, equipment, and classroom facilities . . . .

Any school district may establish an educational program for deaf and/or blind adults."

§11.19

"The Central Education Agency shall establish a program . . . of educational opportunities . . . for students with extraordinary learning or leadership ability or outstanding talent in the creative or vocational arts whose development requires programs or services beyond the level of those ordinarily provided in regular school programs.

The commissioner shall appoint a full-time director of programs for the gifted and talented . . .[who]. . . with the approval of the State Board shall develop and annually update a state-wide plan for the provision and coordination of programs for the gifted and talented. The plan shall include . . .;

APPOINTMENT

1) the development of criteria for the identification of gifts and talents of students;

2) the development and intra agency coordination of instructional programs and techniques . . . .;

3) the development of training programs for professional personnel . . .;

4) coordination of all state, federal, and local resources available for the education of the gifted and talented; and

5) a statement of the objectives of the program, the methods to be used in obtaining the objectives, and the methods to be used in assessing the results.

There shall be an advisory council on the education of the gifted and talented . . .[which] . . . shall assist the director in developing the state plan . . . ." Rules

concerning membership, meetings, expenses, etc. are set forth in the statute. "The director shall present all proposed rules and regulations relating to the program to the council for their review and comment . . . .

APPOINTMENT

The Commissioner may appoint regional advising councils . . . to assist in the implementation of the state program at the local level.

The director, with the approval of the . . . Board. . . may establish demonstration programs for the education of gifted and talented students in various regions of the State. . . A school district or a combination of school districts desiring to participate in a demonstration program . . . shall submit . . . a detailed plan describing the . . . students to be served, the objectives and methods of obtaining the objectives for the proposed program, and the method of assessing the results of the program. All proposed demonstration programs shall be reviewed by the advisory council . . . prior to submission to the . . . Board . . . for approval."

§11.27

"The State Board . . . may provide for the maintenance, care and education of persons under . . . 21 . . . who are totally deaf and blind, totally blind and nonspeaking or multiply-handicapped.

The Board may . . . require reimbursement for the cost of their maintenance, care, and education. . .

CONTRACTS

The board may . . . enter into contracts with public or private institutions. . . . which are equipped to provide the specialized facilities and personnel necessary to care for and educate [such] persons . . .; it may also provide maintenance . . . attendants, and transportation to and from such institutions for such persons."

§12.03

"The . . . Board . . . is authorized to acquire . . . with or without bids . . . free textbooks recommended as suitable and usable" for the public school education (grades 1-12) of the blind and visually handicapped students

"whose visual acuity is impaired to the extent that he[she] is unable to read the print in regularly adopted textbooks. . . . The board may also enter into agreements providing for the acceptance, requisition, and distribution of books and instructional aids pursuant to . . . [federal law]. . . for use by [blind and visually handicapped] students enrolled in public or private non-profit schools" but not for the purchase of such textbooks if state funds other than administrative costs are involved.

BRAILLE

"All [available] textbooks. . .[including]. . . books in Braille . . . or any other medium or any apparatus which conveys information to the . . .[student]. . . or otherwise contributes to the learning process. . . shall be examined by the State Textbook Committee for its recommendation as to their suitability and usability . . . .

RULEMAKING

Textbooks for the blind and visually handicapped may be obtained and distributed by the Central Education Agency pursuant to rules and regulations adopted by the . . . Board . . . as it may act on recommendations of the State Textbook Committee and commissioner of education."

§16.104;161

"It is the intention of this section to provide for a comprehensive special education program for exceptional children in Texas."

'Exceptional children' means children between the ages of 3 and 21 inclusive, with educational handicaps, (physical, retarded, emotionally disturbed and/or children with language and/or learning disabilities)." In general, this encompasses any children whose disabilities "render regular services and classes of the public schools inconsistent with their educational needs."

The statute sets forth definitions for physically handicapped mentally retarded, emotionally disturbed and language and/or learning disabled children.

The "special services" required for the education of such children includes "special teaching in the public school curriculum inside and/or outside the regular

classroom; corrective teaching . . . corrective health habits; transportation . . . instructional media, and and supplies; professional counselling . . .; supervision of professional services and pupil evaluation services; established teaching techniques for children with language and/or learning disabilities."

"Exceptional children teacher units" shall, under rules and regulations established by the State Board, be allotted to eligible school districts. Such units shall be allocated on a separate formula from other type units.

"Professional personnel for the operation and maintenance of a program of special education shall be:

1) exceptional children teachers;

2) special education supervisors;

3) special education counsellors;

4) special service teacher, such as itinerant teachers of the homebound and visiting teachers. . . and;

5) psychologists and other pupil evaluation specialists" whose policy shall be set by the commissioner.

Paraprofessional personnel "shall consist of . . . teachers aides, who may or may not hold a teacher's certificate." The commissioner shall establish their qualifications and salary levels.

The commissioner, under rules adopted by the State Board, shall establish "quantitative bases for the allotment of all special education unit personnel." School districts may, at their own expense either employ special educational personnel in excess of the state allotment or supplement their state allotted minimum salary. In addition, districts may pay for all or part of continuing education programs for its special education personnel.

"Special education unit personnel may be . . . utilized on a full-time, part-time or consultative basis or may be allotted by the commissioner . . . jointly to serve two or more school districts." Two or more districts may jointly operate their special education program, or any part thereof.

Districts operating approved programs shall be allotted a "special service allowance . . . for pupil evaluation, special seats, books . . . and other supplies required for quality instruction."

Special education teachers shall be paid on the same pay scale as regular teachers with similar qualifications and experience. Special education counselors and supervisors shall be paid on the same pay scale as regular counselors and supervisors with similar qualifications and experience.

Special education personnel may be employed on a full-time, part-time or consultative basis, or may be allotted pursuant to cooperative district agreements.

A "special service allowance" to be used for pupil evaluation, special seats, . . . books, instructional media and other supplies "required for quality instruction" shall be allotted to each school operating an approved program.

The annual salaries for special education teachers, special service teachers, counselors and supervisors shall be the same as those of individuals in the regular school systems with similar qualifications and experience. The commissioner of education shall approve the qualification for such special education personnel.

Salary costs and operating costs "shall be paid from the Foundation Program School Fund." Local school districts may, if they so choose, supplement these expenditures with their own funds.

Eligible school districts and regional education service centers may contract with nonprofit community mental health and/or mental retardation centers . . . for the provision of services to exceptional children." Such organizations must be approved by the State Board.

The legislature shall appropriate funds for the implementation of this program. If the monies so appropriated are inadequate to fully implement the program, the commissioner with the approval of the state board shall make such adjustments as are necessary to reduce the cost.

In the event the comprehensive program cannot be provided to all exceptional children, priority in services to be rendered shall be given to those with the most severe handicaps. Detailed records are required to be kept "to allow meaningful evaluation of the effectiveness of the policies and procedures adopted."

SPECIAL SERVICES

Special services extended to children with visual or hearing handicaps "shall be provided by qualified staff certified by: reputable public or private nonprofit organizations in the [applicable] fields of work. . . as having the professional credentials and competence required for certification within those fields."

Special services to be extended to children with visual and/or hearing handicaps shall be provided to children from their birth through age 22. Such services include "parental counseling and training, competent orientation and mobility training," and other necessary "nonacademic services".

§21.0331

SCHOOL FOR BLIND

SCHOOL FOR DEAF

"A child who is blind or deaf and who does not have adequate or appropriate educational facilities available in the area in which he[she] resides shall be referred .... to the Texas School for the Blind or the Texas School for the Deaf .... The ... board of every school district ... shall promptly notify the Central Education Agency of each referral made," along with a statement "setting forth the basis for the determination that the child could not be served adequately ... in the area" where the child resides.

"[T]he Central Education Agency shall furnish the governor and the budget office of the legislature annually the number of the above-noted referrals, the number "actually served" and the number "eligible for admission to these schools but whose admission has been delayed because of inadequate facilities...."

"The governing board of any school district ... which failed to provide adequate services for these children

shall report this fact, the number of children, and the type of disability to the Central Education Agency" annually.

§21.080

"A school age child or ward of an employee of a state school for the mentally retarded ... is entitled to attend school in a school district adjacent to the state school free of any charge ... provided ... his[her] parent or guardian is required by the superintendent of the state school to live on the grounds of the state school ...." The tuition charge "shall be paid by the school district...."

§21.907

"A teacher may use the oral, manual, Rochester (combination method), and the language of signs methods of instruction in teaching deaf and deaf-mute students ... subject to the recommendation of his/her supervising teacher."

§21.911

TESTING

After a test is administered in the child's primary home language to discover verbal or non-verbal intelligence he/she may be assigned to a special education class.

§26.01--.13; 26.15--.17

Districts may be created to provide for handicapped individuals, special services that include special teaching in the public school curriculum within or without the regular classroom, corrective teaching including several alternatives such as lipreading, speech correction etc. Non-handicapped scholastics will be those who are "eligible for public school education under state law and who (are) not officially labeled as being handicapped."

The creation of special rehabilitation districts is to provide education, training, special services and guidance to handicapped persons, peculiar to their needs.

"Any county or combination of counties, contiguous to an existing rehabilitaiton district may be annexed to it and become part of it...."

§26.63

All plans for programs in the rehabilitation district are to be made by the board of directors and approved by "the state commissioner of education and by the executive director of the Texas Department of Mental Health and Mental Retardation." The board shall also "make reasonable limitation on the duration of residence and attendance by trainees ... terminate the training of any trainee who proves to be unadaptable to the training program of the district."

§26.65--.68

"(T)he district shall be eligible for and allotted administrative units, special service personnel, exceptional child teacher units, vocational education units, and other special education personnel" and "shall be eligible to receive state funds for the purpose of educating any handicapped... scholastics between the ages of 14 and 21, inclusive, who is in need of an alternative school setting."

The district's allocation of principal, special service, supervisor and counsellor units shall be computed on eligible exceptional children teacher units in the same manner as other independent school district's allocation.

The board may "fix such fees and tuition rates as are deemed necessary to supplement other sources of funds for maintaining and operating the district in carrying out its functions."

TUITION

REGULATIONS

§3511

"The public educational program of Texas shall include an educational provision for pupils who have special needs because of certain distinguishing characteristics. Individuals who have characteristics that result in special learning problems . . . or potentials shall be identified, appraised, and provided instruction."

"The ultimate objective . . . shall be that there will be no discernible ethnic class or population group differences in the achievement of instructional objectives."

In dealing with the subject of gifted and talented students the State of Texas believes "all children are entitled to full recognition of their right to educational opportunity commensurate with their capability for learning and their special talents." Programs in dealing with this "may be provided throughout all grade levels."

"School districts may make adaptations in elementary and secondary curriculum, instruction, and school organization for identified gifted and talented students. Adaptations shall be reported annually to the Texas Education agency."

"The instructional provision for gifted and talented students may provide for the granting of credit or advanced standing, or both, to pupils of recognized ability in secondary school subjects."

"Gifted and talented students are those students with extraordinary learning or leadership ability or outstanding talent in the creative or vocational arts whose development requires programs or services beyond the level of those ordinarily provided . . . ."

"The State Plan (for gifted and talented students) shall provide for the provision and coordination of programs for gifted and talented students on an annual basis."

Demonstration programs for the education of such students may be established in the state, the cost to be borne by the state and district.

A State Advisory Council will be established for the education of these students, with four members appointed by the governor and five members by the Commissioner of Education. Regional advisory councils may also be appoined.

§3531; 3532

"The Division of Education for the Gifted and Talented has the primary responsibility for the administration of education programs for gifted and talented students.

The State Plan for Gifted and Talented students shall include the following:

(1) the development of criteria for the identification of gifted and talented students;

(2) the development and intra-agency coordination of instructional programs and techniques designed to meet the individual needs of gifted and talented students in all educational fields;

(3) the development of training programs for professional personnel involved with the education of gifted and talented students;

(4) coordination of all state, federal, and local resources available for the education of the gifted and talented; and

(5) a statement of the objectives of the program, the methods to be used in obtaining the objectives, and the methods to be used in assessing the results.

A school district or a combination of school districts desiring to participate in a demonstration program for the education of the gifted and talented shall submit to the Commissioner of Education a detailed plan describing the gifted or talented students to be served, the objectives and methods of obtaining the objectives for the proposed program, and the method of assessing the results of the program. All proposed demonstration programs will be reviewed by the Advisory Council on the Education of the Gifted and Talented prior to submission by the Commissioner of Education to the State Board of Education for approval.

Members of the State Advisory Council will serve for terms of two years without compensation but are entitled to reimbursement for actual expenses incurred in carrying out the work of the council. Council members will select a chairman who will convene the council not less than four times a year. A staff member of the Division of Education of Gifted and Talented shall be designated to act as executive secretary of the council and will furnish all clerical assistance necessary for the council to carry out its responsibilities.

The council will assist in developing the State Plan for the Education of the Gifted and Talented. All proposed

rules and regulations relating to the program will be presented to the council for review and comment prior to State Board of Education approval."

§3571; 3572

"All public school-related efforts to assist exceptional children should be primarily directed toward meeting the educational needs of these children. To meet the needs of exceptional children in a responsive and prudent manner, it is necessary to develop intensive local planning processes, to move to the innovative use of educational and other resources, to maximize the demonstrated value of regional response to problems involving special education , and to disseminate widely the results of research and experimentation. Because the numbers of children with particular types of exceptionalities or combinations of exceptionalities and resources available to meet their needs do not occur uniformly throughout the state, allocation formulas will be flexible to assist in meeting these needs.

The implementation of legislative intent and the execution of the policies and administrative procedures in this series are the responsibilities of the school district. The Texas Education Agency assists school districts in establishing, operating, and further developing comprehensive programs for exceptional children.

Implicit in the development of a plan to provide comprehensive educational programs for exceptional children is the need for certain regional services in support of school district efforts. These multi-school needs may be met through the regional education service center system.

There is an awareness of the keen sense of responsibility felt by the parents of exceptional children. The parental understanding and acceptance of the educational needs of their children and responsible cooperation in efforts to meet these needs are recognized as indispensable requisites to the success of programs of special education.

Based on statutory authority and policies, provisions are made for special education programs for exceptional children according to categories of handicapping conditions. The instructional organization of all programs and services for exceptional children should be comprehensive and flexible to meet the educational needs of each exceptional child. Programmatic goals and resulting instructional elements provided through special education services furnish a basis for meeting the educational needs of exceptional children.

The Special Education Five-Year Planning Document describing services for exceptional children ages 3 through 21 years of age, inclusively, is required by the State Board of Education and is kept in duplicate on file at the school district. Review of the planning document may be requested at any time by the Texas Education Agency for monitoring or other purposes. The format of the document is in accordance with the guide as developed by the Texas Education Agency.

On or before July 15 of each school year, each school district is required to return the Annual Special Education Statistical Report. This report form is provided by the Texas Education Agency before the beginning of the school year. This form is designed primarily to evaluate the quantity of special education services. Various quality studies sampling certain school districts may be carried out during the year in addition to the Annual Special Education Statistical Report.

Programs operated cooperatively or jointly between two or more school districts must be described in the Special Education Five-Year Planning Document. The school district designated as the fiscal agent is responsible for all applications, reports, records, and accounting for the cooperative program.

The contracting arrangements between one school district and one or more other school districts for part or all programs and services for exceptional children must be described in the Special Education

Five-Year Planning Document.

In addition to meeting the provisions of the policies and administrative procedures for pupil transfer . . . the tuition of a special education pupil who transfers is the responsibility of the parent or guardian if the service is provided in the home district. If the service is not provided in the home district, the home district has the responsibility for tuition payment.

The general directives which are established by the Commissioner of Education and which are used in determining pupil eligiblity in special education programs for exceptional children are listed below.

ELIGIBILITY

(1) Pupil identification data shall include name, sex, and evidence of legal age for the program.

(2) For each pupil receiving special education services, there shall be a written educational plan and evidence of the pupil's need for service.

(3) There shall be written reports on vision and hearing screening tests prior to admission to special education programs.

(4) Assignment to special education programs for exceptional children shall be made upon the recommendation of an Admission, Review, and Dismissal Committee.

(5) School districts shall not assign national origin-minority group pupils (or linguistically different pupils) to special education classes on the basis of criteria which were developed solely upon the command of the English language.

(6) Pupils may not be placed in special education services if the only deficiencies identified are directly attributable to a different cultural life style, or not having had educational opportunities, or not having achieved from previous educational experiences.

(7) Admittance to and maintenance in any special education program shall be on a trial basis.

(8) An annual review of the appropriateness of each child's continued assignment to special education services as evidenced by progress or lack of it

shall be made by an Admission, Review, and Dismissal Committee.

(9) All special education assignments must be comprehensively reappraised at least every three years if assignments to special education services continue beyond three years.

The specific eligibility criteria which are established by the Commissioner of Education and which are used in determining pupil eligibility in special education programs for exceptional children are described in the following categories:

Physically Handicapped

Visually Handicapped

In working with parents or guardians of exceptional children each school district has a plan in operation which provides the following components:

(1) Notification to parents or guardians is made of screening or referral activities which include their children.

(2) Permission is secured before comprehensive assessment or consideration for placement in special education services and parent or guardian approval is secured for release of relevant information from various diagnostic sources to the school for educational purposes. CONSENT

(3) All school records, other information and data regarding their children are made available to parents or guardians. Parent or guardian approval for use of pupil information by other schools and agencies is secured before the information is released.

(4) Grievances relating to special education services are to be dealt with according to State Board of Education Policy and Administrative Procedure Series 7100, Hearings and appeals. GRIEVANCES

(5) Parents and guardians will be advised of this plan. Communications, both written and verbal, will be in the language best understood by the parents or guardians.

APPRAISAL

The appraisal process is an orderly and systematic continuum of services for pupils which provides for:

* referral
* screening
* data analysis and alternatives
* comprehensive assessment
* admission, review, and dismissal
* dissemination, and
* evaluation

The goal of appraisal is to provide a basis for making decisions designed to bring about desired changes in pupil achievement and/or adjustment.

(1) When a pupil is considered for initial or continued special education services, a determination is made to ascertain the pupil's primary home language, the pupil's most fluent language, the language in which the pupil has the best speaking ability, and the language in which the pupil has the best capacity for understanding.

(2) In cases in which the school examiner is not fluent or otherwise competent in the best language of the pupil, a person fluent in both the language of the child and English is used. Where an interpreter is used and standardized tests are required, extreme care is taken to maintain standardized test administration procedures.

TESTING

(3) The Department of Special Education and Special Schools is responsible for the preparation and dissemination of the list of approved tests. The list will be developed and approved through the regular planning procedures of the Texas Education Agency and submitted by the Commissioner of Education to the State Board of Education for consideration. Texas Education Agency leadership will be exerted in the development of tests in areas where inappropriate tests or no tests exist.

Referral is initiated when a pupil is perceived as having problems which may impede pupil achievement and/or adjustment. Referral may be made by the parent or guardian, physician, community agencies, other appro-

priate individuals, groups or organizations, school personnel, or as a result of the school's systematic screening procedures. Each referral is directed to the appropriately designated committee of the school.

Screening consists of generating and compiling all immediately available data. Each school is responsible for establishing procedures for collecting screening data to be submitted to the designated committee.

The committee analyzes and interprets data available on each pupil referred and determines the appropriate alternatives of:

(1) eligible or ineligible for further consideration of special education services.

(2) placement in diagnostic class.

(3) referral for comprehensive assessment, specifying, if possible, extent of assessment.

(4) referral for other types or kinds of service.

(5) referral directly to the Admission, Review, and Dismissal Committee, or

(6) other alternatives.

(b-d) Comprehensive Individual Assessment

ASSESSMENT

Comprehensive individual assessment is the observation, diagnosing, and identification of individual pupil achievement and/or adjustment characteristics. It provides all necessary information for developing an appropriate educational plan, determining eligibility for special education services, and planning appropriate instructional arrangements.

Data to determine intellectual functioning are not gathered from single-area reference test(s) such as vocabulary, strictly perceptual-motor tests. Such instruments may be used as a part of or in addition to a comprehensive battery to assess a wide range of intelligence factors, but they may not be used to determine total intellectual functioning.

Assessment instruments used to assess verbal, performance, and adaptive behaviors related to the measurement of intellectual functioning must be selected from a list

provided by the Commissioner of Education as approved by the State Board of Education.

It has been the operation guideline of the Texas Education Agency to require only group intelligence tests to establish normal intelligence, as required for eligibility for five of the six handicapping conditions. The sixth handicapping condition, mental retardation, specifically requires individual assessments of intellectual functioning as needed to meet eligibility criteria for specific handicapping conditions.

When it has been determined through comprehensive appraisal of language dominance that a student's dominant language is other than English, appraisal instruments should be administered in the other language. Where no clear language dominance is demonstrated, appraisal instruments should be administered in both English and the child's other language. When translating an instrument from English to another language, every effort must be made to maintain the original intent and purpose of each item. Interpretation of scores derived from translated instruments must take into consideration possible errors or inconsistencies in literal or conceptual translation. Ideally, the examiner for such appraisal shall be fluent in both English and the language of the student, and sensitive to the differences in culture of the student which may affect the appraisal. Where no bilingual examiner is available, an interpreter may be used, recognizing the additional problems inherent in interpreting data gathered in that manner.

Professional judgment must be exercised in selecting assessment techniques which are most appropriate for the individual child being assessed.

Comprehensive appraisal of educational functioning consists of securing data from formal and/or informal tests in the appropriate skill areas related to developmental, pre-academic, academic, pre-vocational, or vocational levels of performance. Consideration shall be given both to the language of instruction and to the pupil's demonstrated dominant language when selecting measures

of educational functioning.

Comprehensive appraisal of sociological variables consists of identifying the family and home environmental situation influencing the student's learning and/or behavioral patterns. Sociological data are obtained through voluntary communication and cooperation with the family.

Comprehensive appraisal of health factors consists of a medical assessment and diagnosis of the student's physical condition, intended to reveal factors which have influence on student achievement and/or adjustment. When a health problem is perceived or suspected by either the referring party, screening committee, appraisal personnel, or as required to meet eligibility criteria, an appropriate medical opinion will be obtained.

Each school is responsible for establishing a procedure for collecting the comprehensive individual appraisal data in a systematic manner to be submitted to the Admission, Review, and Dismissal Committee.

. . .

The educational plan is the translation of all information derived from the appraisal process into written instructional and behavioral recommendations for the teacher. These recommendations, based on the pupil's identified strengths and weaknesses, include: skills to be mastered, content areas to be emphasized, methods to be employed, materials to be utilized, and appropriate classroom management.

. . .

The Admission, Review, and Dismissal Committee is composed of at least three members, representing the areas of administration, instruction and appraisal and/or special education.

The committee considers available information for the purpose of determining the eligibility of all pupils for original assignment (admission), continued enrollment (review), and termination for special education services (dismissal). Specifically, the act of determining eligibility includes the assignment of

handicapping condition as defined in Policy 3571.2.2 and is based on appropriate data derived from the total appraisal process. All required screening and appraisal data are submitted to the committee as minimum information for their consideration.

The Admission, Review, and Dismissal Committee performs the following minimum responsibilities:

(1) reviews all available data

(2) determines if the pupil meets the eligibility criteria

(3) makes appropriate instructional placement designation

(4) initiates development of educational plan, or modifies existing educational plan

(5) reviews all special education assignments annually to determine continuation, change, reappraisal, or termination

(6) develops an individual written summary of the deliberations, findings, and recommendations, following each meeting of the Committee. Each summary includes the date, the names, the positions, and the signatures of the persons participating in each meeting. A report is made and included in each pupil's eligibility folder.

Dissemination is the provision of the written educational plan to the personnel responsible for implementation. This may be further supported by conferences between supportive professional personnel and instructional personnel.

EVALUATION

Evaluation is the on-going process of determining the effectiveness of the educational plan for each pupil in bringing about desired changes in pupil achievement and/or adjustment. A systematic follow-up is instigated with evaluation information of the effectiveness of the plan. This systematic follow-up may occur at any time but at intervals of no more than three months.

. . . . .

Teachers of exceptional children are employed and utilized in accordance with the provisions of the

Texas State Public Education Compensation Plan (Salary schedule, Policy 4105) and the procedures as adopted.

Because special education services are considered as an integral part of the total school instructional program, the duties of a special education teacher of exceptional children are defined as a regular teaching day of instruction. In addition to the teaching load, the teacher may be assigned to a share of the routine responsibilities of operating the school provided his [her] class is supervised at all times.

"If the school district has three or more special education teacher units where a special education supervisor is not employed or if the district has three or more self-contained special education teacher units on a separate campus without the services of a principal, the teacher-coordinator may be allocated and employed for an additional month.

A special education teacher-coordinator is a teacher who has full certification in one or more areas of special education and who in addition to his [her] special education teaching duties is assigned other administrative or supervisory responsibilities in special education in the local program.

Supportive professional personnel are employed in accordance with the provisions of the Texas State Public Education Compensation Plan and the administrative procedures as adopted.

A special education supervisor meets certification requirements as established and is assigned full time to special education program supervision.

A special education visiting teacher meets certification requirements as established and is assigned full time to special education programs.

A special education counselor meets certification requirements as established and is assigned full time to special education programs.

An educational diagnostician meets certification requirements as established and is assigned full time

to special education programs.

A school psychologist meets certification requirements as established and is assigned full time to special education programs.

An associate school psychologist meets certification requirements as established, is assigned full time to special education programs.

Special education teacher aides are employed in accordance with the provisions of the Texas State Public Education Compensation Plan . . . .

Teacher aides are employed to work the same number of days as instructional personnel and are assigned full time in the special education instructional program.

An aide trainee, a student who shows an aptitude for working with children, may be provided work experience and training which prepares him[her] to become a teacher aide. He[she] assists the teacher with routine tasks in a special education class.

Supportive professional personnel positions are normally authorized for the same number of months of work as are instructional personnel. These positions may also be authorized for an 11 or 12 months assignment, upon application from the school district, when a plan justifies the extended work period.

In addition to their duty assignment, special service personnel may be assigned a share of the routine responsibilities of operating the school provided this does not prevent the effective functioning of their major responsibilities to handicapped pupils.

Professional consultants are utilized as needed to provide comprehensive special education planning and programming.

The utilization and fees for consultants are in accordance with guidelines established by the Texas Education Agency.

Special education instructional personnel may be utilized in any of the ways described below in keeping

with program purposes, educational needs of pupils, the planned program of the school district, and teacher qualifications and certification.

A special education teacher in a self-contained classroom is a teacher who works with special education pupils on a full-day basis. The pupils receive all of their instruction from the special education teacher or other special education personnel.

A special education teacher in an integrated special education program is a teacher who works with special education pupils who may be integrated into a regular class for less than one-half of the school day. The special education pupil receives the majority of his[her] instruction from the special education teacher.

A special education teacher in a resource special education classroom is a teacher whose special education pupils may come from their regular classroom to the resource room as necessary for special instruction.

A helping special education teacher is one who is assigned to several classrooms and is scheduled to assist each teacher in providing individual and group instruction to handicapped pupils.

An itinerant special education teacher is one who provides instructional programs to handicapped pupils on more than one school campus. A minimum of one hour of instruction per week is required for each pupil.

HOMEBOUND INSTRUCTION

A homebound teacher is one who carries out the instructional program in the home of the handicapped pupil. A minimum of four hours of instruction per week is required for each pupil.

A hospital class is one in which instruction is provided in a hospital setting for children who cannot attend classes in the public schools because of illness or a crippling condition. A minimum of four hours of instruction per week is required for each pupil.

Children whose mental or physical condition prevents them from attending public school classes may be provided instruction in community facilities which

are appropriate to their needs.

A diagnostic class is one in which children are placed for a period of time not to exceed two months for a diagnosis of learning difficulties so an educational program can be developed and applied in other types of instructional settings.

A vocational adjustment class of the cooperative work-study program is a class on the secondary level for handicapped pupils who will spend a part or all of the school day off campus in an on-the-job training station or in supervised employment. The Vocational Adjustment Coordinator is the special education teacher assigned to this class. Cooperative work-study programs may be provided through cooperative agreements between the Department of Special Education of the Texas Education Agency, the Texas Rehabilitation Commission, and the school district.

Upon approval by the Department of Special Education, other special types of programming for instructional arrangements are provided for handicapped children whose needs cannot be met by any of the arrangements outlined above.

The Texas Plan for Special Education Instructional Material Services provides

(1) professional leadership in the evaluation, selection, and development of special education instructional materials, media, books, and other supplies; and

(2) inservice training for special education personnel in the better utilization of instructional materials, media, books, and other supplies.

Adopted textbooks used in the Texas public schools are available to exceptional children at the grade level in which they are achieving. Forms for obtaining textbooks are distributed by the Textbook Division of the Texas Education Agency. The directives for obtaining adopted textbooks are as follows:

(1) Pupils enrolled in special education

programs are to be included in the total enrollment figures which are the basis for textbook requisitions.

(2) Teachers of exceptional children are to be included in the count for each grade and subject level taught in order that teacher editions, manuals, and guides can be provided.

(3) School district officials are to retain out-of-adoption textbooks as may be needed to build a suitable library of materials for use by teachers and pupils.

(4) In subjects where pupils advance more than one grade level within a single year, additional textbooks are allowed to meet these needs if they cannot be met from the normal quota of 110 percent of the enrollment.

(5) If the annual requisition for textbooks for the past year did not include in the total enrollment the pupils of special education classes, a supplemental requisition for textbooks to meet the needs of pupils in these classes may be filed.

School districts certify and register through the Texas Education Agency all visually handicapped pupils . . . for the purpose of establishing eligibility to receive textbooks . . . .

Special seats are any type of special chair or seating equipment which will enhance the learning situation or enable a child to maximally participate in classroom activities.

A student is eligible for special seats if he[she]:

(1) is unable to utilize the classroom chairs or desks provided by the school district;

(2) is between the ages of 3 and 21;

(3) has an established need through educational planning;

(4) has medical evidence that special seats are required for the classroom; and

(5) is orthopedically handicapped or other health impaired."

Electronic communication services are services provided for the student confined to his[her] home, which enable him[her] to receive instruction along with his[her] classmates and to participate verbally in calss discussions. The services may be a type of telephone set-up or other electronic communication system.

Under Texas law each special pupil is entitled to transportation services; as are other pupils.

"A special education pupil's home school is considered to be the one to which he[she] is assigned for special education purposes.

Children eligible for special education and who can utilize regular transportation services are transported, if eligible, . . . on regular routes.

Pupils unable to utilize regular transportation are provided special transportation to assist them to receive educational services. The school district:

(1) establishes the pupil's eligibility for special education services;

(2) establishes the pupil's need for special transportation;

(3) provides the type and kind of special transportation needed; and

(4) makes application according to the procedures in Policy 3464."

The Commissioner of Education establishes procedures by which public schools may contract with non-public schools for instructional services for special education students.

"Approved non-public schools for exceptional children are categorized in two basic groups.

[1] Mental health and/or mental retardation facilities

include institutions, programs, or centers under the jurisdiction . . . of the Texas Department of Mental Health and Mental Retardation. . . .

[2] Private, nonprofit facilities include the private, non-profit organizations, institutions, or agencies providing services for exceptional children. These facilities must have a nonprofit corporation charter issued by the State of Texas.

Approved non-public schools for exceptional children must meet the standards as set forth in the Principles and standards for Accrediting Institutional and Special Schools. (The Principles and Standards for Accreditation, Policy 3712)

Mental health-mental retardation facilities must have been in operation at least one year.

Private, nonprofit facilities must have been in operation for at least two years and hold a nonprofit corporation charter issued by the State of Texas at least for the same period of time.

Before approval, all facilities will have received a site visit by a team of professional staff members from the Texas Education Agency.

Request for approval will be made by the applying non-public school to the Division of School Accreditation on or before September 1.

After the determination has been made that the institution is eligible to apply, a site visit will be made by the visitation team.

Following the site visit the applying institution will be notified of its approval or disapproval. Approvals will be for one year or three years.

Institutions not approved, may reapply for the next year if sufficient improvements have been made to warrant the application or they may appeal the recommendation on non-approval through established procedures of the Division of School Accreditation.

Approved schools will make an annual report to the Division of School Accreditation as prescribed by that division.

An approved school which does not contract for two successive years will be dropped from the approved list.

During the 180 days of contracted service any non-public school that charges tuition, mails out statements requesting payment, or charges parents any sums of money for educational services contracted, regardless of the terms used to describe services for which payment is charged, except for routine supply items, will be subject to immediate removal from the list of approved schools.

Non-public schools reporting the operation of programs beyond the required 180 days of instruction may determine an equitable means of assessing fees for programs without penalty.

Any accredited school district may contract for any eligible handicapped pupil under the following conditions:

(1) the child resides with his[her] parent or guardian on a day-by-day basis;

(2) the parent or guardian of an exceptional child, for whom the school district has contracted with be charged no additional tuition;

(3) the school district does not have an approved special education program in operation for the type handicap contracted or the program does not meet the needs of the individual pupil for whom the contract is made; and

(4) the school district has described contracting with non-public schools as an element in their Five-Year Comprehensive Planning Document for Special Education.

The school district is responsible for:

(1) maintaining the pupil eligibility file and the dissemination of that information to the non-public school;

(2) verification of days of attendance of the pupil contracted;

(3) negotiating the contract with the non-public school and maintaining fiscal records of receipts and expenditures:

(3-1) contracts are negotiated on an individual pupil basis and must be completed on or before the date determined by the Assistant Commissioner of Special Education and Special Schools as the date for verification of pupils for contracting with non-public schools

(3-2) contracts on pupils who move during the year and other pupils are found eligible for and need contract service, the new pupils may then be substituted; and

(4) state monies paid school districts for contract pupils may be used for no other purpose:

(4-1) the district will keep revenue and expenditure accounts for these monies; and

(4-2) if at the end of the school year the revenues exceed the expenditures, the excess will be returned to the Texas Education Agency.

(5) allocations for contract services are granted on the basis of individual pupils. School districts receive contract funds through regular Foundation School Program payments and must make payments to non-public schools on a regular basis.

Contract pupils may be eligible for special transportation allocations.

A portion of the contract cost may be paid from either state or federal funds.

The procedures by which regular vocational education programs are provided for exceptional children are listed below:

(1) Handicapped students may be considered as eligible to enroll in regular occupational programs if they have been screened and recommended by the Admission, Review, and Dismissal Committee which has determined that such students can profit from the instruction

and that their presence will not seriously hinder the instruction of other enrolled students.

(2) When considering a student for assignment, continuation in or dismissal from a regular occupational program the Admission, Review, and Dismissal Committee will be composed of at least six members, as designated by the guidelines for operation of both special education programs and occupational education and technology programs.

(3) A copy of the Committee's review shall be made a part of the handicapped student's anecdotal file. Such copy will indicate date of meeting, names and professional assignments of members, and decision reached.

(4) A 'trial' period of approximately two weeks shall be provided. Its purpose will be to allow withdrawal of a handicapped student from an assignment that proves unsatisfactory.

(5) Special Vocational Education Programs for Handicapped Pupils may be requested from the Department of Occupational Education and Technology. The purpose of such programs is to provide vocational education for the individual, who because of his[her] handicap, cannot succeed in the regular vocational education program without the provision of special services.

(6) Only those handicapped students eligible for approved special education programs are eligible for vocational education programs for the handicapped."

"Regional education service centers providing any special education services to school districts . . . funded from any state or federal source will develop and submit a plan for the services to the Department of Special Education for review and approval."

"Regional education service centers employing and utilizing personnel as described . . . will meet the certification requirements as specified . . . ."

§3572.1

"Accredited school districts applying for foundation School Program funds in special education shall develop a comprehensive plan which shows the orderly development and operation of the program . . . .

Two or more school districts may develop cooperative special education programs . . . . A special education pupil shall be eligible for transfer . . . on the same basis as another pupil . . . . Eligibility . . . shall be determined by applying general directives and specific criteria . . . .

Each school district shall adopt policies to implement a plan for counseling parents or guardians of pupils who are considered in any way for special education services. A pupil's appraisal process shall be established by each school district." Any pupil benefitting from this program "shall be tested or otherwise appraised in his[her] . . . primary home language . . . . Each school district shall establish at least one committee for the screening, placement, review, and dismissal of pupils considered for and receiving special education services.

Special education unit personnel may be employed and/or utilized on a full-time, part-time, or upon a consultative basis . . . ." The list of positions to be occupied by such teachers is included in this policy (3572.6).

"The Commissioner of Education shall establish regulations for the operation of a Texas Plan for Special Education Instructional Material Services. RULEMAKING

"Pupils enrolled in special education programs shall be entitled to the same percentages of adopted free textbooks . . . as are other pupils. Visually handicapped pupils shall be furnished special textbooks and other special materials . . .

"School districts may be partially reimbursed for . . . equipment classified and approved as special seats for special education pupils and for providing electronic communication services to eligible homebound pupils.

"Each school district operating an approved special education program shall be allotted a transportation allowance for transporting children in special education programs who are unable to attend the special education program in the public school . . . .

". . . (a) accredited school districts may contract with nonprofit community mental health and/or mental retardation centers . . . or any other nonprofit organization . . . . . for the provision of services to exceptional children. . . who reside with their parents or guardians.

"Exceptional children may be eligible for educational programs of occupational education and technology.

"Eligible exceptional children may receive services from the Texas Rehabilitation Commission. Eligible visually hanciapped children may receive services from the State Commission for the Blind.

"Regional education service centers . . . shall develop and submit a plan for (special education service). . . to the Department of Special Education.

"All accredited school districts operating approved special education programs for exceptional children . . . shall provide comprehansive special education programs and services for handicapped pupils between the ages of 3 and 21 years . . . ." A formula for such programs "shall be based on the school district's total average daily attendance for pupils between the ages of 6 and 21 years for the preceding school year."

It will be the Commissioner's duty to make necessary adjustments to available funds for such programs, to establish regulations and procedures., and determine the number of districts approved for such programs.

". . . [A]ny accredited school district may make application for allocations for special education programs based on identified handicapped pupils between the ages of 3 and 21 . . . by disability categories."

Included in this policy (3563.2) is the provision for the establishment of regulations and procedures for

approval of school districts to special programs as well as the formula for allocating instructional units and adjusting funds for such programs. Records of pupils in such programs must be kept.

"A special education program shall be provided . . . for preschool children, including the ages of three through five years, who have a hearing loss sufficiently severe to prevent adequate progress in speech development" in order "to prepare children for entry in the first grade of the Texas School for the Deaf or the Texas public schools . . . .

"Children whose sense of hearing is nonfunctional . . . for understanding normal conversation . . . shall be eligible for this program" to be taught by certified teachers and funded by the state and participating districts.

SCHOOLS FOR DEAF

"The Texas Education Agency is authorized to establish on a countywide basis special day schools for the deaf in all countries having a population of 300,000 or more . . . according to the last preceding federal census. The . . . agency is authorized to establish on a bi-county-wide basis special day schools for the deaf in any two contiguous counties whose cumulative population exceeds 140,000 but does not exceed 335,000. . . ." School districts contiguous to these bi-county-wide schools may participate in them with agency approval, and may operate on the same basis a bi-county-wide schools upon approval and will be administered by a centrally located school district which will provide necessary facilities, etc.

"All deaf children between the scholastic ages of 6 and 21 inclusive, residing in the county, providing a day school program therein authorized for such scholastics, shall be eligible to attend the school designated by the operating district." Such children between the age of 6 and 13 shall not be eligible for admission to the Texas School for the Deaf "except upon recommendation of the superintendent of the operating district of the Texas School for the Deaf."

ELIGIBILITY

Also included in this policy (3564.2) are eligibility requirements, funding and allocation cost formulas, and

a provision for program approval by the Texas Education Agency.

"The . . . agency may establish procedures for contracting with private schools for the deaf to provide education and training for deaf children . . .," this policy (3574.3) includes funding and eligibility for such schools.

"The Commissioner shall provide for the education, maintenance, and care for deaf and blind, totally blind and non-speaking, and other multiple handicapped persons who can not be provided adequate educational services by other provisions of the education code.

"The parent or guardian of eligible pupils may make application through the resident's school district.

"Contracts may be negotiated with . . . approved public or private institutions inside the State . . . or outside . . . if recognized by or accredited by a state, regional, or national accrediting association. All institutions must be equipped to provide the specialized facilities and personnel necessary to care for and educate these persons. Transportation . . . may be provided. . . ."

Policy 3574.5 provides for special education services for pregnant girls in licensed maternity homes to "provide a continuation of educational programs" for such girls, who are not over 21 years of age and have not completed high school.

"A teacher assigned to the program . . . is required to hold a valid Texas secondary teacher certificate." This program to be funded as part of the Foundation School Program.

DIAGNOSTIC FACILITIES

The establishment of regional experimental diagnostic facilities for language handicapped children is to promote "the development of a planned program for diagnostic, treatment, and staff development applicable to all public schools programming for children who are language handicapped." Such a program might also aid afflicted children by entering them as part of a "network of statewide language and/or learning disabilities public school programs." Each of these facilities "shall operate three

basic components to accomplish the purposes: pupil appraisal, pupil treatment, and staff development," and shall be administered by a regional education service center. Each of these centers desiring to apply for the establishment of a regional diagnostic facility "shall prepare a project application in accordance with prepared guidelines." Procedure and implementation are to be developed by the Commissioner. The Commissioner shall also "select the facilities to be funded under these policies . . . ." A contract for independent evaluation shall be negotiated for by the Commissioner.

EVALUATION

PROGRAM FOR THE DEAF

A regional day school program for the deaf was established in order "to continue a process of providing education for the deaf on a statewide basis . . . and to afford all deaf scholastics an opportunity for educational achievement equal to their peers with normal hearing," and as such is to function in accordance with procedures established by the Commissioner; its cost is to be borne by the state.

"The Texas Education Agency shall allocate to Rehabilitation Districts for Handicapped Persons, exceptional children teacher units and other special education resources . . . . The costs . . . to be borne entirely by the state . . . . subject to the same policies . . . as any other school district operating a special education program."

"The . . . Agency shall allocate to the Department of Corrections, exceptional children teacher units and other special education resources as authorized for the education of eligible handicapped, incarcerated persons who are not high school graduates," with costs to be borne entirely by the state and subject to the policies of all special education programs.

"When the parents in any school district, of the required number of any type of exceptional children, or types which may be taught together, petition the governing board of that district for a special class, it shall be the duty of the board to request the Commissioner . . . to cooperate in the establishment of the class or classes."

". . . [a] school district . . . has the responsibility to educate, free of tuition, children within the district residenced and enrolled in a private school for exceptional children where it is determined that enhancement of the children's progress will result from public school attendance.

CONTRACTS

"The Texas Department of Mental Health and Mental Retardation may negotiate and enter into contracts with public schools in counties where special schools are located to accept and educate pupils of the special schools in the public schools (and). . . is authorized to pay tuition to the public schools out of any available appropriate funds.

TUITION

"Children admitted to the special schools may be placed in public schools by the superintendent, and the special school may pay a reasonable tuition for the children. School districts may provide additional services for emotionally disturbed children . . . .

"School districts shall report pupils who are blind, deaf, mute, and mentally retarded between the ages of 7 and 17, inclusive, who are not provided adequate educational services. Reporting shall be made according to the following described manner:

a) "Each school district superintendent shall refer to the superintendent of the Texas school for the blind. . . or for the Deaf any child who is blind or deaf who does not have adequate or appropriate educational facilities available in the area in which he[she] resides.

REFERRALS

b) "A notification of referrals . . . shall also be made to the Texas Education Agency by each school district superintendent . . .[it] shall include statements setting forth the basis for the determination that the child could not be served adequately or appropriately in the area in which the child resides. Each . . . superintendent shall report annually to the . . . agency the number of children and type of disability of children who are blind, deaf, mute, or mentally retarded for whom the school district has failed to provide adequate services."

"On or before October 30 of each year preceding a regular session of the Legislature, the Texas Education Agency shall furnish the Governor and the budget office of the Legislature with statistics relating to:

1) the number of children referred to or applying for admission to the Texas School for the Blind and the Texas School for the Deaf;

2) the number of blind or deaf children actually being served by these schools; and

3) the number of blind or deaf children who might be eligible for admission to these schools but whose admission has been delayed because of inadequate facilities at these schools."

"Advisory groups for special education . . . may be established . . . as necessary for the best interest of exceptional children in the development of special education programs." These groups are to be created by the Legislature and assisted by the Texas Education Agency.

§3573

EDUCATIONAL NEEDS

The educational needs of each exceptional pupil must be the dominant factor in determining the array of educational services and "the appropriateness of the instructional arrangements. Programmatic goals and resulting instructional elements provided furnish a basis for meeting the educational needs of exceptional children at the early childhood, elementary, and secondary levels."

The basic personnel allocations for programs for pupils, ages 3 through 21, are for each 3,000 pupils in ADA and multiples thereof, an entitlement of:

23 professional instructional units
10 teacher aide units
4 supportive professional units

For each additional 1,000 pupils in ADA, there may be an additional entitlement to serve pupils, ages 3 through 21, of:

7 professional instructional units
3 teacher aide units
1 professional supportive unit

A school district operating Comprehensive Special Education Programs for Exceptional Children is responsible for providing educational services to all exceptional children in the district, ages 3 through 21. The district will provide evidence that a minimum of 15 percent of the exceptional children served are in the 3, 4, and 5 year age range and/or that a minimum of 15 percent of the resources allocated in special education is utilized in this facet of the program.

Pupil accounting records are maintained for exceptional pupils receiving special education services, ages 3 through 21 years of age, inclusively.

School districts having less than 3,000 pupils in ADA where it is not geographically feasible for joint or cooperative programs with other districts may upon the approval of the Commissioner of Education submit applications for comprehensive special education programs when such applications have been coordinated through the regional education service centers. The school designated as the fiscal agent is responsible for all applications, reports, records, and accounting for the cooperative program.

School districts having within their geographical boundaries facilities serving exceptional children on a statewide basis for whom they . . . wish to provide special education services, may apply for instructional and supportive units on the formula based on 'Services to Identified Handicapped Pupils.'

Through administrative arrangements, each special education teacher has available to him/her the services of a special education supervisor, special education counselor or visiting teacher, and an educational diagnostician."

The allocation for special materials is to be used "to improve the quality of instruction in special education programs. The allocation may be utilized for special books, instructional media, and other supplies including consumable materials, appropriate for instruction for and with eligible handicapped pupils."

The allocation which is made to the regional education service center is to be used for the support of the 'Texas Plan for Special Education Instructional Material Serivces'. The regional education service centers shall use this allotment for the support of the materials center. The monies may be used for the acquisition of materials, personnel, and other necessary expenses for the development of the system.

The school district may utilize funds allocated for consultative services in the following manner:

(1) effective program evaluation and planning of its comprehensive special education efforts;

(2) strengthening component parts of special education on a consultative basis; or

(3) special consultants as may be needed in working with individual handicapped pupils.

The allocation which is made to the regional education service center is to be used to support regional and local planning and evaluation activities necessary for the development and operation of a statewide program for comprehensive special education for exceptional children.

Final approvals will be made after the school district files the verification report which gives the extent of special education programs and services as of the date established by the Commissioner of Education.

School districts operating under Plan A approval have until February 1 to activate approved personnel units which are authorized by preliminary approvals.

The purpose of a special education program based upon pupils identified according to disability categories is to provide a variety of services to meet the needs of exceptional children through the established categories of handicapped conditions at the early childhood, elementary, and secondary levels.

The purpose of comprehensive special education programs for visually handicapped children is to provide for the basic educational needs of each visually handi-

capped child. Special provisions necessary to meet these needs are as follows:

(1) program organization;

(2) books and materials in appropriate learning medium or media;

(3) supplemental instruction;

(4) orientation, mobility, and independent travel;

(5) maximal development of any visual ability for optimal visual efficiency at all distances;

(6) special aids and equipment; and

(7) development of social and personal management skills and good study habits.

The purpose of comprehensive special education programs for auditorially handicapped children is to provide services and programmatic considerations of speech reading, communication, and conservation of residual hearing so that these children may develop skills necessary to attain academic achievement.

The purpose of comprehensive special education programs for minimally brain-injured children is to provide an instructional program in an educational setting that will meet the needs of the minimally brain-injured child by providing assistance so that whenever possible these children may be prepared to return to the regular school program."

"The purpose of comprehensive special education programs for orthopedically handicapped and other health impaired children is to provide educational opportunities as the physical condition of the child permits . . . .

The purpose of . . . (such) programs for educable mentally retarded children is to enable each child to develop social and vocational proficiencies and functional academic skills that will enhance satisfactory integration into community life."

For trainable mentally retarded children such programs "assist each child in the development of self-care skills, social adjustment, and some measure of occupational usefulness."

The purpose of programs for emotionally disturbed children "is to provide an instructional program that will meet the needs of individual children who are emotionally disturbed by assisting them to adjust and function intellectually, emotionally, and socially at their expected level."

For language and/or learning disabled children the program "is to provide programmatic modifications for children who have identifiable deficits in the processes related to organizing and integrating the information necessary for academic success."

For speech handicapped children the program "is to provide appraisal of each child's speech, oral language, or mild hearing disorder and to develop a program of correction to meet the child's individual needs." And for the multi-handicapped children the purpose of the program "is to develop an instructional program based upon a cognizance of the interaction of the child's handicapping conditions which allow him[her] to develop to his[her] maximum potential."

There also exists a need for a comprehensive special education program for other exceptional children such as pregnant students, who may benefit by being provided with "opportunities for continuing the educational process . . . ," and for deaf-blind children who may be provided with the basic educational needs of each child. In this program special areas of consideration range from communication skills through vocational training and functional academic skills.

Code	Min. No. Children 1/6 Unit	Min. No. Children 1/3 Unit	Min. No. Children 1/2 Unit	Min. No. Children 1 Unit	Min. No. Children 2 Units	No. Children For Each Unit Above Two

§3574

This series (3574) deals with the special programs of special education and includes a preschool program for children with hearing loss and the authorization, eligibility, funding, etc. that goes with such a program.

"School districts establishing this program are allocated teacher units on the basis of the following formula:

Number of Pupils	Number of Units
4	1/2
6	1
12	2

and one additional unit for each additional eight pupils.

The Commissioner of Education designates the school district in eligible counties to operate day schools for the deaf.

SCHOOLS FOR DEAF

A contract between the Commissioner of Education and the authorized school district stipulates the following.

CONTRACT

(1) The Texas Education Agency provides financial support to the county-wide day schools for the deaf in accordance with provisions of the statutes authorizing the program.

(2) The designated school district provides the administration, educational program, pupil transportation services, and necessary facilities to maintain and operate the county-wide day schools. The program is located on one school campus unless otherwise approved by the Commissioner of Education.

No school district within a county which is a county-wide or bi-county-wide day school for the deaf is eligible under the regular program of special education to apply for teacher units or contract allocations with approved non-public schools for deaf pupils in the age range served by the county-wide program."

ELIGIBILITY

Pupils eligible for such a program are those that qualify as auditorially handicapped and whose hearing is nonfunctional "which results in a delay in language and/or speech development or otherwise creates an educational handicap."

EVALUATION

"Admission to the program is made after evaluations have been completed on the

(1) physical status;

(2) otological examination;

(3) educational background and intellectual assessment; and

(4) medical and family history

In the case of a multi-handicapped child, deafness must be the major handicap.

A local Admission, Review, and Dismissal Committee is established. This committee has the responsibility for admission of pupils to the program, for annually reviewing the progress of each pupil, and for dismissal of pupils from the program.

School districts establishing this program are allocated teacher units on the basis of the following formula:

	County-Wide	Bi-County-Wide
Teachers	One for each eight pupils or major fraction.	One for each seven pupils or major fraction
Principals	One for each 15 or more teachers.	One for each such school.

Supervisors	One for each 10 teachers not to exceed three, however, a minimum of one for each approved school.	One for each 10 teachers, not to exceed three, however, a minimum of one for each approved school.
Visiting Teachers	One	One

The county-wide or bi-county day school is operated for the same school calendar year as that of the operating school district.

It is the purpose of the program for county-wide day schools for the deaf to provide services and programmatic considerations of speech reading, communication, and conversation of residual hearing so that these children may develop skills necessary to attain academic achievement. At the secondary level . . . the program provides academic training, vocational planning, guidance, and training.

Requirements governing certification of teachers of the deaf apply to teachers employed in the county-wide day schools. Supervisors are to hold appropriate certificates and be qualified for their positions by training in the area of teaching the deaf and a minimum of three years of experience in that area. Principals are to hold administrator certificates. Visiting teachers are to hold certificates for visiting teachers.

Program coordination between the county-wide and bi-county day schools and residential schools for the deaf is attained through a committee composed of representatives from

(1) each of the county-wide and bi-county day schools;

(2) Texas School for the Deaf;

(3) Department of Special Education; and

(4) Texas Rehabilitation Commission."

"Accredited school districts may enter into contract with approved private schools for the deaf for the education and training of certain eligible deaf pupils.

CONTRACT

"School districts may make applications . . . for this program if no other state supported program is provided or available to the pupil and the parent requests the contract services.

"The school district must maintain a pupil eligibility file and other records for each pupil contracted.

SCHOOLS FOR DEAF

"Private schools for the deaf are defined as only those nonprofit, nonsectarian schools devoted to the education of deaf children.

Schools may make application for approval to the Texas Education Agency after they have successfully operated for two or more years.

They are approved after it has been determined that they meet the Principles and Standards for Accrediting Institutional and Special Schools . . . .

TUITION

The parent or guardian of an exceptional child, for whom the school district has contracted, will be charged no additional tuition.

"Deaf and blind, totally blind and non-speaking, and other multiply handicapped persons eligible for consideration are students under the age of 21 . . . .

"Applications may be made by the parent or guardian of an eligible student through the superintendent of the resident's school district on forms provided by the Texas Education Agency.

Applications are considered in the order in which they are received, after all other educational program and service alternatives provided by the school district and the State of Texas have been determined inappropriate for the student's education.

"The application information, supplemental material, and testimony regarding a student will be made available to the Texas Education Agency as needed in the determination of student eligibility and placement in this program.

The Commissioner of Education establishes a State Admission, Review, and Dismissal Committee.

This committee has the responsibility for receiving and processing the applications and recommending to the Commissioner of Education the names of students eligible for this service.

Students receiving services from this program will be reviewed annually to determine continued need for the service.

Students receiving services from this program will be reviewed annually to determine continued need for the service.

Students receiving services from this program in out-of-state institutions during the 1974-75 school year will be considered annually, without reapplication, as long as the committee determines this is the appropriate placement for the student."

"The parent or guardian of an approved student may submit necessary receipts for travel expenses in getting students to and from the designated institution for reimbursement purposes. This is limited to two round trips per year.

When approved, the cost of travel expenses for an attendant may be reimbursed.

The travel expense reimbursement will be determined within the established rates for the Texas Education Agency."

"School districts providing special education services for pregnant girls who are residents of or under the supervision of licensed maternity homes will have the following information available on each eligible girl:

(1) date of birth;

(2) report of school placement and academic achievement;

(3) a physician's written report which includes a general medical diagnosis of pregnancy;

(4) a statement of request or acceptance of services from the maternity home; and

(5) a signed recommendation of the local Admission, Review, and Dismissal Committee."

Applications for units for such a program may be made "at any time during the school year when the need is established."

"School districts establishing this program are allocated teacher units on the basis of the following formula:

(1) Units

4 pupils - 1/2 unit

8 pupils - 1 unit

14 pupils - 2 units

14 pupils for each additional unit

(2) Days of Instruction

10 months units - 180 days

11 months units - 200 days

12 months units - 220 days

(3) Length of Teaching Day

Minimum of three hours per day per pupil or 15 hours per week."

This series also provides for the establishment of regional experimental diagnostic facilities for language handicapped children.

"The primary goal of the centers for language handicapped children is the development of a planned program for diagnosis, treatment, and staff development applicable to all public school programming for children who are language handicapped.

At the close of this demonstration program, the secondary goal is to have specific information in "packaged" form about skills, techniques, guidelines and/or manuals, and policies whereby a program for children who have language disabilities can become a part of the network of statewide language disabilities public school programs.

"Each program for the diagnosis and treatment of language handicapped pupils operates three basic components.

(a) Appraisal

At the conclusion of three years of operation,

the center provides the Texas Education Agency with a screening instrument and a manual describing its administration in any local education agency.

The appraisal component of a center will also provide the Texas Education Agency with a description of an indepth appraisal process and a manual which will detail the areas of administration, test reliability, validity, and implications for diagnosis.

This component involves personnel trained in the administration and tabulation of group screening instruments in order to more efficiently identify the language handicapped child in his[her] public school environment.

This component completes indepth appraisal of the language handicapped child identified from the screening process in order to determine the factors interfering with his[her] language function.

"Specific information is obtained from the following areas:

(1) Educational -- what educational information has direct bearing on the child's lack of academic success?

(2) Sociological -- what environmental factors have contributed to the child's language problem?

(3) Psychological -- which tests administered are more sensitive to identifying the problems in the child's mechanism for using adequate spoken or written language?

(4) Medical -- what medical information is necessary to identify the language handicapped child? (This component should gain information from pediatrics, neurology, psychiagry, and pathology.)

This information gained from indepth appraisal is translated by the staff into individual prescriptions applicable to instruction for each child.

The appraisal component provides for continuing evaluation of its procedures in order to determine what information needs to be secured on each child and how this information can be made relevant in any public school environment.

At the conclusion of the three-year project for language handicapped children, the contracting agent is to have developed an instructional program with curriculum design, methodology, techniques, and materials. This information is made available in concise, practical form for replication on the public school campus. The project also addresses itself to the development of designs for new staffing patterns and instructional arrangements applicable to public school settings.

This component develops curriculum designs based on the individual prescriptions for the language handicapped child.

Materials are evaluated to determine their applicability and appropriateness for the language handicapped child. This component develops and evaluates new staffing patterns which are more effective and can be replicated in public school environments.

Instructional arrangements and scheduling are also examined.

The component develops methods for integrating and coordinating the instruction of the language handicapped in the total academic process of the public school system.

"There is continuous evaluation of the treatment component so that the manuals developed are efficient and applicable for public school programming.

(c) Personnel Training

At the end of the three-year operating period the contracting agency is to have prepared guidelines for preservice and inservice staff training outlining procedures and content of such training which can be replicated in the public schools. This component will also submit at the close of the project, a curriculum for teacher certification based on course listings and content of such courses.

IN SERVICE TRAINING

This component develops procedures for preservice and inservice training for all project staff in the areas of

(1) appraisal (including screening); and

(2) treatment (instructional program).

An institution of higher education develops a program for staff training from which academic credit can be obtained.

This institution is also responsible for the development of a planned academic program which leads to possible certification standards for the areas of personnel involved. The institution is also responsible for its awareness of the evolving certification standards of the Texas Education Agency."

This series (3574) also allows for the creation of a demonstration center for language handicapped children that is to have a legally constituted board with contractual authority, and an administrator with a director whose approval is subject to the approval of the Commissioner of Education. There are also to be three component directors for the areas of appraisal, treatment, and personnel training and an advisory committee to the administrator. There shall be a minimum of 10 instructional personnel and 7 aides; with maximums 20 and 14 respectively.

There is to be at least one and not more than three regional, experimental, diagnostic and treatment facilities. . . . Applications are accepted from regional education service centers with a minimum of two directly participating public school systems of no less than 3,000 students in average daily attendance.

The selection of facilities for the program is to be made by the State Board of Education, upon recommendation of the Commissioner of Education, with the advice of the Advisory Council for Language Handicapped Children.

EVALUATION

"At the close of the three-year study the participating third party evaluation system provides the Texas Education Agency with a document outlining specific procedures for evaluating special education programs.

The purpose of the third party evaluation is:

(1) to systematically collect, tabulate, and analyze data from the centers;

(2) to report progress of the centers to the Texas Education Agency for payment purposes;

(3) to assist in the overall evaluation of language center projects; and

(4) to serve in an advisory capacity in annual replanning, modification, and other aspects of language center operation.

"The third party evaluation may be by any public or private organization having professional capabilities in:

(1) planning research designs;

(2) evaluating special education techniques in appraisal, instructional design, and staff training; and

(3) analyzing data related to academic achievement of pupil performance and cost analysis."

Reimbursement, made on a performance contract basis, will be given to the group carrying out the evaluation in an amount not to exceed 10% of the total operating cost of all language centers involved in the study.

There is also to be a Technical Advisory Committee that is to advise on the operation of the total project and shall be composed of representatives from:

(1) Texas Education Agency staff;

(2) Three Language Centers;

(3) Third Party Evaluation; and

(4) The Advisory Council for Language Handicapped Children.

"The Technical Advisory Committee advises on the operation of the total project. The approval of this committee is obtained before any modifications or changes are made in the components of the projects."

PROGRAM FOR THE DEAF

The Regional Day School Program for the Deaf is established and provided in accordance with a statewide design as approved by the Commissioner of Education and in accordance with administrative procedures. Development

and implementation of the program are assigned to the appropriate Agency department, Office of Education for the Deaf.

To provide the Regional Day School Program for the Deaf the state is apportioned into not more than 8 nor less than 5 regions as established and revised by the Commissioner of Education. A superintendent for each region responsible to the director of education for the deaf is employed.

(1) Services to deaf children will include:

[a] early identification

[b] diagnosis

[c] continuing evaluation

[d] counseling

[e] teaching

[f] other services as necessary"

The implementation of a comprehensive statewide design includes:

1) "assisting and counseling parents"

2) "enabling as many as may be practicable of deaf scholastics to reside with their parents or guardians and be afforded education in their home school districts or in regional facilities

3) enabling deaf scholastics who are unable to attend school near their place of residence to be accommodated in foster homes or other residential school facilities

4) enrolling in the Texas School for the Deaf in Austin only those scholastics whose needs can best be met in that school, designating the Texas School for the Deaf as the principal regional school for the central region of the state and superintendent of the Texas School for the Deaf as the superintendent of the central region

5) encouraging scholastics who have demonstrated ability to do so to return to regular school classes on a part-time, full-time, or trial basis. (Supplemental aid is made available to such students.)

6) encouraging methods of communication which will best meet the needs of each deaf child. (Each child is examined thoroughly so as to ascertain his[her] potential for communication. Separate programs may be established to accommodate diverse communication methodologies.)

"Providing education for all students within a school district is the responsibility of that district. . . . the principal cost of educating deaf persons is borne by the state . . .(however) local resources should be utilized to the fullest extent in the establishment and operation of local programs for the deaf.

"Services funded by approved application through the Regional Day School Program for the Deaf are operated and administered by school districts.

When an application is filed by a countywide or bi-countywide day school for the deaf and is approved for funds under the Regional Day School Program, all services and properties of the previous plan continue as a part of the new approved program. When such an application is approved, the prior approvals for that countywide or bi-countywide day school are terminated and considered null and void. Employees of the former organization are employed in essentially similar capacities within the new program pursuant to the school district's final authority for organizing, staffing, and equipping the approved program.

Services funded under other statutes may continue to be so provided under existing policies and administrative procedures; however, such services are encouraged to become part of the Regional Day School Program for the Deaf.

Operating costs for the Program are determined and paid on the basis of procedures such as:

(1) Districts make application for funding under the Regional Day School Program by use of a form provided by the agency.

(2) An operating expense allocation not to exceed that amount specified by statute for each student enrolled in any current year.

(3) Teachers, principals, supervisors, counselors, paraprofessionals and supportive personnel shall be employed in such numbers as necessary to establish and operate the Regional Day School Program for the Deaf. This shall not be less than student-professional ratios known to be requisite for success in education of deaf persons. Salaries of personnel in the Regional Day School Program for the Deaf shall be established according to the school district's authorized salary schedule where the personnel are employed and as approved for funding under the . . . Program . . . .

CONTRACTS

4) Contracts may be authorized with any qualified public or private organization or qualified individuals for diagnostic evaluation and instructional services or any other services incidental to the education of deaf persons, including transportation and/or maintenance.

5) Educational and other personnel shall be employed; real or personal property may be purchased or leased; gifts or grants of real or personal property or services from any source, public or private, including independent school districts and any institution of higher learning in the state, may be accepted for the purpose of establishing and operating eduction programs for the deaf."

§3577

Series 3577 concerns itself with special provisions relating to special education and includes:

1) parent petitions for special education services;

2) the allowance of pupils in private schools for exceptional children to attend public schools;

3) public school contracts for the education or pupils in special schools;

4) additional services for emotionally disturbed children; and

5) special provisions for school districts operating special education programs in certain locations.

§3578

Series 3578 concerns itself with special reports relating to certain exceptional children and includes the Agency notification of school district superintendents of the availability of services in the Texas School for the Blind and for the Deaf for needy pupils.

The series includes referrals by these superintendents of "any child who is blind or deaf who does not have adequate . . . educational facilities available in the area in which the child resides." These referrals are made to the Texas School for the Blind and for the Deaf. A copy of these referrals is made to the Department of Special Education by each school district superintendent, also included are statements setting forth the basis for the determination that the child is not adequately provided for.

The annual Special Education Statistical Report reflects the number of students that are in this category.

"At the time the Texas Education Agency submits the biennial budget to the Governor and the Legislative budget offices, a report of the number of children referred to or applying for admission to the Texas School for the Blind and the Texas School for the Deaf will be made. Also included in the report is the actual number of pupils served and the number of eligible pupils not admitted because of lack of facilities."

§3579

Series 3579 includes advisory groups for special education as authorized by the legislature and the State Board of Education. A group of this character is the Advisory Council for Language Handicapped Children. This council has its staff, offices, and facilities provided for by the Texas Education Agency. The council in turn reports to the Commissioner of Education any information and advice it feels is appropriate.

§4103.4.6

"County-wide or multi-county day schools for the deaf shall be operated and supported from the Foundation School Program Fund . . . ."

§8101

SCHOOL FOR BLIND
SCHOOL FOR DEAF

"The Texas School for the Blind (as well as that for the Deaf). . . shall be under the control of the Texas Education Agency . . . shall function as an independent school district . . . and as a facility for the education of students with visual, (hearing), impairment . . .(and) shall not become custodial in nature."

"The . . . Agency has exclusive jurisdiction (over these schools). . ." and it may be extended, but not limited, to the physical assets of the schools and appropriations made for their benefit.

"The State Board of Education is the governing board and serves as the board of trustees for each school . . . ."

"The Commissioner . . . shall have general administrative responsibility for the schools and shall appoint the superintendents and director for business management . . . .

"The associate commissioner for special education and special schools is responsible to the Commissioner . . . for the general direction of the schools."

Services common to both schools "shall be centralized under a director for business services. The "director shall be responsible for the support of the program administered by the superintendents.

The primary responsibility of the superintendents of the two schools is that they serve as the administrative and educational head of the school and as an advisor to the associate commissioner. They shall also establish operating procedures for the schools, respectively, and in doing this involve faculty, staff, parents, and students, such procedures to be approved by the Commissioner."

Series 8102 states that the assistant commissioner for special education and special schools shall approve "all organizational structures, personnel patterns and the establishment of lines of authority for the schools, prior to implementation." The series also provides for the director for business services to administer the business office operations, plans, and to supervise the following support activities:

" (a) Administration

(1) Budget control

(2) Finance and accounting

(3) Payrolls

(4) Personnel records

(5) Cashier services

(6) Student accounts

(7) Stock records

(8) Auditing

(9) Insurance

(b) Purchasing and Warehousing

(1) Supply demand

(2) Purchasing

(3) Receiving

(4) Warehousing

(5) Issuing

(6) Inventories

(c) Maintenance

(1) Construction

(2) Repairs

(3) Technical assistance

(4) Maintenance contracts

(5) Laundry

(6) Transportation

(d) Food Service

(1) Menu planning

(2) Food requirements

(3) Quality and quantity control

(4) Cook supervision"

This series also states that the superintendents for the Texas Schools for the Blind and for the Deaf shall "plan, coordinate, supervise, and implement the following operating procedures for components of the school:

(2) personnel recruitment and assignment;

(2-1) personnel selection;

(2-2) personnel assignment;

(2-3) staff development

(2-4) personnel dismissal;

(3) student life programs and activities;

(4) admission and dismissal of students;

(5) governance of students, faculty, and staff;

(6) medical services;

(7) budget requirements and approval of expenditures; and

(8) planning for plant, program, and personnel requirements.

Current operating procedures are maintained for each school and distributed to faculty, staff, parents, and students."

§8103

"The educational program of the schools for the blind and deaf is described in each school's operating procedures manual. Each superintendent through and with the assistance of the staff and the faculty develops and maintains a five-year educational plan which shall provide for continuous updating to meet changing needs. This plan is reviewed periodically by the assistant commissioner of special education and special schools who reports his[her] findings and recommendations to the Commissioner of Education and to the State Board of Education.

The schools are accredited by the application of the Principles and Standards for the Accrediting of Institutional and Special Schools . . . . The schools may seek national and regional accreditation.

Proposals for special projects and programs are submitted in writing by the appropriate superintendents to the assistant commissioner for special education and special schools for approval. Proposals favorably considered are forwarded to the Commissioner of Education for his[her] approval, and if appropriate, to the State Board of Education for confirmation. All proposals must be compatible with the five year educational plan.

The extra curricular activities program for each school is the responsibility of each superintendent working through and with the assistance of students, staff, and faculty and is described in the school's operating procedures manual.

The student life program of the schools is the responsibility of each superintendent working through and with the assistance of students, staff, and faculty, and is described in the school's operating procedures manual.

Admission of students to the schools is the responsibility of each superintendent assisted by a student personnel committee composed of staff and faculty representatives and is described in the school's operating procedures manual.

A plan for governance of students is the responsibility of each superintendent working through and with the assistance of students, staff, and faculty and is described in the school's operating procedures manual.

SUSPENSION
DISMISSAL

Suspension and dismissal of students from the school is the responsibility of each superintendent, who acts with advice from a student personnel committee composed of staff and faculty representatives. Procedures for suspension and dismissal, including appeals, are described in the school's operating procedures manual.

APPEALS

GRIEVANCE

Each superintendent establishes appropriate procedures and committees to ensure fair and full consideration of any grievance from students, parents, staff, or faculty. Procedures for grievances are described in the school's operating procedures manual."

This series also considers special transportation provisions for day school pupils at the Texas School for the Deaf and for the Blind.

"When a pupil is admitted to the Texas School for the Deaf under the Regional Day School for the Deaf Program as a day (non-resident) school pupil, the Superintendent of the Central Region shall notify the superintendent of the pupil's home district of this admission.

This notification will serve as verification of the pupil's eligibility for services as a pupil who is deaf, residence in his[her] legal home district, and attendance at the Texas State School for the Deaf as a day school pupil.

The pupil's home district superintendent will make application for funds for special transportation for the pupil through regular application procedures of the Regional Day School for the Deaf Program.

The home district will make the arrangements for and provide supervision of transportation services. It will be responsible for budgeting, accounting and auditing of funds received.

The Superintendent of the Texas School for the Deaf will be responsible for reporting the attendance and progress of the pupil to the home district at regular intervals.

The Superintendent of the Texas School for the Deaf will determine the distance a pupil may reside from the campus to be admitted as a day school pupil.

Special Transportation Provisions for Day School Pupils Attending the Texas School for the Blind:

When a pupil is admitted to the Texas School for the Blind as a day (non-resident) school pupil, the Superintendent of the Texas School for the Blind shall notify the superintendent of the pupil's home district of this admission.

This notification will serve as verification of the pupil's eligibility for services as a pupil who is

blind, residence in his[her] legal home district, and attendance at the Texas School for the Blind Program as a day school pupil.

The pupil's home district will make application for funds for special transportation for exceptional children's program through regular provisions of the Texas Education Agency procedures on transportation.

The home district will make the arrangements and provide supervision of transportation services. It will be responsible for budgeting, accounting and auditing of funds received.

The Superintendent of the Texas School for the Blind will be responsible for reporting the attendance and progress of the pupils to the home district at regular intervals.

The Superintendent of the Texas School for the Blind will determine the distance a pupil may reside from the campus to be admitted as a day school pupil."

§8103.1

EQUAL OPPORTUNITY

"The educational programs of the Texas Schools for the Blind and for the Deaf shall be designed to guarantee equitable educational opportunity to qualified students. The program for each school shall provide a plan to meet changes in educational needs. Each school shall be accredited through the high school grades offering appropriate academic and vocational subjects."

§8103.2

Special projects and programs for the Texas Schools for the Blind and for the Deaf shall be approved by the Commissioner of Education.

§8103.3

"A student life program shall be conducted to ensure opportunity for the students to grow and develop social and living skills" in the schools for the blind and for the deaf.

§8103.5

"Operating procedures for admission of students (into the Schools for the Blind and for the Deaf) shall be established in accordance with law by the superintendent of each school.

When the . . . facilities are not sufficient to accommodate qualified students applying for admission, the superintendent shall maintain waiting lists.

A hearing impaired child is subject to the provisions of the County-Wide Special Day School Program. . . .

Procedures for governance of students shall be established and administered by each superintendent."

§3103.7

SUSPENSION
DISMISSAL

"The superintendent may suspend or dismiss a student (from either the Texas School for the Deaf or for the Blind). . . for misconduct or for non-compliance with school regulations." He[she] may also do so if "tests, observations, and conscientious teaching attempts prove the student unable to progress in any of the programs offered.

The superintendent shall establish operating procedures for the suspension and dismissal of students . . . .

Provisions shall be made for each school for hearing grievances from students, parents, staff, or faculty."

§8103.9

"Day school pupils who attend either the Texas School for the Deaf or the . . . Blind shall be provided transportation in accordance with administrative procedure established by the Commissioner of Education."

§8104

MEDICAL SERVICES

"Each school (for the deaf or the blind) shall maintain an infirmary. Medical services including health and dental care shall be provided to protect each student.

Emergency care may be provided school employees who are injured or become ill on the job.

Operating procedures of each school shall in-

clude regulations for providing medical services to the students and emergency care for employees."

§8104

The responsibility for providing medical services in the Texas Schools for the Deaf and the Blind rests with the superintendent of each school.

§8105

APPOINTMENT

The director for business services and the superintendents (of the Texas Schools for the Blind and for the Deaf) are authorized to appoint personnel to approved positions within staff requirements for their respective areas of responsibility, provided that the requirements of the job classification plan are complied with and that the educational appointments meet legal certification requirements. Professional appointments shall be submitted to the State Board of Education for confirmation.

§9104; 9101

". . . [T]he State Board of Education shall designate from its membership a five-member committee to serve as the Board of the Texas School for the Blind. The committee shall function in accordance with law.

Each year the Chairman of the State Board of Education appoints the committee, subject to Board confirmation, to serve as the Board of the Texas school for the Blind.

The membership of the State Board of Education shall be composed of one member from each congressional district . . . . The term of office . . . shall be for six years or as otherwise established . . . .

The following limitations and requirements determine eligibility for election to the State Board of Education.

(1) a person is ineligible if he[she] holds an office with the State of Texas or any political subdivision of the state, or holds employment with or receives compensation for services from the State or any political subdivision . . . or engages in organized public educational activity."

CONFLICT OF INTEREST

(2) to be elected from or to serve in a district, a person must have been a bona fide resident of the district for five continuous years prior to election.

(3) "a person must be a citizen of the United States, a qualified voter of his[her] district, and at least 30 years of age.

Persons seeking election to the state board of education . . . are subject to the following statutory requirements.

(1) "campaign expenses must not exceed $1,500.

(2) "Request for placing a candidate's name on the official ballot and amount of filing fee must be in accordance with provisions of the Texas Election Code.

(3) "Financial contributions toward campaign expenses from persons or organizations in the textbook or bond selling business are prohibited.

APPOINTMENT

When a vacancy occurs, the Board shall fill the vacancy by appointment of a qualified person from the district affected who shall hold office until a successor is duly elected at the next general election. . . .

Before a vacancy . . . is filled a period of at least 30 days shall elapse after due noice of the vacancy has been given at a Board meeting. During this period of time, full notice of the vacancy shall be given to the people of the district involved."

An invitation shall be extended to members-elect to the State Board . . . to attend meetings of the Board as observers and guests prior to the time the new members take office.

"The Commissioner of Education shall provide new members with appropriate information for orientation to the role of a State Board . . . member."

2. Programs for Exceptional Children

EXAMINATION

Statutes

§53-18-1

All handicapped children must be examined by a person certified by the district superintendent or state board and a report made to the state superintendent on the child's "special educational and training needs."

§53-18-2

A "director of special education of handicapped children" shall be appointed by the state board of education. The director shall be "a specially qualified and experienced" person and shall coordinate "all state programs for all handicapped children." The state board of education shall "adopt standards and regulations" for evaluating handicapped children. All teachers employed to teach handicapped children must be "certified teachers" or must meet qualifications prescribed by the state board of education.

§53-18-3

School districts which maintain special education classes approved by the state board of education may "receive reimbursement from the state board." "The state superintendent of public instruction shall superintend the organization of such special programs."

§53-18-6 - 53-18-7

"Certificates of exemption" may be given to a handicapped child who is determined to be so unstable as to pose a "potential hazard to the safety of himself [herself] or to others." The handicapped child must be examined by an evaluation team established by "the district board of education." The "state division of health" shall provide "diagnostic services" "not otherwise provided by local school districts."

§53-18-8

An "advisory committee for handicapped children" shall be established to "study the needs of and recommend programs for handicapped children to the state board of education."

POLICY GUIDES

IIA2-UT 2

UTAH

RULES AND REGULATIONS FOR PROGRAMS FOR THE HANDICAPPED

Utah State Board of Education 69 pages

1974 with 1977 revisions

Philosophy

The state education agency is committed to the principle of equal access to an appropriate education for all persons regardless of variance in their ability to participate in educational experiences. Most handicapped persons cannot be guaranteed equal access to an appropriate education without special educational programs and services in addition to or in place of programs and services provided for the general population.

Handicapped persons should be educated in regular classrooms and neighborhood schools. Frequently it will be necessary to provide special supplementary services in the regular classroom or to remove handicapped persons from regular programs for parts or all of their programs. It is projected that a majority of the handicapped can receive a major portion of their educational experience through regular classroom provisions.

Every effort should be made at the service level to shift the emphasis from the handicapping condition to achieving the educational and personal needs of each handicapped person.

Authority to Make Policy

Authority and responsibility to make policy and set standards in the area of education of the handicapped rests with the state board of education by virtue of its constitutional mandate to provide general control and supervision of the public school system (article X section 8) and by specific legislative enactment found in the 1953 Utah Code (§53-18-2,3,4). These statutes also indicate an intended partnership arrangement between the state board of education and local school districts.

RULEMAKING

Policy Statement

I. Special Education and Related Services

Districts must provide special education and related

services for people who are classified and identified according to a handicapping condition.

II. Child Find and Referral

Local school districts must establish and utilize a process for identifying and referring for service each potentially handicapped person, age five through twenty-one.

III. Data Gathering and Assessment

Districts must provide for gathering of information necessary for assessment and child study, as required for decision making on behalf of the potentially handicapped person. Written permission for evaluation must be obtained from the parent(s) or legal guardians. The diagnostic and placement team is responsible for assuring that evaluation materials and procedures are appropriate for children of all racial and ethnic groups being considered for placement in a special education program.

IV. Child Study, Classification and Individualized Education Program

PLACEMENT

Child study, classification and individualized education program will proceed under the direction of an evaluation placement team.

V. Delivery of Service Responsibility

Each district which finds itself unable to offer a program locally because of insufficient numbers of students or lack of resources, must provide services by: combining services with another district or contracting with another district, agency or individual, or serving the student at home until a more appropriate service can be provided.

VI Certification Requirements

Teachers serving in a self-contained service pattern must be certified in the category in which they are assigned. Teachers serving in a resource program providing service for a single handicap must be certified in the category to be served.

Teachers, serving in a resource program providing service to pupils who are mildly handicapped from two or more categories, who hold certificates in any of four areas - intellectually handicapped, emotionally handicapped, learning disabled, or communication disordered - are considered to be properly certified.

VII. Districts shall provide appropriate and specific full time leadership service for coordination and supervision of special education programs, including instructional assistance to special education teachers. Leadership may be provided within the district on a multidistrict or regional basis or on a contracted arrangement.

VIII. Districts shall provide appropriate and specific identification, diagnostic and assessment services.

IX. Documentation and Attendance

Districts shall require teachers serving the handicapped students to keep roll books (official attendance register) and other written documentation that may be necessary to verify services rendered.

CROSS REFERENCE

III.D.Educational Programs; Policy Guides, Report of Nine Special Programs in Education (1976).

2. Programs for Exceptional Children

Statutes

§830

The department of Social and Rehabilitative Services shall pay the expenses incurred by a school district for a child in its care. The amount shall be equal to the average per pupil cost in the state for the immediately preceding year or a proportional part if the student did not attend full time for the entire year. Pupils for whom the district is reimbursed shall not be included in the district's average daily membership in determining state aid.

Funding for this program shall be determined from a line item request submitted by the Department of Social and Rehabilitative Services. If appropriated monies are insufficient to provide the amount of support indicated, the per pupil payment shall be uniformly reduced.

§2941

It is the policy of the state to provide "equal educational opportunities" for all children of Vermont. The state department of education shall provide special educational facilities and instruction to see to the needs of handicapped children.

§2943

The commissioner of education shall superintend all matters relating to the education of handicapped children.

§2944

"Within the limits of funds made available" the commissioner shall provide for "essential early education" and special education of handicapped children in "schools and public programs and/"or in private settings if the latter "will best serve the interests of such persons." The costs incurred shall be paid

by the state board of education. However, the school district in which the child resides shall reimburse the state for expenses incurred up to the average per pupil cost. If the child is a ward of a state agency, the state agency shall reimburse the state board of education for such expenses.

The superintendent of a district shall "certify the need" of any handicapped child not receiving the educational opportunities provided by the commissioner and the school board of the district shall request the commissioner to provide the opportunities. "Upon acceptance of the child by the commissioner," the commissioner shall pay the costs of special education for the child. The district shall repay the state board the costs of the special education which do not exceed the average per pupil cost of education in the district.

The parents of any handicapped child not "receiving necessary special education in accordance with the laws of this state" or any child who has been improperly classified as handicapped may petition the state board of education to correct the alleged erroneous action. If any allegation has merit, the board shall order "necessary action."

Within limits of the budget the commissioner may extend special education to a handicapped person having attained the age of 21 in order to complete a program of special education.

§2944a

"Any school district...may establish a professional team for the purpose of diagnosing and educating children of adequate mental ability with learning disabilities of a perceptual, conceptual or coordinative nature or related behavioral problems. The team may consist of a school psychologist and such other persons having pertinent and professionally qualified skills."

§2945

The advisory council on special education shall consist of the commissioner, the director of special

education and other representatives of the department. It shall meet annually.

§2946; 2947

The state board of education shall employ a director of special education who shall also serve as secretary to the advisory council. The council may recommend general state policy and shall cooperate with private agencies. The director shall implement the policies and regulations of the council and recommend standards for the approval of special schools and equipment and certification of teachers of handicapped children.

§2948

The commissioner may award a school district a grant of 75% of the actual salaries and wages of special education personnel if the cost of special education exceeds the average per pupil cost of the school district. The commissioner may pay the reasonable costs for the salaries and wages of teaching personnel in the essential early education program for the initial three-year period and thereafter shall pay 75% of such salary and wage costs.

§2949

The state board of education may enter into reciprocal agreements with other states to share the expense of securing persons skilled in educating the handicapped.

§2951

The cost of transporting a child to a special day class shall not exceed "$100 per child per school year" and shall be considered part of the cost of the handicapped child's education.

§2952

The commissioner shall report to the general assembly biennially on the educational needs and status of handicapped children.

Using a "separate appropriation," the department of education shall "diagnose and educate children "of adequate mental ability with learning disabilities."

REGULATIONS

R.M. Ch. II.L; pp. 39 -- 62A

The Division of Special Educational and Pupil Personnel Services shall have jurisdiction over eligibility and programs standards for Vermont and federal programs for the handicapped.

State-set standards for each program shall be as follows:

Programs and services for pupils with retarded mental development

There is ample evidence of the ability of pupils with limited ability to comprehend abstract concepts to understand the concrete and functional. Programs must be designed to develop academic skills, decision-making abilities, self acceptance and qualities of personality and character required for employment and acceptance in society.

Eligibility of pupils

Mental retardation refers to sub-average general intellectual functioning which originates during the developmental period and is associated with impairment in maturation, learning, and/or social adjustment.

To determine mental retardation an individual study is made of each child referred, using a cluster of criteria, the educational, social, medical, and developmental histories, and a psychological study involving more than one psychological measurement. Except in unusual instances, no child with higher than a 75 I.Q. will be considered to have a general learning disability. Impairment in the educable pupil will result in a generally measurable level which is one-half to three-fourths that

of normality, impairment in the trainable pupil will result in a level of less than one-half of normality. Pupils scoring on the border between educable and trainable levels shall be placed in the next appropriate program. The educable child must have a reasonable expectation of achieving economic and social self sufficiency.

The Director of Special Educational and Pupil Personnel Services will determine placement.

For participation in the program, a child must not require custodial care and must demonstrate behavior which allows others to grow.

Program Policies

1. Each child shall be evaluated educationally yearly. Department regulations and semi-annually reports shall be sent to parents and to the Division of Special Educational and Pupil Personnel Services.

Approved programs under ESEA, Title VI, must include provision for appropriate related services.

2. The curriculum of a program shall meet the standards approved by the Division of Special Educational and Pupil Personnel Services.

Each district shall delegate an individual as coordinator of the program.

Class size for educable pupils shall not exceed 15 or be less than 12. Class size for trainable pupils shall not exceed 10. A class size of 12 is recommended for early elementary level I educable programs and for programs having one or more children with multiple handi capping conditions.

PUPIL/TEACHER RATIO

Several Department regulations regarding length of the school day and provision of supplementary services shall apply. All teaching staff must have basic teaching credential required by the Department and earn 12 hours within three years after accepting a teaching position.

3. Classrooms should allow pupils to be within a facility housing pupils of similar age. The Division shall approve the adequacy of classrooms and all major purchases of equipment. Facilities shall meet standards of the State

Departments of Health and of Public Safety.

4. Each sending district shall ensure provision of suitable transportation for pupils as determined by the Division of Special Education and Pupil Personnel Services.

The local educational agency shall, whenever possible, provide a Type A School Lunch Program.

Programs and services for pupils with severe learning difficulties, orthopedic handicap, or multiply handicapping conditions and other health impairment.

The education of orthopedically handicapped children demands flexibility and individualization. Such children may require physical and speech therapy aid adjustments in the school programs.

The education of children with severe learning disabilities may require a variety of techniques, including the self-contained classroom, the resource room, clinical teachers assigned to a child, or residential treatment.

Eligibility

To be eligible a pupil must be unable to profit from the usual instructional procedures of a school. Acceptance into a program shall be based upon the recommendation of a team of specialists chosen for their training in the evaluation of this type of child. Their recommendation shall include suggested interventions appropriate to the education of the pupil.

Program policies

The program shall be the specific responsibility of a trained administrator in the district who will coordinate educational, medical, and psychological efforts on the child's behalf. Continuous psycho-educational evaluation must be made. Related services of speech and other specialists shall be made available.

The maximum number of children in a special class shall be 12. The classroom shall be constructed or adapted and equipped to meet needs of physically handicapped pupil. The teacher shall meet the Department's certification standards.

Programs and Services for Visually Handicapped and the Multiply Handicapped Blind

Eligibility of pupils

To be eligible, a pupil must be determined by an opthalmologist to have central visual acuity of 20/200 or less in the better eye with correcting glasses, or a peripheral field so contracted that the widest diameter of such field subtends an angular distance no greater than 20 degrees. Also, a pupil may be eligible who has more than 20/70 vision but cannot use vision as a chief channel of instruction in a normal classroom without supplementary service and equipment. Multiply handicapped pupils who are blind must also qualify under criteria established for another disability.

Program policies

A local administrator or teacher shall be designated as a program coordinator for a child receiving supplementary services. The coordinator in cooperation with a team of specialists will determine the need for low vision aids and supplementary materials. Among possible elements in a program shall be: residential education; reader service; specialized equipment; and use of a resource teacher or resource room.

Health impaired pupils who are housebound shall be tutored by a certificable teacher for six hours per week at the elementary level and for two hours per week per subject at the secondary level. A coordinator for the program shall be designated by the district superintendant. Every effort shall be made to give the pupil full use of the school program and services, including the use of such services as home-to-school telephones.

Programs and Services for Hearing Handicapped Children Including Those with Multiple Learning Disabilities

Eligibility of pupils

To be eligible, a pupil must have a hearing loss that approaches an average of 60 or 65 decibels across the speech range in the better ear and be unable to develop

language successfully without special education. Also, a pupil may be eligible whose haring is functional with or without hearing aid but whose less causes a language deficit or learning difficulty making it impossible to use fully the regular school experience without special services. A pupil with a hearing loss who also qualifies under another handicapping condition may be eligible.

Program policies

Before placement in a program, a hearing handicapped child must undergo a medical and audiological examination, possibly a psychological examination, and a thorough educational evaluation by the local educational agency.

The Austine School is the approved placement for deaf and severly handicapped children. Alternative placement will be made by the Director in consultation with the Headmaster of the Austine School and other appropriate specialists.

A deaf child should have a full program day of special education beginning at age four. Classes for elementary deaf children shall not exceed eight, and shall be fully equipped with auditory equipment. Supplementary services of tutoring, lip reading, and auditory training and language development may be part of a program. An elementary program shall include the necessary curriculum in language training for the child's level of accomplishment and also provision for basic instructional areas. Secondary programs shall be accredited by the State Department of Education.

Programs and Services for the Emotionally Disturbed

Eligibility of pupils

To be eligible, a seriously emotionally disturbed child must be unable to learn without special instructions and consistently demonstrate academic achievement below age expectancy and yet not require hospitalization. A study of the child shall be held in the school records.

A total educational plan for the child shall be part of each project application. It shall: explain the

plan to modify the behavior of the child, show how the child will be taught in basic instructional areas and how the child will receive necessary related services, and provide for the involvements of parents or guardians.

A plan shall provide for retaining pupils in regular class or for their eventual return to a regular program. Whenever the special class approach is used pupil enrollment shall not exceed 10. The class shall be housed in facilities distinct but not separate from other educational programs of the district. Approval is contingent on adequate space, equipment, and materials.

Behavior shall be regularly and systematically recorded and evaluated.

Special teachers should hold standard teaching certificates and should obtain a minimum of 12 additional hours of specialized training within a three-year period starting from initial special contracts.

Programs and Services for the Speech-handicapped

Any pupil who has a speech pattern which deviates from the average so far as to draw unfavorable attention to him may be eligible for speech therapy.

The speech therapist shall be certified according to standards set by the Division of Professional Services of the Department of Education.

At the initiation of a speech therapy program, children in grades one through six in the participating districts shall be given a screening test. Thereafter, screening may be restricted to grades one, three, and five, all new pupils, and referrals from parents. Children in kindergarten or in grade seven or higher will be seen at the request of a teacher, administrator or parent.

The therapist's caseload shall be determined by the combined severity ratings of the cases. The ratings of a caseload shall not exceed 60 units. Children should be seen for two periods a week of 15 to 20 minutes. When only one period per week is possible, it shall be 25 to 30 minutes.

The purpose of the learning disabilities programs shall be to initiate, expand, and improve comprehensive services for children with special learning disabilities.

Each program shall be funded through a local educational agency. It shall contain certain essential characteristics, including: an assessment reached by team approach, of the pupil's special learning disabilities and abilities and program planning based on this assessment; coordination of state and community services available to the child; a clear statement of administrative responsibility; and a design for evaluation.

To be eligible, a child should have a special learning disability which is not primarily due to sensory, motor, mental retardation, or emotional disturbance, or envirionmental disadvantage. Children with sensory, motor, or emotional handicaps may also have special learning disabilities; such children shall be considered multiply handicapped. The child must exhibit a disorder in one or more of the basic psychological process involved in understanding or using spoken or written languages. The child should generally demonstrate a significant discrepancy between potential abilities and actual achievement, but learning ability should fall above the definition of mental retardation. The child's deficits should be unable to be ameliorated in the regular classroom.

Guidelines for program administration

The local agency shall submit a total plan for the program and also carry out evaluation.

The district shall invest the per pupil cost in each child enrolled in a learning disabilities class and, having done so, shall receive 75% of the salary of a qualified teacher. The child's school district of residence shall be responsible for transportation.

A specialist in learning disabilities shall have completed at least a fifth year in an approved university or college program. A teacher may receive minimum certification by holding a teaching certificate and completing

within three years, 12 hours in diagnosis of educational disabilities and education and curriculum for children with disabilities.

The elementary special class may contain up to 8 children and may be increased to ten by adding an aide. At the junior and senior high levels, the ratio of teachers, psycho-educational program planners, and aides to pupil enrollment should not exceed one staff member for each five pupils. No more than 15 pupils, seen individually, in small groups or in resource room assignments, shall be assigned to a supplementary instruction teacher or to the resource room teacher. Pupils receiving supplementary individualized instruction shall receive at least one hour per day of teaching. A special class shall not have a chronological span of more than four years.

PUPIL/TEACHER RATIO

The chief school administrator of the district, shall appoint a team of administrators, teachers, and consultants. The program and personnel, including the team, are under the direction of the chief school administrator.

A team using accepted psychological and educational procedures, including direct observation, plus medical opinion (when desirable) shall produce diagnosis, assessment and educational prescription.

The educational appraisal shall include data on the following areas of learning behavior:

1. Measures of the child's general development and ability levels.
2. Measures of the child's school achievement should be taken.
3. At least the following should be considered in relation to the child's overall development age in determining the areas of disability: ability to relate parts to a whole; ability to manage language communications functions in the areas of speech, reading, and writing; ability to generalize learning experiences beyond examples given, to see

principles, and to transfer information to new situations; abstract reasoning and time sense or other difficulties in conceptualizing ability in the arithmetic functions of computation, sequencing, and comprehension of mathematical symbols; ability in memory areas; and ability to coordinate various receptive and expressive modes.

Attention shall be given to the assessment of the child's general behavior in relation to learning situations, particularly with reference to the child's expressed attitude toward himself/herself: Does the child need attention to his/her low frustration tolerance? Have his/her learning problems led him to flee from challenge? Has lack of understanding of his/her abilities and disabilities led to over-compensation on his/her part? Is there evidence of control and manipulation of others or negativism resulting from the lack of success or other factors in the situation?

The assessment and prescription should give attention to the following when they are in evidence in the child's behavior, remembering that at some ages and at some mental ability levels, the following might be appropriate: excess or deficiency of general motor activity, difficulty in gross or fine motor coordination, excess or deficiency of verbal activity or inappropriate or distorted verbal activity, excessive concentration or lapses in attention or difficulty in initiating concentration, reaction atypical in terms of their intensity, appropriateness or frequency.

The curriculum shall be specialized, individualized, and prescriptive. A variety of program models are approvable:

a. Full regular school day plus special help for the teacher
b. Reduced regular school day plus special help for the teacher
c. Part regular school day plus special help for the teacher
d. Full or regular school day and supplementary clinical instruction
e. Small group instruction in resource room

f. Special class instruction

A school psychologist reimbursed under this Act shall: be responsible to the local school district; meet professional standards set by the Department; participate in psycho-education assessment, team work, and planning for the district's handicapped; shall not have a caseload exceeding 50 to 100 pupils.

Multiply handicapped pupils shall be provided with programs appropriate to the various handicapping conditions.

Policy for Home- and Hospital-bound Instruction

To be eligible, a child must be unable to attend regular school for a extended period of time on account of a condition that actually limits physical activity.

Upon learning of the child's homebound condition, the superintendant shall submit the state referral form for special education to the Division of Special Educational and Pupil Personnel Services. After notification approval, the person referring will assign a home teacher to the case.

Each elementary child receiving home instruction shall be taught an average of six hours per week, scheduled on the basis of at least one hour each school day. Junior and senior high school students shall receive an average of two hours per week per subject, scheduled into three or more periods per week. Home instruction during the summer months and special services in art, reading, etc., will be provided if deemed advisable.

Any techniques that help the homebound pupil to maintain a close identity with classmates in regular classes shall be used. A home-to-school telephone service shall be available on request.

The case of a homebound pupil receiving home instruction shall be reviewed on a yearly basis.

A medical report by a physician stating the nature of the disability and its probable duration shall be submitted when the pupil is referred for home instruction.

The home teacher shall prepare a report of the

pupil's progress when the child returns to school or at the end of the school year.

The home teacher will report hours of instruction on forms provided for payment purposes.

Policies Regarding and Educational Services for Schoolgirls who are Pregnant or are Mothers.

The Department aims to provide educational opportunity for pregnant schoolgirls and mothers who must temporarily leave the regular educational system.

A resident girl who is under the age of 21 years and who is pregnant or a mother and who, by reason thereof, is enrolled in the Elizabeth Lund Home in Burlington or who chooses to remain at home shall be a "handicapped child" pursuant to 16 V.S.A. SS 2942. Such a handicapped girl shall be eligible for "special education", with the following qualifications.

The Elizabeth Lund Home provides programs relevant to such handicapped girls. Regarding girls enrolled there, the Home shall report to the Division of Special Educational and Pupil Personnel Services the girl's presence and her program, and, on a monthly basis, her progress.

Every handicapped girl shall receive a minimum of 6 hours per week of individual tutoring. An educational program for each girl shall be devised by the Elizabeth Lund Home with the assistance from local educational administrators and personnel. In the case of a handicapped girl in secondary school for whom the pursuit of a high school diploma is not appropriate, an educational program must be designed so that the girl may be employable and self-sufficient upon termination of her handicap.

The Director of the Elizabeth Lund Home shall furnish once yearly such fiscal information as is required for budgetory and fiscal purposes.

To the extent that funds are available under 16 V.S.A. SS 2948, the Department shall reimburse the Home for expenses incurred in the operation of the tutorial program.

A tutor providing educational services for a handicapped girl shall be certified by the Department.

Policies Relating to the Operation of Special Educational Services under the State Department of Education

Funding of pupils shall depend on their meeting eligibility requirements state above. If funds are not available at the time a handicapped pupil needs special educational services, he/she will be placed on a waiting list.

Residential schools shall receive the tuition they request after justifying this expenditure to the Department.

Home teachers shall receive a tutoring fee comparable to the accepted rate in the local area.

Public and private school programs for the mentally retarded shall receive a budget arranged with the Department including:

salaries based on local salary schedule;

funds for substitute teachers determined by the local cost of substitutes multiplied by the number of days of leave for which a teaher is eligible;

expenditures for all supplies, library and audio-visual materials, and textbooks;

funds for field trips and supplementary activities necessary and unusual in the special program;

expenditure for initial or additional equipment such as furniture;

funds for annual physical examinations and medical care services;

administrative and operational expenditures, transportation and food services.

Elementary guidance is reimbursed on a first-come, first-serve basis for those on the waiting list. Six programs are funded each year and code program is funded for a three-year period.

If the district is reimbursed 75% of costs in utilizing the classroom construction act, all regulations of the school administrative services division shall be

followed. The award shall be based on submission of a comprehensive plan. The district shall be sufficiently large to support at least a four-level program: early elementary, late elementary, junior high, senior high. Private programs for the educable mentally retarded, funded by the Division must find a public school administrative set up by 1975.

In addition, policies and regulations available from the Department were adopted in 1975-1976 to: provide a local plan to describe full educational opportunity for all handicapped; guarentee due process; provide non-discriminatory testing for the handicapped and disadvantaged; make sure that the handicapped programs comply with the least restricted doctrine; establish a child identification system, procedures for confidentiality, regulations for Early Essential Education, and priority service to unserved handicapped; and establish procedure for inter-agency responsibility for the education of the handicapped.

CROSS REFERENCE

II.C.2.; Statute §3457

2. Programs for Exceptional Children

Statutes

§22-10.4

The Board of Education shall operate "a program of special education designed to educate and train handicapped children between the ages of two and twenty-one" and may operate a program for individuals of other ages. "In the development of such program, the Board of education shall assist and cooperate with local school boards" and the Commission for the Visually Handicapped and the Virginia Council for the Deaf.

§22-10.5

"Each school division shall provide special education for the handicapped children within its jurisdiction. Each school division shall submit annually to the Board of Education a plan for special education for the year following and a "report indicating the extent to which the plan required by law for the preceeding year has been implemented." The plan for the year following "shall include estimated costs of the program" and shall show the obligation for local expenditure and expenditure by the State.

§22-10.6

"A local school board may provide special education for handicapped children" either with its own facilities and personnel "or under a contract with another school division or a public or private non-sectarian school, agency or institution approved by the Board of Education."

§22-10.7

(a) "Special education for visually impaired children" shall be "operated jointly by the local school board and the Virginia Commission for the Visually Handicapped" and be subject to the regu-

lations of the Board of Education.

(b) The Virginia Commission for the Visually Handicapped shall prepare and operate a program of special education services designed to meet the educational needs of visually impaired children between the ages of birth and twenty-one and may operate a program for other ages. The Virginia Commission for the Visually Handicapped shall cooperate with the Board of Education and local school boards to develop the program.

"(c) '<u>Visually impaired</u>' means having vision which after best correction limits ability to profit from a normal or unmodified educational setting.

'<u>Program</u>' means a modified program which provides special materials or services and may include the employment of itinerant teachers or resource room teachers for the visually impaired."

§22-10.8

If a school division is unable to provide appropriate special education for a handicapped child and appropriate education is not available in a state school or institution, the school board shall pay the parent or guardian three-fourths of the tuition paid or obligated to be paid by the parent whose child attends a private non-sectarian school for the handicapped approved by the Board of Education. The school board shall not be obligated to pay more than twelve hundred fifty dollars for a child attending a non-residential school or five thousand dollars for a residential school. The school board may pay the parents more from its own funds. If State funds are not available, the school board shall pay the parent or guardian "an amount equal to the actual per pupil cost of operation in the average daily membership for the school year immediately preceding." The school board shall be entitled to count such pupils for reimbursement from the basic school aid fund.

TUITION

When a local school board contracts with another school division or a public or private non-sectarian school to pay the tuition for handicapped children in its jurisdiction, the

Board of Education may reimburse the local school board sixty per cent of its costs not to exceed seven hundred fifty dollars per pupil at a non-residential public or private school or three thousand dollars for a residential school. The Board of Education may reimburse a local school board sixty per cent of its costs in operating preschool special education for handicapped children aged two through four. Reimbursement shall not exceed one thousand dollars per pupil.

§22-10.11

"Each handicapped child enrolled in and attending a special education program provided by the school division pursuant to any of the provisions of §22-10.6 shall be entitled to transportation to and from such school or class. The school board may, in lieu of providing transportation, allot funds to assist in paying the cost of other means of transportation."

TRANSPORTATION

The Board of Education shall fix a maximum amount for assistance in paying the cost of transportation with due regard for the cost of transportation of public school pupils. The local school division shall pay at least forty per cent of this amount. Sixty per cent of this amount shall be paid by the State, "subject to funds being available." Whenever offically closed, the Virginia School for the Deaf and Blind or the Virginia School at Hampton shall transport each pupil to and from the school and the residence of the pupil's parent or guardian. A school board may provide transportation or funds to pay for transportation to handicapped children in its jurisdiction who are attending schools pursuant to §22-10.8(a)

§22-10.13

ADVISORY COUNCIL

The Overall Advisory Council on Needs of Handicapped Children and Adults previously created continues to exist. The Council shall have nineteen members and meet at least once a year. It "shall continuously study

the handicapping problems of children and the various phases of the programs for handicapped persons." The Council shall make recommendations and reports.

§22-223 -- 22-229

CENSUS

Every three years the school board shall see that a census be taken of (1) all persons having reached their fifth birthday on or before December thirty-first and who have not reached twenty years of age as of January first of the school year and who reside in the school division, and (2) all handicapped children as defined in §22-228, except blind and deaf children, who are between the ages of two and twenty and who reside in the school division. Children who are domiciled in orphanages or eleemosynary institutions or who live on any federal military reservation shall be included in the census of the school division where the institution or federal property is located. Children in mental institutions, prisons, state hospitals, state training schools or state training centers for the mentally retarded shall be included in the census for the school division of the residence of their parent or guardian.

The school board on recommendation of the division superintendent shall appoint agents to take the census. The agents shall also "gather statistics relating to the interests of education" in their school division, according to forms furnished by the Superintendent of Public Instruction.

The census lists shall be open for public inspection. The State Board of Education may require a special census at any time.

Every three years a census of deaf and blind persons two to twenty years of age in each school division shall be taken. The division superintendent shall give the census to the superintendent of the schools for the deaf and blind, to the Virginia Commission for the Visually Handicapped, and to the Virginia Council for the Deaf.

§22-275.5

Every visually impaired or deaf child between the ages set forth in §22-275.1 shall attend a school that uses special methods and equipment for visually impaired or deaf persons. The principal of any such school may excuse a necessary absence of a pupil. A child whose physical or mental condition would make instruction inexpedient or impracticable need not attend school.

ATTENDANCE

Any child attending school prior to reaching seventeen shall be required to continue in school until he/she reaches twenty or until the pupil has completed all courses at the school which the pupil can benefit from.

§22-275.12; 275.13

Any person who induces, or attempts to induce, any visually impaired child or deaf child to not attend school when required to do so or who employs or harbors any such child shall be guilty of a misdemeanor and be fined not more than ten dollars for each offense.

VIOLATIONS

Within thirty days from the beginning of the school year every principal teacher of a school in a county or town and every truant officer in a city shall give the names of all children who are visually impaired or deaf between the ages in §22-275.1 who do not attend school to the superintendent and the school board. The school board shall give the names to the superintendents of the State schools for the deaf and blind, the Virginia Commission for the Visually Handicapped who shall investigate all cases of non-enrollment.

A visually impaired child is one whose vision after best correction limits his/her ability to profit from a normal or unmodified educational setting.

§32-11.1

The State Department of Health shall report to the Department of Education or any local school division any information about a child with a health problem or handicapping condition which might affect the child's career in school and his/her need for special education.

Hearing Impaired Children in State Residential Schools, Education and Training of, §I-III

"Programs of education for hearing impaired children in state residential schools should seek to aid each pupil consistent with his or her abilities, interests and educational needs to 1) become competent in fundamental academic skills; (2) be qualified for further training and/or employment, (3) participate as a responsible citizen (4) develop a positive and realistic self-image; (5) exhibit a responsibility for the enhancement of beauty in daily life and (6) practice sound habits of personal health."

Each state board, agency, or institution shall submit to the Board of Education by January 15 of each year an acceptable five-year plan for the education and training of all children in residence or in custody. The plan should stress the educational objectives of the board, strategies for achieving the objectives, a formalized system to assure a smooth transition of the child into the educational program of the state school, and an assessment plan for determining the extent to which the objectives have been achieved, including follow up studies of former students.

Each state board, agency or institution shall maintain an up-to-date policy manual.

There shall be an educational advisory committee for each residential school for the hearing impaired which included individuals from the area and community served by the school, public agencies, parents, and educators, appointed by the director or superintendent of the facility.

EVALUATION

There shall be an initial medical, psychological, sociological, and educational evaluation for each child served in the education program, followed by a periodic re-evaluation consistent with sound professional practice. There shall be curriculum options provided for each group

of children. There shall be an educational plan maintained on file for each child, and there shall be at least 5 hours of education and training per day for each child.

There shall be at least an annual evaluation of the educational progress of each child to determine the effectiveness of the educational plan and to make recommendations for modification of that educational plan.

Handicapped Children Attending Approved Private Non-Sectarian Schools, Tuition Assistance For, §I-IX

In order to determine the eligibility of a handicapped child for further assistance, the handicapped child must have reached his or her fifth birthday by December 31, 1975 and shall not be 21 by December 31, 1975. If hearing is impaired, the handicapped child may be between the ages of two and 21. The child must be identified as handicapped in accordance with Board of Education definitions or procedures.

ELIGIBILITY

The Department of Education shall provide to local school divisions an updated list of those approved private non-sectarian schools for the handicapped in which eligible handicapped children enrolled may receive tuition assistance from their local school division.

The superintendent of the local school division shall certify that the child is handicapped in accordance with Board of Education definitions.

The superintendent of the school division shall certify that in his/her judgment, State schools or institutions cannot provide an appropriate educational program for the child during the school year for which application is made.

The local school board shall pay the parent or guardian of each eligible handicapped child for the school year 1975-1976 three fourths of the tuition cost and shall not be obligated to pay more than $1250 for a child in a non residential school nor $5000 for a child in a residential school provided the local school board is not required to provide such aid if matching state funds are not available. "In the event state funds are not available, the local school board shall pay the

TUITION

parent or guardian tuition costs of such child in an amount equal to the actual per pupil cost of operation in the average daily membership for the school year immediately preceding, and such school board shall be entitled to count such pupils and receive reimbursement from the basic school aid fund in the same manner as if the child were attending the public schools.

APPEAL

A parent may appeal the decision of the local division superintendent concerning the eligibility status of their child for tuition assistance. If dissatisfied with the decision of the local school board, the appeal may be addressed to the State Superintendent of Public Instruction.

Special Education,
Reimbursement From State Funds, §I-VIII

Handicapped children shall not be assigned to a facility other than a regular elementary and secondary school unless special facilities are determined to be educationally advantageous for the severely handicapped.

Certification is required for special education teachers.

Reimbursement is available to assist local school boards with 60% of the actual cost of providing transportation for preschool handicapped children to attend special education classes operated by local school boards.

All reimbursement is subject to the availability of funds. In the event of insufficient state funds, reimbursement will be prorated accordingly.

IV.H.; Statute §22-275.6; 22-275.7

IV.J.; Statute §22-230.1 -- 22-230.3

STATUTES

§28A.03.300-.310

The superintendent of public instruction shall institute a program to screen children for learning/language disabilities. The program shall screen all children after the first grade.

§28A.13.005

It is the purpose of the law to ensure that handicapped children get an appropriate education at public expense as guaranteed by the Washington constitution.

§28A.13.010

A division for handicapped children shall be established in the office of the superintendent of public instruction to oversee their special education.

"Handicapped children are those children in or out of school who are temporarily or permanently retarded in normal education processes by reason of emotional maladjustment, or by reason of other handicap, and those children who have specific learning and language disabilities resulting from perceptual motor handicaps, including problems in visual and auditory perception and integration."

"The superintendent of public instruction shall require each school district to insure an appropriate educational opportunity for all handicapped children of common school age." An appropriate education is one tailored to the "unique needs . . . of handicapped children."

"No child shall be removed from the jurisdiction of juvenile court for training or education under this chapter without the approval of the superior court of the county."

§28A.13.020

"The superintendent of public instruction shall appoint an administrative officer of the division" whose duties shall include coordination and supervision of

APPOINTMENT

special education programs and ensuring that "an appropriate educational opportunity" is provided.

§28A.13.030

School districts are authorized to establish "residential schools and/or homes . . . for aid and special attention to handicapped children."

§28A.13.045

The Board of Directors of every school district can contract with agencies approved by the state board of education for operating handicapped programs. Approval standards shall conform substantially with those for the approval of Special Education Aid programs in common schools.

§28A.13.050

"Special educational and training programs may be extended to include children of pre-school age."

§28A.13.060

If a handicapped child is denied the opportunity of a special education program by a local school superintendent," he/she must show that the district cannot make arrangements to accommodate the child and he/she will not benefit from an alternative educational opportunity."

The parent or guardian has a right of appeal.

§28A.13.070 APPEAL

"The superintendent of public instruction shall: assist school districts to formulate programs to meet the needs of handicapped children; assist in placing handicapped children eligible to receive special education aid; "approve . . . programs . . . eligible for special excess cost financial aid"; adjudge appeals excluding a handicapped child; promulgate rules necessary "to ensure educational opportunities with the common school system for all handicapped children who are not institutionalized;" and establish sanctions for failure to comply with the provisions of this chapter.

§28A.13.080

The superintendent of public instruction may establish sanctions for application to school districts which fail

to comply with the provisions for handicapped children, including withholding state aid until compliance is assured.

§28A.14.010 — 14.020

A division of recreation is established in the special education service division.

APPOINTMENT

A qualified administrator appointed by the superintendent shall coordinate and supervise the recreation programs operated by the state school districts.

§28A.14.040

School districts may employ special education recreation instructors and may allow adults to participate in its recreation program.

§28A.16.010

A division of special education for superior students is established for students "who consistently show remarkable performance in academic pursuits or demonstrate exceptional ability."

§28A.16.020

"The state superintendent of public instruction . . . shall administer a program to improve the education of students of superior capacity."

§28A.16.030

"Local school districts . . . may establish and operate special . . . programs of education for superior students and employ . . . special instructors and . . . operate in conjunction with any institution of higher learning joint programs of education for superior students."

§28A.24.100

"Individual transportation . . . may be authorized" by the intermediate school district transportation commission. All handicapped children . . . who are not ambulatory and/or are not capable of protecting their own welfare while traveling to and/or from school . . . shall be provided with transport at school district . . . expense."

§72.05.010

The purpose of state residential institutions for children with behavior problems, and defective, feeblemind, deaf and blind children is to provide such care as will best serve the welfare of the child, and to provide "care . . . most likely to accomplish their rehabilitation and restoration to normal citizenship."

REGULATIONS

§180-68-100

"Superior student program--Authority--Program approval Excess costs defined. (1) The state board adopts the policies and regulations relating to administration of the program for students of superior capacity...

RULEMAKING

"(2) The state superintendent...shall establish regulations and procedures for the administration of the superior student program,

"(3) Excess costs,...shall be defined as any costs in excess of the costs incurred by regular promotion or advancement of a student."

III.B.School Psychologist; Regulation §180-84-015

IV.D.; Statute §28A.24.110

2. Programs for Exceptional Children

Statutes

§18-8-10

"Every . . . person having control of any mentally normal minor over six years of age, who is defective in sight or hearing to the extent that he[she] cannot be benefitted by instruction in the public schools, shall be required to send such minor to the West Virginia schools for the deaf and the blind . . . . Such minor shall . . . attend such schools for a term of at least thirty-six weeks each year until he[she] has completed the course of instruction prescribed for such schools by the state board of education, or has been discharged by the superintendent of said school."

SCHOOL FOR DEAF

SCHOOL FOR BLIND

Exemptions from such attendance are as follows:

(a) "Instruction by a private tutor or in another school approved by the state board . . ." for the prescribed time;

(b) "Physical incapacity for school work;"

(c) Any other reason deemed good and sufficient by the superintendent of such schools, with the approval of the state board of education.

"Any parent [or] guardian . . . who fails or refuses to comply with the requirements of this section shall be guilty of a misdemeanor . . . . Failure for the period of one week within the school year to send such minor to school shall constitute an offense . . . .

Any person who induces or attempts to induce such blind or deaf minor to absent himself[herself] from school, or who employs or harbors such minor unlawfully, while said school is in session, shall be guilty of a misdemeanor . . . .

It shall be the duty of school attendance directors and assistants, prosecuting attorneys, and any special attendance directors appointed by said school . . . to enforce the provisions of this section.

The county superintendent of schools shall furnish to the superintendent of the . . . schools for the deaf and/or blind and to the state superintendent of schools the names of persons in his[her] county between the ages of six and eighteen reported to him[her] to be deaf and blind with the names and addresses of their parents or guardians."

§18-17-1

"The West Virginia schools for the deaf and blind . . . shall be maintained for the care and education of the deaf . . . and blind youth of the State. The . . . affairs of the schools shall be under the control, supervision and management of the state board of education . . .[which]. . . shall employ the superintendent, principals, teachers and other employees and shall fix the . . . salary to be paid to each person so employed.

The minimum salary scale for said principals and teachers shall be" that set forth by statute for other teachers and principals in the public schools.

§18-17-2

"All deaf youth and blind youth residents in the State, between the ages of six and twenty, providing they are educable, physically capable and free from contagious disease, shall be enrolled in the school on application to the superintendent until the school is filled. Applicants shall be admitted in the order of their application. It shall be the duty of the superintendent to keep a careful record of the names of all applicants with the dates of their admission and discharge, their ages, . . . addresses, the names of their parents or guardians, and the degree, cause and circumstances of their deafness or blindness."

§18-17-3

"All such deaf . . . and blind pupils shall be admitted to the schools without charge for board and tuition. When not otherwise provided with clothing they

shall be furnished therewith by the institution while they are pupils therein," said clothing to be charged back to the students' home county.

§18-17-4

"The pupils of said schools may continue therein until completion of the prescribed course of study, or a lesser period of time which the condition and progress of the pupil may justify, as determined by the state board of education and the superintendent. After all applicants . . .[of]. . . the prescribed age . . . have been enrolled, if there are additional accommodations, the superintendent may enroll other deaf . . . and blind pupils who may be of suitable age to receive any advantage from the institution, and upon such terms as the . . . board . . . may prescribe, but . . . such persons shall withdraw from the institution in the order of their admission to make room for new applicants between the ages prescribed."

§18-17-5

"The course of instruction in the institution shall be prescribed by the state board of education, with the advice of the superintendent, and shall be as extensive in the intellectual, musical, vocationl and prevocational departments as the capacities and interests of the pupils may require."

§18-17-6

"The county assessors of the State are . . . required to register the names of all deaf persons and all blind persons under eighteen years of age in their respective counties, with the degree and cause of deafness and blindness in each case, as far as can be ascertained from the . . . families, their ages, the names of their parents or guardians, their . . . addresses, and such other facts as may be useful in making the institution efficient . . ." Their report shall be submitted annually "to the state superintendent of

schools and to the superintendent of . . .[the]. . . schools for the deaf and the blind. The superintendent shall immediately communicate with the parent or guardians of all . . . persons mainted in the . . . report. with a view to their admission . . . into said schools."

§18-20-1;3

"County boards of education . . . shall establish and maintain for all exceptional children between five and twenty-three years of age, special education programs, including but not limited to special schools, classes, regular classroom programs, home-teaching or visiting-teacher services . . . as the state board of education shall approve. Provisions shall be made for educating such exceptional children (including the handicapped and the gifted) who differ from the average or normal in physical, mental or emotional characteristics . . . to the extent that they cannot be educated safely or profitably in the regular classes of the public schools or to the extent that they need special educational provisions within the regular classes in order to educate them in accordance with their capacities, limitations and needs. In addition, county boards . . . may establish and maintain other educational services for exceptional children as the state superintendent of schools may approve. The state board of education shall adopt rules and regulations to advance and accomplish this program.

RULEMAKING

Nothing in this section shall be construed to prevent county boards . . . from providing . . .[such] . . . programs . . . for . . . exceptional children who are three years of age or older.

Counties maintaining . . .[such]. . . programs . . . and receiving or requesting reimbursement from state appropriated funds shall file with the state superintendent of schools . . . applications, annual reports and such other reports as he[she] may require."

§18-20-2;4

"The board of education of each county is responsible for providing suitable educational facilities, special equipment, and such special services as may be necessary" for the education of the exceptional child. "Special services include provisions and procedures for finding and enumerating exceptional children of each type, diagnosis by appropriate specialists who will certify the child's need and eligibility for special education and make recommendations for treatment . . . [and] . . . special teaching by qualified and specially trained teachers, transportation, lunches, and remedial therapeutic services. Qualifications of teachers and therapists shall be in accordance with standards prescribed or approved by the state board of education.

MEDICAL EXAMINATION

Each child prior to enrolling . . . shall be examined by an appropriate medical specialist . . . who shall report to the county superintendent of schools. The specialists' report shall carry recommendation for eligiblity and placement in regular school, or in the special education facility

No educationally exceptional child shall be excused or excluded from attending school except with . . . written approval of the county superintendent . . . .

Counties may provide for educating their resident exceptional children by contracting with other counties or other educational agencies which maintain such special education facilities."

§18-20-5

"The state superintendent of schools shall have the power to organize, promote and administer. . .[the special education]. . . program . . . and be responsible for:

(1) Stimulating and assisting county boards . . . in establishing, organizing and maintaining special schools, classes, regular class programs,

home-teaching and visitor-teacher services ;

(2) Cooperating with all other public and private agencies engaged in . . . educating and rehabilitating exceptional children, and in helping coordinate the services of such agencies ;

(3) Preparing the necessary rules, regulations . . . and procedures . . . to define minimum standards in providing suitable facilities for education of exceptional children, ensuring the employment, certification and approval of qualified teachers and therapists subject to approval by the state board of education ;

(4) Performing such other duties and assuming such other responsibilities in connection with this program as may be needed."

§18-20-6

"There shall be an advisory council for the education of exceptional children which shall advise and consult with the state board of education on matters pertinent thereto. The . . . council shall be composed of nine members appointed by the state superintendent, . . . four of which shall be parents of exceptional children utilizing the services of the special education programs . . [O]fficers and employees of the State shall not be eligible for appointment . . . . . The members . . . shall be citizens and residents of this State, who by reason of their training, education or experience are qualified to carry out the functions of the council. Members shall be appointed for terms of three years.

APPOINTMENT

All members shall be eligible for reappointment. A vacancy caused by death, resignation or removal of a member prior to the expiration of his[her] term shall be filled only for the remainder of such term. Five members . . . shall constitute a quorum. The . . . council shall meet at least four times each year . . . [or]. . . when called by the [elected] chairman or . . . requested by five members of the . . . council.

Members . . . shall not receive any compensation for their services . . . but shall be reimbursed any actual expenses incurred by them in carrying out their duties . . .

The council shall:

(a) Consult with the state board . . . concerning any rules and regulations formulated by such board in implementing this article; (b) Consider and advise the state board and superintendent concerning any problems presented to the council; (c) Hold public meetings at such times and places as the advisory council deems appropriate; (d) Periodically review the state plan for special programs and make any recommendations it may have concerning changes it may deem proper."

III.C.School System; Constitution; Article 12, §12

2. Programs for Exceptional Children

Statutes

§115.37; 115.79

The state superintendent shall consult with the council on special education concerning:

(a) all proposed department or division policies relating to special education;

(b) new special education programs and expansion, reduction or termination of existing programs;

(c) the annual state plan required by statute; and

(d) any other matters upon which the state superintendent wishes the council's opinion.

The council may report biennially to the legislature on the progress made by special education programs and planning and any other information. The council shall have access to reports and statistics kept by the department of public instruction relating to special education.

The council on the education of the blind shall make recommendations as to policies and procedures of the department affecting the visually handicapped and the state superintendent shall seek such advice from the council. The council shall advise on services, activities, programs, investigations and researches which will contribute to the welfare of visually handicapped persons.

Notwithstanding any provision to the contrary, the council shall have access to files, records and statistics kept in the department relating to the visually handicapped.

"The object of the Wisconsin school for the visually handicapped and the Wisconsin school for the deaf is to afford the visually handicapped and the deaf a practical education and physical rehabilitation which may aid them to make a living, discharge their duties as citizens and secure to them all possible happiness."

Both schools shall be maintained and governed by the state superintendent as follows:

1. The school year shall be not less than thirty-eight (38) weeks.
2. Blind and/or deaf residents between ages six (6) and twenty-one (21) shall be "received and taught in the schools free of charge." Non-residents may be received for a charge but not at the exclusion of a resident. Pupils over twenty-one (21) may be admitted and charged.
3. All pupils shall equally and freely enjoy the benefits and privileges of the schools without discrimination.
4. Transportation may be provided for indigent residents.
5. A summer program may be maintained at the school for the deaf. A summer program shall be maintained each year at the school for the visually handicapped for adult visually handicapped persons. There are no age limitations on summer programs.
6. Both schools may provide instruction for pre-school deaf and/or blind children and their parents.

§115.53

The state superintendent may:

(1) Provide for the education of deaf-blind children either in a special class outside the state or within the state when there are enough deaf-blind children to warrant such a class;

(2) Arrange for vocational, trade or academic training for any pupil in either the state school for the deaf or the state school for the visually handicapped qualified to take such training;

EXAMINATION

(3) Arrange for otolaryngological (hearing) or opthalmic visual examination of any pupil or prospective pupil of the schools;

(4) Apply for admission to the Wisconsin general hospital of any pupil in the state schools;

(5) Arrange for visits by members of the staff of either school to other public schools or to families of blind or deaf children, when such visits will be advantageous to blind or deaf children.

§115.54

If it appears, by affidavit, to any county judge that any blind or deaf child between the ages of six (6) and twenty-one (21), due to failure of the child's parent, guardian or custodian, is deprived of a suitable education, the judge shall order such person to bring the child before him/her. If the charges are admitted or if testimony shows them accurate, the judge may order the child sent to the school for the deaf or the school for the visually handicapped or to some class or other school for instruction.

SCHOOL FOR THE DEAF

SCHOOL FOR THE VISUALLY HANDICAPPED

§115.55

Embossed, clear-type or large-type text books acquired by the school for the visually handicapped

SCHOOL FOR THE VISUALLY HANDICAPPED

shall constitute a circulating collection for the blind and visually handicapped, kept at the school and under the supervision of the school's superintendent. All blind and visually handicapped school age children of the state may use such books upon compliance with rules made by the school's superintendent and approved by the state superintendent.

§115.76

"Child with exceptional educational needs" means any child who has a mental, physical, emotional or learning disability which, if the full potential of the child is to be attained, requires educational services to the child supplementing or replacing regular education. Children with the following conditions, in addition to children with such other conditions as the state department determines, may require educational services to supplement or replace regular education:

(a) physical, crippling or orthopedic disability;

(b) mental retardation or other developmental disabilities;

(c) hearing impairment;

(d) visual disability;

(e) speech or language disability;

(f) emotional disturbance;

(g) learning disability;

(h) pregnancy, including up to two (2) months after the birth of the child or other termination of the pregnancy; and

(i) any combination of the conditions named by the state superintendent or enumerated in paragraphs (a) to (h).

SCHOOL FOR THE DEAF

SCHOOL FOR THE VISUALLY HANDICAPPED

The state superintendent shall appoint an administrator of the division for handicapped children who shall, under the superintendent's direction, appoint personnel. The division shall be responsible for: services for children with exceptional needs who are under the jurisdiction of the state superintendent and for the Wisconsin schools for the deaf and for the visually handicapped; submission to the proper federal authorities of a state plan, prepared by the medical director of the division, and making reports required by the proper federal authorities; supervision of the education of all children, three (3) years of age and older, who have exceptional needs and who reside in any state or county operated facility; transportation of children in special education programs outside the school district, cooperative educational service agency or county where the child's parents reside.

The division shall:

(1) coordinate the development of all special education programs for children three (3) years of age and older;

(2) approve any plans for creation, expansion, reduction or discontinuance of any such program before the plans are implemented;

(3) maintain and publicize current information on all public and private special education programs within the state;

(4) develop a program for the preparation, recruitment and in-service training of personnel; and

(5) receive any federal aid available for special education programs.

A parent or a physician, nurse, social worker or administrator of a social agency who has reasonable cause to believe that a child brought to him/her for services has exceptional needs shall, after informing the child's parents of his/her intention to do so, report the child's name and other required information to the school board for the district in which the child resides or to the division for handicapped children. Any person required to be licensed or certified by statute, who is employed by the school district in which a child attends public school and who has reasonable cause to believe a child has exceptional educational needs, shall report such child and other required information, after notifying the child's parent, to the school board.

NOTICE

Pursuant to standards adopted by the state superintendent, the school district shall screen each child, upon enrollment in public school, to determine if the child has exceptional needs.

SCREENING

The school board shall appoint a multidisciplinary team of at least two (2) persons skilled in assessing exceptional needs of children and in programming for such children.

MULTIDISCIPLINARY TEAM

This team shall:

(a) upon written parental approval examine any child who has attained the age of three (3) years and who as a result of school district screening, or as a result of a report by an individual or the school board, is believed to have exceptional needs;

EXAMINATION

(b) consult with the child's parent prior to recommending a child for a special education program;

(c) recommend a child to the school board for special education if it deems it in the best interest of the child, except that a

pregnant girl may be recommended only if she is under twenty-one (21), has not graduated from high school and if both she and her parents consent; and

(d) recommend a suitable program for children it recommends for special education, including instruction in the home if a physician's written statement attests that the child is unable to attend school.

Teachers of children in special education programs shall report annually to the school district on the child's progress and the teacher's recommendation for further education of the child.

Each child of at least three (3) years of age who is receiving special education in a state or county facility shall be reexamined by the multidisciplinary team at least once every three (3) years.

Upon receipt of a recommendation for special education from a multidisciplinary team or upon a decision to remove a child from a special education program, the school district clerk shall notify the child's parent.

NOTICE

A child's parent may, within four (4) months of such notice, appeal the school board's decision, but no more than one (1) appeal may be initiated in any school year. The child's status shall not be changed until expiration of the time for the parent to request a hearing unless the parent consents, except that where the health or safety of the child or others requires the change may be made by order of the school board without prejudice to the rights of the child or parent.

APPEAL

A parent shall have access to any reports, records, clinical evaluations, etc., upon which the decision was based. At the hearing the parent may examine and cross-examine witnesses, introduce evidence and appear in person or by advocate. He/she may determine whether the hearing will be public or private. He/she may seek an independent examination of the child and if he/she is unable to afford such examination the

HEARING

INDEPENDENT EXAMINATION

school board shall reimburse him/her for the reasonable expense of such examination.

The decision of the school board at such hearing may, within thirty (30) days, be appealed to the state superintendent for a hearing upon the record and the recommendation of the multidisciplinary team. The decision of the state superintendent may, within thirty (30) days, be appealed to the circuit or county court where the child resides.

§115.83 -- 84

A school board, board of control of a co-operative educational service agency or, upon authorization of the county board, a county handicapped children's educational board may:

(a) with approval of the division establish, maintain, expand or discontinue a special educational program;

(b) employ, for such program, either full- or part-time "certified" personnel including teachers, coordinators, school social workers, school psychologists, paraprofessionals and consulting teachers "to work with any teacher of regular education programs who has a child with exceptional educational needs in a class, and any other personnel approved by the department; and

CONSULTANT

(c) provide in-service training for any teacher who has a child with exceptional educational needs in a class and any other services approved by the department.

The board maintaining special educational programs or other services shall report annually to the department (and at other times as it directs) such information as the department requires, including: the number of pupils provided service, their residence;

and the amount of time served during the school year.

A special education program may be for the school term, a summer program or for the school year. It may consist of such programs as to allow the children to attend regular education programs, one or more special schools or preschools, special sections within a school, special instruction centers, special instruction at home or at any other location or program approved by the department.

Special education programs may be supplemented by family guidance or counseling services to train members of the child's family to assist in the child's education.

§115.85

It is the responsibility of each school district to ensure that special education programs are available to all children with exceptional needs who are three (3) or over and who reside in the district. A school district may provide special education to resident children who are residents of private institutions and the board may provide special education for preschool children, subject to the approval of the state superintendent. The school district board shall place the child in an appropriate program within the district, if possible, and, if not, shall pay tuition for the child to attend a school outside the district.

Each year the school board must report to the State Department of Education the number of children placed in special programs and the screening process used to detect exceptional educational needs; a description of the programs and an evaluation of students' progress; and plans for new special education programs or for the discontinuance of any existing programs.

§115.86

Any county board may establish a special education program for children with exceptional educational needs, and upon establishment of such program a board shall be created called the "Handicapped Childrens Education Board," and shall consist of 3 to 5 persons, which may include

school board members, county board members and other electors.

This board shall have charge of all matters pertaining to the organization and maintenance of such programs, and the authority to erect buildings, employ teachers and personnel subject to county board approval. The county board may assign the functions of the board to a cooperative educational service agency operating in the county, and may contract for professional and administrative services. The school board of any district included under the administration of a board may withdraw from participating in the program upon the approval of the state superintendent. Such withdrawal is not effective until the end of the next school term.

The board may promulgate a plan for transportation of children who participate in special education programs, subject to the approval of the state superintendent.

§115.87

A cooperative educational service agency, county handicapped children's education board or school district operating a special education program shall admit a nonresident if the program is appropriate for the child's special needs.

Tuition shall be charged for nonresidents admitted to special education programs. TUITION

In counties having a population of 500,000 or more the school district shall pay tuition charges for children with exceptional educational needs.

Any two or more school districts may admit residents to the program and waive tuition for admittance.

If a child lives in a district served by a county handicapped children's education board, sufficient to benefit the child's need and the child attends a program in another district, the school district of residence shall be charged with tuition.

Upon approval of the state superintendent, the school board of any district may place a child in a special educational program outside the state.

§115.89

HEARING

If the state superintendent finds, after public hearing, that a school district has not provided programs for children with exceptional needs, she/he may recommend to the school district to remedy the denial, and require the district to submit a remedial plan and, if the plan is inadequate to remedy the denial of equal educational opportunities, she/he shall request the attorney general to proceed against the school district for injunctive or other appropriate relief.

JUDICIAL PROCEEDING

§115.91 — 115.94

The state superintendent annually shall establish criteria by which social and economic factors can be measured and on which the superintendent will make grants to agencies or school districts for programs for children with special educational needs. The state superintendent shall issue guidelines for programs serving children with special educational needs.

No application shall be reviewed by the state superintendent unless the school district or applicant has established a local advisory program council consisting of parents, community representatives, school administrators and teachers to advise on the development of applications and the implementation of approved programs.

§119.28

The board shall establish and maintain special schools for children with exceptional educational needs and shall prescribe the courses of study and the educational and other activites in special schools. Teachers may be employed to give home instruction to those unable to attend special schools. Transportation

may be provided for children attending special schools. The superintendent of schools shall prescribe the periods of instruction at special schools.

REGULATIONS

PI 11.01

The legislature shall make provision for youth with EEN ("Children with exceptional educational needs"). These children are to be identified and provided with the appropriate educational training.

Children with the following conditions, in addition to children with such other conditions as the state superintendent determines, may require educational services to supplement or replace regular education:

Physical, crippling or other orthopedic disability;

Mental retardation or other developmental disabilities;

Hearing impairment;

Visual disability;

Speech or language disability;

Emotional disturbance;

Learning disability;

Pregnancy, including up to 2 months after birth of the child or other termination of the pregnancy;

Any combination of these conditions.

Children with no EEN requiring alternative educational programming shall not be considered within this format.

PI 11.02

Children with suspected exceptional educational needs shall be referred for services by the appropriate personnel. The procedures behind the referral system are to be made known to those interested.

All districts shall adopt and implement a

process of screening for those who are suspected of having exceptional educational needs.

PI 11.04

Once a determination has been made that a child has an exceptional educational need, his/her parents are to be notified; no child is to be placed in a special education program without parental consent.

NOTICE

If there is no appropriate program operated by a public school or agency in Wisconsin, the board may seek out and place the child in any in-state non-sectarian facility.

When the situation dictates, children with exceptional educational needs may receive special education at home when there is a physician's statement in writing that the child is unable to attend regular school.

PI 11.05

"The department shall collect, maintain and disseminate student records as required by the Family Education Rights and Privacy Act of 1974."

The consent of an exceptional educational need student's parents must be obtained prior to that student's records being made available. In addition to any required student records, districts shall maintain as part of the exceptional educational need child's record the following:

1. Parental consent for district action;

2. Any data utilized by the multidisciplinary team (M-team) to reach decisions, e.g., evaluations, reports, pupil records;

MULTIDISCIPLINARY TEAM

3. The findings and recommendations of the M-team;

4. The placement decision of the board, director or program designee;

5. The individual educational plans prescribed for the child with EEN.

(1) Section 115.76 (3) (h), Wis. Stats. denotes pregnancy, including up to 2 months after the birth of the child or other termination of pregnancy, as a condition which may require special educational services to supplement or replace regular education.

(2)(a) The provisions of the Code relating to compulsory school attendance shall apply during the school term to students with EEN and may be satisfied by attendance at special education programs operated by an LEA, state or county residential educational facility or private special education services.

(b) Each district shall develop a systematic plan for providing educational services to school-age pregnant girls and mothers. This plan shall be submitted to the division and shall include:

1. Goals.
2. Processes.
3. Procedures.
4. Evaluation design.

(3)(a) Student eligibility. All girls up to the age of 21, unless they have graduated from high school, are eligible to receive special education programming during a pregnancy, including up to 2 months after the birth of the child or other termination of the pregnancy.

(b) All teachers shall hold licensure to teach in Wisconsin. All ancillary personnel shall hold licensure in their respective areas of expertise. Teachers shall be certified at the appropriate level or in specific subject areas or both. All teachers involved in the special programs specifically designed to meet the needs of the affected student shall complete an additional 9 hours of training.

(c) Alternative educational plans shall be offered to the affected students

PI 11.24

RESOURCE ROOM

A resource room program is a special education program type located in a regular school, where the teacher provides for instruction in specific skill areas and the children with EEN enrolled in this program are integrated into the regular academic programs.

(a) This program type shall have a minimum of one certified special education teacher within a particular program area assigned to a designated number of students.

(b) The enrollment for this program type may vary, with a minimum of 15 children.

PI 11.25

ITINERANT PROGRAM

Itinerant program type. An itinerant program is a special education program in which the teacher serves students in several schools. This program operates 5 days a week. The itinerant teacher serves as a consulting teacher (section 115.83 (1) (b), Wis. Stats.) to regular and special education personnel.

(a) Staff. This program type shall have a minimum of one certified special education teacher within a particular program area assigned to a designated number of students.

(b) The enrollment for this program type may vary, with a minimum of 15 children.

PI 11.26

HOMEBOUND INSTRUCTION

A homebound instruction is a special education program in which a teacher serves children with EEN in the home, a hospital, a sanitarium or a convalescent home.

(a) This program type shall require a teacher to hold a valid Wisconsin teacher's license.

(b) Enrollment within this program type shall require all of the following:

1. A physician's statement on a prescribed form from the division shall be submitted

declaring the child physically or emotionally unable to attend school.

2. The physical or emotional incapacity to attend school shall be anticipated as continuous over 30 days.

3. The M-team shall recommend that home-bound instruction is the most appropriate program to meet a child's EEN.

4. No child shall be eligible whose primary disability is defective vision, defective hearing, defective speech or other physical handicaps when special education programs and services are available unless the nature of the physical disability prevents attendance in such programs.

PI 11.28

(1) The purpose of this section is to ensure that districts will provide equal educational opportunities for children with EEN and to provide remedies in those cases where districts are not providing equal educational opportunities. PI 11.28 is intended to implement section 115.89 of the Wisconsin Statutes which requires non-complying districts to remedy the denial of equal educational opportunities.

EQUAL EDUCATIONAL OPPORTUNITY

(2) The superintendent or designee shall receive and investigate complaints and data substantiating complaints charging that a district is not providing appropriate programs.

COMPLAINT

INVESTIGATION

(a) If the superintendent deems it necessary, the complainants shall submit, within 10 days of receipt of a written request from the superintendent, data clarifying and further substantiating the complaint.

(b) The district shall submit to the superintendent, within 10 days of receipt of a written request from the superintendent, all additional information not on file with the department.

(3) The superintendent shall review all data within 30 days following receipt of data from the complainants and the district, and shall set a time, date and place for holding a pre-hearing conference and shall send notice of such conference to the parties to the complaint.

(c) If after the pre-hearing conference the superintendent determines that the district is in compliance with section 115.85 (1) and (2), Wisconsin Statutes, a complete report of the issues raised by the complainants, as well as the disposition of such issues and agreement of the parties thereto, shall be sent to the parties to the complaint.

HEARING NOTICE

(4)(a) If after the pre-hearing conference the superintendent determines that a public hearing is necessary, notice of time, date and place and purposes of a public hearing to be held in the district shall be sent to all parties. An official record of the hearing shall be kept.

(b) The superintendent shall make findings within 10 days following the public hearing in the district, including a finding that the district has denied equal educational opportunities to children with EEN or a finding that the district is in compliance relative to the specific complaints in the allegation.

(5) After the superintendent has found that a district has denied equal educational opportunities to children with EEN, the superintendent, through the division, may make recommendations to the district to

remedy the denial of equal educational opportunities, and shall order development by the district of a remedial plan and implementation of that plan within 3 months of receipt of the order by the district.

PI 11.34

(1) Children shall be determined to have a handicapping condition who have been identified, evaluated and classified as handicapped pursuant to statute. The minimum criteria for the determination of handicapping condition and eligibility for special education shall be consistent throughout the state.

(a) A transition period shall be provided for moving a child out of special education who upon re-evaluation does not meet criteria in the rules.

(2) Educational needs resulting primarily from poverty, neglect, delinquency, social maladjustment, cultural or linguistic isolation or inappropriate instruction are not included under subchapter IV, chapter 115, Wis. Stats.

(a) Mental retardation refers to significantly subaverage general intellectual functioning existing concurrently with deficiencies in adaptive behavior manifested during the developmental period.

(b) A physically handicapped child is one who has some physical defect such as affection of the joints or bones, disturbances of the neuromuscular mechanism, congenital deformities, cardiac condition, spastic and other acquired deformities. Such physical defects, organic diseases or conditions may hinder the child's achievement of normal growth and development.

(c) Medical verification that a girl is pregnant shall establish the disability and handicapping condition and the need for special education.

(d) A visual handicap is determined by functional visual efficiency including a visual fields, ocular motility, binocular vision and accommodation.

(e) An auditory handicap is determined by medical (otologic) and audiologic evaluations.

(f) Speech and language handicaps are characterized by a delay or deviance in the acquisition of prelinguistic skills, or receptive skills or expressive skills or both of oral communication.

(g) The handicapping condition of learning disabilities denotes severe and unique learning problems due to a disorder existing within the child which significantly interferes with the ability to acquire, organize or express information.

(h) Classification of emotional disturbance as a handicapping condition is determined through a current comprehensive study of a child, ages 0 through 20, by an M-team.

Emotional disturbance is characterized by emotional, social and behavioral functioning that significantly interferes with the child's total educational program and development including the acquisition or production, or both of appropriate academic skills, social interactions, interpersonal relationships or intrapersonal adjustment.

(i) A multiple handicapped child is one who has 2 or more handicapping conditions leading to EEN which may require programming considerations and are determined by an M-team composed of specialists trained, certified and experienced in the teaching of children with the EEN.

2. Programs for Exceptional Children

Statutes

§21.1-63

"The board of trustees . . . may deny admission to any child who:

"(a) has completed the twelfth grade; or

"(b) has such a mental or physical disability that based upon a physician's certificate the board believes such child could not reasonably benefit from the programs available or the attendance of such child would be inimical to the health, safety, or welfare of other pupils; provided that the board shall make the best possible provision for suitable and adequate education of such child in accordance with the laws of this state."

§21.1-284

All school-age children with "a mental, physical, or psychological handicap or social maladjustment which impairs learning, shall be entitled to and shall receive a free and appropriate education in accordance with his[her] capabilities."

§21.1-285

The state board, jointly with each local board of trustees, has general supervision and responsibility for the education of all children in the state with handicaps which impair learning. "The state board shall adopt reasonable rules and regulations to assure that each such child receives a free and appropriate education in accordance with his[her] capabilities." RULEMAKING

§21.1-286

Each school district having any resident school-age handicapped children shall, subject to state board rules and regulations, provide for the appropriate diagnosis, evaluation, education or training and necessary related services, which may include room and board, RESIDENT SCHOOL

for such children. Any district not able to provide the necessary and appropriate programs and services shall contract with another school district or agency to obtain them. If the programs and services cannot reasonably be provided by the district or by interdistrict contracts, it is the responsibility of the state board to assist local boards of trustees in arranging for the appropriate educational programs and services either within or without the state.

§21.1-287;288

The state board of education shall maintain and operate the school for the education of the deaf and shall provide adequate staff, equipment and supplies for the proper operation of the school.

SCHOOL FOR DEAF

§21.1-289

The state board has the general supervision of "the deaf and blind and all other persons with a physical disability which prevents reading in the normal manner and, insofar as funds are available, the board shall provide "such educational and other services as it deems necessary to help such persons to help themselves to become and remain useful citizens of the community."

The state board of education may hire personnel and purchase books, equipment and supplies to accomplish this purpose.

REGULATIONS

Chap. II, Sec. 5

The contract of an initial contract teacher may be terminated by the State Board upon notification in writing by the Director of the School for the Deaf. An initial contract teacher shall not be entitled to a hearing or reasons for such termination.

TERMINATION

Chap. II, Sec. 6

The contract of a continuing contract teacher may be terminated by the State Board through a written notice of a recommendation of termination together with written reasons therefore from the Director of the School for the Deaf to the continuing contract teacher, on or before March 15 of any year. Any continuing contract teacher shall be entitled to a hearing before the board.

TERMINATION

HEARING

Chap. II, Sec. 7

The suspension or dismissal of any teacher may be initiated by the Director of the School for the Deaf, submitting to the teacher a written notice of such dismissal or suspension, together with the written reasons therefore. Any such teacher shall be entitled to a hearing.

Chap. III: Rules of Practice Governing Hearings

Hearings concerning contested terminations, suspensions, or dismissals of teachers and pupils of the Wyoming School of the Deaf shall follow the procedures given in Chapter XII, Appendix B, of the Wyoming Educational Regulations for Contests before Boards of Trustees.

SUSPENSION

DISMISSAL

Chap. XI, Sec. 1

Each school district shall adopt, submit to the Office of Exceptional Children and implement local regulations and procedures regarding the operation of the district's education porgrams and services for handicapped children. The district has latitude in determining the content of its regulations. Some specific criteria are necessary. Provisions which must be included in district regulations are given in the following sections.

RULEMAKING

Chap. XI, Sec. 2

PLACEMENT

To the maximum extent appropriate, handicapped children are to be educated in regular classes with children who are not handicapped. All placements and procedures which remove handicapped children from the regular educational environment shall occur only when learning problems are of such nature and severity that education in regular classes, even with the use of supplementary resources cannot be achieved satisfactorily. All placements must be appropriate to individual needs; educational goals shall be specified via an individual education plan.

Chap. XI, Sec. 3

IDENTIFICATION

Each school district shall maintain a system to identify handicapped children who are residents of the district, to assess their educational needs, and to implement appropriate educational programs.

The identification program should include: pre-school children, school-age children not receiving an education, handicapped children attending school but not receiving full or appropriate educational services they need, and school-age youths who have left school but who have needs which the school system can meet.

Chap. XI, Sec. 5

RULEMAKING

Regulations shall be adopted for referring children for assessment who are suspected to have learning and/or behavorial problems, and for confidentiality during this process.

Chap. XI, Sec. 6

Each exceptional child placed in a special instructional program shall receive an individual assessment conducted by a multidisciplinary team of certified, endorsed, or licensed personnel using whatever instruments and procedures

are appropriate. All assessment materials and procedures shall be free from social or cultural bias. Results shall be interpreted to parents, guardians, or surrogate parents in language they understand. In the event of misclassification or misplacement, all indications of the misclassification or misplacement shall be removed from the child's school records.

Chap. XI, Sec. 7

All information obtained in assessment shall be translated into appropriate written recommendations and prescriptions. An individual educational plan shall be written, implemented, monitored, evaluated, and continuously updated for every handicapped child. It is suggested that the educational plan include: long and short-term goals, measurable objectives to be attained, educational strategies and materials, programs for assisting parents, guardians, or surrogate parents with their child, and career and education goals and strategies.

Chap. XI, Sec. 8

Each school district shall establish at least one Child Study Committee or equivalent group, and adopt regulations and procedures to facilitate the thoughtful evaluation, placement, progress review, and reassignment of handicapped children.

It is suggested that such a Committee be established in every school in which handicapped children are provided special instructional services. The core members should represent the areas of exceptionality, regular education, pupil assessment, health and administration.

Chap. XI, Sec. 9

School districts should adopt reasonable criteria for the graduation of the handicapped from high school. It is suggested that students, who meet these criteria be graduated with a standard high school diploma.

DIPLOMA

Chap. XI, Sec. 10

IN-SERVICE TRAINING

Staff members of the district shall receive ongoing in-service preparation in the education of handicapped children.

Chap. XI, Sec. 11

PRIVACY

School district regulations to protect the privacy of students and parents relative to school records shall apply to the implementation of all rules concerning handicapped students.

Chapter XII: The General Regulations Regarding the Eligibility of Handicapped Children

Prior to placing a handicapped child in a special instructional program, the district shall obtain written documentation of the need for the placement by an individual assessment, appropriate to the child's age, culture and socio-economic background. Documentation shall include assessment of hearing, vision, and current educational functioning (strengths and weaknesses) in the cognitive, socio-emotional, academic, and motor areas, and recommendations concerning placement.

(A child who is a new resident of the school district and is known to have been in a special education program operated by the sending district, but where assessment records have not yet been received, may, with written parental consent and endorsement of the Child Study Committee, be provisionally placed in a special instructional program for handicapped children until the records are received, for a period not to exceed 25 school days.)

The assessment of a child who does not have adequate English usage to express school-related abilities should be conducted by personnel knowledgeable about the child's

general culture and fluent in both English and the language in which the child is most competent. When such personnel are unavailable, a language interpreter shall assist communication between the diagnosticians and the child.

Prior to placement, the child's parents, guardians, or surrogate parents shall give written consent and the Child Study Committee or equivalent group must recommend placement.

Each child shall have an individual educational plan, and a program to monitor and evaluate progress shall be implemented.

PLACEMENT

Each child's continued placement shall be determined at least annually by a Child Study Committee or equivalent group. Each child shall be reevaluated every two years. Continuation in the program shall end when the child achieves the goals prescribed in his/her educational plan and can function in the regular school program.

3. Vocational Education

3. Vocational Education

Statutes

§16-3-18

The state board and the state superintendent of education shall co-operate with the federal board for vocational education in administering federal programs relating to vocational education.

§16-4-17

The state superintendent shall prepare rules and regulations for the administration of the vocational education laws. RULEMAKING

§16-37-1; 3

Alabama accepts the federal legislation concerning vocational education. The state superintendent of education is in charge of vocational education and shall enforce all rules and regulations made by the state board of education.

§16-37-4

The state board of education has full authority to formulate plans for the promotion of vocational education in agricultural, trade, industrial, and home economics subjects and shall provide for the preparation of teachers in these subjects. The board has authority: to make studies on vocational education, to aid local communities in establishing schools or classes in these subjects, to provide for the certification of teachers and determine the qualifications for persons training vocational teachers.

§16-37-5

Any county or city board of education may cooperate with the state board of education in establishing vocational schools or classes.

§16-37-6

In its annual report to the governor, the state board of education shall report on the condition of vocational education in Alabama.

County and city boards of education may jointly maintain and operate vocational high schools. Resident pupils of the co-operating boards of education will not be charged tuition. The cooperative agreement shall provide for a staff, setting forth its powers and duties, and for an advisory board composed of members of each cooperating board.

3. Vocational Education

Statutes

§15-1051 --1054

Any high school with sufficient room and facilities may apply to the state board of education for permission to institute classes in vocational education. The high school shall employ trained teachers who meet qualifications set by the state board. The classes will be free to all resident pupils but nonresident students may be charged tuition of three dollars per month. The state board of education will administer the vocational education program and cooperate with the federal government in dispersing funds.

Any school district may organize its own vocational education program and shall receive state and federal aid to enable it to do so.

§15-1062 --1064

The Arizona youth farm loan fund shall be administered by the board of vocational education to provide financial aid to young men under 25 who are students or former students of vocational agriculture. The board of vocational education has the power to collect or cancel claims and acquire property as provided herein.

§15-1091 — 1093

The state board of vocational education shall establish an advisory council for technical-vocational education made up of members recommended by the director of vocational education. The advisory council shall help to plan a program and curriculum for technical-vocational education. If a school district meets the minimum standards recommended by the advisory council, it may receive state aid to establish a vocational education program. Districts which may apply for state funds are high school districts (one or more).

ADVISORY COUNCIL

§15-1501

All students are required to wear eye protective devices while engaged in vocational classes or laboratory

EYE PROTECTIVE DEVICES

activities. The devices will be provided by the school district. The state board of education shall make rules and regulations to enforce this provision.

I.District Board of Trustees; Statute §15-448

IV.A.; Statute §15-1501

3. Vocational Education

Statutes

§80-460--463

Vocational-Technical High School Districts may be formed, governed by a state board for vocational education which shall have these powers: establish criteria "for size and location of sites for the proposed vocational-technical high school; nature and extent of the programs, and size and type of buildings required ; develop a tentative budget"; advise on the "changes and expansion of the program ; establish the required minimum qualifications for the staff of the vocational-technical high school" and "approve budgets for area vocational-technical high schools."

The area schools shall be controlled by a "board . . . composed of a representative appointed by each local school board in the special district." Each member shall serve a five year-term. The board shall: "determine the educational program"; oversee employment of administrative and teaching staffs; administer grants from public or private institutions; acquire property and "exercise all other powers . . . reasonably necessary to the establishment, maintenance, and operation of a . . . school. Seventy-five per cent (75%) of the local school boards in the proposed district may petition for an election to determine whether such district shall be formed. The proposed district must be approved by the State Board for Vocational Education."

§80-2557--2560.1

The state board for vocational education shall administer federal funds slated for "assisting the state and/or local school districts in providing for the extension of vocational education of less than college grade in the field of vocational-technical and adult education for persons sixteen years of age and over."

The board shall "establish or designate one or more area vocational-technical and adult education schools [to train persons] . . . in . . . areas which may be prescribed by the Congress." If state and/or federal funds are not available for such programs, the Board may direct a local district to build such educational facilities. In determining the schools' location and the courses of instruction the Board shall consider: "trends in industrial development; concentration of population; concentration of industry; natural resources and reasonable distance for people in all areas of the State." The Board may also authorize the establishment of branches of vocational schools or offer vocational-technical instruction in public schools and/or in other community facilities.

§80-2561

FACILITIES

The Board shall "purchase, or lease, or contract buildings, land, equipment, machinery, and supplies necessary for the teaching of trade, vocation, and/or other federally aided adult courses of less than college grade." It shall employ persons in these schools and set salaries. Those persons shall be governed by the department of education.

§80-2562

TUITION

The state board for vocational education may set student fees for vocational-technical schools and adult education courses "according to the type of course of instruction and the length."

§80-2569.1

The State Board of Vocational Education shall administer occupational education programs. A State Advisory Council on Vocational Education shall be responsible for those education programs and local educational agencies may appeal the "policies, procedures, programs, or allocation of resources" for said programs.

ADVISORY COUNCIL

The Advisory Council for Voc-Tech Education shall consist of twenty-four members each serving a three-year term. Vacancies shall be filled within fifteen days by appointment. At least one Council member shall represent each of these classifications: (a)" familiar with vocational needs and the problems of management in the State; (b). . . familiar with the vocational needs and the problems of labor; (c). . . familiar with the administration of state and local vocational programs;" (d) . . . knowledge or experience . . .[in] . . . vocational education; (e) . . . familiar with programs in comprehensive secondary schools;"(f) representative of "local education agencies," (g) representative of a school system with many "academically, socially, economically, and culturally disadvantaged students; (h) a person representing the general public"; (i) representative of "a community or junior college or other institution of higher education which provides vocational technical education; (j) the executive director of the Arkansas Industrial Development Commission ; (k) the director of the Arkansas Manpower Council; (l) the director or associate director of the Arkansas Rehabilitation Service, (m) a member of the Arkansas Senate," (n) and "a member of the Arkansas House of Representatives

Consideration shall be given to representation from all areas of the State . . . [N]o member of the State Board for vocational education may serve as a member of the Council."

EVALUATION

The Advisory Council shall promote interest in vocational-technical education, advise the State Board on policy issues, evaluate vocational-technical education programs and report on such an evaluation and make recommendations for annual and long-range plans.

The General Assembly shall authorize federal and/or state funds for the Council's operation.

Members shall receive a $25.00 per diem fee and shall be reimbursed for expenses incurred carrying out Council business.

§80-2587--2589

The state board of vocational education shall establish programs for training plumbers, "in cooperation with, and the approval of, the Plumbers Licensing Division of the State Board of Health and local training committees." Such courses shall prepare students for the licensing examination for plumbers. They may be incorporated into any high school or community college vocational education program. The state board of vocational education shall set rules in cooperation with local plumbing training committees establishing the level of instruction. Instructors "shall be approved by the training committee and the state board for vocational education. A student may receive credit towards said course for a summer apprenticeship with a licensed master plumber. Each plumber trainee shall apply to the State Board of Health for a temporary card, which will allow him/her to work under a master plumber's supervision.

Upon satisfactory completion of said course and passing the necessary examinations a student is eligible for a plumber's license. "Training programs may be taught by a master or journeyman plumber." Courses of study shall be prescribed by National Plumber Standards."

IV.G.; Statute §80-1655

IV.J.; Statute §80-1656

3. Vocational Education

Statutes

§8000 -- 8007

This section provides for the creation of the California Advisory Council on Vocational Education and Technical Training, and it shall consist of:

(1) Director of Employment Development;
(2) a member of the Assembly Education Committee;
(3) a member of the State Education Committee; and
(4) 27 members appointed by the Governor. All members are to serve varying terms. All members of the council who are also members of the Legislature shall work with it as long as that work does not interfere with Legislative duties, and they shall constitute a joint legislative committee.

APPOINTMENT

The members appointed by the Governor shall include: (a) One person familiar with the vocational education needs and problems of organized labor; (b) one person familiar with the vocational needs and problems of management; (c) one person representing the state industrial and economic development agencies; (d) Three persons representing higher education; (e) one person familiar with the administration of state and local vocational education programs; (f) one person having special knowledge and expertise with respect to vocational education who is not involved in such programs; (g) one person familiar with programs of technical and vocational education, including programs of comprehensive secondary schools; (h) one person representing local community college agencies; (i) one person representing secondary education agencies; (j) one person representing community college governing boards; (k) one person representing secondary school governing boards; (l) one person representing elementary school governing boards; (m) one person representing county offices of education; (n) one person representing the manpower and vocational education agencies in the state; (o) one person representing school districts with large concentrations

of academically and culturally disadvantaged pupils; (p) one person with special knowledge and experience, with respect to the special education needs of handicapped persons· (q) two persons who are students currently enrolled in a vocational education program; (4) two persons representing a cross section of industrial, business, professional, agricultural, and health service occupations; (s) two persons representing the general public, one knowledgeable of the disadvantaged; (t) three persons representing private postsecondary education institutions not provided for.

Members of the council shall serve without compensation.

The council shall have the following duties: (1) advise the proper boards in the preparation of long range plans, policy matter, etc.; (2) prepare and submit annual evaluation reports, as well as statements describing its separate consultations; and (3) evaluate programs of occupational education and training maintained by local education agencies, and publish and distribute the results.

The council is authorized to obtain the services of such personnel as may be necessary.

There shall be a vocational education staff that may perform the duties of data gathering and analysis. This staff shall maintain inventories, evaluate programs, and facilitate the preparation of reports and the like.

§8020 -- 8035

There shall be created a number of approved regional adult and vocational education councils with predetermined boundaries. The superintendent and chancellor shall jointly publish guidelines for application by school districts for the formation of these councils.

High school districts, unified school districts, and the county office of education shall participate in a regional adult and vocational education council, with regulations prescribed to them.

Each regional adult and vocational education council, shall be composed of 11 members, as follows:

(a) Four representatives of high school or unified districts selected by vote by the governing board; (b) Four representatives of community college districts or districts within county boundaries, selected by governing board; (c) a representative of a county office of education selected by the governing board; (d) a representative of a prime sponsor; (e) a representative of a private post-secondary education institution selected by the administrators of the private postsecondary education institutions in the region. Members shall serve two year terms. The regional adult and vocational education council shall appoint a vocational and continuing education advisory committee of 18 members from seven different agencies, including handicapped teachers, students, etc. They may retain staff to assist.

Each council shall meet to review programs within the system, as well as plans concerning vocational education, and shall make recommendations.

The council, in exercise of its duties may: (a) prevent unnecessary duplication of courses or services; (b) plan for short-term improvement of vocational education; (c) meet on a regular basis no less than once every two months; and (d) file reports of its activities. The council will receive necessary information from the Superintendent of Public Instruction and Chancellor of the California Community College, who will also submit reports regarding the council to the Legislature.

§8070

The governing board of each school district participating in a vocational education program shall appoint a vocational education advisory committee consisting of one or more members of the general public knowledgeable on the subject.

APPOINTMENT

§8080

Determination of need for: (a) a regional occupational center shall be established by the governing body of the agency maintaining the center; (b) a high school by the governing body of the district maintaining the high school.

§8090 -- 8100

CONTRACTS

School districts may enter into contracts with private business, trade and technical schools to provide training and retraining programs when such organizations have facilities available for this purpose. Federal, state, and local funds may be used for such programs.

Any school district maintaining a regional occupational center may contract with a private post secondary school to provide vocational skill training, provided that such an agreement or contract meet specific guidelines herein outlined.

Certain qualifications necessary for public owned school buildings are not necessarily required of non-public school buildings pursuant to this article.

Courses for vocational training must be approved by the Superintendent of Public instruction or the board of governors as the case may be.

§8120 -- 8121

The development of programs in vocational educational curriculum is encouraged and pursuant to this encouragement a vocational manpower management information system is to be established in order to provide comprehensive information on current and projected occupational demand and supply relationships in local labor markets.

§37113

"The governing board of every district maintaining a high school shall, subject to space being available, admit pupils regularly enrolled in nonpublic schools to enroll in vocational and shop classes and in classes relating to the natural and physical sciences."

§48227--48229

A minor may be assigned to a vocational course in a place of employment in lieu of the regular school course. Prior to assignment, the principal of the school which the minor attends and has been attending during the preceding year shall recommend the assignment, which shall be approved by the state superintendent, and the minor shall be issued a work permit. A minor assigned to a vocational course shall remain under the jurisdiction of the school last attended and may at any time be returned to that school when in the minor's best educational interests.

§49320

The number of students in any industrial education facility shall not exceed the number of basic work stations (defined as assigned locations where a student normally spends class time performing the functions necessary to meet the objectives of the course) designed for the number of students assigned, as determined by the local governing board.

§51760

A governing board maintaining a high school may: provide for instruction contributing to success in employment through courses of work experience education, provide for guidance and supervision to insure maximum benefit to students in work experience education courses; arrange coordinate, and award credit for work experience education courses and employ necessary personnel; and provide for the district to purchase liability insurance for students enrolled in these courses or require students to purchase insurance and pass the costs to the district.

§51761 -- 51762

The state board shall establish standards for work experience education including, but not limited to, selection and approval of work stations, supervision of pupils, credit, and guidance procedures.

The Department of Education shall adopt rules necessary to implement these standards.

§51763 -- 51764

All laws or rules applicable to minors in employment relationships are applicable to students enrolled in work experience education courses.

Work experience education includes the employment of pupils in part-time jobs approved as having educational value for students and coordinated by school employees.

§51765

A governing board which maintains a work experience education program in which mentally retarded pupils are employed in part-time jobs may use funds derived from any source, to the extent legally permissible, to pay the wages of these pupils.

The Legislature declares that the authority granted by this section is necessary to ensure that the work experience education program will continue to provide maximum educational benefit to students, particularly mentally retarded pupils, and that the program is deemed to serve a public purpose.

§ 1766

APPRENTICESHIPS

Work experience education involving apprenticeable occupations shall be consistent with §3070 et seq. of the Labor Code and with standards established by the California Apprenticeship Council.

§51767 -- 51768

A governing board may provide for work experience education programs in contiguous areas outside the district.

A governing board providing work experience and work study education may provide for employment under such program of pupils in part-time jobs located in areas outside the district and such employment may be by any public or private employer. Such districts may pay wages to persons receiving such training whether assigned within or without the district, except that no payments may be to or for private employers, and may provide workers' compensation insurance.

§51769

The school district or county superintendent under whose supervision work experience education, or occupational training classes, are provided shall be considered the employer under §3200 et seq. of the Labor Code of persons receiving such training unless such persons are being paid a cash wage or salary by a private employer, or unless the person or firm under whom such persons are receiving work experience or occupational training provides workers' compensation insurance. Whenever work experience education, or occupational training classes, are under the supervision of a regional occupational center operated by two or more districts, the district of residence shall be deemed the employer.

§51770

Sections 1292, 1293 and 1294 of the Labor Code shall not apply to work experience education programs, provided that the work experience coordinator determines that the students have been sufficiently trained in the employment otherwise prohibited, if parental approval is obtained, and the principal or counselor of the student has determined that the progress of the student toward graduation will not be impaired.

§51790 -- 51792

AVIATION EDUCATION

The Department of Education shall aid local districts to develop a program of aviation education.

Each governing board is encouraged to develop aims for aviation education to include: integration of aviation concepts throughout elementary school with instruction in science, social studies, and arithmetic, aviation experiences in junior highs in social studies, science, and arithmetic; and elective courses in high schools including air transportation, vocational training, economic, social and political implications of aviation, the history and science of flight, and flight experience where such is feasible. Periodic reports concerning the

program shall be made to the Department of Aeronautics.

The Department of Aeronautics may assist in the selection of airports and pilots used in aviation education programs. It is authorized to make available to public schools offering flight experience as part of the regular curriculum a basic insurance program and to assure that adequate supervision and precautionary measures are taken by flight school operators. Governing boards may participate in the insurance program and pay from district funds a pro rata share of its cost.

§52300 -- 52332

REGIONAL CENTERS

The Legislature intends that qualified students be provided with the opportunity to attend a technical or vocational school or program, regardless of the geographical location of their residence. Regional occupational centers or programs (meeting the criteria and standards of instruction in regional occupational centers, but not necessarily situated in one single location) shall serve this purpose.

A regional occupational center or program may be established: by one or more county superintendents, with state board consent; by the governing boards of any school districts maintaining high schools in a county, with the consent of the state board and of the county superintendent; by a governing board maintaining 500 or more schools; by two or more school districts maintaining high schools through the use of the resources of a community college or colleges serving the same geographic area, with the consent of the state board and of the county superintendent; by two or more school districts pursuant to §6500 et seq. of the Government Code, in which case the county superintendent may, with state board consent, maintain a separate regional occupation center or program.

Notwithstanding the above, a single school district in a class 1 county, having an average daily attendance of 50,000 or more, or a single school district located in a class 2 county, having an average daily attendance of 100,000 or more, may apply to the state board through the county

superintendent for permission to establish a regional occupational center or program. The state board shall, within 90 days, prescribe a procedure, whereby the district may establish a center or program.

A school district or county superintendent, sponsoring a regional occupational center or program, shall conduct a job market survey in its geographical area, in cooperation with the local office of the Department of Human Resources Development, prospective employers, the district's advisory committee on vocational education, and the appropriate advisory committee for each of the proposed training programs. The survey shall include an analysis of existing vocational and occupational training programs in the area.

The board or superintendent shall determine whether or not the survey and analysis justifies the proposed skill training and whether the skill training will be offered through a regional occupational center or program or through a contract with an approved private post-secondary school, pursuant to §8092.

A regional occupational program or center may provide day, including Saturday and Sunday, and evening full-time and part-time vocational education programs for minors and adults, the year round.

It may include within its programs a sheltered workshop.

It may permit the establishment and operation of such business, commercial, manufacturing or construction activities as will best serve the aims of vocational education (including the sale of products or services to private or public corporations or to the general public) if all the following conditions have been complied with: it shall be only for the education or training of students enrolled in the center or program; it shall be approved by the appropriate agency of the Department of Education according to requirements of the State Plan for Vocational Education and rules adopted by the state board; it shall be operated on a nonprofit basis, with all revenues restricted

to cover instructional and operating costs; it shall obtain the approval of the appropriate trade associations and of the county labor council. However, it may be conducted without the need to obtain local business licenses or permits or to pay local business taxes. Attendance of students in any such activity shall be credited to the center or program for apportionment purposes, except that the state superintendent shall deduct from such apportionments any revenues earned by the facility in excess of operating costs.

To the extent feasible, business, commercial, manufacturing, or construction activities established in a center or program shall be made to work cooperatively with sheltered workshops located in the area of such programs.

A regional occupation center shall be established at a readily accessible place selected to serve the pupils who will attend the center.

The governing board or county superintendent establishing a center or program may acquire sites, plan, construct, purchase, or lease buildings, and equip them. Buildings of not more than one story or equipment for a term not to exceed 10 years may be leased without complying with other provisions of this code.

A regional occupation center's or program's curriculum shall be subject to the approval of the department and shall comply with the State Plan for Vocational Education. The state board shall establish guidelines and criteria differentiating between causes appropriate for regional occupational centers or programs and those appropriate for high schools.

Credits earned from a center or program may be applied toward fulfillment of requirements for a high school diploma. A pupil who has attended a center or program full-time and completed the prescribed course of study may be conferred with a high school diploma.

DIPLOMA

A school district which by itself or in cooperation with other districts maintains a regional occupation center or program may admit to the center or program pupils who reside in the district or in any of the cooperating districts

and pupils residing in other districts under interdistrict attendance agreements pursuant to §46600 and §46605.

A county superintendent maintaining a regional occupational center or program may admit to the center or program: any pupil eligible to attend high school or adult school in a district subject to the county superintendent's jurisdiction and who resides in a district not maintaining a center or program and pupils residing in the county but outside of districts participating in the county regional occupational center or program (under §46617.5).

A county superintendent may authorize pupils who reside in districts participating in the center or program conducted by the county superintendent to enroll in other centers or programs where it is deemed in the pupils' best interests under an attendance agreement specifying that the county superintendent authorizes the center or program to be credited with the attendance of such pupils.

No pupil shall be admitted to a center or program, unless the county superintendent or governing board maintaining it determines that the pupil will benefit and approves the pupil's admission. A pupil may be admitted on a full-time or part-time basis.

Any visually handicapped, orthopedically handicapped, or deaf person who has been graduated from high school may attend a regional occupational center or program on the same basis as a high school pupil. Additional special instruction and support services shall be provided to such persons.

A pupil enrolled in grades 10, 11, or 12 who is also attending a regional occupational center or program may be excused from attending physical education courses by the governing board of the district in which the pupil is enrolled, if such attendance resulted in hardship because of travel time involved. If so excused, the pupil's minimum schoolday in the regular high school is 180 minutes.

The county superintendent or governing board maintaining a regional occupational center or program may accept and expend grants from the federal government or from other public or private sources for the purpose of this chapter.

Units of average daily attendance in regional occupational centers or programs are the quotient arising from dividing the total number of days of pupil attendance during the fiscal year by 175. Attendance in sheltered workshops in centers and programs (pursuant to §52305) shall not be considered in computing units of average daily attendance.

Any district or county superintendent operating a 60-minute regional occupational program shall be credited with one-third of a unit of average daily attendance for each student in the program and two-thirds of a unit of average daily attendance in a 120-minute program.

SCHOOL DAY

The minimum day in a regional occupational center is 180 minutes and in a regional occupational program is 60 minutes.

The Department of Education shall annually submit to the Legislature an evaluation of the regional occupational centers and programs for the preceding fiscal year, including an analysis of costs of individual centers and programs, their enrollment, numbers of graduates and trainees, dropout rates, and placement data.

Any school district, in a county contiguous with the Republic of Mexico, and any county, contiguous with the Republic of Mexico, which maintains a regional occupational center may enter into a student exchange agreement with a trade and technical training school located in Mexico.

In computing average daily attendance of the center, the state superintendent shall include any Mexican students if the agreement provides as far as possible for the exchange of students on a one-for-one basis, if the educational services provided the U.S. students in Mexico are at least equivalent in quality to services in the regional occupational center, and if the state superintendent has approved the agreement prior to its operative date. No average daily attendance shall be credited to the center for U.S. students while in attendance at the Mexical school.

A governing board of a district in a county contiguous to the State of Arizona or a county superintendent of

such a county which maintains a regional occupational program may enter into an agreement with a public or private educational agency in Arizona to provide students enrolled in the program vocational or technical training which is not otherwise available to such students, due to geographical isolation. Such training shall be approved by the state superintendent and conform to the State Plan for Vocational Education. The attendance of such pupils shall be included in computation of average daily attendance and credited to the county school service fund of the county of residence.

A governing board or county superintendent operating a regional occupational center or program may maintain center or program classes in industrial or school facilities located outside the district or county. The state superintendent shall be notified prior to the establishment of such classes.

No instruction shall be given in a regional occupational center except by a certificated teacher.

§52350 -- 52352

DROP OUTS

To curtail the rate of pupil dropouts or premature enrollment terminations, the Legislature intends that special emphasis be given to prevocational training courses.

A county superintendent or governing board maintaining grades 7, 8 or 9 may, with the state superintendent's approval, establish a program in which pupils whose academic attainment level and behavior indicate that they will probably terminate enrollment prior to completion of grade 12, but who demonstrate aptitude for prevocational training, are identified by various means and offered prevocational courses as well as counseling and guidance.

The county superintendent shall have primary authority to establish the program within the county. Should he/she fail to do so after the request of a governing board, the governing board shall have full authority to do so.

Notwithstanding the mandatory course of study in grades 7, 8 and 9, the state board shall prescribe the

particular courses to be waived in the case of pupils enrolled in prevocational training. Such courses shall be those of less importance in connection with instilling in pupils traits necessary to good citizenship.

Any pupil identified as eligible shall voluntarily, without duress or coercion, and with the consent of a parent or guardian, be authorized to elect to enroll in prevocational courses as follows: in grade 7, one such course per semester; in grade 8, two such courses, provided that the pupil successfully completed any such course during the preceding school year, and in grade 9, three such courses per semester, provided the pupil successfully completed any such course during the preceding school year.

It shall be unlawful for any school officer, employee or board to willfully cause or aid in the forced enrollment of a pupil in a prevocational course as a disciplinary measure, or to cause or aid in effecting any distinction in the form of any diploma issued at graduation based on a pupil's having enrolled in the program.

The state board shall adopt rules prescribing the particular means to be used in identifying pupils who may be eligible for prevocational training and all other rules governing such programs.

RULEMAKING

The state superintendent shall administer §52356 et seq. and have power of review and approval of any prevocational programs.

§52370 -- 52374

The governing board of any high school district may maintain on Saturday special day and evening classes in vocational training provided for by any federal program of national defense or any federal agency, acting through the Department of Education.

With the state superintendent's approval, pilot programs may be established for the maintenance on Saturday of classes in vocational training, which may be part of, but are not limited to, a federal program of national defense or any federal agency.

In either case, no apportionments from state funds

based on average daily attendance in such classes, whether maintained on Saturday or other days, shall be made where the total cost of classes is borne by the federal government or any federal agency.

A governing board may establish and maintain, in connection with any high school under its jurisdiction, cooperative vocational courses in accord with state board standards.

AGRICULTURE COURSE

The governing board of a high school district maintaining an agriculture course may transport pupils and instructors to and from any classes or places of work, whether within or without the district, in the same manner and subject to the same limitations as in transporting pupils to and from school.

The duties and powers of a governing board with respect to any high school established in the district prior to August 14, 1929, and not supported in whole or in part by any funds derived from the levy of any district tax may, with the state board's approval, be transferred to the Chief of the Division of Vocational Education in the Department of Education who may appoint any qualified person to exercise supervision over the school.

§52382 -- 52394

A program of summer vocational and technical education for pupils who have completed grades 9 to 12 may be established by any governing board maintaining a high school. It shall consist of training in skills in which ample opportunities for gainful employment are to be found and may include work experience involving the gainful employment of pupils. Limitations on the employment of aliens by public agencies shall not be applicable to the employment of pupils in such programs. Wages earned by pupils in such programs shall be paid weekly or, if not possible, biweekly.

No average daily attendance of pupils in such a program shall be credited unless the program has been approved by and is conducted according to rules of the department of education. Districts desiring to participate

shall submit applications describing in detail the proposed content and operation of summer programs.

Each participating district shall submit an annual report and evaluation of the conduct of its summer programs, on forms provided by the department.

With department approval, a governing board may contract with and receive funds from any other public or private agency or cooperate with institutions of higher learning for purposes of such programs.

A governing board offering an approved program may no more than 10 weeks prior to the beginning of the program for the forthcoming summer, employ staff to perform tasks necessary to implement the program.

RULEMAKING

The department shall adopt rules to implement §52382 et seq., including standards for the programs, and shall develop, in cooperation with districts, program cirriculums. The department shall annually report to the Legislature on the operation and results of the programs.

From funds appropriated by the Legislature, a district shall be reimbursed for the current expense actually incurred by the district per pupil in average daily attendance participating in the program during the preceding fiscal in excess of the foundation program amount during the year for such a purpose.

§52700--52706

AGRICULTURE COURSE

A governing board may, for the purpose of providing practical instruction in agriculture, establish one or more school farms. The cost of purchasing and equipping a school farm and all other costs not met from the receipts of the farm's operation including the cost of its supervision shall be charged against district funds.

Moneys received from the sale of farm products shall be paid into the county treasury to the credit of the district's general fund or may be deposited in an account established for each farm or for all farms in the district by the governing board. All farm receipts may be withdrawn from the general fund and deposited in the account for expenditure for the operation and maintenance of the farm or farms.

The governing board may designate an employee to have custody of such an account.

The governing board may buy feed, livestock, and materials and supplies for a farm and may sell produce, livestock and other products of a farm in accordance with regulations adopted by the board.

REGULATIONS

§10071

WORK EXPERIENCE

Work experience education shall consist of:

a) exploratory work experience education guiding the vocational growth of the student by affording him/her an opportunity to sample a variety of work conditions; general work experience education b) supervised part time paid employment to develop skills and desirable work habits; c) vocational work experience education -- extends vocational learning opportunities through part time paid employment.

All three such programs must be submitted to and approved by the State Department of Education. Further requirements for these programs are detailed in sections 10072-10078.

§10090-91

COMMUNITY CLASSROOM

A community classroom is a program which conducts occupational training in various physical sites. Its general purpose is to expand occupational opportunities by utilizing facilities other than the public schools. The program shall be conducted under the immediate supervision of a certificated instructor. The number of pupils enrolled per hour, per certified instructor, shall not exceed 30. hours of training the instructor shall meet personally with each student. The instructor shall maintain records of each student's progress.

§10100

COOPERATIVE VOCATIONAL EDUCATION

Cooperative vocational education programs shall comply with the procedures set forth in the State Plan for Vocational Education. Each responsible local

education agency (LEA) shall comply with the requirements set forth in this article. An advisory committee shall be designated and composed of employers, and individuals having knowledge of cooperative vocational education. To qualify a student must be at least 16 years of age and a full time student.

§ 11441

PREVOCATIONAL STUDY

The eligibility of a student to elect a prevocational study course shall be determined by the principal upon recommendation from the pupils teachers and counselors according to Section 6034 of the Education Code. Such recommendations of the students aptitude for prevocational training shall be based on:

1) Teacher observation and appraisal
2) Achievement Tests
3) Aptitude Tests
4) Counseling and guidance problems
5) An indication that enrollment of the pupil in a prevocational program will increase the likelihood of her/his completion of high school through grade twelve.

§ 11442

WAIVER

Courses to be waived in lieu of prevocational program courses shall be determined on an individual basis for each pupil.

a) A course in English, mathematics or government or history as described in Education Code Section 8571(a),(f) and (b), shall not be waived.

§ 11443-11444

A request for approval of a district plan shall be submitted to the Superintendent of Public Instruction by May 1 preceding the school year in which a vocational education program is to be conducted under Education Code Sections 6031-6036. The request shall include:

a) A copy of the plan including a description of courses. This plan shall conform to the above mentioned sections of the Education Code.

b) A copy of the resolution of the governing

board adopting the plan.

c) The Superintendent of Public Instruction shall report periodically to the State Board of Education on the nature of such programs and the number of pupils enrolled.

An annual report shall be made to the district governing board and to the State Department of Education.

§ 11502-11503

County Superintendents or cooperating school districts shall submit applications for the establishment of Regional Occupational Centers or Regional Occupational Programs to the State Board of Education. The application shall both explain and justify the intended operation including compliance with all requirements in this Chapter (9) and Chapter 14 of Division 6 of the Education Code.

REGIONAL CENTERS

Curriculum shall be approved by the State Department of Education and shall comply with all requirements in the California State Plan for Vocational Education.

§ 11504-11505

Regional Occupational Centers shall provide vocational or technical training for students who are not presently served through such courses offered by high schools or community colleges. General training courses such as industrial arts, and basic adult education are not acceptable. Instruction shall be "provided by an instructor meeting the requirements of Education Code Section 52323, the California State Plan for Vocational Education."

§ 11506

Each Regional Occupational Center or Program shall submit an evaluation to the Department of Education which shall include the following:

a) An analysis of the cost of individual centers, programs and services.

b) Enrollment of high school, post-high school students and adults.

c) Number of trainees employed and the number of trainees continuing training in other institutions.

d) Dropout rates and placement data.

e) Activities included in Education Code 7451.5(c) and 7451.6 and 7451.62.

§ 11507

Each Center or Program shall be organized and administered so that there is a clear and separate audit of income and expenditures, agreements, contracts, enrollments and all other statistics pertaining to fiscal accountability.

§ 11508

Regional occupational centers and programs may establish and operate business, commercial, trade, manufacturing or construction activities including the sale of products or services to private or public corporations or companies, or to the general public as authorized in subdivision (c) of Education Code Section 7451.5.

The sale of such products shall be approved by the State Department of Education.

§ 11536

The occupational purpose of Vocational Education contracts is to provide quality vocational, technical and occupational preparation to a large number of public school students through private post-secondary schools approved in Chapter 1 of Division 21 of the Education Code.

§ 11537

The instructional purpose of Vocational Education contracts is to provide vocational, technical and occupational instruction which will prepare students for:

a) Gainful employment in an occupational area where training has been given.

b) Occupational upgrading.

c) Enrollment in more advanced training programs.

§ 11542

The Department of Education shall use the following criteria in determining the appropriateness of vocational education to be provided by private post secondary schools:

a) Manpower needs and job opportunities that relate directly to instruction under the contract have been identified.

b) Courses do not duplicate those courses available in the region.

c) Students eligible for enrollment must meet criterion defined in subdivision (g) of Section 11538.

d) The contracted services shall not reduce existing vocational education efforts and shall meet the standards set forth in California State Plan for Vocational Education.

e) Keep clear separate audit of all fiscal, enrollment and statistical data.

3. Vocational Education

Statutes

§10-12

"The state board of education is designated as the state board of vocational education for the purpose of cooperating with the federal government in the promotion and administration of vocational education."

§10-13

APPOINTMENT

"The state board of education may appoint one or more school physicians for the state vocational schools and shall provide such physicians with suitable facilities for the performance of such duties as it prescribes."

§10-21a

EMPLOYERS

Any employer may offer accredited high school courses or may offer vocational training courses on the business premises for the benefit of any employee. The courses must be approved by the local board of education but the local board shall not be responsible for paying for the courses.

§10-64

Any town or regional board may establish a regional vocational agriculture center, provided there is a regional vocational agriculture consulting committee. Each board shall appoint two representatives to the committee who have a competent knowledge of agriculture and who need not be members of such board.

§10-66

"The state board of education shall have authority to make such regulations as are necessary to carry out the purposes of this part and to insure reasonable economy in the vocational agriculture centers."

§10-95

The state board of education may establish schools, part-time schools and evening schools in vocational education. The board may make regulations on admissions, appoint and remove members of the school staffs and make rules for the management of the schools.

The board may enter into arrangements with establishments in order to provide an opportunity for

the students to obtain practice." A town in which a school has been established may appropriate funds for maintaining the school.

§10-95b

"The boards of education of Branford, etc. . . and such other local boards . . . as may wish to participate shall . . . establish a career education center." The cooperative arrangements for the center shall provide for direct community participation.

The center shall provide "a continuing career education program from grades kindergarten through twelve . . . . shall offer career training opportunities on the secondary level" and shall use "teaching techniques and materials designed to meet the needs of the students." The center shall be eligible for transportation grants.

"The center may acquire . . . such facilities as may be necessary."

The state board shall annually evaluate the progress of the center . . . and shall submit a report of the findings and recommendations . . . to the general assembly.

§10-96

The state board of education shall establish standards for approving vocational schools and industrial arts programs in junior and senior high schools, and prescribe regulations for these schools and programs to receive state aid.

The state board of education shall "evaluate periodically the progress, accomplishments and needs" of these programs and make a general, annual report to the governor and the general assembly.

§10-96a

The state board shall prepare a "five-year master plan for career and vocational education" and shall submit the plan to the governor and general assembly. The plan shall be revised biennially. The master plan shall include: goals for vocational and career education;

financing methods; number and location of vocational schools and the scope of their programs; the need for new facilities; the need for program revision; and measures for improving opportunities in vocational education.

§10-97

The board of education of any town, or a regional board of education shall provide transportation for students under twenty-one years of age who are residents of the town or district and attend a state-approved vocational high school. If a high school does not offer vocational training, the town or regional board shall pay tuition and transportation costs for their students to attend a vocational school in another district.

TUITION

REGULATIONS

§ 10-95-1 to 10-95-5

"To be admitted to a state vocational-technical school" an applicant must have completed the 8th or 9th grade of an elementary school or junior or senior high school and will enter into the 9th or 10th grade of the vocational-technical school. A student seeking admission must provide evidence of "physical fitness for the pursuit of a trade....Preference in admission shall be given to students who show...ability to complete satisfactorily the instructional program." Students are admitted in September. An applicant who does not meet the requirements of these regulations "shall be considered for...admission as a special student."

STATUTES

§205

The Board may establish such vocational technical centers, or schools as in its judgment will promote the educational interests of the state.

§1064

"(a) The members of the school board of any reorganized vocational-technical school district shall be appointed by the Governor from the residents of such district. The school board shall be composed of seven members. Annually, the Governor shall appoint one member for the term of seven years to fill the vacancy caused by the expiration of the term of the member whose term expires at such time. Any vacancy in the office of any such member, caused by death, resignation, removal from the district, or any other cause whatever, shall be filled by the Governor for the unexpired term. Every member, at all times, shall be a resident of the reorganized vocational-technical school district, or his[her] office shall be considered vacant and a successor shall be appointed for the unexpired term as provided in this section. After the expiration of the terms of the present members, not more than four members of the school board shall be of the same political party, and no member shall fail to state his[her] political affiliation.

In the case of any reorganized vocational-technical school district which will not have, after reorganization, at least seven school board members serving pursuant to section 1061 of this title, the Governor shall appoint such members as are necessary to bring the total number of school board members to seven and shall designate the term of such appointed members so that the term of one member shall expire each year thereafter for the succeeding seven years. Not more than four members of the school board shall be of the same political party, and no member shall fail to state his[her] political affiliation.

The terms of the school board members shall begin

July 1 following their appointments and shall continue until their successors qualify."

§3201

This chapter is to encourage youth to pursue vocational and occupational education when such pursuit is deemed in the best interest of the student and the State.

§3203

The General Assembly shall appropriate in the annual budget a sum to be known as the "Vocational Youth Organization Fund."

§3204

The Board may award grants, under the Vocational Youth program, to vocational organizations which are an integral part of the instructional program in the following, but not limited to, occupational-vocational areas, such as Agriculture, business and office occupations, distributive education, home economics, and trade and industrial education.

§3310

The State Board for Vocational Education shall:

Be responsible for the preparation of a State Plan for Vocational Education and the execution of its provisions;

Be responsible for the disbursement of vocational funds received from the U.S. Government and the State; the vocational funds to be disbursed to the school districts and to the State Treasurer as determined by the State Board for Vocational Education;

Appoint and provide for the compensation of all personnel necessary to administer this program;

Prescribe rules and regulations governing the qualifications and certification of teachers of vocational education in the State;

Prescribe the minimum amounts necessary to be allocated by the various school districts for vocational education programs, in order to comply with the standards set forth in the State Plan for Vocational Education;

Report annually on the administration of this program; as a part of the annual report of the State Department of Public Instruction.

3. Vocational Education

Statutes

§31-614

The Board shall "establish occupational schools on the elementary school level" for less advanced students, and also provide "trade or vocational courses on the senior high school level . . . ."

CROSS REFERENCE

III.B.Teachers; Regulation: Chap. XVII, §9, License VII

3. Vocational Education

Statutes

§230.63-.631; .634

With approval by the department of education, any school board may "organize, establish, and operate" an area vocational-technical center.

The center must meet the requirements of the state vocational education plan and any additional criteria established by the department of education.

The center shall offer terminal courses of a technical and vocational nature and courses for out-of-school youth and adults. Area vocational-technical centers are subject to general state school laws.

§230.65

Vocational-technical centers approved by the department of education shall participate in the minimum program funds for public schools. Funds shall be allocated from minimum foundation program funds according to the formula established by law.

§230.651

The state board of education is directed to designate a public school district which has a vocational education program of at least eight vocational education units and one high school with a department exclusively or principally devoted to vocational education as an area vocational education school center.

§230.66

A supplemental program to provide training to meet the employment needs of industry shall be under the department of education. The Industry Services Advisory Council shall have seven members and shall consist of the directors of the divisions of economic development and of labor and five members appointed by the state board of education. The duties of the council shall be prescribed by regulations of the state

board of education. Vocational education programs "offered under this act shall be supplementary to those offered by vocational-technical schools . . . and other public schools programs and shall be operated on a statewide basis to assist any area to become more competitive in industrial and economic development."

"The program prescribed in this act shall be concerned only with training for skilled and semiskilled operations requiring learning time of 1 year or less and each such training program shall terminate when training needs have been met." The department of education shall administer programs, provide "technical and engineering services, curriculum development, instructional services, . . . and overall program direction and . . . an adequate staff to carry out an effective training program for industry."

All expenses incurred by a school board under an agreement with the state to provide the services prescribed by this act shall be reimbursed by the state from funds appropriated for this purpose.

If a school board refuses or is unable to provide the training program, the department of education may enter into a cooperative agreement with any institution, public or private, which is willing to operate the program. Persons employed in the programs shall be exempt from the requirements for certification. The department of education may procure and control the equipment necessary to provide adequate training programs.

§233.068; .0682; .069

COURSE OF STUDY

"Practical courses of direct job-related instruction" shall be offered for students under 19 years of age. Each school district must offer "courses in at least five vocational education areas." "Provisional certification shall be granted instructors " for said courses when persons with usual academic backgrounds are not available.

School districts may "jointly implement the requirements" for vocational education. The State Board of Education shall establish minimum requirements for vocational education plans such as examinations of students' performance, "job placement" and "satisfactory performance in employment." The Vocational Improvement Fund, begun in 1971-72, shall be used to develop vocational education programs including those mentioned above. Utilization of community resources shall be encouraged and programs which integrate school and community given priority in funding. Prior to each legislative session, the Commissioner of Education shall report on the "objectives, methods, and output of the projects".

§944.19

COURSES FOR PRISONERS

The School Board and State Department of Education shall "establish and maintain classes . . . of a vocational, adult or academic nature" for prisoners in public or private institutions. The school board within the district of the institution shall administer such a program, properly approved by the State Board.

REGULATIONS

6A-6.59

The industry service advisory board shall assist the director of vocational education by recommending policies and procedures for the training program, coordinating interagency activities relating to identification of new or expanding industry and training needed by such industry, providing labor market research and labor force analysis, establishing plans for recruiting and selection of employees for the industry, and advising the director of vocational education on such other matters as he (she) may request.

6A-6.61

TRAINING PROGRAMS

Programs of training under the industry services training program are to be supplemental to those offered by vocational-technical schools and other public school programs financed

through the kindergarten through grade twelve. Training programs under the provisions of section 230.66 of the Florida Statutes may be carried out on the basis of agreements between the school board and the director of the division of vocational education; provided that, in the event a school board refuses or is unable to provide a training program, the director of the division of vocational education may enter into a cooperative agreement for a training program with such other agency as provided by law.

6A-6.63

Vocational education courses include world of work instruction in the elementary grades and courses in one or more of the following: exploratory education; agricultural education; business education; distributive education; health occupations education; home economics; industrial education; and such other offerings as may be authorized by the Florida state plan for vocational education.

COURSE OF STUDY

6A-6.64

Vocational educational instruction is graded, ungraded, credit or non-credit instruction which is not designed to lead to a baccalaureate or higher degree and which consists of the following types of courses and activities: introductory course; exploratory course; occupational proficiency course; pre-technical course; vocationally oriented home economics; remedial or compensatory education course; activities of vocational education student organizations.

6A-6.67

A coordinating council for vocational education, adult general education and community instructional services shall be established in each community college district. The membership of this council shall include the superintendent and directors of vocational education and adult general education of each school district in the community college area and the president and deans or directors of vocational education and community instructional services of the community college.

The council shall develop recommendations to the respective school boards and to the community college board of trustees and where appropriate may make recommendations to the commissioner of education and to the appropriate division directors of the department of education. The responsibilities of the council shall be to review the total vocational education, adult general education, and community instructional services programs being offered in the district, to make such recommendations as are necessary, to encourage the development of needed offerings or changes in existing offerings and to avoid unwarranted duplications.

6A-6.69

Each board shall provide for an administrator of vocational education in accordance with the following requirements: (1) an administrator of vocational education shall meet the same qualifications as the department of education has for the director of vocational education; (2) the administrator shall be a member of the superintendent's or president's administrative staff; (3) the administrator shall be responsible for the administration of the vocational education programs within the community or school.

ADMINISTRATION

6A-6.74

"Duties, responsibilities and functions of the department of education relating to vocational-technical and adult education, except those specified...to be performed by the board or commissioner or...assigned to other divisions, bureaus, sections or units, are hereby assigned to the division of vocational education." The director of the division shall organize the personnel and activities of the division in order to perform the powers, responsibilities, and functions assigned to it in the most effective and efficient manner.

The director has authority to fill vacancies, direct the work of the division and cooperate with other divisions to make the department work.

6A-6.75

The state advisory council for vocational education shall be appointed by the state board constituting the state board for vocational education from a list nominated by the commissioner of education. The council shall perform duties as set forth by regulations and as are assigned by the state board or commissioner of education.

3. Vocational Education

Statutes

§32-611a

"The State Board of Education shall maintain a comprehensive program of career, occupational and vocational education. The purpose of this program shall be to provide occupational training and retraining to meet the needs of individual citizens and the manpower needs of business and industry within the State. This program shall be designed to prepare individuals for gainful employment, . . . in recognized occupations . . . and to prepare individuals for enrollment in advanced technical education programs. This program shall provide for vocational guidance and counseling, instruction related to the occupation or occupations for which the student is in training, and instruction necessary for students to benefit from such training.

The State Board of Education [shall] receive federal funds allotted to Georgia under the Vocational Education Act or other acts of Congress appropriating federal funds for career, occupational, [and/or] vocational education."

§32-934

The board of education may open a department of industrial education, "in which the students may be taught agriculture, home economics, or trades and industries . . . ."

§32-2201

"The State of Georgia hereby accepts the provisions of . . . [the federal vocational education] act to provide for the promotion of vocational education . . . ."

§32-2205

"The boards of education of the several counties may employ and pay agricultural teachers and home

economics teachers when employed in the consolidated schools of the counties . . ."

§32-2206

"It shall be the purpose of this law to more nearly equalize the education opportunities in certain phases of vocational education, especially trade and industrial and distributive occupations, to persons of the State, who, in the discretion of the State Board of Education, are of the age that will make it possible for them to profitably pursue training for a specific occupation."

§32-2210-- 2215

The State Board of Education does not have authority to make local vocational training programs mandatory. State-owned equipment may be apportioned to local units for vocational education and vocational education funds may be used for transportation for "trainers living outside the jurisdictional area of the local school unit."

The State Board of Education shall establish an advisory committee "composed of equal representation of labor and management" to advise the Board regarding vocational education policies.

§32-2218 --2219

To better enable the State Board of Education to properly locate and carry on the state area Trade, Vocational and Industrial schools the board is "authorized to contract for and purchase real estate and building sites, to build, construct and properly equip and maintain, for teaching and boarding students, all necessary buildings and houses . . . ."

§32-2221

"State Board of Education is . . . empowered . . . to . . . establish rules and regulations for the operation of . . . [vocational] schools, . . . prescribe courses of study to be taught . . . [and] prescribe the ages, requirements and conditions under which students may be

RULEMAKING

received for instructions in such schools." The State Board will "prescribe and arrange for classes and courses in the different vocations and trades, and . . . [will] prescribe and set up courses for citizens of the State who may receive injuries in industry." The board will be impowered to "set up classes to rehabilitate and prepare members of the military . . . for renumerative employment."

MILITARY

"The State Board of Education is . . . authorized to employ teachers, supervisors and directors of vocational training . . . for area trade schools."

§32-2302a; 2303a; 2304a; 2305a

The State Board of Education is the State Board of Vocational Education. The State Board shall prepare and approve plans for vocational education; establish standards for vocational schools; inspect courses and training programs; maintain a system of teacher training; conduct studies in order to promote and improve vocational education.

The State School Superintendent shall serve as executive officer of the Division of Vocational Education Service.

REGULATIONS

30-2111-2118

The State Board of Education, as the State Board for Vocational Education, is authorized to develop and administer a state program for vocational education.

"Vocational education means vocational or technical training . . . which is given in schools or classes . . . under public supervision and control or under

contract with the State Board or local educational agency. Vocational education is . . . designed to prepare individuals for gainful employment . . . in recognized . . . and . . . new and emerging occupations or to prepare individuals for enrollment in advanced technical education programs . . . . Vocational education includes vocational guidance and counseling . . ., instruction related to the . . . occupations for which the students are in training . . ., and job placement.

"The State Board shall provide related activities, in support of a comprehensive program of vocational education, including . . .

1. Vocational youth clubs
2. Leadership training
3. Staff and student travel
4. Staff development
5. Research and demonstration
6. Special programs for handicapped, disadvantaged and gifted students
7. Curriculum materials development and dissemination
8. Job placement and follow-up
9. Career guidance for decision making and planning."

With the advice of the State Advisory Council for Vocational Education, the "State Superintendent shall develop . . . a State Plan for Career and Vocational Education which provides for an assessment of current and future needs for vocational education, program budgets. . ., staff development activities," and administrative procedures. "Before approving the State Plan, the State Board shall conduct a public hearing" after public notification.

In order to receive state funds for vocational education programs, plans must be submitted for approval. In preparing these plans, local school systems shall use the Vocational Education Program Manual, which will provide appropriate guidelines.

The State Advisory Council for Vocational Education shall "advise the State Board on the development of the State Plan for Vocational Education . . . (and) on policy matters arising in the plan's administration, evaluate vocational education programs, services and activities . . . (and) prepare and submit through the State Board to the Commissioner and to the National Advisory Council an annual evaluation report."

Allotment of funds for vocational education programs shall be determined and disbursed annually. "The State Superintendent shall apportion and distribute to local school systems and other eligible agencies . . . any and all funds which may be . . . available . . . to aid and assist such systems and agencies in paying the costs of vocational education."

Teachers and personnel for vocational education programs in high schools and vocational technical schools shall be allotted by the State Superintendent.

30-2310; 2320

BILINGUAL EDUCATION

"The State Board supports the implementation of programs of bilingual vocational education. . . . Local units of administration which serve students whose language as normally used is other than English" are eligible for federal "grants for conducting bilingual vocational education programs. Applications to the U. S. Commissioner for Education must be made through the State Board." Proposals shall be reviewed by the Assistant State Superintendent for Adult and Vocational Education, who acts on behalf on the State Superintendent of Schools.

40-219; 40-229

"The State Superintendent through the Office of Adult and Vocational Education shall develop for State Board approval procedures" for cooperative programs to be offered by state and area vocational-technical schools and high schools to high school students. The

Office of Staff Services shall ensure claims for attendance credit are substantiated.

IV.G.; Statute §32-604a

3. VOCATIONAL EDUCATION

STATUTES

§300-1, 300-2

The department of education in establishing agricultural, industrial, and domestic courses of instruction "may prescribe the manner and designate the places in which . . . [they]. . . shall be conducted . . ."

§300-3

Profits arising from agricultural and industrial courses of instruction shall "be used by the school for the purchase of equipment and material" or "be distributed among the pupils actually engaged in such pursuits."

§300-4

"All moneys arising from the sale of manufactured or repaired articles, or from work and labor performed, or from any other source, in any state trade school . . . shall . . . be expended by it in payment of expenses incurred in the purchase of additional materials and supplies required by such schools, and in the care, maintenance, and operation thereof, and in the employment of student labor therein before or after regular school hours."

§300-24

"The state board of vocational education shall, . . . extend to the 13th and 14th years vocational and agricultural . . . shop training programs."

§305A-2-4

A state board for vocational education shall be established. The responsibilities of the board shall include using whatever necessary to insure the receipt of federal funds; desegragating schools, departments or classes which are to be the recipients of such funds; determining "by general regulations, the qualification to be possessed by persons teaching agricultural, trade

. . . [and] industrial . . . subjects." They shall also "enforce rules and regulations concerning the granting of certificates and licenses to such teachers . . ." "The board shall make an annual report to the Governor describing the condition and progress of vocational education during the year . . ."

A vocational education coordinating advisory council "shall serve in an advisory capacity to the board."

§372-4-6

APPRENTICESHIPS

The department of labor and industrial relations shall be responsible for the general direction and management of apprenticeship programs.

"Related instruction for apprentices, coordination of instruction with job experience, and the selection and training of teachers and coordinators for the instruction shall be the responsibility of the department of education or of the community college division."

STATUTES

§18-2B-1-8

"The aims and purposes of the area vocational education program shall be to provide vocational training or retraining . . . designed to prepare individuals for useful employment in recognized occupations. The program shall be made available to residents . . . in . . . areas designated and approved by the . . . board of vocational education.

"The state board of education is designated as the state board of vocational education . . . and is . . . authorized and empowered to establish, operate and maintain area vocational educational programs including the acquisition of necessary lands and the construction of necessary buildings for the purpose of operating and conducting educational training centers. [It] may delegate . . . its operational authority for multi-county vocational centers to an administrative council composed of equal representation from each of the participating county boards of education, the superintendent of schools from each participating county, and the state director of recreational education or his[her] representative." The administration and supervision of the area vocational educational programs shall be . . . [handled] . . . by the director of the division of vocational education.

ADMINISTRATION

"The state board of vocational education is . . . authorized to pay transportation costs for unemployed persons participating in any area vocational educational program.

"The director of vocational education may appoint a consulting committee for each area designated, composed of members representing business, labor, management, school administrators and lay groups. [They] shall advise the head of the local area or training center on such matters pertaining to shop equipment, curriculum,

labor-management coordination or selection of personnel. A statewide consulting committee may be appointed by the director . . . to serve in the same capacity and for the same purposes."

§33-2201

"The state of Idaho . . . accepts the benefits and provisions of" the Smith-Hughes Act to promote vocational education.

§33-2202 -- 33-2203

"The state board of education is . . . designated as the state board for vocational education for the purpose of carrying into effect the provisions of . . . the Smith-Hughes Act . . . and is . . . authorized to cooperate with . . . any agency of the United States designated to administer such legislation; . . . to execute the laws of the State of Idaho relative to vocational education; to administer the funds provided by the federal government and the State of Idaho." The board is authorized to promote vocational education in the public schools and "provide for the preparation of teachers in such subjects," prescribe qualifications for and "provide for the certification of . . . teachers, directors and supervisors." The board has "full power to fix the compensation" of persons employed "to administer the federal act." The board shall "promote and aid in the establishment . . . of schools, departments or classes" in vocational education subjects in local communities.

§33-2204 -- 33-2206

The state board for vocational education shall have two regular meetings a year. The board shall appoint an administrator to "be known as the administrator of vocational education." The board shall make an annual report to the governor and legislature "of all moneys expended for vocational education both from state and federal funds."

CROSS REFERENCE

II.A.2; Statute §33-124

3. Vocational Education

Statutes

§29-5

School districts which transport resident pupils to another school district's vocational program shall be reimbursed by the State for transportation costs.

§694 698

The State of Illinois accepts all provisions of the Federal Vocational Education Law of 1917. The State Treasurer shall act as the custodian of all funds allotted to the state under this law and keep them in a separate "Federal Vocational Educational Fund."

§697

The State Board of Education shall be responsible for policy and guidelines and assume all powers and duties pertaining to vocational and technical education, including: to cooperate with the federal government in the administration of the Federal Vocational Education Law; to promote the establishment of schools and classes provided for in Board plans and cooperate with state and local authorities in the maintenance of such schools and classes; to conduct, prepare and publish the results of studies related to vocational education; to promulgate rules and regulations regarding vocational and technical education; and to report annually to the Governor on the extent, condition, possibilities for improvement, and costs of vocational education in the state.

III.E.Teachers; Statute §20-6.1-2-3

STATUTES

§20-1-18.1-2

APPOINTMENT

"The governor shall appoint the following members to the [state board of vocational and technical education]:

(1) the state superintendent of public instruction (ex officio);

(2) the executive officer of the commission for higher education (ex officio);

(3) one member each from the state board of education, the commission for higher education, the governing board of a secondary and a post secondary vocational institution, and one each from vocational administration, and members representing labor, business and agriculture. Members are appointed to staggered 4 year terms.

§20-1-18.1-4 --20-1-18.1-6

The state board of vocational and technical information shall: plan and coordinate vocational education programs; review budget and advise the legislature accordingly; review plans for proposed programs; receive and disburse federal funds; annually evaluate vocational education programs in the state and report their findings to the general assembly, adopt rules and regulations and appoint advisory committees; contract for services it deems necessary.

§20-1-18.1-5

"The board [of vocational and technical education] shall employ an executive officer, designated state director of vocational education, and any staff as it may deem necessary . . . . The board's staff shall serve as liaison between the vocational staff of the

state department of public instruction and the vocational staff of the commission for higher education, but no board staff member may be an employee of any other state institution or agency."

§20-1-18-7

"Two or more school corporations may cooperate to establish and maintain or supervise schools or departments for vocational education . . . ." The heads of the cooperating school corporations or their designates "constitute a board for the management of the schools or departments." Such a board may by resolution designate three or more of its members as an executive committee which shall "to the extent provided in the resolution . . . exercise the authority of the board in the management of the school and shall submit a written summary of its actions to the total board at least semiannually."

§20-1-18.1-7

A "state advisory council on vocational education is established" which shall "promote interest in vocational education, advise the board on policies relating to vocational education, advise the board in the development of the state plan, submit an evaluative report on the state plan to the appropriate federal agency, and perform any additional function required by federal laws and by this chapter."

§20-3-11-27

The board of school commissioners in a school city of 300,000 or more may "conduct . . . a system of industrial or manual training and education." In such a system the board "shall employ competent instructors in the various subjects to be taught, and

shall establish such general rules and regulations" as will "produce the best results and . . . give instruction to the largest practicable number of pupils."

§20-10.1-6-1

School boards may establish industrial or manual training to teach the principles of mechanical construction, mechanical drawing and printing. The board shall employ competent teachers and may make rules and regulations for student admissions. Students may be required to pay tuition.

TUITION

§20-10.1-6-2

School boards may establish vocational schools or departments for industrial, agricultural or home economics education as approved by the state board of vocational and technical education and may "maintain them from the general fund."

§20-10.1-6-3

Each township elementary school shall offer elementary agriculture and each city elementary school shall offer industrial work. Both township and city elementary schools shall include elementary home economics. A teacher must pass an examination prepared by the commission on teacher training and licensing in order to qualify to teach any of these industrial or home economics courses.

§20-10.1-6-4 -- 20-10.1-6-5

Day, part-time, and evening classes in industrial, agricultural or home economics shall be offered by vocational schools or departments. Evening classes must offer training for persons employed during the day and must relate to the person's employment; evening classes in home economics shall be open to all women. Part-time

classes are also for working people and must relate to the person's job. Day and part-time classes are restricted to persons over 14 and evening classes to persons over 16.

§20-10.1-6-7

School corporations may enter into cooperative programs with employers to provide job training for students enrolled in vocational education classes. The job training must be approved and supervised by the school.

§20-10.1-6-9 -- 20-10.1-6-10

The state board of vocational and technical education shall help to establish vocational schools and departments, vocational teacher-training classes, and "shall supervise and approve the schools, departments and classes." The board must approve the vocational school or department for "organization, buildings, location, equipment, qualification of teachers, courses, length of term, methods of instruction, conditions of admission, employment of pupils, and expenditures of money."

§20-10.1-6-11

Each school board administering vocational schools or departments shall appoint an advisory committee composed of representatives of local trades, industries and occupations. The advisory committee shall advise the school board and other school officials who manage and supervise these schools or departments.

§20-10.1-6-12

The state shall pay each school corporation that maintains a vocational school or department up to "one-third of the cost for instruction in vocational and technical subjects authorized and approved by the state board of vocational and technical education."

§I, Ch. 4

State Board of Vocational and Technical Education

"The board is to receive federal funds . . . and to divide and distribute such funds between the Commission on General Education . . . and the Indiana Vocational-Technical College in a manner which will contribute most to Vocational and Technical Education in Indiana." The board is composed of the Governor, the State Superintendent, and seven others who are "familiar with the vocational education needs of management and labor in the state." Additional qualifications are set forth in the statute.

State Agency Institutional Schools

This agency, because of the number of other agencies conducting education in institutions within their respective spheres, shall perform certain limited functions as accorded to the Department by statute.

State School Bus Committee

This Committee whose composition is set forth in the statute "sets standards for the construction, equipment and inspection of school buses and the forms for school bus contracts.

Health and Safety

"The State Fire Marshall, the State Board of Health and the Administrative Building Council must approve all school building projects." Only the State Board of Health may condemn and close a school building as being unsafe or unhealthy.

3. Vocational Education

Statutes

§258.2

"The state board of public instruction shall constitute the board [of] vocational education."

§258.3

The superintendent of public instruction shall appoint and direct personnel to carry out the vocational education program.

§258.4

The state board of vocational education shall promote and help to establish vocational programs in the schools; establish standards for vocational education teachers and for schools; and annually inspect all vocational programs.

§258.7

A thirteen-member advisory council on vocational education, appointed by the governor, shall advise the state board for vocational education. The members shall include representatives of the community, business, and education.

§258.9

Any school district with a population of more than five thousand, which receives federal aid for a vocational education program, shall appoint a local advisory committee for vocational education. The advisory committee shall assist the local school board in establishing and maintaining vocational programs.

§258.10

The board of directors of any school district is authorized to "carry on ... vocational instruction in ... agriculture, commerce, industry, and home economics ..."

§258.13

The superintendent of public instruction shall include in his/her biennial report an accounting of expenditures for, and observations on, the vocational education program.

§258.14

A "vocational youth organization fund" shall be created to encourage youth to pursue vocational education and to develop leadership in the vocational programs.

§280A.1

There shall be seventeen areas established in the state of Iowa which may operate "either area vocational schools or area community colleges," which offer the following: the first two years of college work; vocational training; "in-service and retraining programs;" high school completion programs; programs for high school students; "personnel services;" "community services;" "vocational education for persons who have academic, socio-economic, or other handicaps which prevent succeeding in regular vocational education programs."

§280.3 -- .5

Two or more counties may merge for the purpose of providing an area vocational school. Such a merger plan must be approved by the state board of public instruction, and include a detailed description of the area, its projected needs, interest in the program, and proposed curriculum.

§280A.12 -- .13

"The governing board of a merged area shall be a board of directors composed of one member elected from each director district in the area ..." The board of directors shall elect a president and appoint a salaried secretary and treasurer.

The board of directors of each area vocational school or area community college shall "determine the curriculum to be offered," make contracts for services with private vocational schools, "determine tuition rates," "establish policy and make rules ..." and set the salary of the area superintendent. The board of directors may, with state board approval, "expand the curriculum of the school to qualify as an area community college."

RULEMAKING

§280A.25

The state board of public instruction shall have authority to administer funds for area vocational schools and community colleges, adopt rules and regulations to carry out these vocational programs, permit high school students to attend area vocational schools, review programs and make recommendations.

§280A.27

"There shall be an area schools branch within the state department of public instruction." The branch shall exercise the authority and perform the duties of the state department with respect to area vocational schools and community colleges.

§280A.33

Approval standards for area vocational schools and community colleges shall be inititated by the Area Schools Branch and approved by the state board of public instruction. Approval standards shall include standards for "administration, qualifications ... of personnel, curriculum, facilities ..., instruction ...". The department of public instruction shall "supervise and evaluate the educational program" in the area schools. The superintendent of public instruction shall make recommendations, in writing, to the area schools when it is determined that deficiencies exist. The state board may remove an area school from its approved list for

failure to comply with the approval standards. The school must be given at least one year's notice and one year in which to remedy any deficiencies. The suspended area school may request a hearing before the state board of public instruction.

§280A.36

The administration of the area community college and area vocational school shall encourage faculty development by "stimulating department chairmen ... to meet their responsibilities in this regard;" "lightening the teaching loads of first-year instructors ...;" "stimulating curricular evaluation; and ... encouraging ... an atmosphere in which the faculty brings a wide range of ideas and experiences to the students, each other, and the community."

§280A.38 -- .40

The board of directors of area schools may "enter into lease agreements" for buildings for classroom use. Boards of directors of two or more merged areas may agree to combine, subject to elector approval. Any merged area shall provide a vocational school within a county of the area containing "a city of fifty thousand" or more.

IV.A.; Statute §280.10 -- 280.11

§72-4413 -- 72-4414

STATE PLAN

The state plan for vocational education shall not be approved by the state board until the proposed plan has been distributed to each school district and other interested persons, reasonable public notice has been given, and each school district and each interested person has been given a reasonable opportunity for a public hearing. The state board shall adopt regulations.

NOTICE

HEARING

RULEMAKING

The state board may contract for vocational education research.

§72-4415

The state board of education shall be responsible for the distribution and allocation of state and federal funds for vocational education.

The state board shall exercise general supervision of all vocational education courses and programs. Every area vocational school and area vocational-technical school may have an area advisory council comprised of primarily nonprofessional persons appointed by the board of such school and having the qualifications and terms approved by the state board.

§72-4416 -- 72-4417

Any board may present a plan to the state board for the establishment and operation of an area vocational school. Upon review of such plan, the state board may designate the facility as an area vocational school.

Students admitted to a vocational education course or program which is conducted by the school district in which such student resides may be charged fees but shall not be charged tuition. Nonresidents shall be charged tuition and fees determined in accordance with this section.

TUITION

§72-4417a

TUITION

No school district shall be liable to pay the tuition and fees for any student whose parent has not been a resident of the school district where the vocational school is located for six months prior to enrollment of the student.

RULEMAKING

The state board of education may adopt regulations for determining residence of students for tuition purposes.

Upon the request of any board, the state board shall review the determination of the residence of any student.

§72-4418

The state board shall adopt regulations for enrollment of students in vocational courses.

Any student applying for admittance to a vocational program shall be admitted if the board of the vocational program approves, a similar program is not offerred in the district where the student resides, if the applicant is capable of benefiting from the instruction, and if the applicant meets minimum age requirements for the program.

APPEAL

Any applicant who is denied admission for any reason may appeal to the state board whose determination shall be final.

§72-4421

Any two boards may agree to cooperatively operate an area vocational education school or course. The agreement shall be for three to five years and shall be approved by the state board before taking effect.

§72-4422

TUITION

The board may admit an out-of-state resident to a vocational program if the student pays tuition and fees and if the state plan allows nonresidents of Kansas to attend.

§72-4429

An area vocational school may make agreements for students enrolled in a public school of another adjoining

state to attend vocational education schools of this state. Agreements under this act shall be for a period not to exceed three years, subject to limitation, change or termination by the legislature. The state board of education shall adopt rules and regulations for the administration of this act, and must approve any agreement made under this act.

§72-5326 a

The board of control of any area vocational-technical school, as provided for in K.S.A. 72-4412, upon majority vote, may pay dues from its operating fund to any organization whose purpose is to accredit the vocational-technical school, to exchange information among area vocational-technical schools, or to assist boards of control in developing curriculum or solving problems.

REGULATIONS

§91-16-1; 16-3; 16-5; 16-6

Any person whose application for admission to a vocational education course or program is denied may, within thirty days following his/her actual notice of the denial, appeal to the state board. The appeal shall be filed at least thirty days prior to the state board meeting at which the appeal is to be heard. The appellant may also file a statement of why his/her application should be approved and any supporting documents.

APPEAL

The commissioner of education shall give written notice of the time and place of the hearing to appellant, the local board, and any other concerned person. The local board shall, within ten days after receipt of the notice of hearing, file any defenses which it will raise and any supporting documents, and shall serve these on all interested parties. The appellant, the vocational education school, and any other interested person may file any defenses, replies or statements and supporting documents ten days prior to the hearing. These shall be served on all interested parties.

NOTICE

HEARING

The appellant, the board, and any other interested party recognized by the presiding officer of the state board may in turn present his/her case at the hearing. Any parties may examine the evidence and question any other party. The hearing shall be informal, non-adversary, and without oath-taking. Each party's presentation shall last one hour unless the chairman of the state board grants lesser or greater time in the interests of justice.

If six members of the state board approve the application of the appellant, the local board shall admit the appeallant to the vocational education course or program. The decision shallbe delivered to all interested parties within five days of the hearing's conclusion.

§91-6-16 - 9-16-18

In order to attend a vocational education course or program which is not part of a regular high school curriculum, a prospective student shall submit a written application to the vocational education institution. An out-of-district prospective student shall also submit an affidavit of residency.

A student may be disapproved or placed on a waiting list for the following reasons: the school has insufficient facilities or staff; reasonable proof exists through interviews, counseling, or testing that the student is incapable of benefitting from instruction or of being employed in the occupation for which instruction is being sought; or the student fails to meet minimum age requirements.

Each accepted student shall receive an enrollment decision form signed by the director. Within two weeks after the student has been accepted the vocational education institution and the student shall notify the district that is required to pay the student's tuition. The local board of the applicant's district shall act upon the student's request for tuition in the month in which the board receives it. Failure to do so shall be considered a denial and grounds for appeal.

TUITION

Unless good faith doubts exist as to the student's residence or qualifications, the board shall approve the

tuition request. The board may also deny the request if the district has the same or substantially the same state approved vocational education course or program.

If an applicant's application is denied the party making the denial shall notify the student of the reasons for the denial and the student's right to appeal to the state board within thirty days. The applicant shall have thirty days to appeal from the date he/she is actually informed of the right to appeal.

APPEAL

The vocational education institution shall submit to the board of the student's residence a statement of tuition due. If within thirty days after starting school, a student drops out, the district shall be liable for only one-half tuition.

§91-17-6

PARENT-SUPERVISED PROJECTS

Acceptable learning activities shall include parent-supervised projects in agriculture and home-making, and work study programs in cooperation with local business and industry.

A student shall file a written report of the learning activities he/she pursued since the last class meeting and the time spent on each activity. The teacher shall evaluate the report, shall approve plans for further learning activities, and shall provide necessary assignments and instruction.

§91-27-2;91-27-4

An area vocational school shall have an administrative staff appropriate to the size and the purpose of the institution and one which permits it to function effectively and efficiently.

The school shall have a written plan for the school which includes goals, objectives and expected outcomes for administrative assignments. The plan shall be reasonably commensurate and in agreement with state board educational goals and with recognized educational concepts and practices. The plan shall be formulated with broad base community involvement, "except that

experimental or innovative programs . . . are encouraged." The plan shall state specifically the amount of time assigned for the improvement of instruction including determining the needs of the students and staff and supportive services available to supplement administrative responsibilities.

The plan shall be approved by the governing body and the state board.

The chief administrator of an area vocational school shall be the executive officer of the governing body.

Each administrative staff member shall hold a certificate as required by the state board.

An instructor's records shall be kept on file.

Records shall be kept about the following: (1) student personnel, (2 staff, (3) instructional supplies and equipment, (4) curriculum, (5) student activities, (6) instructional media, (7) guidance, (8) school plant, (9) administrative operation, and (10) job placement and follow-up studies of graduates.

ACCESS TO RECORDS

The records of students, staff, and curriculum shall be accessible only to those who have a legitimate interest in them and shall be protected from theft and fire. "Governing board policy shall provide for the right of privacy which shall include consent, due process, record management, security and access and dissemination of personal data."

The school shall keep complete financial records. The school shall have its accounts audited annually.

The school shall organize its schedule of classes in a pattern most appropriate to achieving the objectives of the program. The school shall meet minimum state board enrollment requirements pertaining to instruction.

A high school student whose educational experience can be better served by an area vocational program should enroll through proper admission procedures. Each school shall display the United States flag and Kansas flag.

". . . 1. Each area school shall make a statement expressing its purposes and objectives. Where appropriate,

objectives and performance terms will indicate the degree to which they are being achieved by the students in the school.

2. The statement shall be the joint product of the thinking of the faculty, the administration, the students, the patrons, and the industrial, professional, and business community involved with the school. The statement shall be approved by the governing board of the area school.

3. The statement shall reflect the individual character of the area school including familiarity with the community's sociological composition, various community agencies and resources, the expectations and requirements of the businesses and industries for which the school is training its students, and the needs and characteristics of the community's youth and adults. The statement shall be consistent with the principles and spirit of American democracy and with the prevailing values of work in American society.

4. The statement shall show evidence of the priorities established for the school's various responsibilities. Implementation of such priorities shall be evident in the educational program.

5. The objectives shall be identified for the specific subject areas, the various occupational programs, and the student personnel services. They shall be expressed in the terms of the specific behaviors, skills, attitudes to be achieved, and be coherent and consistent with the major purposes of the institution.

6. Provision shall be made for periodic review and appropriate modification of the statement in light of changing social conditions and circumstances.

7. Information from a variety of sources, including the local advisory committees, shall be required to determine the extent to which the institution's purposes and objectives are being achieved and to evidence that the major characteristics of the program are traceable to the purposes and objectives established by the statement.

8. The statement shall be given to all members of the staff, the students, and the various segments of the community.

B. Curriculum. 1. The educational program shall be developed from the school's statement of purposes and objectives and from a knowledge of the needs of its students and shall be appropriate to serve the important vocational education needs of the community, state and nation.

2. The school's program shall be designed specifically to meet the vocational education needs of its students. It shall provide a variety of learning experiences through classroom, laboratory or on-the-job activities, and appropriate guidance services.

3. The planning and the design of the school's vocational education program shall provide opportunities for cooperative participation by patrons, students, faculty members and the advisory committees.

4. Provisions shall be made for students of different aptitudes, mental capacities, and interests -- including the disadvantaged and handicapped.

5. Continuity and articulation of programs shall be within and between the area schools and other schools in the state.

6. Resources of the industrial and business segments of the community shall be ucilized judiciously in providing program enrichment.

7. Programs of vocational education shall provide instruction in both preparatory and supportive courses which reflect occupational trends, meet the changing needs of job requirements, and develop an effective understanding of the world of work.

8. The primary purposes of any course or curriculum shall be to prepare students with skills and knowledge for entry into an occupation, for advancement within an occupation, for upgrading their occupational skills, or for preparing them for additional specialized occupational and technical education.

9. The content of each course in the curriculum shall be based on the skills and knowledge required in the occupation and will be developed and conducted in consultation with persons actively engaged in the occupation.

10. Flexibility and adaptability shall be essential characteristics of programs for vocational education.

NEEDS ASSESSMENT

11. The program shall be based on periodic surveys by the area school of manpower needs and the evaluation of the curriculum in terms of those needs.

12. It is the responsibility of the area school to plan curriculum patterns that serve the vocational needs of the students and community.

13. Each area school shall provide the necessary instruction, or make available instruction, in reading to enable its students to cope with the requirements of the school's vocational programs.

14. Each area school shall provide the necessary instruction, or make available instruction, in mathematics fundamentals to enable its students to cope with the requirements of the school's vocational programs.

15. A follow-up of students shall be conducted by the area school to determine how well students have succeeded and, where indicated by the follow-up, changes shall be made in the curriculum.

16. Adult occupational education must provide experiences related to promoting gainful employment. Such education shall be designed to meet the needs of those unemployed, untrained, and underemployed adults who desire to retrain and upgrade their skills. Adult occupational programs shall operate within the philosophy and under the administration of the area school.

EVALUATION

C. Evaluation. 1. Periodic Evaluations. (a) Comprehensive Evaluation. A thorough evaluation of all aspects of the area school shall be carried out at least once in each five-year cycle with the first cycle commencing with the 1975-76 school year. Such evaluation includes an analysis of the management and utilization of existing facilities and resources, finances, instructional program,

student services, and community services. The evaluation of the area school shall be on a self-study basis involving students, patrons, and staff. The self-study shall be followed by an on-site team visitation and evaluation as hereinafter provided.

(b) Visiting Team: The visiting team, appointed by the State Board according to procedures adopted by it for the evaluation of an area school, shall include sufficient vocationally and educationally competent personnel to assess every aspect of the school's vocational program. Some visiting team members shall be qualified evaluators other than State Board personnel and shall include some evaluators from out-of-state.

(c) Criteria For Selection of Visiting Evaluation Team Members. The composition of the visiting evaluation team shall be representative and knowledgeable of the various segments of the area school programs, and, in addition, the following shall be considered: 1. Individual criteria: (a) At least one year of teaching or employment experience relating to area school programs. (b) Possess an interest in working on a visiting evaluation team.

(c) Evaluation competency through study, previous visiting evaluation team experience, or prior school responsibilities which provided the needed skills for evaluation.

(d) Ability to adapt or compromise on the opinions and ideas of other members of the team in order to arrive at an evaluation.

2. Group Criteria: a) Appropriate representation from different instructional areas.

(b) Appropriate secondary and post-secondary representation.

(c) Multi-cultural/multi-racial representation.

(d) Representative range of teaching experience or employment experience.

(e) Representative range of age.

(f) Appropriate male/female representation.

(d) Visiting Team Report: It shall be the responsibility of the visiting team to submit a written report to the chief administrative officer of the area school and to the State Board. Such report shall include statements pertaining to strengths, areas needing improvement, and, when appropriate, suggesting means of improvement and including the specific area, if any, where the institution or program may not be in compliance with accreditation standards. The chief administrative officer of the area school shall be given the opportunity to comment upon the written team report and to file supplemental materials pertinent to the facts and conclusions prior to State Board action on the written report.

2. Continuous Evaluations. (a) Data Collection Systems. An area school shall maintain a system of data collection which provides evidence as to the effectiveness of the school, and which shall be collected and utilized in program planning and shall be part of the continuous evaluation system. (1) Student characteristics: An analysis shall be made of the economic, educational, and social backgrounds and the mental and physical capabilities of the students. (2) Labor Markets To Be Served: An analysis shall be made of current and emerging employment needs, as the basis for those program modifications in the area school that will provide the trained manpower to meet changing labor market requirements.

(3) Financial Ability. An analysis shall be made of the financial ability of the area school to provide the resources necessary to meet fully the vocational education needs in the communities served.

(4) Individual Program Cost Effectiveness: An analysis shall be made of the per student costs of each individual program. When correlated with data concerning student performance on the job, this information shall be used to increase the efficiency and effectiveness of the school's vocational curriculum.

(5) Achievement: An analysis shall be made of the achievement levels of students to determine the

extent to which instructional objectives are being achieved.

(6) Staff Morale: Because of the crucial impact of teacher morale on teaching effectiveness, the school shall identify those factors that either foster or impair sound staff morale.

(7) Participating Schools: Studies shall be made of the reactions of the professional staff in the participating schools to the contributions being made by the area school.

(8) Advisory Committee's Recommendations: Studies shall be made of the practical experience inputs, the recommendations, and the suggestions of the various advisory committees and their role in program modifications.

(9) Follow-Up Studies of Graduates or Trainees: The area school shall conduct follow-up studies of its graduates and those who leave for early employment to determine their present job placements and to obtain their assessment of the effectiveness of their vocational school education. Efforts shall be made to maintain contact in succeeding years for similar purposes.

(10) Early Leavers: The area school shall conduct studies of the early leavers to determine reasons for their leaving the school. This information shall be used to adapt the program of the school to the needs and interests of such students.

(11) Surveys of the Community and of On-the-Job Supervisors: An area school shall annually conduct systematic surveys of opinions of the on-the-job supervisors of the school's students and graduates in order to evaluate the effectiveness of the initial training the students have received and of the community to ascertain whether the educational requirements of all persons needing or desiring training are being met. . . ."

§91-27-6

Based on assessed student needs and interests an area vocational school shall provide a student record service, individual appraisal service, informational

service, admissions and registration service, counseling service, follow-up service, student placement service, school health service, and guidance service.

Guidance services shall be directed by a certified vocational guidance counselor. The service shall assist a student to understand his/her strengths, weaknesses, interests and abilities, to understand and to adjust to his/her environment, and to assist the school to reach its overall education objective.

The school shall provide the necessary facilities insuring privacy for counseling, clerical help and materials for effective implementation of guidance services.

Instruction and services shall be available to meet the requirements of disadvantaged and handicapped students and students with exceptional needs because of economic, educational, mental, physical or social limitations.

§91-27-7

An area vocational school shall show evidence that its library media facilities are being used effectively and efficiently.

The library media services shall be directed by a certified librarian or certified vocational instructor. The library media collection shall be adequate in size and scope to serve effectively the program offered and shall be kept up-to-date through a planned program of acquisition and deletion.

§91-27-9 -- 91-27-10

The vocational schools accreditation advisory body to the state board shall, without discrimination based on age, sex or race, have a membership representing public employment services, employers, employees, post-secondary and secondary vocational educators, vocational students, and the general public including minority groups. The advisory body shall advise the state board about accreditation standards, operation procedures

and policy, educational needs, and manpower projections.

The state board and the advisory body shall annually review the accreditation regulations for area vocational schools.

STATUTES

§158.525

"The department shall develop a comprehensive statewide program of career education by assuming the following functions;

1) Assist in the development and dissemination of model curricula in career education . . . in conjunction with the programs of local boards of education and the institutions of higher education responsible for teacher education;

2) Identify and disseminate information relating to innovative teaching methods for instruction in career education;

3) Assist local school boards in conducting teacher in-service education programs in career education based on a training program developed by the department;

4) Assist teacher education institutions in the development of a program designed to prepare teachers to utilize the theories and methods required of a program of teacher education;

5) Provide funding for teacher in-service education programs when so requested by local school districts . . .

6) Assist in the design and implementation of career education guidance programs and services deemed appropriate by the department."

§163.020;030

"This state accepts and agrees to comply with all the provisions of the acts of Congress . . . relating to vocational education . . . the purpose of which is to provide training, develop skills, abilities, understandings, attitudes, work habits, and appreciation, and to impart knowledge and information needed

by workers to enter into and make progress in their chosen vocations. These training opportunities should be provided for the young people who are enrolled in the regular day schools, and, also, for out-of-school youth and adults, both employed and unemployed who are in need of and can profit by vocational training.

The state board of education is vested with the authority to carry out the purposes of the program of vocational education . . . and is given all the necessary power and authority in administering vocational education and carrying out the provisions of the acts relating thereto.

§163.085

"The state board of education is authorized to purchase, lease or erect . . . buildings to be used as state vocational schools . . .[which]. . . in its discretion will best meet the vocational education needs of the Commonwealth. Such facilities . . . shall be operated in accordance with policies of the board and . . . the state plan for vocational education . . . ."

§163.086

APPOINTMENT

"There shall be a state advisory council on vocational education . . . of 21 members appointed by the governor to advise and consult [with the state board of education, superintendent of public instruction, and assistant superintendent of vocational education] in the development of rules and regulations and annual state plan for the administration of vocational education. The council shall be responsible for holding public hearings on vocational education and evaluate significant areas of the state program . . . each year, prepare an annual report of its findings, then submit it . . . to the United States commissioner of education and the national advisory council on vocational education in compliance with the provisions of the acts of Congress . . . ."

704 KAR 3:150

"Teachers qualified to serve in an approved [industrial arts] unit in a junior and/or senior high school shall [have] a regular certificate, valid at the secondary level. . . In scheduling industrial arts classes, consideration shall be given to pupil placement . . . . The maximum number of pupils per shop class should not exceed twenty four. . . . Evaluative procedures shall be included in the plans for the program . . . ."

PUPIL/TEACHER RATIO

There shall be minimum space requirements for industrial arts classes.

705 KAR 1:010

"The Kentucky State Plan for the Administration of Vocational Education shall be prepared and approved by the State Board of Education . . ."

705 KAR 3:020

"A public specialized high school may be established . . .[provided it] shall be used exclusively or principally for the provision of vocational education to persons who are available for study in preparation for entering the labor market . . . ."

Other standards to be met include:

"(2) The school shall serve a minimum of 1,500 students in grades nine . . . through twelve . . ., with a minimum of 500 students in the eleventh and twelfth grades.

(3) All students enrolled in the school must have an objective of occupational preparation for entering the labor market.

(4) All students in the school shall be enrolled in a program of occupational orientation, exploration, and work experience, or occupational preparation leading to job entry skills.

(5) The school shall offer a minimum of twelve . . . different vocational preparation programs. The types of programs shall be approved by the Assistant Superintendent for Vocational Education.

(6) The total school curriculum shall meet the minimum State Board of Education standards for high school accreditation.

(7) The administrator and assistant administrator shall hold a certificate for the administration, coordination, and supervision of vocational education.

(8) Each vocational education program offered in the school shall meet the minimum State Board of Education requirements for teachers, curriculum, and equipment.

(9) The school shall be available to all residents of the area designated and approved by the State Board of Education."

705 KAR 3:030

"A department of a public high school or area vocational education center may be established . . . [provided] the facility shall be used exclusively or principally for providing vocational education in no less than five different occupational fields to persons who are available for study in preparation for entering the labor market; [it] shall serve an area with high schools having a minimum enrollment of 1200 students in grades nine through twelve . . .; [it] shall [offer] a minimum of five different vocational preparation programs . . . approved by the Assistant Superintendent of Vocational Education [which] . . . shall meet the minimum state requirements for teachers, curriculum, and equipment [and] the facility shall be available to all residents of the area. . ."

705 KAR 3:060

"A department of a public high school may be established as part of a remote high school to serve one or more public high schools in a public school system [provided] the

public high school(s) to be served . . . is [at least] twenty-five miles [away] from any area vocational education center: [that] the public high school(s) to be served has no local school districts adjacent to it with which it can cooperate to meet the minimum standards for establishing . . . an area vocational education center; [that] the facility . . . be used exclusively or principally for providing vocational education in [at least] . . . five different occupational fields to a minimum of 150 students, fifteen years of age or older . . . available for study in preparation for entering the labor market . . . . The types of programs and related instruction shall be approved by the Assistant Superintendent for Vocational Education . . .[and] shall meet the minimum state requirements for teachers, curriculum, and equipment. The head of the department must hold the certificate for administration, supervision, and coordination of vocational education . . . . The facility shall be available to all residents of the area . . .[and] the department shall be operated by the local school district as a regular part of the high school program . . . .

The local school district shall be responsible for the complete maintenance of the department and all of the equipment in accordance with state and federal guidelines and regulations . . . ."

705 KAR 3:070

Residential vocational school facilities "shall be used for the purpose of demonstrating the feasibility and desirability of such [schools] for youth of high school age . . [These] shall enroll youths, [between] fifteen years of age and . . . twenty-one years of age . . . ., who need full-time study on a residential basis in order to benefit from such education . . .[The schools] shall serve a minimum of 500 full time residential students . . . [receiving] at least six hours of instruction per day on an individualized basis . . . . The vocational education programs offered at such schools shall include occupational fields for which available labor market analysis indicates

a present or continuing need for trained manpower. [These] shall be appropriately designed to prepare enrollees for entry into employment or advancement in such fields. . . ."

705 KAR 3:075

"Maintenance of vocational education facilities owned by the local boards of education shall be the responsibility of the local boards of education. . . ." When owned by the state and operated by the "Department of Education, Bureau of Vocational Education" maintenance "shall be accomplished from approved funds designated in accordance with current and approved plans and specifications on file in the office of the Superintendent of Public Instruction and the Division of Engineering, Executive Department of Finance and Administration."

705 KAR 3:090

"Equipment purchased for vocational education programs shall . . . meet the specifications and requirements as established by the Bureau of Vocational Education . . .[and] made available by the Bureau . . . in the form of recommended equipment lists . . .; [and shall] be in accordance with the safety standards as outlined in the Occupational Safety and Health Act of 1970 . . . and subsequent amendments thereto . . . ."

705 KAR 4:010

"Objectives of vocational instruction" shall be designed to . . . prepare individuals for gainful employment . . . in recognized . . . and in new or emerging occupations or . . . for enrollment in advanced or highly skilled vocational and technical education programs . . . . The content of instruction . . . shall . . . be developed and conducted in consultation with potential employers and other individuals having skills and substantive knowledge of the . . . occupational fields included in [the] instruction . . . . The vocational program of instruction shall combine and coordinate classroom instruction with

field, shop, laboratory, cooperative work, or other occupational experience . . . ." Instructional personnel in vocational education shall be qualified and fully certified under the provisions of the Kentucky State Plan for the Administration of Vocational Education and . . . regulations of the State Board of Education . . . . [They] shall attend district, regional, or state in-service education meetings . . . when . . .[these] are reimbursed by funds from the Bureau of Vocational Education . . . . A continuous evaluation of the vocational education program shall be conducted by the local educational agency . . .[which] . . . shall include a follow-up of students after their termination from the program . . . . Classrooms, libraries, shops, laboratories, and other facilities, including instructional equipment, supplies, teaching aids, and other materials, shall be adequate in quantity and quality to meet the objectives in the vocational instruction . . . ."

705 KAR 4:020

"Extended employment time shall be used for . . . teaching secondary students during summer sessions . . . [supervising] . . . student organization activities occurring during the summer; [and for] other activities such as curriculum committees, laboratory organizations, conducting manpower surveys, and planning an improvement of the course of study . . . . Plans for extended employment shall be submitted with the annual local plan for vocational education. . . . . By May 15, each teacher shall submit a schedule of extended employment activities for the summer. [It] shall be approved . . . by the local superintendent . . . ."

705 KAR 4:040

Enrollees in cooperative vocational education programs shall be at least sixteen years of age. If under eighteen years of age, "they must secure a work permit issued by the superintendent of schools. Students from eighteen to twenty-one years of age shall have a certificate of age on file with the employer. [They shall have taken basic skill

prerequisites]. . . .[They] shall receive minimum classroom instruction equivalent to five hours per week. A local advisory committee shall be formed to advise on suitability of job selection, standards, related instruction, and criteria for evaluation and performance.

Cooperative teacher coordinators shall . . . hold a teaching certificate designated for a teacher in an occupational area in which he[she] is coordinating cooperative vocational education experiences, [and] have a minimum of two years teaching experience in an occupational program area . . . ."

705 KAR 4:060

Vocational preparation programs offered in vocational schools "shall be offered on a daily basis and on a schedule which is consistent with good educational practice . . . . Vocational student organizations shall be integrated in the vocational education program. Vocational teachers shall serve as adult advisors to the student organizations to improve the quality and relevance of instruction, develop student leadership, enhance citizenship responsibilities, and provide other wholesome experiences for youth . . . . Students shall be admitted for enrollment and receive instruction on the basis of their potential for achieving the objectives of such instruction . . . .

Secondary students enrolled in public or private schools shall be permitted to enroll in vocational programs within state-operated area vocational schools consistent with that school's student enrollment quota for cooperating local school districts. Secondary students shall be at least fifteen . . . years of age during the school year in which they enroll in a vocational preparation program. No lower age limit shall deny any student use of the facilities of vocational schools for career education experiences designed to produce occupational awareness, orientation, exploration, and limited work exposure. High school credit shall be permitted for students enrolled in vocational programs in vocational schools on the same basis as the equivalent

time would be granted high school credit for programs offered in the secondary schools.

Each local district shall provide adequate instructional supplies for each approved vocational education program. . . ."

705 KAR 4:070

AGRIBUSINESS EDUCATION

In secondary schools offering secondary agribusiness education programs, "instruction shall be for youth . . . who are preparing for job entry in the field of agriculture. . ." In addition, "the following minimum requirements shall apply to those schools:

(1) The curriculum shall be designed to offer training that will enable students to develop skills and competencies that are necessary for job entry and advancement in their chosen agricultural occupations.

(2) Each student shall plan and conduct, under the supervision of the teacher, an occupational experience program which contributes to his[her] occupational objective.

(3) Each student enrolled in a preparatory program shall have a record of an occupational objective on file. It shall specify a planned sequence of instruction.

(4) Preparatory programs designed for eleventh and twelfth grade students shall be two . . . year programs that meet for a minimum two . . . hour block of instruction each school day . . . .

The Future Farmers of America (FFA) shall be the officially recognized student organization for secondary students enrolled in agribusiness education . . . Agribusiness education teachers shall serve as FFA chapter advisers in multiple teacher departments; each teacher shall share the FFA chapter responsibilities.

A regular program of agribusiness education shall require the services of a teacher for a twelve . . . month period. The summer months shall be spent supervising occupational experience programs of secondary students, supervising the business operations of young and adult farmers and other agricultural workers employed in agriculture."

AGRIBUSINESS EDUCATION

705 KAR 4:080

"The Kentucky FFA Leadership Training Center at Hardinsburg shall be operated and maintained as a definite part of the state program of agribusiness education. The center shall provide training in leadership and citizenship development for youth.

The Assistant Superintendent for Vocational Education shall have general responsibility for the management and control of the center. The director of the center shall be a supervisor on the staff in agribusiness education in the Program Development Division, Bureau of Vocational Education, Department of Education. The facilities shall be maintained by dues and fees collected from members of the Kentucky Association of Future Farmers of America, by funds budgeted by the Bureau of Vocational Education and by fees charged other groups using the center. The facilities shall be used by the members of the Kentucky Association of FFA and other vocational education youth organizations for leadership training and recreation. When not used for vocational education purposes the facility is available for use by other educational and farm organizations . . . ."

BUSINESS AND OFFICE EDUCATION

705 KAR 4:090

"The following minimum requirements shall apply for schools offering a secondary vocational business and office education program:

(1) The school shall offer a minimum of two . . . business and office occupational curriculum clusters in addition to a basic program. The clusters are secretarial, clerical, accounting - jr. management, and data processing.

(2) The program shall have a minimum of three . . . business teachers, two . . . of whom are approved as vocational teachers.

(3) A minimum total of fifteen . . . vocational business and office students are enrolled in the two . . . occupational clusters.

(4) Students shall have an occupational objective card on file specifying a planned sequence of instruction

(5) Each student's curriculum shall consist of six . . . units of credit in business and office, four . . . of which must be classified as vocational.

The Future Business Leaders of America (FBLA) shall be the official student organization for business and office education . . . ." A minimum one-week of extended employment shall be given to vocational business and office teachers "to complete the activities of the program and participate in approved in-service education . . . ."

Vocational business and office teachers shall have a "baccalaureate degree with a major or minor in business, a provisional high school certificate for Kentucky," and "one year or 2,000 hours of work experience related to the occupation to be taught . . ."

705 KAR 4:100

HEALTH AND PERSONAL SERVICE EDUCATION

"The following standards shall apply for schools offering a secondary vocational health and personal service education program:

(1) The student enrollment shall not exceed the number established as approved for the available classroom and clinical facilities.

(2) The maximum student/teacher ratio for health occupations programs shall be fifteen . . . to one . . . per session and twenty . . . to one . . . for personal service programs unless otherwise approved in writing by the Assistant Superintendent for Vocational Education. In the event a licensure, certification, or registration board mandates a lower student/teacher ratio, the requirements of this board shall apply.

(3) Secondary health and personal service education classes normally meet for a minimum of three . . . hours per day. Innovative programs of shorter duration shall be approved in writing by the Assistant Superintendent for Vocational Education.

(4) The program shall meet the criteria required by state and national boards and associations that license, certify, or register the graduates of the program.

Student leadership development activities shall be integrated into the educational program. . .

All health and personal service education instructors shall be employed for a minimum of one (1) month beyond the regular school term to complete the activities of the program and participate in planned inservice meetings . . . .

An instructor in health and personal service education shall have at least a high school diploma, or its equivalent, determined by evidence of an acceptable score on a GED test administered by an approved testing center, be a graduate of an approved curriculum of vocational education in the area to be taught, and have at least three . . . years of work experience in the area. One . . . year of the work experience requirement may be substituted by one . . . year of additional education beyond the high school level in an approved postsecondary school. The minimum qualifications for an instructor shall be equivalent to those required by state and national boards and associations that license, certify, or register the graduates of vocational programs. The work experience shall be approved by the Assistant Superintendent for Vocational Education. The teacher shall hold the Kentucky education certificate designated for the position. In a health careers program, at least one . . . instructor shall be a registered nurse licensed to practice in the Commonwealth of Kentucky . . . ."

705 KAR 4:110

CONSUMER AND HOMEMAKER EDUCATION

Schools "offering a secondary vocational program in consumer and homemaking education" shall "offer instruction in the areas of child development, clothing and textiles, food and nutrition, housing, management-consumer education, and personal and family development," which will be included in a "two year comprehensive program.

The Future Homemakers of America (FHA) shall be the official student organization for home economics education and shall be an integral part of the instructional program . . . . The teacher shall be employed [for an

extended one-month period]. . . to complete the activities of the program and participate in appropriate in-service education . . . ."

705 KAR 4:120

HOME ECONOMICS

Schools "offering a secondary vocational program in gainful home economics" shall base their curriculum on "a job analysis of the occupation." Classes "shall meet for a minimum of two consecutive class periods daily . . . . Students shall be enrolled on the basis of their interest and aptitude for a specific occupation or a cluster of closely related occupations.

The student organization, FHA or FHA/HERO shall be an integral part of the program. The teacher shall be employed [for an extended minimum one month term]. . . to complete the activities of the program and participate in approved inservice education."

A secondary gainful home economics teacher shall have "a certificate to teach vocational home economics" and "one year or 2,000 hours work experience related to the occupation to be taught or one year teaching experience, a course related to occupational instruction and approved additional experience or occupational experience in the area of home economics related to the occupation . . . ."

705 KAR 4:130

INDUSTRIAL EDUCATION

"The following minimum requirements shall apply for schools offering a secondary industrial education program:

(1) Classes having the objective of occupational preparation shall be organized to operate for three . . . consecutive hours including passing time on a daily basis during the school year. Any exception to this schedule will be made for the purpose of experimentation or research with the approval of the Assistant Superintendent for Vocational Education.

(2) Students enrolled in occupational preparatory programs shall be at least fifteen . . . years of age during the school year in which they enroll, and they shall be enrolled on the basis of their potential for achieving

the specific occupational goal they have chosen.

(3) Courses of instruction shall be made up of specific occupational content and be of sufficient length to prepare students with entry-level skills in the occupation.

(4) Class size shall be determined by the number of individual work stations provided. No more than twenty . . . students shall be the responsibility of one . . . teacher at any given time.

The Vocational Industrial Clubs of America (VICA) shall be the official youth organization for industrial education students. The organization shall function as an integral part of the instructional program.

Industrial education teachers shall be employed at least one . . . month beyond the regular school term to complete the activities of the program and participate in approved in-service education.

Facilities for industrial education programs shall be of adequate size and design to accommodate the equipment activities, and the number of work stations peculiar to each program. The equipment shall be equivalent to that used in industry. . . .

The minimum qualifications for employment of an industrial education teacher shall be:

(1) A high school graduate or the equivalent with at least three years of journeyman level experience in the occupation to be taught, which shall be approved by the Assistant Superintendent for Vocational Education: or an approved associate or bachelors degree in industrial education.

(2) A certificate endorsed to teach the specific preparatory program . . . ."

705 KAR 4:140

DISTRIBUTIVE EDUCATION

Schools "offering a secondary marketing and distributive education program" shall "offer a three year program of instruction beginning in grade ten . . . .

Distributive Education Clubs of America (DECA), the official student organization for marketing and distributive education, shall be an integral part of the instructional

program . . . . Teachers shall have a minimum of one month extended employment . . . to complete the activities of the program and to participate in approved in-service education . . . [They] shall [have] a baccalaureate degree with a major or area in distributive education, business administration, or business education [accounting or general business]; a provisional or standard high school certificate for Kentucky; [and] one year or 2,000 hours occupational experience in distributive occupations . . . approved by the Assistant Superintendent for Vocational Education . . . ."

705 KAR 4:150

PRACTICAL ARTS EDUCATION

In schools "offering a vocational practical arts education program," students "shall explore a minimum of six occupational clusters from a minimum offering of nine clusters during three consecutive years of grades six, seven, eight, and nine . . . . In addition . . . students must have an orientation to the world of work and the economic system.

During the first year of the program, students shall explore at least three . . . clusters from a minimum of six . . . cluster offerings. In addition, they must have a module consisting of orientation to the world of work and the economic system prior to, or concurrent with, beginning exploration of the occupational clusters.

During the second year of the program, students shall explore at least three . . . clusters not previously explored from a minimum of six . . . cluster offerings, three . . . of which were not previously explored in the first year of the program.

During the third year of the program, students shall explore at least one . . . cluster from a minimum of four . . . offerings. Enrollment at this level shall be permitted to be in a cluster previously explored in the first or second year of the program . . . ."

Students "may elect to enroll in other vocational student organization if [their] bylaws . . . so permit."

Teachers shall hold "a provisional high school certificate for Kentucky;" they must have "work experience in

the occupational cluster or clusters to be taught on a vocational certificate in the occupational area being taught," and "experiences in directing students in an exploratory program or pre-service or in-service experiences in directing students in an exploratory program."

705 KAR 4:160

PUBLIC SERVICE OCCUPATION EDUCATION

Schools "offering a vocational public service occupation education program at the secondary level" shall ' offer a two year public service education program of instruction in grades eleven and twelve . . . . The Vocational Industrial Clubs of America (VICA) shall be the official student organization for public service occupations students...."

Teachers "shall have a minimum of three weeks extended employment to complete the activities of the program and participate in approved in-service education." They shall have a "high school diploma, three years of work experience related to the occupation to be taught," and a "one-year vocational education certificate for public service occupations education."

705 KAR 5:020

ADMINISTRATION

"The overall administration of area vocational education schools shall be under the direction of the Assistant Superintendent for Vocational Education.

Area vocational education schools . . . constructed as an addition to the high school facility which is owned and operated by a single local school district for the benefit of only one . . . high school shall be directly administered by a local board of education being responsible for the education program in the area served by the school.

Area vocational education schools . . . constructed as a separate facility to serve two . . . or more high schools in two . . . or more local school districts . . . shall be directly administered by the State Department of Education, Bureau of Vocational Education, through the regional staff for vocational education which is responsible for the vocational programs in the region in which the school is located. . . ."

"Each area vocational education center that is operated by the State Department of Education, Bureau of Vocational Education, shall have an official steering committee appointed by the Superintendent of Public Instruction upon recommendation of the Assistant Superintendent for Vocational Education. It shall provide systematic contact with and participation by responsible leaders in the cooperating local school districts. The center steering committee shall be composed of the superintendent of schools, one . . . member of the local board of education, the principal of a cooperating secondary school, and one . . . lay citizen from each participating local school district; and a member of the Regional Advisory Committee on Vocational Education.

The center steering committee shall be authorized to consult, counsel, and advise with the coordinator of the area vocational education and his[her] staff, and the director of the Division of Program Management in the Bureau of Vocational Education, State Department of Education, on all matters pertaining to the operation of the center.

The steering committee shall consult, counsel, and advise with the administrators responsible for the operation of the center on such things as: (1) Annual and long-range program planning for the center; (2) Procedures to be followed in implementing the program plans; and (3) Management procedures in handling the details pertaining to program operations.

The management procedures referred to in the preceding section of this regulation include such areas as determining the programs to be offered, curriculum development, employment of personnel, in-service training of personnel, enrollment quotas for secondary school students from the different participating local school districts, discipline of students, class and school schedules, transportation of students, equipping and maintaining the facilities, program evaluation,

student counseling and guidance, records and reports, and other areas of concern pertaining to the operation of the center."

705 KAR 5:050

The "policy for vocational-technical education regional advisory committees in Kentucky shall be prepared and provided to regional advisory committees and other interested parties . . . ."

705 KAR 5:060

"State-operated vocational-technical schools and area vocational education centers shall be permitted to accept live work projects when the administrative and instructional staffs deem these necessary and appropriate for the vocational education of the students....

Individuals or organizations committing live work to a school shop shall be provided a copy of the school policies for accepting and performing live work.

School employees and members of the State Board of Education shall not guarantee or be liable for any live work performed in the vocational shops, nor shall they be responsible for the theft or loss of any article or articles that may be left in the vocational shops for any reasons...."

705 KAR 5:070

"A regional vocational education program shall include all vocational, technical, . . . programs in their geographic region as designated by the State Board of Education to be served by a state vocational-technical school and area vocational education centers...."

705 KAR 5:080

"Teachers and administrators employed by a state vocational-technical school or an area vocational education center shall be responsible for the supervision and discipline of students during the time they are in attendance at a state-operated vocational facility.

Secondary school students who are subject to disciplinary action shall be referred by the principal of a state vocational-technical school or the coordinator of an area vocational education center to the principal of the parent school in which the student is enrolled. The principal or coordinator shall submit in writing to the princiapl of the parent high school the reason(s) for disciplinary action. The principal of the parent high school shall respond to the vocational principal or coordinator as to the action to be taken. The vocational principal or coordinator will accept the decision of the local school authority and act accordingly.

SUSPENSION

Any secondary student who is suspended or expelled from a participating local high school shall be considered suspended or expelled from the state vocational-technical school or area vocational education center in which [he/she] is enrolled."

EXPULSION

3. Vocational Education

Statutes

§17:151.2

"The parish school boards of St. John the Baptist, St. Charles and St. James Parishes may establish a consolidated multiparish vocational-technical school district . . . and may provide funds for the establishment, operation and maintenance" of vocational-technical schools in the district.

§17:349.4

"Any state-operated trade or vocational technical school which violates the constitution or laws of the state, or state board of education policy, rules and regulations shall be closed . . . and the [board] shall cease and desist in the operation of such school or schools . . . ."

§17:480

"The teaching certificate of any teacher in the state operated trade and vocational, technical schools of Louisiana, who shall instruct a class in violation of the constitution and laws of this state, or of state board of education policy, rules, and regulations . . . is . . . revoked" as well as teaching certificate of the teacher's supervisor or director who permitted the instructor of that class. "The directors of trade and vocational technical schools" are prohibited from paying such teachers for rendering services without a valid teacher's certificate."

Regulations

Policy and Procedure Manual of State Board of Elementary and Secondary Education
1.00.13

Initiation of new programs in trade, or vocational education should come to the State Board of Education from the directors of these schools. It shall be their duty to present these programs to the Board.

Policy and Procedure Manual of State Board of Elementary and Secondary Education 1.03.00

There shall be a state advisory council for vocational technical education. Members of the council shall serve two-year terms. It shall consist of the regional directors council and an executive committee and shall advise the board of the administration of vocational-technical schools.

Policy and Procedure Manual of State Board of Elementary and Secondary Education 3.00.12

The objectives of the vocational technical education shall be determined through a state survey designed to measure the interests of the citizens. All schools are expected to maintain educational standards. Offerings should reflect economic and social shifts and public needs.

Policy and Procedure Manual of State Board of Elementary and Secondary Education, 3.03.02

VO-TECH ATTENDANCE POLICY

A student must attend classes four days after enrollment to be counted for reporting purposes. If a student has three consecutive absences or five intermittent absences in a two month period, he/she will be suspended for a three month period To reenroll after dismissal, the student must give "reasonable assurance that the casues of the excessive absences have been removed." The validity and approval of absences for injury, illness, military duty or death in the immediate family will be determined by the school's director. [The regulations governing vocational schools are set forth in the Vo-Tech Policy and Procedure Manual.]

SUSPENSION

MILITARY

Policy and Procedure Manual of State Board of Elementary and Secondary Education, 4.03.40

Affirmative Action Policy of Vo-Tech Schools

"We affirm ourselves to a program of recruitment selection, appointment, promotion, training and compensation only on pertinency of task and not on the basis of non-pertinent factors."

The objectives of the program include communicating to administrators, employees and the public of the existence of the program through state wide press releases, a job bank, workshops at each vo-tech school and mailings to employment agenices.

The responsibility for the program rests with the director of each school. He/she shall review the policies periodically to determine their effectiveness.

EQUAL OPPORTUNITY

A person who believes he/she has been discriminated against has the right of appeal as follows: (1) the equal employment counselor; (2) equal employment director (3) civil service commissioner or state board of education as appropriate. Persons are urged to seek the advice of an equal employment counselor before filing with the CSC or SBE.

APPEAL

Policy and Procedure Manual of State Board of Elementary and Secondary Education, 5.03.31

TUITION

State operated vo-tech schools are to charge tuition of $30.00 per month to out-of-state students. A student over 23 years of age must have been a Louisiana resident for twelve months to be considered a resident for tuition purposes.

Policy and Procedure Manual State Board of Elementary and Secondary Education, 5.03.40

Bus transportation should be provided to vo-tech schools at no cost to the student.

3. Vocational Education

Statutes

§57

The purpose for the establishment of state vocational institutes by the board is "to promote specialized training for persons who give evidence of special aptitude or need and who desire specialized training designed specifically to train for service in trade, industry or commerce."

§106

The commissioner shall appoint an education specialist II or agricultural education consultant who shall be responsible, among other duties, for "supervision of agricultural technical education including agribusiness and agriculture's relation to the environment."

§2351-A

1. A "vocational center" is located in a particular community, and is governed by the local school board;

2. A "vocational region" means all communities within a certain geographical area governed by a board representing the various community municipalities.

§2356-A

Any school offering vocational education, regardless at which level the program is offered, must meet the following requirements:

1. Regional Center - "It shall be a Regional Center for vocational . . . education and may include satellite centers."

2. Approval of State Board of Education - A vocational education program cannot be established, maintained or operated without the approval of the state board of education;

3. Programs - "Programs of education and training in trade, industrial, agricultural, business, distributive, technical and service occupations shall be available to

persons in secondary school, or who have graduated from secondary school;

4. Satellite Centers - If there is a justified need for expansion, all requests for satellite centers shall be submitted to the State Board of Education. The local school committee "shall assume full financial responsibility" and receive state subsidy and tuition income. The school committee shall furnish facilities and equipment and "be eligible for school construction aid." Personnel operating satellite centers shall be nominated by the superintendent and be approved by the school committee of directors. Personnel working in satellite programs shall be "supervised by the school principal and the director of the . . . vocational center," making joint recommendations to the superintendents of schools.

5. Advisory Committees - As of 1972 there shall be an advisory committee in any operating vocational education center. Members shall consist of the superintendent or his representative of the participating high schools and "one Board member chosen from each school committee or board of directors by its membership." The responsibility of the advisory committee will be to prepare and submit annual reports on the satellite and/or vocational centers to the state board of education and each town served by the centers;

6. Local Director - He/she must meet qualifications set forth by the state board of education. The director shall be responsible to the administrative staff of the school operating the center.

7. Transportation - It shall be provided by the existing regional centers and any future satellite programs.

§2356-F

Any person eligible for "free public education in the secondary grades," full-time 13 and 14-year students, or any continuing education student "may attend any regional technical and vocational center" in his/her

area provided that, by the same standards as all other students applying for admission, he/she is "qualified to profit by instruction and that the school can accommodate" him/her.

§2356-G3.

"Vocational regions shall be administered by a cooperative board." A majority vote of the school committees or board of directors shall determine the size, number and appointments of the cooperative board and the method of sharing costs. "Decisions reached on the method of sharing costs and the representation on the cooperative board may be appealed to the state board of education by any administrative unit within the region." "The board's decision shall be final and binding." Membership of the cooperative board shall be in proportion to the population. Citizens holding jobs with a conflict of interests with the cooperative board members will not be considered. The cooperative board members will elect a chairperson, a vice chairperson, a secretary and adopt a constitution or by-laws or both. The secretary and treasurer need not be members of the cooperative board.

CONFLICT OF INTEREST

§2356-G5

"The superintendents of schools within each region shall serve as an advisory committee to the cooperative board." The advisory committee shall be invited and receive notice of all cooperative board meetings.

"The vocational administrator shall meet with the superintendents' advisory committee at least four times each year to review proposed programs, budgets and issues relating to vocational education."

§2356-G6

The cooperative board shall submit an approved annual budget to the legislative body in each unit. The legislative body will vote to accept or reject the budget. No portion may be amended. The cooperative board members shall be notified in writing of the results

of the vote. "A vote on the budget of the vocational region must be completed at the same time as the regular school budget in each year."

Warrant. "Each regional meeting shall be called by a Warrant. The warrant shall be signed by a majority of the cooperative board membership." It shall:

(1) "specify the time and place of the meeting;"

(2) "direct to any resident living within the vocational region by name ordering him to notify all voters within the region to assemble at the time and place appointed;"

(3) "an attested copy of the warrant shall be posted by the person to whom it is directed in some conspicuous public place in each of the municipalities within the vocational region at least seven days before the meeting.

§2356-I

If the school administration determines that a student would benefit more by attending an "out-of-state secondary or vocational school which is closer than a Maine Regional Vocational school, the local administration shall be reimbursed by the state of Maine the same amount per pupil as would have been incurred by the Maine Regional School."

§2401

The commissioner shall have the duty of investigating the methods of industrial education, advise and aid introductory industrial courses for free state schools and academies and report on the industrial education courses in all special schools. He/she shall have the authority to inspect and approve the courses of study in all free high schools and academies aided by the state.

IV.D.; Statute §2356-C8

IV.H.: Statute §911

3. Vocational Education

Statutes

Art. 77 §133

The state treasurer is custodian for all moneys received by the federal government under the Smith-Hughes Act, the George Borden Act, the Vocational Education Act of 1963 and any other similar laws Congress might enact relating to vocational education. The state board of education shall be responsible to carry out the provisions of those acts and to authorize the distribution of any federal funds received for this purpose. It shall also authorize that assistants' salaries and office expenses be included as necessary.

3. Vocational Education

Statutes

71 §37 K

"Each school committee may authorize business demonstration projects of an educational nature, to be operated by students as an educational service. Each such project shall be subject to all applicable health, safety and nutritional regulations."

74 §2

"The commissioner, under the direction of the state board, shall investigate and promote distributive occupations, industrial, agricultural, household arts education and practical nurse training, and initiate and superintend the establishment and maintenance of schools for . . . [such] education, and shall supervise and approve such schools."

74 §2 A

"The commissioner shall establish rules and regulations to promote the use of vocational students during their vocational studies by the town or in the case of a regional school district, the [region] . . . Students shall not be permitted to perform work on projects which are outside the . . .[area] . . . served by the school attended by said students, unless the projects have exceptional educational value as determined by the commissioner."

74 §3; 4; 5A

Separate towns, regional school districts or districts of two or more towns may establish and maintain independent distributive occupational training schools including industrial, agricultural, household arts and practical nurse programs.

74 §5, 6

Local and district trustees for vocational education, administering approved independent distributive occupations, industrial, agricultural, household arts and practical nurse training schools,

shall, under a scheme approved by the commissioner, appoint advisory committees composed of representatives of local trades, industries and occupations. District trustees shall adopt plans of organization and administration which shall be binding on all towns in the district.

74 §7

"Residents of towns in the commonwealth not maintaining approved independent distributive occupations, industrial, agricultural, household arts and practical nurse training schools offering the type of education desired . . .may, upon the approval of the commissioner, . . .be admitted to a school in another town." The commissioner shall take into consideration "the opportunities for free vocational training where the applicant resides the financial status of such place, the age, sex, preparation, aptitude and previous record of the applicant, and other relevant circumstances."

74 §7 A

TUITION

Tuition for state wards attending vocational education programs shall be paid by the commonwealth.

74 §7 B

"An apprentice . . . shall upon the concurrence of the commissioner of labor and industries, be approved by the commissioner for related vocational training in any city or town regardless of residential qualification under the direction of the state board. Related classes for an approved apprenticeship program shall be conducted in a single school system, unless the commissioner in agreement with the commissioner of labor and industries determines that it would be in the best interests of said program to conduct such classes in more than one such school system."

74 §8

Tuition of non-residents attending vocational education shall be paid by the town in which the person resides.

74 §8 A

A person who is admitted to a day school in another town at least one and one-half miles away shall have his transportation paid for by the town wherein he/she resides. The town may receive fifty percent of the cost of such transportation.

74 §9

The commonwealth shall annually pay one-half the net maintenance sum to schools maintaining approved independent distributive occupations, industrial, agricultural, household arts or practical nurse training schools except agricultural departments in high school.

74 §10; 11

The commonwealth shall reimburse towns paying tuition and fees in agricultural departments in high schools and other vocational schools. The counties of Bristol, Essex and Norfolk shall be reimbursed for one-half the net maintenance sums.

74 §12

"The commonwealth shall pay to towns . . . maintaining approved . . . independent agricultural schools consisting only of agricultural departments in high schools two-thirds of the salary of the instructors therein."

74 §13

"Independent industrial, agricultural, household arts and practical nurse training schools may offer instruction in day, part time and evening classes. Independent distributive occupations schools may offer instruction in part-time and evening classes only. Attendance upon such day or part-time classes shall be restricted to those over fourteen years of age; and upon such evening classes, to those over sixteen years of age."

74 §14; 14A

Towns and regional school districts may establish and maintain household and other practical art classes to be open to persons over sixteen. The purpose of such classes shall be to: 1)provide opportunities for disabled soldiers and disabled workers; 2) provide additional

opportunities for livelihood for the inhabitants of smaller towns; and 3) provide "greater opportunities for persons trained in war industries."

Federal funds may be received and expended for such programs.

74 §15; 16

Cities may establish and maintain schools for instruction in "gardening, fruit growing, floriculture, poultry raising, animal husbandry, and other branches of agriculture and horticulture." A description of the purposes and scope of the instruction to be given shall be circulated prior to its establishment.

74 §17

Boards or officers having power to take land for school purposes in cities may take, by eminent domain, land not already appropriated to public use, or lease or purchase land either within or without the city limits, for the purposes of agricultural classes. A school committee may erect suitable buildings and provide the use of the plots for temporary housing of pupils.

74 §18

School committees or trustees for vocational education may establish classes for training teachers for continuation schools or vocational schools.

74 §20; 21; 22

The state treasurer shall be the custodian of federal funds in relation to vocational education programs and shall distribute them to the state board who may use them for salaries, and/or courses for the preparation of teachers of vocations selected as in need of stimulation

74 §22 E

"Any school committee or board of trustees for vocational education may elect a teacher who has served in its schools for not less than one school year to serve at its discretion" (i.e. have tenure) for vocational education programs.

74 §26; 27; 28

Agricultural schools, supported and approved by the state shall have boards of trustees whose members will serve without compensation, but shall be reimbursed for expenses. Such board shall submit estimates of the amounts necessary to equip and maintain their respective schools

74 §31B

The boards of trustees of agricultural schools "may supervise and control all athletic and other organizations composed of vocational agricultural school pupils." Expenditures by the trustees for the organization, equipment, and facilities for sport activities shall be considered to be a proper maintenance item for reimbursement purposes.

74 §32; 33

"Any resident of the commonwealth over fourteen years of age who resides in any town outside of a county in which a county agricultural school is located may be admitted to such school on the conditions prescribed" as to tuition payment. Residents of the counties where agricultural schools are located may attend free.

74 §37

Members of the staffs of the agricultural schools "shall investigate farm and market conditions for the purpose of advising individuals and organizations as to business methods among farmers, and satisfactory methods of marketing farm products, shall instruct in the formation of co-operative enterprises and shall perform other work calculated to promote the agricultural or rural development of the respective counties."

REGULATIONS "

REG. #5, Section 1

"A. LEGISLATION

Chapter 74, Sections 1 to 37, amendments thereto, and other legislation bearing on the subject . . . .

1. General. The Commissioner shall investigate and promote distributive occupations, industrial, agricultural and household arts education. The Commissioner shall cooperate with the Office of Education, Federal Security Agency, in the administration of the Smith-Hughes Act, the George-Barden Act and amendments thereto.

2. Establishment and Maintenance of Schools. The Commissioner shall initiate and superintend the establishment and maintenance of such schools. He[she] shall supervise and approve such schools. He[she] shall approve o disapprove non-resident pupils and fix tuition rates and present annually to the General Court a statement of amounts for which cities and towns shall receive reimbursement.

3. Approval Factors (Statutory). The ten approval factors over which the Department has definite responsibilities are . . .

Organization	Qualifications of Teachers
Control	Methods of Instruction
Location	Conditions of Admission
Equipment	Employment of Pupils
Courses of Study	
	Expenditures

4. Vocational Education Defined. Vocational education is . . . define[d] . . . as 'education of which the primary purpose is to fit pupils for profitable employment.' This shall be in preparation for employment or for advancement while in employment. The . . . four forms of vocational education which may be given State aid [are:] Agricultural, Distributive Occupations, Household Arts Education and Industrial Education.

5. Types of Schools Provided For. In each field, the following types of schools may be organized:

a. All Day -- a school in which the pupils are enrolled full time at the minimum hours established for the field.

b. Part-time Co-operative -- a school in which the pupils are enrolled full time at the minimum hours established for the field to provide to qualified pupils technical or related instruction in conjunction with school supervised experience in cooperating establishment.

c. Part-time and Evening -- schools in which the pupils give a part of their working time to instruction in the school.

d. Evening Trade Extension -- a school which provides supplementary instruction for pupils employed during the working day. Such instruction must relate to the day employment.

e. Apprentice -- a school which provides a minimum of 150 clock hours per year of supplementary training to qualified apprentices.

B. BASIC REQUIREMENTS AND REGULATIONS COMMON TO ALL SCHOOLS . . .

1. Distinctive Characteristics. The schools provided for . . are those . . 'under a distinctive management,' intended to furnish education distinctive in aim and character from general education provided for in the public schools . . . .

2. Periods of Activity.

a. Period of Initiating and Superintending Establishment. -- For formal approval of establishment of schools, the Commissioner will require:

1. A copy of the city ordinance or vote of the town authorizing a local board of control for vocational education. . . . .

2. Appointment of board of control (Trustees for Vocational Education) and executive officer. . . . .

3. Appointment of an advisory committee. The

names of the members should be listed . . . .

4. Appointment of a director whom the Commissioner approves (Distinctive management). . . . .

5. An approved location. Supervisors of the Department report upon this factor.

6. Adequate equipment. A report upon this is made by supervisors of the Department.

7. An organization of courses which the Commissioner approves; the proposed departments, courses of study and methods of instruction. Supervisors of the Department report upon these and superintend their organization . . . .

8. Teachers whom the Commissioner approves . . . .

9. An approved organization of pupils, plans for admission of pupils and employment of their time; the program of the school or department with a calendar and key. . . .

When all this evidence is ready for consideration, formal approval . . . will be acted upon by the Commissioner. Approval of establishment of schools shall be ordered as of the date on which all the above approval conditions . . . were satisfactorily met.

For formal approval of the establishment of additional departments or courses in approved schools, the Commissioner will require compliance with items (3, 5, 6, 7, 8, and 9) above.

. . . [Such] approval . . . may not be given for more than thirty days prior to the date upon which all required data is received.

b. Period of Superintending Maintenance of Established Schools -- For formal statement that established schools constitute approved schools, and the cities or towns maintaining them are entitled to reimbursement, the Commissioner will require the following evidence annually, or as necessity arises:

1. Directory of board of control (Trustees for Vocational Education) and the executive officer . . . .

2. Directory of the members of the advisory

committees . . . .

3. Registers of the school faculties in cases of re-appointments . . . .

4. Courses of study proposed for evening classes and unit courses . . . .

5. Programs of schools or departments . . . .

6. Trade or Occupational Records . . . or Farm Practice Records . . or Unit Course History Cards . . . . Supervisors of the Department will report upon these.

7. Special approved Life History Cards or Folders . . . . Supervisors of the Department will report upon these.

8. A financial record, . . . financial statistical returns . . . accompanied by an affidavit stating the cost of maintenance or amount of money expended for tuition of non-resident pupils. Supervisors of the Department will superintend the preparation of these.

9. Vital statistical returns . . . . Supervisors of the Department will superintend the preparation of these.

10. Applications of non-resident pupils . . . .

11. Notices of the withdrawal of non-resident pupils . . . .

12. Notice of the appointment of new faculty members, or transfers to new positions of faculty members whom the Commissioner approves . . . .

13. Notice of the resignation or change in salary of instructors . . . .

14. Written notice of any other changes affecting any of the approval factors.

Upon the basis of this evidence and further reports of supervisors of the Department, the Commissioner will determine annually . . . [the] . . . amounts for which cities and towns shall receive reimbursement . . . . The period of reimbursement may begin with the date of approval of establishment of schools or the date of entrance of

approved non-resident pupils. . . .

C. BASIC REQUIREMENTS AND REGULATIONS COMMON TO ALL SCHOOLS (By Approval Factors)

1. Organization. By 'organization' is meant the working plan for carrying out the aims of the schools. . . . Schools will be inspected upon the basis of the plans approved.

a. As to Departmental Character -- All independent State-aided vocational schools shall be organized by departments or courses. A department or course is an organization of instructional activities, pupils and teachers.

b. Advisory Committees -- . . .[B]oards of control (trustees for vocational education) shall appoint advisory committees composed of representatives of local trades, industries and occupations and areas of distribution.

These committees . . . will be most effective when the director points out specific services which they can render. The superintendent . . . or the director of a school may well act in any executive capacity for the advisory committee.

Members of the committees shall not also be members of the boards of control . . . .

c. Distinctive Management.

1. There shall be a director, who under the executive officer of the board of control (trustees for vocational education), shall be distinctly responsible for the conduct of the school and for all instruction given in the school.

2. An assistant director may be appointed with the approval of the Commissioner. [He/she] must be assigned specific responsibility under the director. . . .

d. Faculty. -- The faculty shall consist of all personnel charged with administrative, supervisory and instructional responsibilities.

1. All faculty members shall meet [their] respective qualifications . . . .

2. be approved by the Commissioner; [and]

3. be appointed by the local board of control (trustees for vocational education).

e. Vocational Guidance -- In all schools there should be established approved vocational guidance programs providing services for the effective administration of these programs. The services are:

1. Prepare and use individual inventories, including test information.

2. Organize and present occupational information, especially information drawn from local occupational surveys and follow-up studies.

3. Organize and present information on educational and training opportunities.

4. Administer and interpret standardized objective tests.

5. Provide counseling for all individuals.

6. Provide placement: (a) In a suitable training program; (b) In employment -- placement includes graduates and school-leavers.

7. Make follow-up studies of graduates and school-leavers.

8. Secure the cooperation of parents in the counseling of individuals.

9. Make contacts with community referral and resource agencies to assist individuals in solving their problems.

f. Size of Classes -- The size of classes should be determined by agreement with the Commissioner, in relation to the field and subject, the number of pupils always limited to . . . secure efficient instruction.

g. Persistency of Attendance and/or Membership --

As a factor in size of classes, persistency of attendance and/or membership will be reported upon by Supervisors . . . and a minimum standard of such persistency will be required for each type of school and course. Failure to maintain these standards . . . may result in withholding approval and reimbursement.

h. Quantity of Service -- A minimum quantity of service, varying with the type of school is required for reimbursement approval. . . . [See Below]

2. Control. By 'control' is meant the responsible local board in whose charge . . . is placed the local administration of vocational education . . . .

The city or town determines which method of control to adopt. The board designated shall be known as 'Local Trustees for Vocational Education.'

3. Location . . . .

The school and all of its departments shall be satisfactorily located as to housing conditions, land and accessibility.

Approval of the Commissioner shall be secured for plans of new buildings, remodeling of existing facilities and for location of departments within a building.

4. Equipment. By 'equipment' is meant the machinery and apparatus, apart from educational supplies, employed in carrying on the instruction.

. . . . The equipment shall be sufficient in quantity and variety to enable all departments of the school to give instruction in all the standard methods of the occupation for which the school proposes to give instruction.

5. Courses of Study.

a. Courses of study shall be submitted in sufficient detail for approval. They shall show the proposed aim, scope, content and order of presentation of content. Supervisors of the Department shall analyze these courses and report upon them . . . . Whenever material changes are made in the courses, approval of the

Commissioner shall be secured.

b. Certificates and Diplomas -- The granting of a trade or occupational certificate is recommended as the standard form of recognition for the completion of vocational training.

It is however within the legal authority of the local board of control . . .(in the case of independent schools, not connected with the public schools) to grant a high school diploma to graduates of a vocational school, either through the establishment of a vocational high school or through cooperation with the high school.

6. Qualifications of Teachers. By 'qualifications of teachers' is meant the qualities and attainments that are acceptable as fitting a person to instruct or direct pupils in vocational schools . . . . [See Below]

7. Methods of Instruction. By 'methods of instruction is meant the instructors' regular way or manner of carrying out the work of the school with the pupils.

They shall be suited to the field of service and the type of practical work.

a. The Project Method of Instruction -- The project method of instruction is recommended for vocational schools as a method of instruction best calculated to develop power to use and to apply vocational information.

[A] project is a job, or it is something involving the discharge of a responsibility on the part of a pupil. The project method of instruction . . . is a plan of instruction combining growth in manipulative skill on a shop, store, farm, or home job with growth in power to apply the related technical knowledge on the job.

Approved schools shall provide for performance of practical work, which conforms in all factors with commercial standards. Output of practical work shall be judged by commercial standards and be of salable character under market conditions. . .

b. Project Management -- Some definite method of checking, inspecting and routing the pupil through a series of projects calculated to give the desired vocational instruction is necessary. This can be

accomplished by project routing -- carefully planning the specific requirements which the pupil is to meet and deal with in successive projects.

A very definite progressive project control, combined with an inspection report and the perpetual inventory of the pupil's educational conditions at the close of the given project is an essential part of the project method of instruction . . . .

8. Conditions of Admission. By 'conditions of admission' is meant the legal and administrative requirements and procedure in permitting pupils to enter vocational schools: Qualifications as to age, aptitude, sex, schooling, employment status are specific for each field and type of school.

Under the limitations imposed and subject to the approval of the board of control . . . the director of the school shall assume the responsibility for admission of pupils.

High school pupils are not eligible for admission to vocational classes for the purpose of pursuing therein any portion of their general education.

a. Admission of Non-Resident Pupils

1. Residents of cities and towns which do not maintain State-aided vocational schools or specific courses, have a legal right to apply for admission to any State-aided vocational school, department or course under certain conditions and with certain obligations . . . .

The applications of qualified non-residents must be given official consideration by the school in which they wish to enroll. Such non-resident applicants must meet all the qualifications specified. . . In addition, applicants must be residents of . . . Massachusetts. Applications . . . must be passed in review by the Commissioner. [His/her] decision . . . is final. [He/she] shall consider . . . the opportunities for free vocational training [in] the [applicant's] community . . .; the financial status of the community; the age, sex, preparation, aptitude and previous record of the applicant; and all other relevant circumstances.

2. Requirements -- Administrative -- Approval of admission shall not be granted before the school authorities . . . of the place of residence have had an opportunity to express their opinion; continuance in the school shall be conditioned upon satisfactory improvement of the opportunity afforded and reports shall be sent at least quarterly from the school to the parents or guardians of non-resident pupils and to the school authorities . . . of the place of residence, setting forth clearly the facts as to the pupil's (1) attendance, (2) effort, and (3) progress . . . .

3. Obligations -- Financial -- Step 1. The cities or towns of residence shall pay to the counties, cities or towns maintaining the schools involved such tuition fees as the Commissioner . . . shall set . . . . Step 2. The State shall reimburse such cities and towns.

Provisions under this form are construed to cover:

b. Employment Within the School -- It shall be of a character which promises efficient vocational instruction . . . [and] . . . must be of a productive nature. The allotment of time must conform to the requirements . . . for each field of service and type of school.

c. Employment Outside the School -- The concern of the School is here largely that of employment upon home project work in connection with agricultural and household arts schools; . . . employment in industry or areas of distribution where the school is organized on a coperative plan; and employment of pupils through placement in their trades during vocational periods.

e. Pupils' Individual Records -- Certain records shall be required for reference in matters involved in the employment of pupils' time and the resulting efficiency of the vocational instruction. These records will be used to supplement inspection of the work by supervisors of the Department.

They will constitute a specific statement as to an individual pupil in terms of: The kinds of experience and accomplishment; the time requirement

Two types of records of pupils shall be required from the schools: historical and statistical, and trade and occupational. . . .

PERTINENT IN ALL FIELDS

All candidates accepted for vocational teacher-training and all candidates appointed as teachers in State-aided Vocational Schools shall present evidence of citizenship, ... [and of their sound moral character] . . . ."

REG. #5, Section 2

QUALIFICATIONS OF TEACHERS - ALL FIELDS

"A presentation of these qualifications in detail is to be found in chart form [infra]. . . .

1. General Statement -- Teacher Status. The distinctive qualification for shop, distributive, farm and home-making teachers is the possession of a minimum number of years of work experience in the trade or occupation in which the candidate proposes to teach.

STAFF

The work experience required must have been within a period which would give it current value . . . .

The Department . . . does not appoint teachers nor fix their salaries. Teachers are nominated and appointed by the local board of control. The Department . . . has, however, the legal right and direct responsibility for approval of qualifications of teachers in general and in relation to specific situations.

The qualifications of teachers should be approved in advance of their nominations by the local authorities . . . . Teachers who are to give instruction in State-aided vocational schools are approved specifically in terms of subjects or occupations and for specific positions

Instructors are approved in the following classifications:

Instructors of:

a. Shop, distributive occupations, farm or homemaking.

b. Related technical subjects.

c. Academic subjects.

In ordinary circumstances, candidates for teaching positions in shop and related subjects who have not fulfilled the Teacher-Training requirement will not be approved when fully qualified candidates are available. Teachers appointed prior to completion of the Teacher-Training

requirements must complete [them] within" the required time

Temporary aids or assistants are approved, to serve jointly with and under the direct supervision of a . . . teacher, where a class is too large for a single teacher unaided, but not large enough to justify division.

The educational requirement for an aid or assistant is the same as that for shop teachers.

An emergency substitute may be employed . . . for a period not to exceed one month at which time formal approval for a substitute must be secured.

Teachers employed on an extended substitute or on a part-time basis must meet the minimum requirements in the type of work for which they are approved as required for full-time teachers . . . . Part-time . . . teachers will be approved . . . only when the size of classes or the requirement for service is not sufficient . . . to warrant the employment of a full-time teacher.

2. General Statement -- Administration and Supervisory Classification

a. Directors . . . shall be selected from an approved list of candidates established by a rating plan promulgated by the Department . . . in cooperation with local school authorities for the position at the time a vacancy exists.

1. Education

Professional - shall be a graduate of an accredited four-year college . . ., have completed an approved teacher-training course in Vocational Education, . . . [and] . . . shall have at least 30 semester hours of approved courses in education beyond the Bachelor's Degree level.

2. Experience

a. Trade or Technical - shall meet the requirements for approval as a teacher in a State and/or Federally-aided vocational school.

b. Teaching - shall have had at least 5 years of satisfactory experience as an instructor in a

State and/or Federally-aided vocational school. . . .

c. Supervisor of Practical Art and Handicraft Classes - Supervisors employed on a full-time basis, must have graduated from secondary school courses or equivalent and completed at least one year of special technical and professional training in home-making of collegiate grade, and have had at least four years of successful experience as a dressmaker, milliner, or homemaker. They should have sympathetic understanding of the problems of the persons attending the classes and ability to guide the teachers.

Part-time supervisors should meet . . . the qualifications of the full-time supervisor.

d. Placement Co-ordinator - In general a placement co-ordinator should qualify as a teacher in the field in which he[she] services. In case he[she] serves in two or more fields in a school he[she] should qualify as a teacher in the dominant one. He[she] should also have had at least 1 year of satisfactory teaching experience in a State-aided vocational school.

e. Vocational Counselor - The Vocational Counselor should qualify as a teacher in a State-aided vocational school. . . .

General Education: He[she] shall include in his[her] general education courses: Psychology, Economics, Sociology, and Vocational Education.

Professional Training: This training shall be based upon the duties he[she] must perform. Professional courses should include: Principles and Practices of Vocational Guidance; Occupational and Training Information, Analysis of the Individual, including Tests and Measurements; Techniques of Counseling; and Organization and Administration of Vocational Guidance.

Experience: He[she] should have had at least two years of approved teaching experience in a State-aided

vocational school or secondary school, or in personnel work in business or industry.

Occupational Experience: He [she] should have had at least one year of continuous full-time satisfactory occupational experience other than teaching or counseling. time of a vacancy. Such rating examinations would establish a local approved list from which the local school committee may elect a person to fill the vacancy.

Ratings. Such ratings may be determined by written or oral examinations or both, and other evidence as shall be determined by the examining board. A teaching demonstration shall be part of any scheme for rating full-time teachers for day school service.

Examination on:

Oral English

Trade Processes

Applied Mathematics

Applied Drawing

Applied Science

Theory and Technique of Teaching Trade Processes

Aims and Philosophy of Vocational Education

Oral Interview or teaching demonstration (Personality)

Trade Experience

Education . . . .

Official Procedure - New Appointments. Notice of intention to appoint should be given in writing . . . long enough before formal action to give the State office opportunity for thorough inquiry in case any question arises. . . .

Before approval can be recommended, Supervisors . . . must interview all candidates for full-time service in day schools who have not complied with the teacher-training requirement.

If approval can be given, an official approval letter is forwarded to the local director. . . .

Official Procedure - Reappointments. Register of the faculty on . . .[the appropriate form]. . . for day and evening schools shall be furnished annually.

TRAINING OF TEACHERS -- LEGISLATION

Section 18, Chapter 74, General Laws, provides for the establishment and maintenance of classes for training teachers for State-aided vocational schools. . . .

The ... State Department ... has engaged in the work of training . . . teachers . . . .

Information regarding this work may be secured from the . . . Department . . .

After the instructor has completed the work he[she] proposed, he[she] must submit evidence of its completion to the State office before December 1, of the next school year....

If evidence is approved it will be recorded on the instructor's professional improvement card . . .

REGULATIONS REGARDING PROFESSIONAL IMPROVEMENT FOR TEACHERS IN STATE-AIDED VOCATIONAL SCHOOLS

Teachers, regularly employed . . . are as a condition of appointment, required to complete approved professional improvement work annually during each year of service.

[E]ach school year the instructor should fill out a "Professional Improvement Proposal" blank on which he[she] states the work he[she] proposes to do during the coming school year. He[she] then must submit the blank to his[her] local Director for his[her] . . . signature of approval of the type of work he[she] proposes to do.

If an instructor does professional improvement work other than that which he[she] proposed or for which no proposal was given, he[she] must submit a new proposal blank which conforms with the work he[she] has done.

REGULATIONS REGARDING PROFESSIONAL IMPROVEMENT FOR TEACHERS IN DAY INDUSTRIAL SCHOOLS

In meeting the professional improvement requirements, instructors . . . must present evidence of maintaining command of their trades and trade knowledge by employment in, or approved contact with the trade (not less than a total of 30 clock hours per year) at least once during every two years of service . . .

This trade contact requirement may, however, be

fulfilled by approved attendance at the summer conference, provided that instructors attend the specific classes which apply to their particular trades.

Professional improvement may take the form of additional training or research in methods of teaching, increased skill or knowledge in the trade; in English, Mathematics, Drafting; Science; Sociology, Economics, Occupational or Educational Surveys, Vocational Guidance and Testing which will be of benefit to the students, school or the teaching profession. Attendance at the annual summer conference conducted by the Division of Vocational Education is an excellent means of fulfilling the professional improvement requirement . . .

Evening school instructors who are not regularly employed as day school teachers may be required to take professional improvement courses which will assist them to gain proficiency in teaching.

[Part-time] teachers . . . must meet the professional improvement requirements if fifty percent or more of their school time is devoted to teaching vocational classes.

REGULATIONS REGARDING PROFESSIONAL IMPROVEMENT FOR TEACHERS IN PRACTICAL ART CLASSES FOR WOMEN

Proposals for professional improvement should be submitted for approval

Each teacher should propose . . . some form of professional improvement. Every year a minimum of 15 class hours . . . is required when formal courses are proposed as professional improvement . . .

All teachers are required to complete at least 30 hours of approved professional improvement work during each year of service.

Professional improvement work must be done during the year for which credit is requested. Summer school attendance may be credited to either the school year immediately preceding or immediately following the course.

Teachers taking the teacher-training course before or during their first year of service may offer the teacher-

training course for the professional improvement requirement for the first year of service.

Additional preparation or experience required for a teacher to meet in full the minimum requirements for her position should be completed during the first year of service.

Evidence for all completed work . . . must be sent to this office not later than September first.

Professional improvement may take the form of additional training in methods of teaching, increased skill in the trade, study of English, special problems, art or other related subjects, investigation of educational problems of occupational conditions or other volunteer undertaking for the benefit of students, school or profession. . . .

REGULATIONS REGARDING PROFESSIONAL IMPROVEMENT
FOR TEACHERS IN STATE-AIDED DISTRIBUTIVE
EDUCATION SCHOOLS

All teacher-coordinators in Part-time Cooperative Distributive Education schools are required to complete a minimum of 30 hours of approved professional improvement work during each year of service. Professional improvement work must be undertaken during the year for which credit is requested.

When professional improvement and teacher-training classes are operated concurrently, teachers who complete the teacher-training course may submit this accomplishment in lieu of the professional improvement requirement. At the beginning of the school year the teacher-coordinator should complete the "Professional Improvement Proposal" blank and submit it to the local Director who signs and forwards it for approval to the State Supervisor of Distributive Education.

In addition to the yearly professional improvement requirement, all teacher-coordinators must complete, over

a ten-year period, a minimum of 160 hours of approved work experience in distributive employments. This occupational experience should be accumulated in consecutive two-year periods during vacations or in part-time employments. Evidence of employments must be furnished to the State Office immediately after the period of employment or at the end of each two-year period.

SUPPLEMENTARY PROFESSIONAL IMPROVEMENT REGULATIONS AS APPLIED TO TEACHERS OF VOCATIONAL AGRICULTURE

Professional Improvement certificates are granted annually to all teachers successfully completing and reporting an approved program. Certificate credit is not given when reports lapse into the succeeding year or when the required proposals were not submitted. . . .

Fields of Improvement are Classified as Follows:

1. Farm experience needed in the community in which the man[woman] lacks recent practice . . .

2. Technical courses in agriculture in which he[she] is not now up to date.

MINIMUM QUALIFICATIONS OF INSTRUCTORS

The tables on the following pages . . . [infra] list the minimum qualifications of instructors in the four forms of Vocational Education which may be given state aid."

AGRICULTURAL SCHOOLS AND DEPARTMENTS

Factor	Teacher: Agriculture	Teacher: Farm Mechanics	Teacher: Evening School	Academic and Related Sciences Teacher
1. Age	21-40 (See Note 1)	21-40 (See Note 1)	21-40 (See Note 1)	21-40 (See Note 1)
2. Occupational Experience	8 years (See Note 2a & b)	8 years (See Note 3)	8 years (See Note 2a & b)	Apprentice teaching or one year of successful teaching experience for academic teachers. Knowledge enough of farming to enable the instructor to understand the aim of vocational agricultural education, and a natural inclination toward country living.
3. General Education	Completion of secondary school courses or equivalent.	Completion of secondary school courses or equivalent. (See Note 4)	Completion of two years beyond elementary school. (See Note 4)	College graduation.
4. Technical Education	Special courses in agriculture, approved as to type, distribution and amount.	Eight years of diversified trade experience; or Graduate of an accredited college, majoring in shop work with at least two years of approved diversified trade experience; or Graduate of a State and/or Federally-aided trade school with at least four years of approved diversified trade experience.	Special courses in Agriculture, approved as to type, distribution and amount.	Scientific courses approved as to type, distribution and amount for related teachers. Major or minor in English or History, for academic teachers.
Professional 5. Education	Course of 100 clock hours of college grade.	Course of 100 clock hours of college grade. (See Note 4)	Course of 20 clock hours of pre-service training followed by a course of 20 clock hours of in-service training (See Note 4)	Course of 100 clock hours of college grade.
6. Teaching Experience	Not required but is to be given preference in comparative ratings for appointment to administrative or supervisory services.			
7. Personality	Sound health and physique, neatness of person, befitting habits of conduct and speech, presumption of ability to manage pupils.			
8. Sex	Men as instructors for classes of men and boys. Women as instructors for classes of women and girls. Exceptions may be approved for special units of work in the evening school.			

1. An upper age limit of fifty years applies to World War veterans.
2. a. Years in secondary school, while living and working in out-of-school time on farm, will count.
   b. Four calendar years in farming, if two years, or equivalent, in Agricultural College courses have been taken.
3. Years spent in technical training may be substituted for trade experience, not to exceed four years.
4. Not applicable to part-time teachers.

DISTRIBUTIVE EDUCATION PART-TIME CO-OPERATIVE SCHOOLS

Factor	Teacher-Coordinator*	Related Teacher	Academic Teacher
1. Age	21-40†	21-40†	21
2. Occupational Experience	1. Three years of approved Distributive Occupations experience in the branch of Distribution in which the candidate will teach. 2. Approved teaching experience in Distributive Education and/or special technical training in or directly related to Distributive Occupations may be substituted for occupational experience, but not in excess of two years.	1. One year's successful teaching experience. 2. Evidence of ability to adapt their special knowledge and skills to the vocational needs of the students. 3. Approved teacher-coordinators are automatically qualified to teach related subjects.	Must meet the requirements established by local school regulations
3. General Education	Graduation from an accredited institution of college grade.	Graduation from an accredited institution of college grade.	
4. Technical Education	One year or more of special technical training in or directly related to Distributive Occupations at an accredited institution of college grade may be substituted for occupational experience but not in excess of one year.		
5. Professional Education	Completion of 150 hours of an approved Teacher-Training course in the theory and practice of Vocational Distributive Education.		
6. Teaching Experience	Not required but is to be given preference in comparative ratings for appointment to administrative or supervisory services.		
7. Personality	Sound health and physique, neatness of person, befitting habits of conduct and speech, presumption of ability to manage pupils.		
8. Sex	No restrictions.		

* Teachers employed on a part-time basis must meet the minimum requirements in the type of work for which they are approved.
† Except for Veterans of World War I and II in accordance with Chapter 74, Section 24A.

DISTRIBUTIVE OCCUPATIONS EDUCATION PART-TIME AND EVENING SCHOOLS

Factor	*Part-Time School*	*Evening School*
1. Age	24*	24*
2. Occupational Experience	1. Three years of approved Distributive Occupations experience in the branch of distribution in which the candidate will teach. 2. Approved teaching experience in Distributive Education and/or special technical training in or directly related to Distributive Occupations may be substituted for occupational experience, but not in excess of two years.	Two years of approved Distributive Occupation experience in the branch of distribution in which the candidate will teach.
3. General Education	Graduation from an accredited institution of college grade.	Graduation from an accredited secondary school.
4. Technical Education	One year or more of special technical training in or directly related to Distributive Occupations at an accredited institution of college grade may be substituted for occupational experience but not in excess of one year.	
5. Professional Education	Completion of 60 hours of an approved Teacher-Training course in the theory and practice of Vocational Distributive Education.	Completion of 60 hours of approved Teacher-Training in the theory and practice of Vocational Distributive Education.
6. Teaching Experience	Not required but is to be given preference in comparative ratings for appointment to administrative or supervisory services.	
7. Personality	Sound health and physique, neatness of person, befitting habits of conduct and speech, presumption of ability to handle pupils.	
8. Sex	No restrictions.	No restrictions.

* No upper age limit

DAY HOUSEHOLD ARTS SCHOOLS

Factor	*Homemaking Teacher*	*Related Technical Teacher*	*Academic Teacher*
1. Age*	A. 21-40* college graduate. B. 25-40* only one year of technical and professional training.	Same as homemaking teacher	21-40*
2. Occupational Experience†	A. Where instruction is departmentalized, at least two years' practical experience for pay, or an equivalent in the specific branch of homemaking to be taught. Where the teacher must give all or several phases of instruction, at least a total of two years' practical experience for pay or an equivalent in all or the several branches of homemaking to be taught. B. At least four years of successful experience as a dressmaker, milliner, or homemaker.	Knowledge enough of homemaking to enable the teacher to enter into the objectives of vocational homemaking education.	At least one year of successful teaching experience in a regularly organized day school. Knowledge enough of homemaking to enable the teacher to enter into the objectives of vocational homemaking education.
3. Academic‡ and/or special technical training	A. College graduation, from a Household Arts Course preferably Vocational. B. One year of special technical and professional training, preferably in Vocational Household Arts in the subject to be taught, in addition to occupational experience.	College graduation	(1) Graduate of an accredited institution of college grade, baccalaureate degree, with major or majors in the subject matter area in which the candidate is to teach

Factor	Homemaking Teacher	Related Technical Teacher	Academic Teacher
4. Special Professional Training	Completion of the approved 60-hour teacher training course in the theory and practice of vocational teaching.	Same as homemaking teacher	Same as homemaking teacher
5. Personality	Sound health and physique, neatness of person, befitting habits of conduct and speech, presumption of ability to manage pupils.	Same as homemaking teacher	Same as homemaking teacher
6. Sex	Women as teachers for women and girls. In special approved situations, exceptions may be made.	Same as homemaking teacher	Same as homemaking teacher

* The upper age limit does not apply to World War Veterans. The upper age limit does not apply to qualified teachers of at least one years' previous successful experience in a regularly organized day school, providing that this experience was acquired prior to reaching the age of 45.

† Teaching experience may not be substituted for occupational experience.

‡ Every teacher of home nursing in Day Household Arts Schools shall qualify under heading "Homemaking Teachers," and shall be a graduate of an approved hospital, and in addition shall have had a total of not less than one year of special technical and professional training in preparation for teaching. (Credit for a portion of hospital training may be given toward the professional and technical requirement.)

NOTE: The teacher-training requirement for part-time teachers is a matter for individual consideration and adjustment. This requirement may be met in conjunction with the professional improvement requirement.

Every teacher of home nursing in Day Household Arts Schools shall qualify under the heading "Homemaking Teachers," shall be a graduate of an approved school of nursing, be a registered nurse in Massachusetts, and have a Bachelor's degree with a major in the field of nursing or education.

PRACTICAL ART AND HANDICRAFT CLASSES (WOMEN AND MEN)

Factor	Homemaking and Handicraft Teachers
1. Age	21, Minimum
2. Occupational Experience	Dressmaking:* at least four years of experience in the trade, producing garments of high standard as shown by acceptable evidence. Foods:* at least four years experience in taking full charge of meal planning and preparation on a professional basis or as a homemaker. Handicrafts:* Ceramics, decorated ware, ~~[illegible]~~, furniture refinishing, jewelry, lamp shades, leather, metal ware, weaving, wood carving, and other crafts. — at least four years experience in producing for sale, articles of high standard as shown by acceptable evidence. Home Furnishings and Decorations:* Slip covers, draperies, and upholstery: — at least four years experience in the trade. Cane and rush seating, knitting, crocheting, braided rugs and hooked rugs— at least four years experience in producing saleable articles of high standard as shown by acceptable evidence. Home Nursing: at least two years of experience, following graduation from an approved hospital and evidence of current knowledge of nursing. Millinery:* at least four years of experience in trade with major experience as maker and trimmer.
3. Academic Training	Completion of at least two years of secondary school or equivalent.
4. Special Technical Training	Dressmaking: completion of approved instruction in the techniques and art of dressmaking. Foods: completion of approved instruction of at least 200 class hours in theory and practice of foods and nutrition. Handicrafts, Home Furnishings and Decorations: Ceramics, decorated ware, jewelry, lamp shades, metal ware, weaving, wood carving, braided rugs and hooked rugs: — completion of at least 60 hours of approved instruction in fundamental applied art principles.

* Must be employed in trade or occupation at time of employment, and need continue to produce articles throughout employment.

Factor	Homemaking and Handicraft Teachers
4. Special Technical Training (Cont.)	Home Nursing: graduation from an approved hospital. Millinery: completion of approved instruction in the techniques and art of millinery.
5. Special Professional Training	Completion of the approved course in the theory and practice of vocational teaching: 80 hour teacher-training course including 20 hours of supervised practice teaching.
6. Personality	Sound health and physique, neatness of person, befitting habits of conduct and speech, ability to manage pupils.
7. Sex	No restrictions.

DAY INDUSTRIAL SCHOOLS

Qualifying Factors	Unit Trade Shop Teacher	Related Technical Teacher	Academic Teacher
1. Age	24–40*	24–40*	21–40*
2. Occupational Experience†	Eight years of full time service in the trade in which the candidate proposes to teach. (1) Successful work as a student in an approved day vocational school in the trade in which he proposes to teach may be accepted year for year as equivalent for the earlier portion of the required eight years. (2) Half the time spent successfully as a student in a technical school or college in the trade in which he proposes to teach may be credited upon this requirement. In all cases at least four years of full time employment at journeyman status are required. Experience in the trade must have been sufficiently recent to insure complete command of up-to-date practices. In certain trades a license is required.	(1) A qualified shop teacher may be approved as an instructor in his particular trade. Related drawing may be taught by a qualified draftsman with experience related to the trade or occupation of the department involved.	
3. General Education	Completion of secondary school or its equivalent.	A. Same as qualified shop teacher. B. Graduate of a technical institution of collegiate grade from a program inclusive of the fundamentals of that specific trade or occupation and with sufficient knowledge of that specific trade or occupation to enable the instructor to enter into the aim and purpose of vocational education.	(1) Graduate of an accredited institution of college grade, baccalaureate degree, with major or majors in the subject matter area in which the candidate is to teach.
3. General Education (Cont.)		C. A qualified academic teacher who has one of the following: a. At least two years of practical experience in that specific trade. b. Evidence of at least two years of technical training of collegiate grade and one year of practical experience in that specific trade or occupation.	
4. Technical Education (Additional to Occupational Experience and Academic Training)	Preference is given for approved special courses for improvement in trade.	1. Sufficient knowledge of the specific trade or occupation to enable the instructor to enter the aim and purpose of vocational education beyond the grade to be taught.	1. Same as for Related Technical teacher.
5. Professional Education	Completion of approved courses in the theory and practice of vocational teaching as follows: 120-hour Teacher-Training Course including 20 hours of supervised practice teaching. 120-hour Advanced Teacher-Training Course.	Same as for Shop Teacher.	Completion of approved courses in the theory and practice of vocational teaching. 60-hour Teacher-Training Course.

* An upper age limit of fifty years applies to World War Veterans.
The upper age limit does not apply to qualified teachers of at least one year's previous successful experience in a regularly organized day school providing that this experience was acquired prior to reaching the age of 41.

† Teaching experience may not be included in occupational experience.

AGRICULTURAL EDUCATION

"A. DAY SCHOOLS, COUNTY OR SEPARATE SCHOOLS AND DEPARTMENTS IN HIGH SCHOOLS

Vocational agricultural training is organized as independent agricultural schools designed to fit for occupations on the farm and allied occupations. This type of school may be organized as a separate department in a high school. Such schools must meet the following provisions:

1. Organization.

a. Departmental Character. [See Section 1.C.1.a]

b. Advisory Committees . . . [See Section 1.C.1.b]

[C]ommittees must be appointed for each school and department.

c. Distinctive Management . . . [See Section I.C.1.c] . . . The school shall be under a director designated by the local Trustees for Vocational Education . . . . In schools consisting of departments in high schools the Principal of the High School is generally designated as the Director. However, the Superintendent . . . or any other qualified individual may be designated by the Local Trustees . . . .

d. Faculty -- [See Section I.C.1.d] . . . Instructional personnel shall be responsible for the supervision . . . of the productive work of the students; teach on-the-job at periods frequent enough to assure that application based on previous study is functioning.

Instructors shall be employed for one calendar year with provisions for continuous service during the summer.

All instructions are annually approved for continuance in teaching as conditioned upon successful teaching exerpeince and professional improvement.

e. Vocational Counseling and Placement -- [See I.C.1.e] . . . . This . . . shall be a joint responsibility of the Director, educational manager and agricultural instructor.

All former pupils shall be contacted yearly for . . . five years, and facts recorded as to their employment and earnings. In addition, such follow-up should be "continued until the former pupil has been fully established in farming as owner, operator or on a satisfactory employment basis.

f. Size of Classes -- [See I.C.1.f] . . . Minimum class enrollment is six in established departments. [H]owever, . . . temporary approval may be given for continuance of classes of fewer than six. In new or re-established programs the minimum total enrollment is 16 students.

g. Persistency of Attendance and/or Membership -- . . . [See Section I.C.1.9] . . .

h. Quantity of Service

1. County agricultural schools . . . -- Classes should be in session for at least five clock hours per day five days per week with 25% of the time devoted to academic, 25% to related, and 50% to agricultural study.

2. High School Departments -- The agricultural class session should occupy 50% of the high school instructional time and not less than 120 minutes per day of which not less than 90 minutes shall be consecutive.

2. Control . . . [See Section I.C.2.]

3. Location . . . [See Section I.C.3] . . . Adequate quarters must be furnished, having a minimum of 600 sq. ft. for classroom and 2,100 sq. ft. for farm mechanics instruction . . . .

5. Course of Study . . . [See Section I.C.5] . . .

County Agricultural Schools . . . Courses shall be organized on a 4-year basis offering 6 months of class instruction and 6 months of supervised farming practices each year seasonally distributed and related to the instruction received.

High School Departments -- Courses should be organized on a 4-year basis, including at least six months of supervised

farm work per year seasonally distributed and related to the instruction received.

Project and Survey Courses, and Related Subject Matter Instruction in Agricultural Schools, and High School Departments -- The course of study must involve participation of the pupil in vocational agriculture in both the operative and the managerial jobs involved in farming . . . .

8. Conditions of Admission. . . .

Day Schools -- An applicant must be 14 years of age.

Admission to the school must be based upon the applicant's definite conscious aims and desires to pursue a course to fit for successful establishment or employment in occupations connected with Agriculture, the care of domestic animals, forestry and other wage earning or productive work on farm land and the applicant's evident ability to profit by the instruction

9. Employment of Pupils . . . . -- Each pupil shall conduct annually an approved supervised farming program related to the instruction given and compatible to his[her]occupational objective. . .

B. EVENING SCHOOLS

1. Organization. Assembled and non-assembled unit courses in evening schools are organized and conducted to serve out-of-school youth and adults who are engaged in or are planning to enter into farming or other agricultural pursuits.

b. Advisory Committee -- . . . . An advisory committee must be appointed. The day school advisory committee may serve as the advisory committee of the evening school, or a special committee may be appointed. . . .

c. Distinctive Management -- . . . . The school shall be under a director designated by the local Trustees for Vocational Education (Board of Trustees or School Committee). The director of the day school program may serve as director of the evening school.

d. Faculty -- . . . . The faculty shall consist of the director and either full-time or part-time instructors.

e. Vocational Counseling and Placement. -- Not required.

f. Size of Classes -- . . . . Normally a minimum of six.

g. Persistency of Attendance and/or Membership -- . . . . Unapproved absence for three consecutive class sessions shall require dismissal from membership.

8. Conditions of Admission . . . . -- Unit classes,. . . are open to persons 16 years of age or older who are engaged in occupations connected with agricultural; or who plan to establish themselves in agricultural; or who are heads of families who have land or livestock which they desire to . . . contribute more effectively to their support.

9. Employment of Pupils . . . Persons enrolled in evening school unit classes shall be responsible for conducting annually supervised farming programs, at least six months in length, and which are related to the instruction received each year.

10. Expenditures. For detailed regulations regarding the approval factor (Expenditures) see Section VII."

REG. #5, Section 4

"The three areas of distributive employments are as follows: retailing, wholesaling, and the service trades.

A. PART-TIME COOPERATIVE SCHOOL (HIGH SCHOOL DEPARTMENTS)

A Part-time Cooperative School is one providing instruction in vocational Distributive Education subjects to qualified students in school supervised cooperative employment which is an integral part of their school program.

1. Organization.

a. Departmental Character -- . . . . Part-time Cooperative Schools shall be organized and approved as individual departments or courses where technical and related distributive instruction is given in conjunction with practical and paid work experience by employment in approved and selected distributive agencies . . . . Cooperative courses include work experience in distribution as part of the school program, in which the student is legally considered a member in the publicly-supported school system rather than an employee in the usual sense of the word . . . .

b. Advisory Committee -- The Board of Control (School Committee) shall appoint an Advisory Committee composed of members representing the wholesale, retail and service areas of distribution.

c. Distinctive Management -- . . . . . The Director under the Executive Officer of the Board of Control shall be clearly responsible for the conduct of the Distributive Education School and for all instruction therein. Under certain conditions the Principal of the High School or the teacher-coordinator may be delegated administrative and supervisory responsiblities by the Director when the Distributive Education School is located in the high school building.

When the [DE]. . . School is located in a building other than the high school, an inter-school arrangement should be made with the high school to permit the students to enter and take part in extra-curricula [sic] activities of the high school and should under conditions agreed upon make them eligible for a high school diploma.

[I]n setting up such an inter-school plan, the program must offer an opportunity of a minimum of fifteen hours of instruction per week, of which ten are given to vocational Distributive Education and related subjects.

Whenever an approved [DE]. . . School uses or shares the facilities of other school units, the following division and assignment of responsibilities applicable are enforced:

1. The Director of [DE]. . . has full responsibility for: Organizing classes; keeping all records . . . statistical and financial; report to local and state officer recommending budgets . . . preparing curriculum; . . . preparing instructional material and recommending equipment; conducting distributive faculty meetings; recommending qualified teachers; . . . admitting students; disciplining students; supervising teachers; . . . recommending and approving professional improvement of teachers; assigning and training of students; employment of pupils; investigating and recommending approval of cooperative employments; attending educational conferences and meetings; placing and following

up students graduating or leaving school; providing information regarding students to employers and others requesting such information; disseminating information regarding Distributive Education (public relations).

2. The Director and the High School Principal have joint responsibility for participation of . . .[DE] students in extra-curricular activities; scheduling of physical education and athletic programs; assigning related teachers to part-time service; . . . participation of Distributive students in assemblies; recommending high school students for transfer to the Distributive Department or from the Distributive Department to . . . the high school; recommending Distributive students as to eligibility for high school diplomas; recommending Distributive students as to eligibility for high school athletics.

d. Faculty . . . . -- For Qualifications of Teachers, see Section II. . . .

f. Size of Classes -- . . . . There shall be one teacher-coordinator to not more than twenty-five nor less than twelve students, and the number always limited to the size of the group necessary to secure effective instruction . . . .

Academic class maximum thirty-six; class minimum twelve.

h. Quantity of Service -- . . .

1. Minimum School Hours -- Cooperative part-time students in an approved [DE]. . . School spend 540 clock hours in school during the regular school year. At least 360 of such clock hours shall be devoted to instruction related to and based upon the distributive employment activity of the students . . . .

2. Minimum Work Hours -- Students enrolled in an approved . . .[DE] School shall be employed not less than an average of fifteen hours per week in selected and approved employments. . . .

The cooperative work experience . . . is organized as an integral part of the school program and may be scheduled on a part-day, part-week or alternating period basis. . . .

3. Alternate Plan for School and Work Schedule -- Since the cooperative employments may be scheduled on a part-day or part-week basis, it is possible in some communities for students to be employed full time for part of the school week. The school schedule must then allow for the release of students to accommodate the work schedule.

4. Diploma Requirements -- The curriculum of the cooperative part-time students should be arranged so that they would be eligible to receive the[ir] regular diplomas . . . . Such requirements for diploma certification should be met, but not at the expense of the basic fifteen-period weekly minimum for distributive and related instruction. . . .

5. Course of Study . . . -- The course of study may be organized on a short unit basis. No unit is to be covered in fewer than five class periods. Flexibility should be maintained in regard to subject emphasis in order to meet the specific needs of the occupation within the community.

7. Methods of Instruction . . . -- The methods of instruction shall conform to those prescribed in pre-service classes of the State conducted teacher-training program for Part-Time Cooperative . . .[DE] Schools. These instructional methods shall be adapted to the type of class, the course content and the individual needs of the students

When the [DE] School is in session, it is recommended that the teacher-coordinator devote a minimum of 10 clock hours per week to out-of-class coordinating activity. . . .

8. Conditions of Admission . . . -- The minimum requirements for students entering the [DE] School are as follows:

a. Boys and girls sixteen years of age and over.

b. Satisfactory completion of the eleventh year in high school or its equivalent.

c. A creditable record of attendance.

d. Physically and mentally fitted for the occupation.

e. Ability to profit by the instruction to be determined by the Guidance Counselor in cooperation with the school faculty and Advisory Committee.

f. They shall be employed or assured employment in

an approved distributive occupation within forty school days after their enrollment in the school.

Minors admitted to the cooperative course shall be 'employed' on authority of a special certificate . . . subject to school regulations and supervision. No minor under sixteen . . . may be admitted to membership in a Part-Time . . . Program.

9. Employment of Students . . .

a. Approved Combined Instruction -- The division of time for 'Approved Combined Instruction and Employment for Wages Program' is a matter for special arrangement and approval to meet particular employment situations. The school is responsible for the supervision of the employment phase of instruction outside of the school . . . .

c. Students' Individual Records -- . . . Information shall be required for reference involving the employment of students and the effectiveness of the distributive instruction . . . . The recorded information should reveal in terms of the individual student the following:

1. Location and nature of the work experience.
2. Daily, weekly and monthly tabulation of the student's wages and hours of employment.
3. School and work attendance data.
4. School and work progress, accomplishment. . . . and final full time placement.

B. PART-TIME AND EVENING SCHOOLS

A part-time or evening school is one providing vocational distributive instruction to students (out-of-school youth and adults) who are employed in or will enter a distributive occupation. The time given to instruction shall not exceed in each day, or week or other unit of time the number of hours the student is profitably employed. Special part-time and evening courses organized for students entering limited seasonal employment (pre-Christmas, pre-Easter) may be conducted for qualified secondary school students. All instruction . . . shall be based upon and complementary to the distributive work activity in which

the student is regularly engaged or in which he[she] has definite prospects for employment.

1. Organization.

a. Departmental Character -- . . . [C]lasses shall be organized as distinct courses, offering instruction in vocational distributive activity to particular students who are employed in distribution or will enter a distributive occupation.

b. Advisory Committee -- . . . Specific requirements are the same as for Part-time Cooperative Schools. The advisory committee serving the Part-time Cooperative School may also serve the part-time and evening school.

c. Distinctive Management -- . . . Specific requirements are the same as for Part-time Cooperative Schools.

d. Faculty -- . . . For Qualifications of Teachers, see Section II.

e. Vocational Counseling and Placement -- Not required.

f. Size of Classes -- No class shall be established when less than 12 students enroll and there should be not more than 30 students per instructor for all part-time and evening classes.

h. Quantity of Service -- Approved evening or part-time schools may offer 6 to 60 clock hours of instruction with class sessions of not less than one hour in duration. . . .

5. Course of Study. . . -- The course of study shall match current and the anticipated occupational needs of the enrollees.

6. Qualifications of Teachers . . . Specific requirements Section II.

7. Methods of Instruction. . . -- The methods of instruction shall conform to those prescribed in pre-service classes of the State conducted teacher-training program for part-time and evening schools.

8. Conditions of Admission. . . -- The minimum requirements for students entering part-time and evening Distributive Education Schools are as follows:

a. Sixteen years of age or over.

b. Employed in a distributive occupation.

c. Planning to enter or have definite prospects of employment in a distributive occupation.

d. Ability to profit by the instruction.

e. Preparing for short-term seasonal employment in distribution.

High School students may not be admitted . . . except those special pre-employment training classes for selected students entering short-term seasonal employments (pre-Christmas).

9. Employment of Students. The school has no supervision of employment outside the in-class activity.
Students' Individual Records -- Information shall be required for reference regarding the nature and place of the students' employment and the record of school accomplishment."

REG. #5, Section 5

"A. Day Household Arts

Household arts education is that type of vocational education which fits for occupations connected with the household. This type of vocational education has a two-fold objective, namely, to enable pupils to share efficiently and happily in their present family situations, and to become more capable and successful homemakers in the future; and in as far as is possible, to fit individuals for related wage-earning occupations.

1. Organization . . . . -- The . . . program may be organized as an all-day school or as a department in the conventional high school.

b. Advisory Committee -- . . . The advisory committee for a household arts school should be composed of citizens of broad sympathy for and knowledge of homemaking problems.

c. Distinctive Management -- . . . In a . . . school organized as a department in the conventional high school, the superintendent of schools or the high school principal may be approved as the local director.

d. Faculty -- . . . For Qualifications of Teachers -- All Fields, Section II.

The following activities should be included in the schedules of the homemaking and related subject teachers:

1. Time devoted to teaching and supervising of homemaking and related work . . . including supervision of directed out-of-school experiences.

2. Regularly scheduled conference periods for work with individual pupils on directed out-of-school experiences.

4. Employment beyond the regular school year, . . . for services directly connected with the vocational program in homemaking.

5. Work in connection with the Future Homemakers of America as an integral part of the home economics education program.

f. Size of Classes -- . . .

Vocational Classes -- There shall be one instructor to not more than twenty pupils.

Related Subject classes -- There shall not be more than thirty pupils in a related subject class.

Academic class -- There shall be one instructor to not more than thirty-six pupils.

h. Quantity of Service -- . . . The . . . school shall offer an opportunity of at least the same number of weeks of instruction as is provided for the conventional high school, thirty clock hours per week, five days of six clock hours each of instruction of which at least 75% of the time shall be for vocational instruction (homemaking and related) with at least 50% of the total time on productive homemaking work under the direct control of the school. It affords for a minimum of two school years, an intensive, comprehensive, homemaking program. A one-year program . . . is offered to high school graduates.

An approved . . . school organized as a department in a public high school offer, for at least two consecutive school years, a minimum of [three] periods daily of homemaking and related instruction; the balance of the time shall be devoted to general education.

5. Courses of Study . . . -- The curriculum is to be concerned with the fundamental values and problems in the several aspects of home living and homemaking and deals with these in such a way as to develop needed skills, understandings, attitudes and appreciations

Increasingly, the . . . curriculum guides, give special emphasis to the objectives (in terms of pupil growth), to class activities or pupil experiences, to evaluation devices, and to teaching aids and references, rather than to the outlining of subject matter content only.

No prescribed course of study has been formulated for the day household arts school. Each school is allowed much latitude in working out the content of its own courses

7. Methods of Instruction . . . -- Class and group instruction should be given . . . . The method of instruction will necessarily vary with the type of unit and class, but in every instance carefully planned lessons should be given in accordance with teacher-training class instruction.

8. Conditions of Admission . . . -- Public high school students are not eligible for admission to vocational homemaking classes for the purpose of pursuing therein any portion of their general education."

Reg. #5, Section 6

"The trades, crafts or manufacturing pursuits in which instruction is offered shall be classified as:

Production occupations

Service occupations

Assembly occupations

The occupations as classified may be taught in Independent Trade and Industrial classes organized in:

All-day Schools

Part-time Cooperative Schools

Part-time and Evening Schools, including Apprenticeship. Supervisors of the State Department of Education shall report upon the systems and devices for carrying on the shop work in the schools.

A. All-Day Schools

An all-day school is one in which the entire vocational program is carried on, at least six clock hours of class

instruction per day, within the school by unit trade and/or general vocational organization and without reference to any current employment status of the pupils therein.

1. Organization.

a. Departmental Character -- . . . Independent Industrial Schools shall be organized by departments giving instruction in a trade, craft, manufacturing or service pursuit, and general education as approved.

These departments shall have a unit trade or general vocational organization as to shop and related work.

b. Advisory Committees -- In addition to standard requirements . . . the committees should be organized by departments.

c. Distinctive Management -- . . . An interschool arrangement with the high school is possible and desirable . . . where conditions warrant this procedure. Such a plan . . . must meet the requirements of the law providing for distinctive vocational management and be developed under special agreements with the high school principal, the trade school director, coordinated through, and with the approval of, the executive officer. This plan permits vocational classes to be organized in such a way that pupils enrolled in vocational schools may be instructed in the shops and related classes of the trade school and may attend such academic classes in the high school as are specifically approved for reimbursement as a part of the vocational school.

This will enable vocational pupils to enter and take part in the extra curricular activities of the high school and should, under conditions agreed upon, make them eligible for a high school diploma. . . .

[T]he following division and assignment of responsibilities as applicable are in force:

1. The Director of Vocational Education under the Executive Officer . . . has full responsibility for: Organizing classes; keeping of all records; . . . statistical and financial; reporting to Local and State office; recommending budgets . . .; preparing curriculum . . .; preparing instructional material and recommending equipment; conducting Vocational faculty meetings; recommending qualified teachers

to Executive Officer; admitting pupils; disciplining pupils; supervising teachers -- shop, related and academic . . .; recommending and approving professional improvement of teachers; assigning and training of pupils; employment of pupils; investigating and recommending approval of cooperative employment; attending educational conferences and meetings; placing and following-up pupils graduating or leaving school; providing information regarding pupils to employers and others requesting such information; disseminating information regarding Vocational Education (Public Relations).

2. The Coordinator (High School Principal) and Vocational Director have joint responsibility for:

Participating of vocational pupils in extra-curricula activities;[sic] scheduling of physical education and athletic programs; assigning high school teachers for part-time service in Vocational schools; assigning rooms; participating of Vocational pupils in assemblies; recommending high school pupils for transfer to trade school or from trade school to high school; recommending Vocational pupils as to eligibility for high school diploma; recommending Vocational pupils as to eligibility for high school athletics.

d. Faculty -- . . . For qualifications of teachers -- all fields -- Section II. . . .

f. Size of Classes -- . . . No shop instructor shall regularly have instructional responsibility for more than twenty nor less than twelve pupils in any one class.

h. Quantity of Service. . . . -- A minimum service equal to the same number of weeks of instruction as provided for the established local high school must be offered. A school week shall consist of not less than thirty . . . clock hours per week, six . . . clock hours per day, exclusive of lunch periods and other scheduled recesses. At least 75% of the total time of the pupil shall be devoted to vocational instruction (shop and related).

j. Courses of Study. . . -- The course of study . . . shall consist of an analysis of the trade or occupation in terms of divisions, units, type jobs and lessons based on the analysis of each type job. The single items should be arranged in a progressive order of learning.

8. Conditions of Admission . . . -- Admission shall be open to applicants who are at least fourteen years of age and/or have successfully completed the eighth grade . Admission must be based on the applicants' definite conscious aims and desires to pursue the occupations trained for and applicants' evident ability to profit by the instruction offered.

B. Part-Time Cooperative Schools

A part-time cooperative school is one providing alternate periods of Vocational instruction for pupils in cooperative employment as an integral part of their vocational training and in instruction given at the school plant.

1. Organization

a. Departmental Character -- . . . Part-time cooperative schools shall be organized and approved by individual courses, conducted in approved schools where technical and related instruction is given in conjunction with practical experience by employment in cooperating factories, manufacturing, mechanical establishments or workshops.

8. Conditions of Admission . . . -- Minors admitted to cooperative courses shall be 'employed' on authority of a special certificate . . . subject to school regulations and supervision. No minor under sixteen years of age may be admitted to membership in an industrial cooperative course.

[A]dmission to state-aided vocational schools shall be possible to minors over 14 years of age ready to leave school to enter employment (having a sixth-grade educational acquirement), and able to profit by the instruction.

[W]hen part-time cooperative schools and industrial departments are associated with established high schools, membership in either or both vocational programs may properly be limited to pupils also enrolled as high school pupils.

C. Part-Time and Evening Schools Including Apprentice Training

A part-time class is a vocational class for pupils giving part of the working time to profitable employment and part-time to the class, . . . class[time] not exceeding

. . . the number of hours the pupil is profitably employed.

An evening trade extension class . . . is one providing instruction for pupils employed during the working day.

1. Organization.

a. Departmental Character -- Evening trade extension and part-time classes shall be organized by courses dealing with the day employment of the pupils and all of the time allotment will be devoted to vocational instruction.

b. Advisory Committees -- . . . Specific requirements same as for all-day schools.

c. Distinctive Management -- . . . Specific requirements same as for all-day Schools.

d. Faculty -- . . . For qualifications of teachers -- all fields -- see Section II.

e. Vocational Counseling and Placement -- Not required.

f. Size of Classes -- . . . A minimum average membership of sixteen students per teacher in each shop or occupational activity is required.

h. Quantity of Service -- Approved evening schools should offer at least twenty weeks of instruction, four hours each week . . . on two nights each week . . . .

5. Courses of Study . . . -- Courses of study for shop instruction are the same as those for all-day schools.

8. Conditions of Admission. . . -- Three limitations are imposed upon applicants for part-time, evening trade extension courses:

a. Age: they shall be over sixteen years of age.

b. Employment: they shall be employed. This is defined: 'engaged, had, kept for or in service regularly with or without wage.'

c. Character of instruction as related to employment: they shall be admitted only to courses . . . related to their employment.

3. VOCATIONAL EDUCATION

STATUTES

§380.681

An intermediate school district may establish and operate (or rescind) an area vocational-technical education program if approved by the majority of school electors in an annual or special election.

§380.684

An intermediate school board in which an area vocational-technical education program has been established may operate the program on contract with local school districts or with community colleges for the operation of the program. Such programs shall be approved by majority vote of representatives of the constituent districts at an annual budget meeting.

The intermediate board may expend area vocational-technical education funds for state-approved programs for acquiring, purchasing or constructing area vocational-technical buildings, sites and equipment, but not for purposes other than those set forth in sections 681 to 691.

§380.685

An intermediate school board shall make payments from area vocational-technical funds to those constituent districts and community colleges under contract serving the intermediate school district which operate area vocational-technical education centers.

§380.686

An intermediate school board may make grants of money to constituent districts or community colleges operating area-vocational technical programs for building construction, site acquisition, or equipment purchase if the board of the constituent district contracts to receive non-resident children into the facility for a period of at least 15 years after the contract date or if the board of trustees of the community college contracts to receive non-resident persons on a tuition basis into the facility

for a period of at least 15 years after the contract date.

The contracts shall provide that the districts or colleges are bound to accept non-public school and non-resident pupils in return for and in consideration for these grants-in-aid.

§380.688

A constituent district or community college maintaining an area vocational-technical education facility may become an area vocational-technical education center by contracting with the intermediate school board to accept non-resident pupils assigned to its facility by that board.

§380.689

The intermediate school board annually shall appoint a committee of at least five persons, including at least two school superintendents and three constituent district board members, who with a staff member of the state board annually shall visit area vocational-technical education facilities in the intermediate school district and advise the intermediate board relative to the administration of the program.

§380.690

A school district of not less than 18,000 pupils or a first or second class school district may elect not to come under an area vocational-technical program by a resolution adopted by its board not later than 30 days after receipt of notice that the question of establishing such a program will be submitted to the school electors. Such a district may thereafter elect to come under the program if a majority of the registered school electors approve the program and the annual tax rate for that purpose in effect in other constituent districts.

In an intermediate school district where the school electors have failed to approve the establishment of an area vocational-technical program, a combination of two or more contiguous constituent districts containing not less than 12,000 students, by resolution of their boards, may elect to establish such a program, if approved by the intermediate

board and designated by the state board. At any subsequent time within six months of the resolution, a petition by school electors equal in number to 5% of the votes cast in the most recent school election shall require the school board to submit the questions to the electorate. Participation in the program shall be terminated if not approved by a majority of the school electors voting.

Programs established in this manner shall receive any appropriate state or federal funding on the same basis as programs established by intermediate districts. Buildings, sites, and equipment for such programs may be jointly acquired, owned, or leased.

A contiguous school district desiring to become part of an area vocational technical educational program established in this manner may do so with the approval of each participating school district, the intermediate school district, and the state board. Districts operating a program established in this manner may subsequently elect not to participate, or may thereafter elect to participate, in an intermediate school district program in the same manner prescribed in this section for school districts of not less than 18,000 pupils or first or second class school districts.

§380.1287

The board of a district other than a primary district may establish vocational education programs, subject to state board approval, and may enter contractual arrangements with business and industrial firms for this purpose. Contracts shall allow for full payment of personal and property taxes on leased sites.

§388.805

All federal funds received by the state for the purpose of vocational education and rehabilitation shall be received and administered by the state board of control for vocational education.

§388.1084

A vocational education demonstration program is established to develop, test, and evaluate a vocational education assessment and counseling system using computer and

other automated techniques and a career development program to devise curriculum and materials for new careers in the labor market.

§388.1313

The career education advisory commission, consisting of 20 members appointed by the state board to two-year terms in two staggered groups, is created in the department. The state superintendent or designee shall be a nonvoting, *ex officio* member and serve as chairman. The membership, of which not more than half shall represent the education profession, shall include representatives of labor, business, or industry, a noneducational state agency, local and intermediate school board members and administrators, a community college district, a college or university, a neighborhood education authority, the state advisory council for vocational education, parents, teachers, counselors, and students.

§388.1314

The commissioner shall evaluate current efforts in the state toward career education and submit its findings to the state board along with recommendations of guidelines and objectives for a comprehensive career education program.

§388.1315

The state board shall recommend statewide guidelines and goals for a comprehensive career education program not later than nine months after the effective date of this act.

In cooperation with the career education commission and teacher training institutions, the board shall develop a plan for professional personnel development (both pre- and in-service) in career education.

§388.1316

The state shall be divided by the state board into career education planning districts to increase communication among member educational agencies and to coordinate and promote career education in the district. The number and boundaries of such districts shall be reviewed annually.

A planning district shall be served by a career education planning district council whose membership shall be recommended by local educational agencies and selected by the intermediate board in which they are constituent. Membership shall not exceed 20, of which not more than half shall represent the education profession, and shall include representatives of local and intermediate board members and administrators, the arts, business or industry, a labor organization or manpower agency, parents, teachers, counselors, and students. All other educational agencies shall be represented as nonvoting, ex officio members on the council. A career education planning district council shall develop annually a comprehensive, cohesive, and well-coordinated career education plan, utilizing state board guidelines.

§388.1317

Each local educational agency shall have a comprehensive career education plan and annually evaluate its career education program, using state board guidelines, the planning district's plan, and the local plan.

§388.1318

The department, in cooperation with other agencies, shall periodically compile and make available to career education planning districts and local educational agencies information pertaining to current and future job opportunities.

§395.1; 395.2

The provisions and appropriations of an act of Congress to provice for cooperation with the states in the promotion of vocational education and in the preparation of teachers of vocational subjects are accepted by the state of Michigan.

§395.3

The state superintendent, with the approval of the state board, shall provide for the administration of §395.1 to 395.10. The state board is charged with the responsibility of cooperating with the federal board for vocational

education and is authorized to incur such expenses as it may deem necessary to the proper administration of the funds.

§395.5

The board of education of any approved program giving instruction in agricultural, industrial or home economics subjects, which receive the benefit of federal or state moneys, shall provide suitable facilities for such instruction and shall appropriate a sum to cover expenses. At the end of the fiscal year, the state board shall apportion to the local boards state and federal funds to reimburse such expenditures, giving to each school its proportionate share.

Institutions authorized to give training for vocational teachers shall provide facilities and funds during the year and at the end of the year shall be reimbursed from federal and state funds equally.

§395.6

The state board shall formulate rules and regulations necessary for the development and operation of vocational schools, subject to the approval of the federal board of control. The board of any school where vocational education is given under this act shall make an annual report to the state superintendent.

§395.7

The state board shall provide for the inspection of the work in schools and institutions offering vocational instruction and vocational teacher training. Upon approval of the work, the state superintendent shall certify to the auditor general the amount of state and federal moneys due to the board of each school and institution.

§395.31; 395.32; 395.33

The state board may take any necessary action consistent with state law to comply with the "vocational education act of 1963" and may accept and expend federal funds under that law for developing and expanding vocational education so long as no state funds are expended in excess of any amount for which appropriated.

The state board shall make an annual report of activities and expenditures under this act to the state legislature.

REGULATIONS

R 390.1167

"Rule 67. Personnel assigned instructional responsibility in fields for which a state or federal license is required shall hold the appropriate license before requesting a vocational endorsement or authorization."

R 395.241, R 395.242, R 395.243

The program under the vocational education act of 1963 combines instruction with field, shop, laboratory training, and cooperative work experience.

The program shall be for:

(1) persons 14 years of age or older attending high school full time who have an occupational goal of record, and

(2) persons 16 years of age or older who do not attend high school, and

ELIGIBILITY

(3) persons who have already entered the labor market and who need training to achieve stability or advancement in employment, and

(4) persons who have academic, socio-economic or other handicaps that prevent them from succeeding in the regular vocational programs provided.

The program shall be designed to fit persons for employment in occupations other than those considered professional.

R 395.244

Vocational education shall be directed by the state board or a local educational agency responsible for vocational education and shall be taught by public school teachers.

The state board or local educational agency may enter into a written agreement with a public or non-public agency or institution for the agency or institution to provide vocational education. The agreement shall incor-

porate the standards of the state plan, shall be reviewed annually, and shall state that public funds shall be used only to cover those additional costs which are necessary to administer the program under the state plan or to lower fees charged to students.

An agreement shall not be made with an agency or institution which charges fees and is able to cover with its own resources substantially all the necessary costs of administering the program, unless the agency or institution agrees to use the public funds to reduce tuition.

"Vocational instruction shall be designed only to fit individuals for gainful employment."

Each student shall have a recorded occupational objective in a recognized occupation.

A person who has an academic, socio-economic or other handicap which prevents him/her from succeeding in a regular vocational program shall be provided with special classes which are an integral part of the vocational program in which the student is enrolled.

Funds shall be available for general education subjects only if they meet conditions as set forth for vocational classes. A program may be supplemented with general education subjects as may be necessary to develop a well rounded individual regardless of whether they are eligible for federal financial participation.

Funds shall not be available for instruction for which the student can receive credit leading to a degree.

In establishing, continuing, or terminating a program the interests, needs, and abilities of all persons in the community who have need for, desire and can benefit from the instruction shall be considered. The need and opportunity in the employment market for the skills and knowledge for which instruction is being provided shall be considered.

Any individual who resides in the state and who is qualified shall receive instruction. If the locality does not offer a reasonably comparable program to the one needed, a person shall be permitted to enroll in

ADMISSION

another locality's program.

An individual shall be admitted to a program on the basis of his/her potential for achieving competence in the occupation. An individual who has an academic, socio-economic or other handicap, and who would not be able to succeed in an occupation, may be admitted to special classes in a program to enable him/her to develop competencies adequate for employment in a recognized occupation.

The program shall have a planned logical sequence of essentials of education or experience necessary for the individual to be employed in his/her occupational objective.

The program shall be developed and conducted with potential employers and others involved in the field.

Related vocational instruction shall be provided for a worker being trained under a written apprentice training agreement.

A cooperative program shall provide part time vocational instruction in the school and on the job training to prepare the student for employment in the field of his/her occupational objective. A written agreement between the employer and the school shall specify the job activities and wages. "At no time shall there be exploitation of the student learner for private gain." The student shall be employed for at least fifteen hours per week and shall attend related instruction at least one class period per day.

Students shall be provided with facilities, equipment, and materials which are adequate to enable them to meet their occupational objective.

Funds may be used to reimburse the local public educational agency or money paid to a business or industrial establishment to provide vocational education when the agency cannot provide adequate facilities and materials.

When the activities of vocational education youth organizations complement the vocational instruction offered, such activities shall be supervised by

qualified vocational education teachers or administrators.

R 395.251

A local school operating a vocational education program shall cooperate with state staff in developing and maintaining adequate vocational counseling services.

R 395.252

STAFF

Training of vocational personnel shall include both pre-employment and inservice training and "shall provide for qualified teachers, supervisors and other vocational education personnel in the state."

The state director shall evaluate annually the vocational teacher education programs to determine their compliance with the state plan and to make changes to strengthen programs.

The state board or a teacher education institution designated by the state board shall conduct the preservice and inservice training. The state board shall designate a public teacher education institution to run teacher education programs using federal funds.

The state board may enter into a written agreement with a nonpublic teacher education institution to provide teacher training. The agreement shall be initiated by the board, shall describe the program and its standards, and shall be reviewed annually by both parties.

Each institution shall submit its budget to the state director.

The state board may contract with a teacher education institution for instruction materials and data about vocational education and the labor market.

Vocational teacher training shall be offered only to a person who has entered or who is preparing to enter the profession of teaching vocational education students or a profession for which such education would be useful. Vocational teacher training supported with funds under Smith-Hughes and supplementary acts shall be given only to a person who has had vocational experience or relevant work experience.

R 395.253

The state board or professional staff of a local public educational agency may conduct research, demonstration projects, and experimentation. An agency shall have an agreement which specifies all tasks to be completed. The professional staff shall have competencies acceptable to the state board. "Prior approval for studies or projects shall be granted by the state board."

Any research, demonstration, or experimental program shall meet the requirements of the state plan. To be eligible for approval a project shall be significant, shall directly apply to the problems in vocational education, and shall have an adequate design, facilities, and personnel. The funds requested for the project shall be reasonable in terms of expected outcomes.

The state plan's requirements may be waived by the state board if the project would not violate any federal act or regulation, and after the state board has notified the United States commissioner of education.

If the waiver would result in a violation of a federal regulation, the state board shall not use any federal funds for the project until the United States commissioner of education approves the project.

R 395.254

The state board shall require each school district and educational institution to submit vocational education agreements "relating to ancillary services and activities" and reports on the status of these services and activities.

R 395.261, R 395.262

A local public agency that has received state board approval to operate area vocational education facilities may apply to the state board for approval of a construction project. The project shall adhere to state standards and be approved by the fire marshal and the director of public health.

Priority of funding among agencies shall be determined according to the area's educational needs, the ability

of the area to provide facilities and the number of districts in the area. Secondary consideration shall be given to the number of persons to be benefitted and the occupational opportunities of the facility.

During the construction of a facility, the state board staff shall make periodic on site inspections.

R 395.271, R 395.272

WORK-STUDY

A work-study program shall be for a student who needs earnings in order to begin or continue in vocational educational education. Employment in a program shall be available to a student who has been accepted in a vocational education program or is in good standing in a program. The student shall be between the ages of 15 and 21 at the beginning of employment. The student shall be capable of maintaining good standing in the program while employed in the opinion of the school authorities.

The student shall be employed for no more than fifteen hours per week during school and no more than 40 hours per week in the summer.

Employment shall be for a public agency.

A local education agency shall submit a project proposal for a work-study program to the state board. The state board shall give preference to agencies serving communities having substantial numbers of drop-outs and unemployed youths.

R 395.291

A vocational education in business and office occupations shall meet the needs of persons over 14 years of age who have entered or are preparing to enter such an occupation and shall make a contribution to the students' employability. The instruction shall provide entry, refresher, and upgrading instruction.

Instruction for full-time students or out of school youth or adults may be provided in preparatory classes utilizing participation activities and projects geared to the interests, needs and abilities of those enrolled.

Supplementary classes may be provided for out of school youth and adults who have entered into a business

and office occupation. The classes may be offered for as many hours as necessary to meet the needs of persons enrolled. Specific attainment goals for the individual class group shall be included in the justification of the need for the class.

Cooperative education classes may be provided for full time secondary or post high school students. The classes shall provide actual office employment experience which is appropriate to the vocational objective of the students and which is long enough to develop the necessary competencies for employment.

R 395.301

Agricultural vocational education shall be designed to meet the needs of persons over fourteen years of age who have entered or are preparing to enter an occupation involving agricultural skills.

Classes shall include subject matter and practical experience necessary for gaining or upgrading employment in an agricultural occupation.

Preparatory programs in high schools shall meet the needs of secondary school students and shall be offered to students in a two to four year program. The program shall be available to any student. The program may work with youth organizations.

A post high school preparatory program shall be for persons who do not attend high school. The program shall teach areas which have sufficient job opportunities. The program shall be evaluated in terms of course content, progress in training, follow up and placement.

Supplementary programs shall meet the needs of young and adult farmers. The program "shall deal with agricultural problems encountered by young men in becoming established in farming and those who require basic agricultural education on farm problems." The program shall supervise any new practice applied by the student on his/her farm.

Classes may be provided for persons who have entered an agricultural occupation and who need training to

achieve stability or advancement. The classes shall relate classroom instruction to the work experiences of the enrollee.

The faculty of an agricultural education program include staff members who have degrees in technical agriculture and who are qualified by training and experience for teaching and research in the area to be taught. A high school teacher shall be employed for at least twelve months.

An agricultural education program shall have facilities which include a farm, livestock, and poultry and scientific laboratory facilities of recognized college standards in all basic areas of agriculture and related sciences.

R 395.311, R 395.312

A distributive education program shall offer instruction in marketing of products and services in the area of the occupational objective of the student. Preparatory classes utilize participation activities geared to the needs of the students or on the job training.

Instruction for persons who are out of school and who are employed in a distributive occupation shall be offered in supplementary classes designed to upgrade the students' skills and knowledge.

High school classes shall meet for a minimum of one semester with one class per school day. To be eligible for reimbursement, the school shall submit a written plan of operation in advance to the state board.

To be eligible for reimbursement for classes for out of school persons, a school shall submit a statement of the need for the instruction and availability of employment and a plan of operation in advance to the state board.

Cooperative education classes may be offered to post high school students and high school students. Cooperative education may be offered to students in preparatory classes if the experience is appropriate to the vocational objective of the students and is long enough to develop the necessary competencies.

R 395.321, R 395.322, R 395.323

Home economics education shall be designed to prepare a person over 14 years of age for the vocation of homemaking and for a gainful occupation.

Preparatory education in homemaking shall reflect the needs of the students. A course for out of school students shall meet for at least ten hours. Two years of homemaking education shall be provided for high school students with at least half the time devoted to practical work.

Preparatory education for gainful employment shall be planned for areas with actual or anticipated opportunities for gainful employment. Cooperative education may be offered if it is appropriate to the vocational objective of the students and lasts long enough to develop the necessary competencies.

Supplementary classes may be offered to out of school persons employed in a home economics occupation who are at least sixteen years old.

A home economics supervising teacher shall have a secondary vocational home economics certificate, two years of teaching experience in home economics; one of which shall have been in a vocational all day home economics program. "She[he]may be employed with a minimum of six semester hours of graduate work including supervision with a plan for completing the master's degree."

R 395.331, R 395.332, R 395.334, R 395.335

Vocational education in trades and industries shall be for persons over 14 years of age who have entered or are preparing to enter a trade, industrial or fishery occupation.

Trade and industrial education shall include any subject which is necessary to develop the manipulative skills, technical knowledge, and related information such as job attitudes, safety practices, and trade judgment necessary for employment in a trade and industrial

occupation.

Type A day trade related instruction shall be offered to full-time day school students over 14 years of age and as units separate from the field, laboratory, shop, cooperative work, or other occupational experience.

Type B day trade related instruction shall be offered to full-time day school students over 14 years of age and shall be offered by the shop or laboratory instructor as an integral part of the shop or laboratory experience.

Any instruction in related subjects for which funds are used shall have a direct functional value in the occupation.

A supplementary class shall be held during the nonworking hours of the enrollees. Only persons who are 16 years old or older and who are employed in a trade, industrial, or fishery occupation or temporarily unemployed may attend. The instruction shall be limited to that which will enhance the skill or knowledge of the worker. Instruction may include instruction for apprentices and for personnel training for leadership positions in management, labor, and other industrial organizations.

Type C classes shall be a special type of preemployment trade training which may be provided to unemployed persons.Training may be offered for any length of time and in any combination of classroom instruction and field, shop, laboratory, cooperative work, or other occupational experience.

Classes for single skilled or semiskilled occupations may enroll only persons who are preparing for such an occupation.

"Classes for out of school youth and adults, when George-Barden funds are used, may be organized for persons who have not yet entered employment and who are either out of school youth over 14 years of age or over 18 years of age."

Part time classes under the Smith-Hughes act shall provide not less than 144 hours of classroom instruction per year. Regular day trade type A instruction shall extend

over not less than nine months per year and not less than 30 hours per week. At least half the instructional time shall be given to work on a useful and productive basis. In regular day trade classes in cities of less than 25,000 population, the state board, with the approval of the U.S. commissioner of education, may modify the conditions as to length of course and hours of instruction.

A cooperative work experience program shall be for persons enrolled in a school to receive part-time vocational instruction and on the job training through part-time employment. A written cooperative training plan agreement between the school and employer shall state the job activities, standards of attainment, length of the program, and wages to be paid the student learner. The student shall be employed for at least fifteen hours per week. The program shall be long enough to develop competencies necessary to prepare the learner for employment. Related vocational instruction in classes limited to the cooperative group shall be scheduled for an average of at least one class period per day.

Representative advisory committees for trade and industrial education, joint apprenticeship committees, and technical committees may assist industrial and technical education at both the local and state levels.

R 395.341

The regulations for distributive and trade and industrial programs shall apply to persons over 14 years of age who have entered or are preparing to enter into employment in a fishery occupation.

R 395.351, R 395.352, R 395.355

Vocational education in health occupations, under title II of the George-Barden act, shall be for persons who are or have been employed or are preparing to be employed in a health occupation.

Instruction in theory shall be closely correlated with supervised practical experience in the clinical phases of the curriculum. The preparatory full time practical nurse program established in cooperation with

the Michigan state board of nursing is outlined in the publication "Minimum Standards and Educational Criteria for Programs of Practical Nursing in Michigan." Preparatory training for other health occupations shall be designed to prepare students for gainful employment. Supplementary classes shall be designed to provide additional knowledge and training in recognized health occupations.

Course content and length shall be adequate to provide the skills stated in the course objective. A major part of the supervised practical experience required shall be spent on activities directly related to patient needs.

R 395.361, R 395.362

Technical education, under the state plan pursuant to title II of the George-Barden act shall be designed to train persons for employment as highly skilled technicians in occupations requiring scientific knowledge in fields necessary for the national defense, as determined by the state board. Preparatory classes shall be offered to persons who are preparing to enter such an occupation. Supplementary programs shall be offered to persons already employed in such an occupation.

Each student shall be in the ninth grade or at least 16 years old.

3. VOCATIONAL EDUCATION

STATUTES

§120.05

A vocational center school serves a group of secondary schools and offers approved vocational training and adult programs. An area vocational-technical school is organized by statute under standards established by the state board of education.

§121.21

"The board of any . . . district may petition the state board to classify . . . schools as an area vocational-technical school."

The state board will promulgate regulations to insure equal opportunity for all persons who desire a vocational-technical education.

RULEMAKING

EQUAL OPPORTUNITY

"The rules shall provide for, but are not limited to the following:

(a) The area to be served by each school . . . ;

(b) Curriculum and standards of instruction and scholarship;

(c) Attendance requirements, age limits of trainees, . . . non-resident attendance, determination of . . . costs, individual programs, and attendance for which no tuition will be charged;

(d) The distribution and apportionment of all funds . . .

(e) Transportation requirements and payment of aid therefor."

§121.213

A vocational-technical student association may fund a program for legal counseling and services for students.

§123.351

Two or more independent school districts may establish a cooperative center to provide vocational

education by a majority vote of the school boards involved. The center shall be governed by five members drawn from the boards of the participating districts. Vacancies shall be filled by the appropriate school board.

The center board shall have "general charge of the business of the center and ownership of the facilities." It may: furnish vocational courses to any resident, provide special education for the handicapped, provide educational programs for high school and adult vocational students, and prescribe tuition rates. It shall be a public corporation entitled to receive and disburse any public or private funds made available to it.

Each center shall be approved by the state board, and subject to the general laws regarding independent school districts. Any district wishing to join or withdraw from the center must be approved by a majority vote of the full board.

§124.53

The state board of education is designated as the board for vocational education and shall cooperate with the federal government in carrying out this program.

§124.57

The state board shall reimburse districts maintaining vocational programs for monies spent on teachers' salaries and other reimbursable expenses. If local districts are unable to provide vocational training, the state board has authority to employ "itinerant teachers" to provide these services. An "itinerant vocational teacher" is one who gives part-time instruction in vocational education in one or more districts.

§124.69

The state board of education has authority to enter into agreements with the federal government to provide for vocational training and retraining and placement after training.

§126.151

Any pupil enrolled in a vocational-technical education program approved by the state board of education may belong to a vocational student organization which is operated as an integral part of the program. The commissioner of education may provide assistance and leadership to these organizations.

REGULATIONS

EDU 60

"Written . . . application for the approval of agriculture, business and office, distributive home economics, trade and industrial education, vocational education for health occupations and technical occupations, and industrial education departments or classes to be established by school districts in classified secondary and post secondary schools shall be made to the state board for vocational education."

EDU 61

The state board for vocational education shall approve applications of school districts to establish departments and classes in specialized fields (as stated in EDU 60) only if the following standards are provided:

MINIMUM STANDARDS

-- Sufficient and suitable facilities.

-- Courses and fine allotments based on the state curriculum guide.

-- Properly certified teachers.

-- Sufficient reference materials and audio visual aids.

-- Class periods of sufficient length.

-- Class size conducive to efficient instruction and accommodation.

-- All required reports on file and accessible to teachers.

Credits for such specialized courses shall be the same as for other secondary subjects.

Approval of such a department may be withheld upon filing a written report of deficiencies in the proposed program.

If a school loses approval of a department, the local board of education must reapply for approval of that special department.

EDU 62

To be eligible for vocational aid a school district shall meet the requirements of the Minnesota state plan for vocational education. The amount of reimbursement granted to such for approved vocational classes shall be determined by the state board for vocational education.

EDU 63

Districts which cannot provide vocational instruction may apply to the state board for vocational education for itinerant teacher services.

Itinerant teachers shall be under the direction of the chief supervisor of the vocational field. The courses offered shall be recognized by the Minnesota state plan and shall not supplant a local course.

EDU 64

To qualify for the approved business education program, courses shall be offered in 10th, 11th and 12th grades at least five periods per week. Basic business shall be offered as an elective and the ratio of pupils to teachers in Office Practice classes shall not exceed 20 to 1. If instruction in one year of shorthand is given, an advanced course in transcription must also be offered if the school wishes to have its department approved.

EDU 65

To qualify for approved general agriculture education programs, General Agriculture courses offered below the ninth grade shall be offered either five periods per week throughout the seventh or eighth school year or five periods per week for one semester in both seventh and eighth years. Courses for the ninth grade and at the secondary school level shall be given at least five periods per week throughout the year.

EDU 67

At least two full years of industrial education shall be maintained in junior secondary schools, one year in senior secondary schools and at least three full years in a department in any other type of secondary school. Industrial education shall be required for all seventh and eighth graders unless excused for health reasons. Courses shall also be offered in "the ninth, tenth, eleventh and twelfth grades, where classes may be combined. All pupils of a given class shall receive instruction in a given media at the same time. Industrial education shall be offered at least five periods per week throughout the school year in junior high schools. Senior high school instruction shall be for a minimum of five periods a week throughout the year.

EDU 69

Adult vocational education shall assist people in acquiring skills for "gainful employment" to maintain or further their employment status or to further consumer home making education. All adult education shall be in accordance with the state plan for vocational-technical education.

IV.A.; Statute §126.20

IV.D.; Statute §124.223

STATUTES

§37-3-25

The director of the division of vocational education shall be responsible for education in the fields of agriculture, trades and industry, home economics, adult education, teacher training and distributive education.

§37-13-58

(1) The state department of education is designated as the agency responsible for administering and supervising "the career education concept as an educational innovation;"

(2) to implement the above intent, the state department of education is empowered to credit an office of career education within its framework to develop "standards, procedures and criteria for the administration and supervision of a state-wide program of career education in grades one through twelve. The office of career education shall be responsible for "promoting a statewide effort designed to prepare local school facilities and staffs to incorporate the career education concept in their local educational programs."

§37-13-60

Each school is empowered to plan for implementation of a career education program.

The state department of education, the state coordinator of career education and the school district governing boards shall implement this program according to each individual district's needs.

Furthermore, the commission on school accreditation shall "encourage the development of plans of career education and the implementation thereof, and shall be authorized to accredit same."

"The main purpose for any agricultural high school being to teach theoretical and practical agriculture and home economics, and to be a real service to the fairness of the county, any school failing to come up to the following standards shall be dropped from the list of approved agricultural high schools by the state board of education:

(a) Each school shall own and operate a dairy sufficiently large to furnish milk and butter necessary for use in the dormitories;

(b) Each school shall own and operate an approved poultry farm with one or more breeds of chicken . . .;

(c) (Every school shall have) a model orchard with a minimum of one acre demonstrating correct methods of planting, cultivating, pruning and propagation of orchard plants;

(d) (Every school shall have) a model garden sufficiently large to furnish vegetables to the boarders. The minimum acreage for vegetables and truck crops shall be one acre for each twenty boarders;

(e) A sufficient number of pure-bred hogs shall be kept for teaching and demonstrating purposes;

(f) Plots of land shall be cultivated on the school farm demonstrating the yield per acre and the best method of cultivation of such crops as cotton, corn, sugar cane, potatoes, etc., suitable to the different sections of the state;

(g) Students shall be required to take part in the work thus outlined for the specific purpose of encouraging farm life . . . and acquiring practical knowledge . . .;

(h) Schools shall do . . . extension work and shall maintain . . . agricultural and home science laboratory equipment as . . . prescribed by the state board of education;

(i) The sciences and other subjects taught in the agricultural high school shall be connected vitally

with the social and economic life of the school and the county;

(j) Each school is required to have a minimum of one-eighth of an acre of ground set apart as a vegetable garden for use of the home economics department of the school;

(k) Each school is required to own and operate an incubator for the teaching of poultrying . . .;

(l) Each school must provide means of laundering of plain clothes for the boarding students;

(m) Each school is required to own a modern canning outfit . . .;

(n) Each girl boarding in the dormitory . . . must do five hours per week of practical work;

(o) All girls who graduate from agricultural high school must demonstrate their ability to make their own clothes, prepare and serve meals, and do other things necessary to ordinary household management."

The state superintendent of education shall enforce the above standards.

§37-27-91

"Any agricultural high school . . . which has not been operated and maintained (as such) for four years . . .; which does not own sufficient buildings in which to operate . . . an agricultural high school, and which owes legal, valid and outstanding debts, may be abolished by the board of supervisors of the county in which . . . [it] is located."

§37-31-1

The state of Mississippi accepts all the provisions of the federal Smith-Hughes Act which provides "for the promotion of vocational education."

§37-31-3 -- 5

"The state board of education shall constitute the state board of vocational education."

"The state superintendent of education shall serve as executive officer of the state board of education as the state board for vocational education, and

designate, by and with the consent of the state board, such assistants necessary . . . .

§37-31-7

"The state board of education shall have all necessary authority to co-operate with the federal board for vocational education in the administration of the "Smith-Hughes Act," to administer any legislation pursuant thereto enacted by the state of Mississippi and to administer the funds provided by the federal government and the state of Mississippi . . . for the promotion of vocational education in agricultural subjects, trade and industrial subjects, home economic subjects and distributive educational subjects. It shall have . . . authority to formulate plans for the promotion of vocational education in such subjects as are an essential . . . part of the public school system of education . . . and to provide for the preparation of teachers of such subjects . . . . It shall have authority to make studies and investigations relating to vocational education in such subjects; to publish the results of such investigations and to issue other publications as seem necessary by the board; to promote and aid in the establishment by local communities of schools, departments, or classes giving training in such subjects; to co-operate with local communities in the maintenance of such schools, departments or classes; to prescribe qualifications for the teachers, directors and supervisors . . . and to have . . . authority to provide for [their] certification . . .' to cooperate in the maintenance of classes supported and controlled by the public for the preparation of teachers, directors and supervisors . . . and to . . . determine by general regulations the qualifications to be possessed by persons engaged in the training of vocational teachers."

§37-31-15

"The board of trustees of any public school . . . and the board of trustees of the school for the blind and the board of trustees for the school of the deaf

and dumb, located in the city of Jackson, may . . . cooperate with the state board of education in the establishment and maintenance of vocational schools or classes giving instruction in agricultural subjects, or in trade and industrial subjects, or in home economic subjects, or in distributive education subjects, to persons in need of such instruction . . ."

§37-31-61

"The state board of education is . . . empowered to establish and conduct schools, classes or courses, for preparing, equipping and training citizens of the state for employment in gainful occupations, in trade, industrial and distributive pursuits, either separately, or in conjunction with any public school, agricultural high school or junior college."

The state board is also authorized to accept any funds which may be available for such purposes.

§37-31-73

"The various school districts, counties, municipalities and junior college districts . . . are . . . authorized to enter into agreements" between governing authorities of the above political entity to provide for "construction and operation of regional and vocational education centers," meaning facilities aimed at vocational or technical education on the secondary or post-secondary level," jointly operated by or [facilities] which accept students on a contractual basis from two or more districts of this state, or for any school district which encompasses an entire county."

§37-31-81

"The division of vocational education of the state department of education is . . . directed to establish a 'Future Farmers of America' camp . . . ."

3. Vocational Education

Statutes

§162.895

Free vocational instruction for children under the age of twenty-one residing within the districts, shall be provided in the special school district, so as to enable students to receive a high school diploma at the completion of the twelfth grade. The board of education shall establish standards for admission to vocational programs operated by the district.

DIPLOMA

§178.440 -- .530

The state board of education is responsible for vocational education administration, in submitting plans for teacher training, and shall provide that teachers be trained in the state colleges and state teachers colleges of Missouri. The state board shall make studies and investigations relating to prevocational and vocational training in agriculture and shall cooperate with local communities in the maintenance of the schools. The state treasurer is custodian of funds for vocational education and shall make an annual report to the general assembly. The board of education may contract with other school districts if vocational education services for high school students is unavailable within the school district; and may also contract for additional instruction for courses of study approved by the state board of education for graduation from high school in Missouri. The tuition fee shall be paid to the receiving school district by the board of education of the contracting district. The state board of education shall establish standards and inspect all public prevocational and vocational schools and such schools are entitled to state or federal moneys as long as they are approved by the state board of education.

TUITION

§178.540 -- .580

The state commissioner of education is the executive officer of the state board for the adminis-

tration of vocational education. The president of the state board of education shall annually appoint a five member committee known as the "state advisory committee for vocational education", and such members shall be reimbursed for their expenses incurred in attending conferences. The school board shall appoint persons of experience in agriculture, industry, home economics and commerce to give advice and assistance to the school board in the establishment and maintenance of the schools. The state board of education may incur the expenditures for the salaries of assistants and other necessary expenses and shall make a report to the general assembly on the administration of law.

APPOINTMENT

REGULATIONS

5 CSR 60-120.010 -- 040
VOCATIONAL EDUCATION

The regulations summarize the rule as follows. The entire text may be obtained from the Secretary of State.

The plan designates specific groups of individuals to be served and indicates programs designed to meet their needs. It provides for goals and objectives which will result in educational change and is a basis for evaluation of the statewide effort to serve the vocational needs of the people of Missouri. The general administrative procedures are delineated in section 1 of the plan. This section contained rules pertaining to the State Board of Education which is responsible for the administration of the state plan, public hearings and dissemination of information, qualifications and training of personnel, program evaluations, state reports, cooperation arrangements with other state agencies, provisions for construction projects, hearing opportunities and procedures on local applications, and the identification of areas that are designated as economically depressed or having high unemployment.

The Handbook of Vocational Education establishes the guidelines for implementation and operation of vocational education. It describes the general guidelines for administration of vocational

education; including certification of teachers and inservice education, facilities, time requirements for programs and courses, evaluation, replacement of equipment guidance services and advisory committees. It also establishes the guidelines for the administration of specific vocational education program areas.

CROSS REFERENCE

IV.A.; Statute §170.005 -- .009

IV.E.; Statute §171.098

3. Vocational Education

Statutes

§75-7702

The board of public education shall be the state's "governing board . . . for vocational education . . .[and] shall adopt policies to effect the orderly development of a system of vocational education," to include: "a state plan . . .; standards . . .[and] instruction qualifications for vocational education courses and programs . . .[and] criteria for approval of . . . programs which are to receive financial assistance; a basis for apportionment of all moneys appropriated by the legislature for vocational education . . .[and] received by the state . . . from the federal government . . .; a system of evaluation . . . which allows for consideration of . . . manpower needs and job opportunities;" and other policies necessary for the system's operation.

§75-7703

"The superintendent of public instruction shall be the executive officer of the board of [public] education for the administration of all state and federal laws related to vocational education."
The superintendent shall:

(1) "administer the . . . policies adopted by the board . . .; (2) prepare curriculum guides . . .; (3) employ . . . professional staff . . . for the state supervision and administration of vocational education;" (4) report the status of programs to the board; (5) keep all records on vocational education; and (6) "provide . . . supervisory and consultative assistance to districts."

§75-7704

"The trustees of any district . . . may establish . . . a vocational education course or program that complies with the . . . standards" of the board of

public education. A course or program must be approved by the board "to be eligible for state or federal financing."

§75-7705 — 75-7706

The state of Montana accepts the "terms and provisions" of the federal Vocational Education Act and of all other federal laws "which provide funds for . . . vocational education in Montana. The state treasurer is "designated as the custodian of all federal and state moneys . . . for vocational education."

3. Vocational Education

Statutes

§79-1419

The state of Nebraska accepts those acts of Congress that provide for the promotion and development of vocational education in the states.

§79-1412

The State Board of Education is also the State Board of Vocational Education and the Commissioner of Education shall be its executive officer. Members receive no compensation for services. The board shall meet regularly at least four times a year. Special meetings may be called by the presiding officer or by the commissioner "upon the written request of a majority of the board." Five members constitute a quorum.

§79-1422 -- 79-1423; 79-1429; 79-1435

The State Board of Vocational Education shall adopt policies for vocational education and supervise the administration of vocational education "by the assistant commissioner of education . . . in change of vocational education." The board is authorized to cooperate with the U.S. Office of Education in the administration of federal laws on vocational education and "to make such rules and regulations as are necessary to properly carry out" the federal and state laws.

On the recommendation of the commissioner, the board shall appoint assistants as necessary, who "shall be located by the assistant commissioner of education in charge of vocational education" and reviewed and selected by the commissioner. APPOINTMENT

The State Board of Vocational Education is authorized to (1) cooperate with school boards to establish vocational schools and courses; (2) cooperate with the U.S. Office of Education in the administration of federal laws and administer all funds for vocational

education in public schools; (3) appoint officials and assistants and fix their salaries; (4) make studies on vocational education, aid local boards in establishing and maintaining schools and classes in vocational education; (5) "prescribe qualifications and . . . provide for the certification of teachers and supervisors of vocational and related subjects;" participate directly or indirectly in maintaining classes for the preparation of teachers and supervisors" of vocational education, and "establish . . . the qualifications . . . [for] persons engaged in the training of vocational teachers." The board shall make a biennial report to the legislature on "the progress of vocational education" in the state, the schools or classes receiving funds, and expenditure of federal and state moneys for vocational education.

§79-1428

The board "of any public school, college, or university, may establish, in cooperation with the State Board of Vocational Education and in conformity with the Nebraska State Plan for Vocational Education, a vocational school, department, or class giving instruction of less than college grade in agriculture, trade, distributive subjects to persons of the required age" who will be or are working in those areas. Schools or classes approved by the state board are entitled to reimbursement.

3. Vocational Education

Statutes

§388.330; 388. 340; 388.350

"The state board for vocational education shall consist of the state board of education" and "shall hold at least four meetings per year at the state capital, coincident with" state board of education meetings. "The superintendent of public instruction shall serve as executive officer of the state board for vocational education." He or she shall designate necessary assistants, enforce rules and regulations established by the board, maintain an office for the board at the state capital and keep all board records there.

§388.360

The state board for vocational education shall have authority: (1) to cooperate with federal groups in administering Nevada's federal vocational education funds; (2) to administer state funds and programs provided for "the promotion, extension, and improvement of vocational education"; (3) to formulate plans for, make studies of, and certify teachers in vocational education; (4) to cooperate in promoting and maintaining "the establishment by local communities" of groups providing vocational education; (5) to pay compensation as well as necessary administrative and travel expenses to personnel administering the federal and state vocational education acts.

§388.370

"The state board for vocational education shall make a report biennially to the legislature setting forth the condition of vocational education in . . . Nevada, a list of the schools to which federal and state aid has been given" and a detailed statement of the expenditures of the federal and state funds provided.

§388.380

"Any board of trustees of a school district may establish and maintain vocational schools or classes" and raise and expend money for such vocational schools or classes in the same manner in which moneys are raised and expended for other public school purposes."

3. Vocational Education

Statutes

§186:39

The state of New Hampshire accepts and will match funds with the federal act providing for vocational education.

§186:40

The state board of education is authorized to arrange with school boards and school districts for vocational education facilities. The state board may also "approve certain schools" for use as "vocational training centers" and make provisions for students to attend who reside in other school districts.

§188-A:1 -- 188-A:2

In order to prepare "youth and adults for productive employment as technicians and skilled workers," the state board of education is "directed to establish technical institutes".

§188-A:2-a

A director for "each technical institute" shall be appointed by the commissioner of education. The director's duties shall include the "administration and operation" of the institute.

§188-A:3

The curriculum for the technical institutes shall be "designed to prepare qualified high school graduates as technicians who may serve as assistants to professionally trained personnel".

§188-A:5

The state board of education is "authorized and directed to establish vocational-technical institutes" throughout the state.

§188-A:7

A seven member committee, appointed by the governor, and representing labor, business and education, shall advise the state board of education regarding the

APPOINTMENT

"administration and programming of the technical institutes".

§188-A:9

The state department of education is "authorized and directed to apply" for federal funds for vocational education.

§188-A:12

The state board of education is "authorized and directed to designate comprehensive high schools offering vocational education programs as vocational education centers." The state board will pay tuition costs for students to attend vocational schools in other districts when their own district does not offer such courses.

TUITION

§188-E:1

The state board of education is "authorized and directed to designate high schools offering vocational education programs as vocational education centers."

§188-E:3

The state board of education is "directed to make grants available" to regional centers for the "construction of vocational education facilities." The criteria for determining the granting of funds shall include whether or not the center will receive students from other school districts.

§188-E:4

A "state advisory committee for regional vocational centers," made up of one representative from each regional center, shall be appointed by the state board of education. In addition, each regional center shall have its own local advisory committee.

APPOINTMENT

§188-E:5

The program for the regional centers shall "provide for a substantial vocational offering". The programs shall be extended to "disadvantaged and handicapped persons" as well as "drop-outs" and persons desiring adult education courses.

DROPOUTS

§188-E:6

Students shall enroll both at their regular high school for "non-vocational courses" and at a regional vocational center. Students may, "where distance, transportation, or other physical restrictions prohibit," attend solely the vocational education center.

§188-E:7

TUITION

The state board of education is authorized to pay tuition for students whose school district does not provide vocational courses and who must go outside the district to attend a vocational school.

REGULATIONS

State Board of Education Policies,
321.1, p. 00047

The State Board of Education will designate area vocational centers in accordance with the long range plan for secondary vocational education.

3. VOCATIONAL EDUCATION

STATUTES

§18A:35-4.2

"The commissioner of education and the state board of education shall have the authority . . . to establish and operate a Career Development Program comprised of vocational education projects."

§18A: 54-5 -- 7

The board of education of any school district may establish vocational schools. The location, management, and curriculum of vocational schools must be approved by the commissioner of education. Pupils from other districts may attend classes and will be required to pay tuition.

TUITION

§18A:54-13;16;17

In any county with a population not exceeding 100,000, there may be established a vocational school. For each county system of vocational schools there shall be a board of education consisting of the county superintendent and four appointed persons. Each board member must have been a county resident for three years prior to appointment.

APPOINTMENT

§18A:54-22

All teachers, principals and superintendents in county vocational schools shall have the same rights and privileges as other teachers, principals, etc.

§18A:54-24

The curriculum in county vocational schools shall be approved by the commissioner and the state board.

§18A:54-25

"The school year for a county vocational school shall begin on July 1 and and June 30."

§6:41-2.1

In order for a state to receive federal funds under the Vocational Education Act it must have an advisory council which shall be separate and independent from the State Board.

§6:41-2.4

The State Advisory Council on Vocation Education shall:

1. Advise the State Board on the development of the State Plan including the preparation of long-range and annual program plans, and prepare and submit a statement describing its consultation with the State Board on its State Plan.

2. Advise the State Board on policy matters arising in the administration of the State Plan submitted pursuant to the Act and the regulations in this part.

3. Evaluate vocational education programs, services and activities under the State Plan and publish and distribute the results thereof.

5. Prepare and submit through the State Board to the United States Commissioner of Education and to the National Advisory Council an annual evaluation report which evaluates the effectiveness of vocational education programs, services and activities carried out in the year under review.

6. Prepare and submit an annual budget.

§6:42-1.1

Disadvantaged persons having a combination of conditions which relate to academic, socioeconomic, cultural and other handicaps that prevent them from succeeding in regular vocational education shall be eligible for vocational education.

§6:42-1.2

Handicapped persons including those who are mentally retarded, hard of hearing, deaf, speech-impaired, visually handicapped, seriously emotionally disturbed, crippled or have other health characteristics which prevent these persons from succeeding in a regular vocational education program shall be eligible for vocational education.

§6:42-2.2

ON-THE-JOB-TRAINING

Cooperative agreements may be reached between the school and prospective employers to hire pupils, through the vocational education programs, for on-the-job training employment.

§6:43-1.1

A program of vocational technical education of less than college grade shall be conducted and be part of the state plan for Vocational and Technical Education.

§6:43-2.3

Pretechnical, vocational instruction should be designed to prepare individuals for enrollment in advanced or highly skilled postsecondary and technical education programs.

It shall not include instruction designed to prepare individuals for higher education or professional training.

§6:43-2.4

PREVOCATION INSTRUCTION

"Prevocational instruction shall include instruction designed to familiarize individuals with the broad range of occupations for which special skills are required for careers in such occupations."

§6:43-2.7

The content of vocational instruction shall be developed and conducted in accordance with the following standards to assure soundness and quality in such instruction:

1. The program of instruction shall be based on a consideration of the skills, attitudes, and knowledge required to achieve the occupational or other objective of such instruction and includes a planned sequence of those essentials of education or experience (or both) deemed neccessary of the individual to achieve such objective.

2. The program of instruction shall be developed and conducted in consultation with employers and other individuals or groups of individuals (such as local advisory committees) having skills in and substantive knowledge of the occupations or the occupational fields included in the instruction.

3. The program of instruction shall include the most up to date knowledge, attitudes and skills neccessary for competencies required to meet the occupational or other objective of such instruction.

4. The program of instruction shall be sufficiently extensive in duration and intensive within a scheduled unit of time to enable the student to achieve the occupational or other objective of the instruction.

5. The program of instruction shall combine and coordinate classroom instruction with field, shop, laboratory, cooperative work, apprenticeship, or other occupational experience which is appropriate to the occupational or other objective of the instruction is of sufficient duration to develop competencies neccessary for the student to achieve such objective and is supervised, directed, or coordinated by persons qualified under the State Plan.

§6:43-2.9 -- .10

The vocational instruction shall be conducted and supervised by teachers, teachers aides, supervisors, and other supporting personnel. Vocational guidance and counseling personnel services are also to be made available.

Vocational education for disadvantaged or handicapped persons shall include special educational programs and services designed to enable disadvantaged or handicapped persons to achieve vocational education objectives that would otherwise be beyond their reach as a result of their disadvantaged or handicapping condition.

To the extent feasible, disadvantaged or handicapped persons shall be placed in regular vocational education programs to the extent that they are able to benefit from such programs and provided only with those supplementary special education services which are neccessary to enable them to so benefit.

If certain disadvantaged or handicapped persons cannot benefit from regular vocational education programs to any extent, even with the provision of supplementary special educational services, then these persons shall be provided with special programs of vocational instruction which meet the standards and requirements of regular vocational education programs and which, in addition, include such special instructional devices and techniques and such supplementary special educational services as are neccessary to enable those persons to achieve their vocational objective.

Vocational education programs and services for disadvantaged or handicapped persons shall be planned, developed, established and administered by State Boards and local educational agencies in cooperation with other public or private agencies, organizations, and institutions having responsibility for the education of disadvantaged or handicapped persons in the area or community served by such programs or services, such as community agencies, vocational rehabilitation agencies, and special education, department of State and local educational agencies, and other agencies, organizations, and institutions, public or private, concerned with the problems of such persons.

§6:46-2.1

"The Division of Vocational Education is the supervisory agent in the initiating and operating of state approved vocational education apprenticeship programs."

Related instruction programs shall be provided constituting a minimum of 144 hours each year of apprenticeship.

3. Vocational Education

Statutes

§77-11-20

"The vocational education division of the state department of education shall provide a course of instruction in diesel mechanics . . ."

§72-12-4

"The vocational education division is created within the department of education" the state superintendent, with state board approval, shall appoint a director of vocational education. The state board may delegate appropriate administrative functions to the division.

§73-34-3 --73-34-4

A technical and vocational institute district will be formed by the state board of education if it finds, after a survey caused by petition of 10% of the voting population, that the proposed district is geographically suitable, that there is need (200 potential students) and there is financial support. After state board approval, local boards present the proposal for public election.

§73-34-6

The governing board of the technical and vocational institute district shall:

(1) "determine the financial and educational policies of the institute;"

(2) select a president for the institute;

(3) "fix fee rates and tuition rates for students nonresident in the district;

(4) have authority to issue certificates of proficiency;

(5) have authority to accept gifts, receive federal aid, and purchase, sell, hold, rent property in the name of the district."

§73-34-7

"The state board of education shall in conjunction with the board, prescribe the course of study for the technical and vocational institute and shall define official standards of excellence in all matters relating to the administration, course of study and quality of instruction."

§73-34-7.1

The purpose of the technical and vocational institute law is ". . . to extend state support to public school vocational and technical education programs of not more than 2 years' duration designed to fit individuals for employment . . ."

§73-34-10

Technical and vocational institute districts may arrange for the use or sharing of facilities with any school district or with the board of regents of a higher educational institution.

§73-34-11

Any school district within the county or the adjoining county to the institute district may petition the state board of education to be included in the institute district. If this occurs: the school district may be admitted to the institute district by the same procedure used to first establish the institute district.

§73-34-12

Institute districts may be dissolved by vote of the general electorate after a petition for dissolution is presented to and approved by the state board of education. Plans for dissolution must include payment of all debts. If the electorate approves of the dissolution plan, the institute district board shall proceed with the plan and submit a report to the state board of education, which shall formally declare the institute district dissolved.

§73-37-1

"It is the intention of the legislature. . . to provide means whereby the state . . . in cooperation

with school districts can provide facilities for training and preparation of students for productive employment as technicians and skilled workers, and to more nearly equalize educational opportunity. Further, it is the intention of the legislature that such facilities be developed only in those locations where the number of students will be sufficient to permit the offering of a broad program of vocational and technical education with reasonable economy."

§73-37-3 --73-37-4

"The local school board of a school district may develop and present a plan to the state board (of education) for the establishment and operation of an area vocational school." If the state board approves the plan it will be submitted to the "qualified ad valorem taxpaying electors" in the school district for a vote. If the vote is favorable, the state board shall designate the approved school as an "area vocational school"

§73-37-5

The local school board, with state board approval, may accept non-resident "qualified" (i.e., non-high school graduates, regularly enrolled in one-half or more of the minimum course requirements approved by the state board for public school students and at least 6 years old) students for vocational and technical education on a tuition basis. It may also accept on a tuition basis, with state board approval, resident and nonresident nonqualified students but nonqualified students shall not be included in the district's average daily membership report for the purpose of receiving state basic support.

TUITION

§73-37-6

"Federal funds made available to the state for vocational training programs . . . may be used in support of area vocational schools."

§73-37-6.1

Funds from the "area vocational school fund" shall be distributed to area vocational schools based

on the number of students in the school. Students enrolled in a course which the cost is totally reimbursed from federal, state or private sources are not counted for the purpose of disbursing these funds. The chief of public school finance shall require area vocational schools to make periodic reports of enrollment for the purpose of fund distribution.

§73-37-16

"The vocational education division of the state department of education shall institute vocational education programs to provide occupational training for persons above the compulsory school age or to high school dropouts in order to make them eligible for employment."

§77-11-20

"The vocational education division of the state department of education shall provide a course of instruction in diesel mechanics . . ."

§77-12-2

Unless otherwise provided by law the state board "shall establish policies for the conduct of all programs of the state and state plans established relating to vocational education or vocational rehabilitation." The state board is also the administrating agency for any plans in the field.

§77-12-5

"Subject to the policies of the state board, the vocational education division shall:

A. provide vocational education to qualified individuals;

B. (administer) . . . any state plan or federal aid funds relating to vocational education;

C. . . . make agreements with public or private agencies to establish or to maintain a vocational education program;

D. enter into reciprocal agreements with other states to provide vocational education;

E. accept gifts or grants to be used for vocational education;

F. adopt regulations for the administration of laws relating to vocational education; and

G. conduct research and compile statistics relating to vocational education."

§77-12-9

Vocational education or rehabilitation shall be provided to anyone who is a resident of the state at the time of application and qualifies under a vocational education or rehabilitation program established by the state or anyone who qualifies for eligibility under an agreement which the state has with the federal government or with another state.

CROSS REFERENCES

I.State Board of Education; N.M. Const. Art. XII, Section 6

I.State Board of Education; Statute §77-2-2

3. Vocational Education

Statutes

§1101; 1102

A county board of supervisors or governing body may establish "a county vocational education and extension board for the purpose of giving instruction in agriculture and home economics and . . . other special subjects . . . ."

The board will consist of nine appointive members who shall serve nine year terms. "At least three members . . . shall be appointed upon recommendations made by the farm and home bureau associations of the county and at least three members upon recommendations made by the district superintendents of the county." APPOINTMENT

The powers and duties of a vocational education and extension board include: determining the vocational education needs of the county; employing teachers and supervisors and determining salaries; cooperating with public agencies to conduct vocational education; making contracts with school authorities for services to be rendered and leasing land, buildings and other facilities necessary to carry out vocational education purposes.

§1103; 1104

Vocational education courses must be approved by the commissioner of education. Elementary and secondary level courses "are to be approved" by the local superintendent of education. Employee qualifications "must conform" to state regulations. State aid is available to county vocational education programs. COURSES

§4601

School districts which maintain an "occupational education program" shall appoint an advisory council to advise the board of education on policy matters. APPOINTMENT

§4602

School districts shall provide occupational education programs for high school students and adults. The programs shall be organized by the boards of education and shall include "occupational classes" and "work experience." The board of education has authority to employ teachers and approve curriculum.

§4606

School districts are encouraged to provide "school-to-employment" programs consisting of part-time school and part-time work programs.

§4701 -- 4707

Any county board outside the city of New York may establish farm schools for instruction to school age children in "industrial, agricultural, and homemaking subjects . . ."

A board of managers, composed of district superintendents, shall operate and maintain the school.

Courses of instruction shall include: agriculture, mechanic arts, trades, homemaking.

School age children may be admitted on application or upon commitment as truants or juvenile delinquents. TRUANT

§4712

A farm school shall be part of the public school system, and subject to the control of the commissioner of education.

REGULATIONS

Part 15 (Statutory Authority: §207)

§15.1

The commissioner shall make regulations establishing standards for industrial arts, vocational-industrial schools and classes. In approving these programs the commissioner shall RULEMAKING

consider the adequacy of facilities, standards of instruction and educational efficiency.

Part 111 (Statutory authority §207)

§ 111.1

The board of education of any school district or the vocational education board of any county district may establish industrial high schools. Before an industrial high school opens, a plan of organization and administration must be submitted to the assistant commissioner for vocational education for her/his approval.

§ 111.2

The curriculum of every industrial high school must include three groups of subjects: (1) unit trade shopwork; (2) related technical subjects; and (3) academic or non-vocational subjects.

COURSE OF STUDY

The unit trade shopwork may include the following courses: machine shop, printing, automobile repair, carpentry. For each trade taught, the school must submit to the department for its approval a course of study.

The related technical subjects must be those which will give the students the "practical technical information which intelligent trade workers are required to have." The department must approve the course of study for each subject offered. The subjects may include mechanical drawing, mechanics and mathematics.

An approved industrial high school four-year course of study shall include: 4 units of English, 3 units of social studies, one unit of science, one-half unit of health, and physical education. Industrial high schools may also offer additional instruction in mathematics, science, social studies, music, drawing and art.

§ 111.3

Graduation from a 4-year course in an industrial high school requires the completion of 19 units of work.

An industrial high school must have at least two qualified teachers who devote their full time to unit trade, related technical and academic instruction. A teacher in an industrial high school must hold a vocational certificate. Local school authorities are responsible for vocational teachers' professional improvement and shall make an annual report to the commissioner on this matter.

The superintendent or principal of an industrial high school must hold a permanent or provisional vocational director's certificate. Proper buildings, equipment, tools and machinery must be provided. A suitable library, and proper chemical and physical laboratory facilities must be provided. An advisory board representing local trades must be appointed by the school board in each district.

APPOINTMENT

§ 111.4

If nonresident pupils attend the industrial high school, they must pay tuition. Claims for tuition shall be filed with the trustees or board of education that is required to pay.

TUITION

Part 140 (Statutory authority §207)

§ 140.1 — 140.2

Before September 1 of each year, all county vocational education boards shall file a report with the Commissioner for her/his approval of educational services. The report shall include: copies of all courses of study; names of supervisors and teachers to be employed; a copy of the budget; and copies of agreements between vocational education boards and local school districts.

Before June 30 of each year the board shall file with the Commissioner a report covering educational services rendered. The report shall include financial information and a descriptive summary of the educational services rendered.

§ 140.3 — 140.4

Each county vocational education board shall have regular and special meetings. The boards may employ only full time qualified teachers for educational services for day pupils.

§ 141.1 — 141.2

A board of education in a city with over 125,000 population, a board of education in an approved regional plan, a board of cooperative educational services, or a vocational education and extension board may establish an occupational education program. This program may include cooperative agreements with employers for part-time work and study and will be conducted in high school classes.

§ 141.3

Each school district that receives state aid for an occupational education program shall prepare a plan describing the program.

§ 141.4

Boards of education may provide training, instruction in basic and remedial subjects, and establish part-time employment programs for youth. The educational programs shall be at the high school level unless otherwise specified by the commissioner. Supervised work experience programs may be organized for youth 14 years old who have special education and employment handicaps.

§ 141.5

Occupational education programs shall maintain certain standards, including supervised instruction by certified personnel; an educational program that embraces both general and occupational education; and instruction that is related to the occupation for which the student is being trained.

§ 141.7

Boards of education conducting occupational education programs shall file annual reports with the Commissioner which must include the number of enrollees, and an evaluation of the results obtained from the program.

§ 141.8

A board of education may establish a "school to employment program" for students identified as potential school dropouts. These programs shall be a part-time school, part-time work arrangement.

DROPOUTS

CROSS REFERENCES

I.Chancellor of New York City District; Statute §2590-h

II.A.10.Other - Home School Program: Statute §4801 -- 4809· 4815

III.B.Teachers; Regulation §80.5

3. Vocational Education

Statutes

§115-229 — 115-230

The State Board of Education shall have authority to administer federal funds for "the promotion of vocational education." The State Board shall formulate plans for a vocational program in "such subjects as are an essential and integral part of the public school system" and provide a program for "the preparation of teachers in such subjects." The Board shall have authority to make and publish "studies and investigations relating to vocational education" and to promote the "establishment by local communities of schools, departments, or classes giving instruction in such subjects," and to "prescribe qualifications for teachers, directors and supervisors of such subjects."

§115-230.1

The State Board of Education is authorized and directed to develop a program for the public schools which will offer "more diversified and comprehensive" instruction in "basic work skills, applied economics, and industrial education" and to implement the program on an experimental basis in the public schools. The State Board may provide for the "in-service training or retraining of vocational and other teachers" in preparation for this program.

§115-234

Local boards of education may establish classes in vocational education. Teachers in the vocational program "shall be employed in the same manner as are other public school teachers."

§115-235

Local boards of education are authorized to purchase or lease land "suitable for forest planting or other vocational training." The "school forest" shall be managed by the "department of vocational

agriculture of the school."

§115-235.1

The State Board of Education shall develop "prevocational and industrially-oriented practical arts programs for the middle grades" insofar as funds are available, and a program for the lower grades which provides a "thorough introduction to the world of work."

STATUTES

§15-20.1-02

"The state board of public school education shall be the state board of vocational education." The board, acting through the office of the superintendent of public instruction, shall appoint a director and executive officer for vocational education, who, under the direction of the board, shall be charged with the administration of vocational education. The state board shall also designate assistants to the director. The duties, terms of office, and compensation of the director and assistants shall be determined by the board. The director shall hold as a minimum a baccalaureate degree, enforce the rules and regulations adopted by the board and prepare vocational education reports.

ADMINISTRATION

§15-20.1-03

The Board of Vocational Education shall have the authority to cooperate with the United States Department of Health, Education and Welfare or any other federal agency in the administration of Congressional acts relating to vocational education, and:

1. to administer state legislation in conformity with Congressional acts relating to vocational education;

2. to administer vocational education funds and contract with:

a. any public or private institution or agency agricultural and training schools or state school district;

b. any public or private institution or agency of any other state;

3. to formulate plans for the promotion of vocational education subjects;

4. to provide for preparation of teachers;

5. to fix the compensation of necessary administrative personnel.

6. to conduct studies relating to vocational education;

7. to promote the establishment of schools, departments or classes and to cooperate with local communities in the maintenance thereof;

8. to prescribe the qualifications and provide for the certification of teachers, directors and supervisors;

9. to cooperate with school districts and communities in the maintenance of classes for the preparation of teachers, directors and supervisors for vocational education, to maintain such classes under its own control, and to establish qualifications for those having vocational education teachers.

§15-20.1-05

The board shall administer the funds for vocational education.

§15-20.1-09

The school board of a vocational school district shall not exceed seven members, and shall be elected from geographical areas nearly equal in population.

§15-20.1-10

TUITION

The vocational school board is authorized to receive real or personal property from the United States and federal grants. It may accept enrollments and set the amount of tuition for students residing outside of the district. Payments from the county equalization fund of a student's residence shall be the same rate as that paid for high school students.

§15-20.1-11

COURSE OF STUDY

The curriculum offered students by a vocational school shall be determined by the school board and approved by the state board.

§15-20.1-70

The governing body of any school district and the board of trustees of any county agricultural and training school may cooperate with the state board in the establishment and maintenance of schools, departments, or classes giving instruction in vocational education as approved by the state board, and may use any moneys raised by public taxation for such purposes in the same manner as the moneys for other school purposes are used for the maintenance and support of public schools. When any school, department, or class giving instruction in vocational education has been approved by the state board, it shall be entitled to share in any federal and state funds available for vocational education.

§15-20 2-02

The school boards of three or more school districts may submit to the state board of vocational education a plan to establish a multi-district vocational education center. The proposal and its processing shall be consistent with the state plan and meet the requirements and procedures adopted by the state board.

§15-20.2-04

A multidistrict vocational education center shall be operated by a center board. The number of members will be proportionally determined according to school district population. Center board members shall be members of the school board and their term of office shall be for three years with eligibility for reappointment. Their compensation shall be the same as members of the school boards.

§15-20.2-05

Four districts or fewer may establish small Center Boards.

§15-20-2-07

The powers and duties of the center board are:

1. to supervise, manage and control multi-district vocational education centers;

2. to provide vocational education programs approved by the state board;

3. to contract with, employ, pay, and remove for cause administrative personnel in the multi-district vocational education center;

4. to lease, acquire or purchase vocational education equipment;

5. to lease, acquire, purchase or sell vocational education facilities;

6. to receive and administer funds for multi-district vocational education funds;

7. to enter into contracts consistent with its powers.

§15-20.2-08

The center board shall assess expenses of school districts based on its enrollment compared with total high school enrollment. Each school district shall remit payment to the center board.

§15-20.2-12

A school district board may request that the state board approve such district as a participating district in a multidistrict vocational education center.

§15-20.2-15

The state board may dissolve a vocational education center.

§15-20.2-16

The state board is authorized to establish rules, regulations, standards and procedures as to the creation, operation, control, supervision and approval of multidistrict vocational education centers.

§15-41-05

The state board of public school education, acting as the state board for vocational education, shall make all rules and regulations required for compliance with federal financial aid programs.

REGULATIONS

Chapter I: III.

The State Board for Vocational Education provides a state director and supervision for such programs as: home economics education, office education, distributive education, agriculture, trade, technical and health education, vocational guidance, and related services.

The State Board shall have the authority to cooperate with any federal agencies in the administration of acts of Congress relating to vocational education, including the powers and duties to administer federal and state funds and to make contracts for vocational educational purposes, to plan for vocational educational programs; and to provide for the preparation of teachers and prescribe qualifications for teachers and administrators in vocational educational programs.

Chapter III: II.A.

Vocational education prepares individuals for employment as semi-skilled or skilled workers in occupations requiring less than a baccalaureate degree. The State Director of Vocational Education and the State Supervisors of Vocational Services (Agriculture, Distributions, Home Economics, Office Education, Trades and Industry, Vocational Guidance, and Manpower Development and Training) are available to assist local agencies.

Chapter III: II.B.

The State Board shall reimburse approved public or private agencies giving instruction in vocational education.

Chapter III. II.C.

The governing body of any school district and the board of trustees of any county agricultural and training school may cooperate with the State Board in providing vocational educational instruction. Any program of vocational education approved by the State Board shall be entitled to share in any federal or state funds available for vocational education

Chapter III: II.D.

The school board shall determine vocational curriculum, provided that it shall be submitted annually to the State Board for approval and only an approved curriculum shall be offered.

3. Vocational Education

Statutes

§3311.16 - .18

Any local exempted village, city or county board of education may undertake a study to assess the need to establish within the county or an area comprised of two or more adjoining counties, a joint vocational school district. The cost of such a study shall be divided by the interested parties, and they shall file a copy of the study with the state board of education. Upon the approval of the plan by the state board, each of the interested districts shall have 30 days to decide whether to become part of the proposed vocational school district. If one or more boards decides not to become part of the proposed district, revised plans shall be made to accommodate this. The boards of education of the school districts participating in the establishment of a joint vocational school district may participate on a proportional basis in meeting the administrative, clerical and other expenses necessary to the establishment and operation of a joint vocational school district until funds are otherwise provided. Participation in the vocational district shall not mean any loss of a regular school district's separate identity or legal existence.

§3311.19

The management and control of a joint vocational school district shall be vested in the joint vocational school district board of education. Where the limits of the joint vocational school district do not extend beyond one county, the board's of education of participating districts may choose to have the county board of education serve as the joint vocational school district. Otherwise, the board of education of the joint vocational school district shall be composed of one or more members of the boards of education from each affected city exempted village or county school districts, assuring that the joint vocational school district board of education be composed of an additional number of members.

A county board of education may, with approval of a majority of affected boards of education, select one or more members of boards of education within the county and joint vocational school districts to serve in the place of its county board of education members.

Should the board of education of any school district included within a joint vocational district have its board membership raised under the preceding paragraph, the joint vocational board shall submit a revised plan accomodating such procedures to the state board of education for approval.

The vocational schools in such joint vocational school district shall be available to all youth of school age within the joint vocational school district subject to admissions' standards as set by the joint vocational school district board of education. A joint vocational school district board of education shall enjoy the same legal posture as a city school district as regard the management and operation of its district

Where a county board of education has been designated to serve as the joint vocational school district board of education, the county superintendent of schools shall be the executive officer for the joint vocational school district, and shall enjoy the same legal posture as a superintendent of schools with regard to such district. Such superintendent may receive additional compensation, but he/she shall have no continuing tenure other than that of county superintendent.

Each member of a joint vocational school district board of education shall be paid such compensation as the board may provide by resolution, provided that such compensation shall not exceed twenty dollars a meeting and milage at the rate of ten cents a mile to and from meetings of the board, not exceeding twelve meetings in any one year.

§3311.211

TUITION

The board of education of the joint vocational school district shall collect tuition for the attendance of pupils from nonparticipating school districts. The board of education of

the joint vocational school district may accept gifts, grants federal funds, tuition and other allocations of funds for the purposes of erecting, repairing and equipping buildings and for the cost of operation of the vocational schools of such districts.

§3311.212

The board of education of a joint vocational school district and a participating district may enter into agreements to permit the use of school buildings of the latter to carry on a vocational school program. The cost is to be arranged by agreement between the parties.

§3311.213

With the approval of the board of education of a joint vocational school district which is in existence, any other school district in a county comprising part of a joint vocational school district may become part of the latter.

"On the addition of a local school district to the joint vocational school district, pursuant to this section, the board of education of such joint vocational school district may submit to the state board of education a proposal to enlarge the membership of such board by the addition of one or more members of the county board of education of such additional local school district," subject to approval by the state board.

§3311.215

Facilities of the joint vocational school districts may be used for post-high school training, technical training and retraining programs of vocational education. Joint vocational school districts operating a vocational school may construct, maintain and operate facilities other than those used for vocational training to be used solely for post high school training, technical training, retraining programs of vocational education, dormitories, and other facilities for the use of any student.

§3311.217

The board of education of a joint vocational school district may send a resolution to the state board of education requesting the dissolution of the joint vocational school district. Such

resolution shall require the approval of a majority of the full membership of the joint vocational school district or a majority of the participant school districts boards of education. The resolution shall include a plan for the disposition of all properties, debts, etc. to each participants school districts. Upon approval of the state board of education, the district shall be dissolved accordingly.

§3313.07

Special education classes for deaf, blind, emotionally disturbed, crippled, neurologically handicapped, and educable mentally retarded pupils may be approved for state funding in joint vocational school districts.

The state board of education may assign school districts to joint vocational districts and shall require districts to enter into contract under agreements pursuant to RC 3313.90 so that special education students as well as others may receive suitable vocational services.

§3313.53

"The board... of any city, exempted village, or local school district may establish and maintain in connection with the public school systems:

(A) Manual training, industrial arts, domestic science, and commercial departments;

(B) Agricultural, industrial, vocational, and trade schools."

Such schools may be funded out of public school funds.

§3313.90

Each school district shall establish and maintain a vocational education program adequate to prepare a pupil for an occupation. Districts who are members of joint vocational school districts or have contracts with such districts are in compliance with this provision.

A minimum enrollment of 1500 pupils in grades nine through twelve is required as a base for a comprehensive vocational course offering. This requirement may be met alone, through school

district consolidation, participation in a joint vocational school district, or through contract with a state licensed school. Exceptions to the minimum number of required students may be made by the state board of education based on sparsity of population of other factors indicating that comprehensive educational or vocational programs can be provided through an alternative plan. State funds shall be contingent upon a comprehensive vocational program plan approved by the state board of education. The state board of education shall not approve a school district plan unless the plan proposed reasonably meets the vocational needs of other school districts in the general area . . . . Such a plan shall include:

(a) the organization for vocational education; (b) the offering of such programs in comprehensive high schools, specialized schools or skill centers, and joint vocational schools; (c) building requirements for vocational facilities at respective locations. In approving the organization for vocational education, the state shall provide that no school district is excluded in the state plan.

§3313.91

Any public board of education may contract with any public agency board or bureau, or with any private individual or firm for the purchase of any vocational education or vocational rehabilitation service for any resident of the district under the age of twenty-one years and may pay for such services with public funds. Requirements for such services including teachers and facilities shall be the same as for public schools and must be approved by the state board of education.

REGULATIONS

§3301-11-05

"Each joint vocational school board of education shall establish a procedure to be utilized to report to the public on a yearly basis, data indicating the achievements, problems, plans and improvements made by the district to meet the educational goals established by either the state board of education or the district board of education."

The report shall indicate staff/pupil ratios, percentage breakdowns of staff by race, pupil enrollment data by sex and race, average daily pupil attendance, number of students working full-time or part-time, number of academic courses offered, and the economic status of the district (one or more of the following: "unemployment, percentages receiving public assistance, percentages receiving free or reduced price lunches").

§3301-61-03 -- 3301-61-15

"Each school district shall provide. . .through an approved plan for vocational education job training for eligible students based upon the following percentages": where the percent of high school graduates entering college or degree granting higher education programs is 50% or less, the school district must offer vocational education to 40% of the students 16 years of age or older. In districts where 51% to 60% of the graduates enter college, vocational education must be offered to 30% of those students 16 years or older. Where 61% to 70% of the high school graduates enter college, vocational education must be offered to 20% of the students 16 or older. Where 71% or more of the high school graduates enter college, vocational education must be offered to 10% of the students 16 or older.

Twelve different job training offerings and twenty classes of vocational education must be provided. No more than four of the twelve offerings may be provided by cooperative education methods. Programs shall take into consideration present and future market trends and the recommendations of local advisory committees composed of appropriate representatives of employers and employees in each field related to the proposed job training offering."

School districts may enter into contractual agreement to provide vocational offerings.

"In grant programs which support the provision of health, education or welfare services, discrimination in the selection or eligibility to receive the services

and segregation or other discriminatory practices in the manner of providing them are prohibited."

If the State Board of Education determines, pursuant to the requirements of the administrative procedure Act, that a school district has failed to provide vocational education requried by law, it shall terminate distribution of funds to the school district unless the district establishes "good and sufficient reasons" for its failure to comply.

Programs for vocational education curriculum development and development of professional competence may be extended beyond the regular school year. "Nondegree instructors teaching on a one-year certificate may be approved for extended service beyond the regular school year up to a maximum of four weeks."

§3301-63-01 -- 3301-63-09

FIRE FIGHTER TRAINING

A public agency may receive a continuing or limited charter for a fire fighter training school where at least five trainees have been recruited.

Instructors must be approved by the state superintendent and must have either completed an approved training program, conducted by a state coordinator, or be able to provide evidence of competencies in the subjects to be taught. Fire fighters shall be issued a certificate upon satisfactory completion of the minimum training course.

"Each school shall have. . .classrooms and facilities . . .to effectively carry out the program of instruction." Attendance at all sessions shall be required except for valid reasons and a record of attendance shall be maintained. A final examination must be taken and passed. The training program must be completed in 50 training days or less. Instruction shall include community fire defense, chemistry of fire, classification and uses of fire extinguishers, water fire hydrants, standpipes, fire pump, fire hose, tools, rope, ladders, gas masks, alarms, action analysis, forceable entry, rescure, ventilation, salvage, overhaul and pickup, care of apparatus, arson detection and investigation, inspections, and radiation and gaseous hazards.

3. Vocational Education

Constitution

OKLAHOMA CONSTITUTION, ART. XIII, §7

"The Legislature shall provide for the teaching of the elements of agriculture, horticulture, stock feeding, and domestic science in the common schools of the State."

Statutes

§70-14-101 -- 14-106

The State Board of Vocational and Technical Education shall meet at least once a month. No business may be transacted unless a quorum of seven members is present.

The Board shall supervise the Department of Vocational and Technical Education; supervise the vocational and technical schools and colleges; cooperate and enter into agreements with HEW and other federal agencies; provide for the formulation and adoption of curricula, courses of study, and other instructional aids; purchase or otherwise acquire equipment and other property; enter into contracts with the State Board of Education and with other states for the conduct and administration of services and activities.

The State Department of Vocational and Technical Education may operate or provide for courses and training in vocational and technical education, and charge students reasonable tuition fees. It may also operate an equipment pool, at which equipment shall be kept for the use of area school districts and vocational and technical schools. TUITION

§70-14-108

The State Board of Vocational and Technical Education shall prescribe criteria and procedures for

establishing area vocational-technical school districts. Each district shall be a body corporate with the usual powers of a corporation for public purposes. Its governing board of education shall consist of five elected members, and shall have the same powers and duties as boards of education in independent school districts. Territory may be annexed or detached from an area school district, in accordance with rules and regulations of the State Board of Vocational and Technical Education.

Schools shall be subject to classification, inspection, and accreditation by the State Board of Education.

REGULATIONS

High School Regulations; p. 64
XIII. Vocational and Technical Education

The State Board of Vocational and Technical Education is a "thirteen-member board consisting of the State Superintendent of Public Instruction, the six appointed members of the State Board of Education and six other members appointed by the Governor.

APPOINTMENT

"The State Department of Vocational and Technical Education consists of the following divisions: Agriculture Education, Area Vocational-Technical Schools, Business and Office Education, Distributive Education, Health Occupations Education, Home Economics Education, Manpower (CETA) Training, Special Services, Trade and Industrial Education, Cooperative Vocational Education, and Coordinated Vocational Education Training (CVET).

"Vocational and Technical education programs are a cooperative effort of local schools, the State Department and other state agencies . . . .

"Req. a. Units of work earned by a student in an approved vocational-technical school. . . shall be certified. . . to the high school in which the student is regularly enrolled" and will count toward graduation. "The area vocational-technical school is considered to be

an extension of the local school district and . . . subject" to the district's regulations.

Req. b. "All administrative personnel of a vocational school or an area vocational-technical school who teach less than half time shall have an appropriate administrative certificate."

Req. c. Vocational and technical education-teachers must be certified in the field taught.

Req. d. Three units of credit are earned for secondary level courses in area vocational-technical schools that meet 3 hours a day, 5 days a week, for at least 175 days a year.

3. Vocational Education

Statutes

§344.100

Oregon accepts all provisions and benefits of the federal vocational education act. To provide for the promotion of vocational education in agriculture and the trades and industries and "in the preparation of teachers of vocational subjects, and to appropriate money and regulate its expenditure."

§344.130

District school boards may cooperate with the state board of education in establishing vocational schools or classes, using "any moneys raised by public taxation in the same manner as moneys for other school purposes are used for maintenance and support of public schools."

§344.215

Career education "provides the learning experiences needed to make effective career choices and to develop the attitudes, knowledge and skills that enable persons to perform successfully in the (occupational) role."

Vocational education "offers specific skill training in a wide variety of subtechnical and subprofessional skills to prepare individuals for gainful employment. It is completed initially at the high school level or in a post-high school technical institution, community college or apprenticeship program and may continue through skill upgrading or retraining for a new job."

§344.225, 235

A state advisory council for career and vocational education shall be appointed by the governor.

The advisory council shall give advice on the state plan for vocational education, evaluate career and vocational education programs, and prepare an annual evaluation report.

§345.320

"[V]ocational schools are capable of increasing the educational opportunities available in this state " and contributing to the social and economic progress of the people of the state, while offering different approaches to education, and are often able to provide vocational education and placement assistance not otherwise available.

The licensing laws are "to provide for the protection, education and welfare of the citizens of this state, its vocational schools and its students, by establishing minimum standards. Concerning quality of education, ethical and business practices, health and safety and fiscal responsibility, and protecting against substandard, transient, unethical, deceptive or fraudulent practices."

CROSS REFERENCE

IIA3.1.b.; Regulation §581-11-106

STATUTES

§9-958; 9-959

All powers and duties of county boards of school directors with respect to vocation-technical education and special pupil services are transferred to intermediate unit boards of directors. All Commonwealth payments paid to county boards of school directors on account of vocation-technical education and special pupil services shall be paid to intermediate unit boards of directors.

§18-1802

The Superintendent of Public Instruction shall be the executive officer of the State Board for Vocational Education and shall appoint, periodically, with the State Board of Vocational Education's approval, such expert assistants as may be necessary in vocational industrial, vocational homemaking, vocational agricultural, vocational distributive or vocational business and office occupational education and all clerical and other agents necessary.

APPOINTMENT

§18-1803

The State Board for Vocational Education shall "assist in the establishment of," "inspect and approve," and "report annually" concerning "the condition and progress of" vocational schools and departments for vocational agricultural, industrial, homemaking, distributing business, and office occupational education.

§18-1804

"The State Board for Vocational Education shall provide for vocational schools or classes, with the necessary staffs, in accordance with the State Plan for Vocational Education, approved by the Federal Board for Vocational Education.

§18-1805

Instruction in vocational industrial, vocational agricultural, vocational homemaking and vocational distributive occupational schools or departments may be given in day, part-time and evening classes. Attendance for these classes shall be restricted to those over 14 years old.

§18-1806

Any school district may establish and maintain vocational schools or departments; require a deposit fee of a sum not to exceed ten dollars from each person enrolling in evening vocational schools or classes; acquire land for the purpose of an agricultural school and equip and maintain land as needed.

§18-1807

"Two or more districts may, through a joint school committee, establish and maintain vocational . . . schools or departments, to be known as joint vocational schools or departments."

§18-1808

APPOINTMENT

Local school boards may appoint an advisory committee composed of members representing local trades, industries, and occupations. The committee shall counsel and advise those having the management and supervision of such schools.

§18-1809

Any resident of any school district which does not maintain approved vocational schools, offering the type of training which she/he desires, may apply to the board of school directors of any other district for admission to such school or department. If refused admission, he/she may apply to the State Board for Vocational Education which may approve or disapprove such application. The board should take into consideration the opportunities for free education or vocational training in the community in which the applicant resides, financial

status of community, age, sex, . . . and other relevant circumstances. The decision of the State Board for Vocational Education is final.

Any child of school age who resides three miles or more from the nearest vocational high school may be assigned to a more convenient school in another state on request from the child's parents or legal guardian, provided, that the consent of the proper official in such school district is given and transportation is not provided to a vocational school in the state. The school district in which the person resides must pay the high school charge provided for by this act.

§18-1810

Vocational schools must be approved by the State Board for Vocational Education. "School districts maintaining such vocational schools or departments shall receive reimbursement . . . . and shall make such certificates to the Superintendent of Public Instruction as are required."

§18-1841

An area vocational-technical board may establish schools or classes to prepare for vocational trades, to be known as "area vocational-technical schools. These classes shall be known as a 'technical institute' and offer post high school programs and courses which will prepare out-of-school youth and adults for sub-professional occupations which increase students' qualifications for employment. Technical institute programs shall be coordinated with those offered in area vocational-technical schools to insure progressive advancement of students. Such institutes shall be organized in accordance with proposals of area vocational-technical boards, and must conform to standards established by the Department of Education and the State Board for Vocational Education."

§18-1842; 1844

Each county board of school directors or area vocational-technical board shall appoint an advisory committee, composed of representatives of local trades, industries, and educational agencies. The advisory committee shall advise the area vocational-technical board on such matters as need for equipment or facilities, curriculum, labor management coordination, business and industrial requirements or selection of personnel.

The intermediate board of directors may call an election to determine if an area vocational-technical school may be established. It shall certify the vote conducted in convention or by mail ballot to the Department of Education and if enough school districts vote in the affirmative, the intermediate unit board of directors shall proceed to organize and establish an area vocational-technical school or technical institute. School districts indicating unwillingness to participate may become participating districts at a later date according to terms and conditions defined by the then participating districts.

In cases where a second or third class school district maintains an approved vocational program, such district may make the program part of the area vocational-technical school, or continue to operate the program independently either as a participating or non-participating district.

§18-1845

All expenses in connection with the establishment of area vocational-technical schools or technical institutes and additions and improvements shall be borne by the school districts in the proportions agreed upon by the respective districts.

All property shall be owned jointly by the participating districts.

§18-1847

"On obtaining the consent of the area vocational-technical board any pupil residing in a non-participating district may attend the area vocational-technical school or technical institute, provided the school district in which the pupil resides pays an amount equal to the total approved budget for current expenses, divided by the number of pupils enrolled in the school."

§18-1849

"Future development of area vocational technical schools shall conform to the state plan. The school directors of a specified attendance area desiring to change the specified area, or questioning the practicality of the plan may petition the state board for vocational education for change. Decision of the board shall be final."

§18-1850.1

Local boards of school directors shall have authority to establish a vocational-technical school or institute and

set forth the rights and obligations of the participating districts. No change shall be made without majority vote of each participating school district. The several participating boards of school directors shall be known as the area vocational-technical board. Its duties shall be: to assume the obligations incurred by any county board of school directors on behalf of such participating districts pursuant to prior agreements;

to formulate and adopt policies and the budget relating to the operation of the school or institute;

to designate a superintendent of the school or institute which may be a county superintendent or a "chief school administrator;"

to make surveys to determine the current vocational and technical needs of the school districts;

to make rules and regulations for the administration of the work under its charge;

to employ professional employees and other necessary persons and determine their salaries. Employees shall have the same rights as personnel in other schools; and,

to acquire real property and tangible equipment and supplies;

to provide for free mandated transportation of district pupils to and from the area vocational-technical school;

to make an annual report to the Department of Public Instruction; and

to receive federal, state, school district and other public and private funds;

to prepare and submit to the Department of Public Instruction a budget;

All actions of an area vocational-technical school board shall be by a majority vote of the members of the board; an area vocational-technical board shall have power to delegate the operation of the school to one or more county boards of school directors acting as agent for the area vocational-technical board.

§18-1850.2

An intermediate unit board of directors or joint committee designated as an agent to operate, administer and manage a school shall discharge its duties and responsibilities in accordance with the agreement between itself and the area vocational-technical board. "The agreement shall give the agent the power and authority to operate, administer and manage a school given by law to an area vocational-technical board and shall provide that the agent shall conduct the affairs of the school and/or institute within the limits of the budget adopted by the area vocational-technical board." Certain powers granted an area-technical board may not be delegated.

§18-1850.3

A joint committee may be selected to operate a school and/or institute. Its membership shall be determined by agreement among the boards of participating

school districts. Each participating board of school directors shall elect one or more of its members to serve on the area vocational-technical committee. The committee members shall serve staggered three-year terms.

§18-1851

"Where the provisions of this act have not been complied with or the vocational educational needs of children and adults are not being adequately served, the Department of Public Instruction is authorized to provide vocational schools, departments or classes for the proper vocational education and training of children and adults. Eligibility for classes shall be determined according to standards and regulations promulgated by the State Board for Vocational Education.

§18-1853

An area vocational-technical board authorized to establish and operate an area vocational-technical school or technical institute may contract "with the State Public School Building Authority, the General State Authority, municipal authorities, nonprofit corporations, municipal corporations, political subdivisions, public and quasi-public and private agencies, Federal government and its agencies and instrumentalities to lease lands and buildings for the purpose of operating an area vocational-technical school or technical institute."

§19-1922

Vocational education programs for out-of-school youth or adults should be undertaken upon request by 20 or more out-of-school people if there is an administratively feasible educational objective provided for in the State Plan for Vocational Education and there are facilities available.

§19-1925

"Any board of school directors may admit persons less than six years of age, or more than twenty-one years of age, to suitable special or vocation schools or departments."

§1703

The State Board of Education is designated to carry out, through the bureau of vocational education, the provisions of the act and "shall have full power to take all necessary steps in the formulation of plans for the promotion of education in agriculture, in trades, in home economics, industries, and to formulate and execute plans for the preparation of teachers of vocational subjects."

§1707

The State Board of Education is hereby designated as the State Board for Vocational Education to carry out the provisions of said act "as it relates to the cooperation of the state and federal governments, and shall have full power to take all necessary steps in the formulation of plans for the administration of education in agriculture, in trades, in home economics, in industries and distributive occupations and to formulate and execute plans for the preparation of teachers of vocational subjects."

REGULATIONS

§ 6.1 - 6.3

Four general types of educational field experience programs are:

(1) Cooperative vocational education: A planned instructional program developed through a signed cooperative arrangement among school representatives, students, parents, and employers in the community to provide students with an opportunity to alternate in-school academic and vocational instruction with entry-level paid employment in any occupational field.

The students' total occupational work experience is planned, coordinated, and supervised by the school in close cooperation with the employer.

(2) Work study program: Designed to provide financial aid through part-time work for vocational students outside of school hours. Students may perform work in the school system or any other public agency. Whenever possible, the work-study program should be related to the educational program of the students.

(3) Work release programs: Student is released from school for a portion of the school day in accordance with existing federal and state laws in order to obtain paid employment. Purpose is to provide students with income and the values associated with being productive. Employment need not be related to any future vocational interests, prior schooling, or training.

(4) General field experiences: Any instructional activity designed to promote the general educational development of students. Programs are usually non-paid and offered to orient the participants to the nature of the community outside the school.

It shall be the policy of the State Board of Education through the Department to provide every youth attending secondary school with the opportunity to receive vocational education which will facilitate the attainment of economic independence and the development of human potential.

Vocational education programs and services shall be subject to the approval and supervision of the Secretary and shall be consistent with a high quality of education for every pupil in the Commonwealth.

Exceptions to specific regulations may be granted by the Secretary when it becomes necessary to provide for unusual conditions.

§ 6.41, 6.42

New or renovated program facilities shall be

assigned in accordance with shop, laboratory, and classroom space allocations approved by the Secretary. Standards and procedures shall be developed in accordance with the revised method of administering public school new construction and renovation projects. All standards shall be developed according to schedules approved by the Secretary based on formulas established by him.

Equipment shall be comparable, insofar as practical, to that used in occupations or household for which vocational education is provided.

§ 6.53

INSERVICE TRAINING

The Board of School Directors of each educational agency which has a vocational education program and each Area Vocational-Technical Board shall provide for in-service education for the vocational education staff.

§ 6.54

CLASS SIZE

Factors determining the class size in any vocational education class shall include the size of the laboratory, type of equipment, the number of work stations, and the safety of the students.

§6.71 -- 6.75

Vocational education shall be a part of a comprehensive educational program in every school district to assist in providing career awareness, career exploration, and preparation for occupational specialization on the secondary level.

Enrollment in such vocational educational programs shall be granted in accordance with provisions of the Pennsylvania School Laws and the State Board of Education.

Vocational education curricula shall be designed to contribute to the total career education program of the school.

A record of each vocational education pupil's occupational objective and planned program of studies

shall be on file in each school operating an approved vocational education program.

A State and Federal program of education, including safety shall be integrated in the curriculum and practiced in all instructional areas.

Vocational education youth organizations functioning in a vocational education school or department shall be administered as an integral part of the respective vocational instructional programs.

§ 6.76

EQUAL OPPORTUNITY

Area Vocational-Technical Boards shall have a written policy regarding admissions to each of their programs insuring that admittance in no way could be construed as discriminatory. Admittance shall be based upon the aptitude of the student for the applicable vocational-technical program. Fair and equal access to all courses and programs for all students without respect to sex shall be insured; students who have not achieved high grades in academic subjects, but who otherwise qualify, should not be unfairly penalized.

§ 6.77

School district boards and area vocational-technical school boards may provide programs to meet the basic vocational education needs of the citizens of the community including those who have left or graduated from high school.

Educational opportunities in vocational-technical skills and knowledge considered at the level normally taught by high schools and area vocational-technical schools may be made available to adults needing such training.

§ 6.78

Cooperative vocational field experience programs shall have a curriculum which integrates field placement and in-school instruction. Work release programs may have a curriculum which attempts to integrate the

work experience release activity with the in-school instruction. Students involved in work release programs have the option to return at any time to either a regular general program of instruction or an appropriate vocational education program.

§6.81 -- 6.83

"Vocational education programs will be evaluated by the Secretary using such techniques as self-study, Department staff reviews, or external evaluation units.

Within six months following the receipt of a formal evaluation report from the Secretary, the Board of School Directors, or Area Vocational-Technical Board shall submit to the Secretary a plan for program improvement.

Standards for the approval of vocational education programs and the implementation of these regulations shall be based upon desired vocational competencies to be achieved for each vocational program."

§ 6.91

The State Board of Education adopts as its goals for vocational-technical education, the goals specified and approved by the State Board for Vocational Education each year in the State Plan for Vocational Education.

3. VOCATIONAL EDUCATION

STATUTES

§16-8-1

The state board of education is designated as the state board of vocational education to co-operate with the federal office of education and veterans administration in the administration of any act of Congress, "relating to vocational education . . . or to disabled veterans."

§16-8-2

The general treasurer is the custodian of all funds required to be appropriated by virtue of Rhode Island's acceptance of the Smith-Hughes Act for vocational education.

§16-22-1

"The department of education shall make a study of the curricula offered by the public schools within the state of Rhode Island for the purpose of planning a more practical education program," and with the object of training pupils so that at the completion of their schooling they may be qualified to seek specialized occupations in the fields of business, industry, manufacturing and the various trades, or to pursue further studies for the various professions. Through vocational guidance counselors within the schools each pupil shall receive assistance in selecting courses which will best suit them for some specialized occupation or profession upon graduation from high school.

§16-27-1.2

The state board of education is empowered to provide vocational evaluation and work adjustment services to persons disadvantaged by reason of handicaps, youth or advanced age, low educational attainment, ethnic or cultural factors, prison or delinquency records, or other conditions, constituting barriers to employment.

§16-30-1

The school committee of any town may, with the approval of the department of education, establish a

technical institute, to offer educational opportunities in the technical fields through the thirteenth and fourteenth years of school.

§16-45-1

The state board of education shall "establish and maintain regional schools for vocational and technological training with such equipment, books and supplies as are necessary;" and the department of education shall appoint the necessary teachers and other employees, determine their salaries and fix their terms.

§16-45-3

The state board of education shall investigate, evaluate and review the specific vocational needs of the entire state, and shall report annually to the governor and general assembly and make recommendations for future programming of courses and facilities for vocational and technological training.

§16-45-7

The general assembly shall annually appropriate necessary sums for support of regional vocational and technological schools.

§16-45-8

Any resident of the state, being otherwise qualified therefor shall, until a vocational school is in operation in the region in which she/he resides, be eligible to register at, receive instruction from, and be issued a certificate by the regional vocational school serving the inhabitants of the greater Providence area.

ELIGIBILITY

§16-53-1

"There is hereby established a permanent committee to be known as the Rhode Island state advisory council for technical-vocational education."

§16-53-2

ADVISORY COUNCIL

The advisory council for technical-vocational education shall be composed of 21 members appointed by the

governor, and membership shall exclude members of the board of regents, the state director of vocational education and the regent staff, and it shall include a wide variety of persons knowledgeable in diverse areas of vocational-technical education and implementation of educational policies.

§16-53-3

The state advisory council on technical-vocational education shall:

A. Advise the board of regents on the development of a state plan pursuant to federal guidelines.

B. Advise the board of regents on policy matters arising in the administration of the state plan submitted pursuant to the federal act and the guidelines and regulations in this part.

C. Evaluate vocational education programs, services and activities under the state plan, and publish the results thereof.

D. Prepare as required by federal guidelines, an annual evaluation report, which (1) evaluates the effectiveness of vocational education programs, and (2) recommends such changes as may be warranted by the evaluations.

E. Prepare and submit to the United States Commissioner of Education an annual budget covering the proposed expenditures of the state advisory council and its staff for the following fiscal year.

REGULATIONS

ARTICLE I: ROLE AND FUNCTION OF THE STATE EDUCATION AGENCY, pp. 1-13.2 -- 1-13.3

BOARDS, COUNCILS, COMMISSIONS AND COMMITTEES

H. An area advisory committee for the Blackstone Valley Regional Vocational School shall be established to advise the State Department of Vocational Education and Blackstone Valley Vocational School officials concerning the development of the vocational-technical program and to provide closer cooperation and better understanding of trade and industrial education in industry, business, the home, and the school.

The Committee shall consist of an indefinite number of members, appointed by the Commissioner of Education on recommendation of the Professional Liaison Committee to serve terms of one, two, or three years. Members shall be representatives of labor, business, and the professions.

The officers of the committee shall consist of a chairman, selected by the committee for a one-year period, and a secretary who shall be the Coordinator of the school.

Meetings shall be called as required by the chairman. All active members of the committee may vote. A majority of the members shall constitute a quorum.

4. Early Childhood Education

Statutes

§16-2-27

Every child who has attained or will have attained five years of age on or before December 31 of any school year shall be eligible to attend kindergarten during all the days that kindergartens are in session during said school year.

CROSS REFERENCE

III.A.2.; Regulation, Standards for Elementary Schools

3. Vocational Education

Statutes

§59-53-1810 --59-53-1870

The state board of education may cooperate with any local or state agency to advance vocational education. The state shall appropriate an amount equal to or greater than that appropriated to South Carolina by Congress under the "Promotion of Vocational Education" Act. The funds may be used to pay or to train teachers of vocational subjects, to purchase supplies and equipment, and to maintain vocational classes.

§59-53-1880

School districts may affiliate to develop and maintain vocational education facilities and programs. The agreement shall be evidenced by a written instrument filed with the state board of education and the county board of education.

§59-53-1900 --59-53-1920

The school districts of the state may join to create a vocational school board to construct and operate vocational schools. The school shall not constitute a separate school district but shall be a joint project funded by the cooperating school districts. The board of the vocational school shall consist of members from each cooperating district. The board shall be "fully empowered to operate . . . maintain . . . and extend the facilities . . ." and to govern the functioning of the school and has the powers enumerated in this section.

Anyone who "wilfully injure[s] or destroy[s]" vocational school facilities shall be guilty of a misdemeanor.

Regulations

§43-183

Custodial services for vocational centers shall be provided to adequately clean and service all shops and classrooms.

§43-185

Boards of trustees shall establish written policies outlining procedures for handling discipline problems that arise in connection with area vocational centers including specific assignments of responsibilities to the director of vocational centers and principals of the feeder schools.

§43-236

The program of studies in each vocational center should be broad in offerings to meet the diverse occupational needs of students. If centers are organized on a quarterly or semesterly basis, courses should be sequential in content and planned for four quarters or two semesters to be equivalent to one year of skilled training. A vocational center may offer credits and courses in accord with established procedure of the district's secondary schools.

A vocational education program shall include vocational specialization and skill development in a minimum of four occupational program areas (a minimum of 12 units in Grades 10-12) or vocational specialization and skill development in a minimum of 10 Trade and Industrial programs plus two other vocational program areas.

The vocational center or the school's program shall consist of at least the minimum offerings and shall be selected from the following occupational program areas:

Agricultural Education - A minimum program shall include at least three levels of single period courses or a two-year course in specialized agricultural occupations scheduled for multiple periods daily, five days weekly, 36 weeks annually.

Distributive Education - Program consists of D.E. I for 11th graders as a prerequisite for D.E. II for 12th graders with students receiving a minimum of one unit of credit for 250 minutes of instruction weekly. Students receive one unit of credit for approved on-the-job training in addition to credit for classroom instruction. Fashion Merchandising is a one-year specialty D.E. Program offered to 12th grade students for a minimum of 500 minutes

of instruction weekly for two units of credit.

Health Occupations Education - A minimum program consists of exploratory and/or occupational courses in the 11th and 12th grades on a three-hour block; post secondary adult courses on a nine-or twelve-months basis for eight hours a day; and adult supplementary/preparatory courses of specified content for two to three hours of instruction.

Occupational Home Economics - Included should be one and two level courses in Child Care Services, Clothing Services, Food Services, Housing and Home Management Services, scheduled for multi-periods daily, five days weekly, thirty-six weeks annually.

Office Occupations Education - Program shall include a minimum of four different course offerings each year. Each student enrolled in an office occupations course shall be enrolled in one of the six clusters/majors. Office Procedures is a senior-level course required for each office occupations student enrolled in and completing the stenographic, clerical, accounting, keypunch and senior intensified clusters/majors. A minimum of four courses is required for each of the six clusters. The clusters are stenographic, accounting, clerical, senior intensified, keypunch and data processing.

Trade and Industrial Education -- A sequence of learning activities in each occupational area sufficient to permit student job-entry on completion shall be provided as a minimum; that is interpreted as three levels of two hours per day or two levels of three hours per day.

Prevocational Education - schools are required to provide this offering as an elective for students in Grades 9 and/or 10. It shall consist of six exploratory areas. Curriculum guides are available from the Office of Vocational Education from which a school district may select five areas, plus "The World of Work." Schools administered under a nine-week structure may offer four exploratory areas and include "The World of Work" in each unit.

Consumer and Homemaking Education - Program includes basic and advanced year courses, and one and two level semester courses in Child Development, Clothing and Textiles, Con-

sumer Education, Family Life Education, Foods and Nutrition, Housing and Home Furnishings and Human Sexuality, scheduled for a single period daily for five days a week.

Vocational centers planning to adopt the quarter or semester system shall develop a written outline or guide for each course and secure approval of the Chief Supervisor Accreditation and Education Improvement Section, and of the Chief Supervisor, Program Planning and Development.

The director of an area vocational center may conduct an experimental program which necessitates the temporary waiving of certain standards provided the program has prior approval of the Chief Supervisor, Accreditation and Educational Improvement Section, and of the Chief Supervisor, Program Planning and Development.

Area vocational centers courses are approved as described in the Secondary Schools section.

In addition to the policies of the State Board of Education, the programs under the jurisdiction of other state licensure boards shall meet their requirements.

§43-275

In secondary schools and vocational centers, teachers and students participating in courses involving potential eye hazards must wear protective eye devices.

3. Vocational Education

Statutes

§1-45-9 — 1-45-10

The "state board of vocational education" is the head of "the division of vocational education." The board shall consist of five members appointed by the governor. APPOINTMENT

§13-39-3 — 13-39-4.1

The "board of vocational education" shall be governed by a salaried director.

§13-39-5

The director of vocational education may be "removed by the Governor at any time for cause." REMOVAL

§13-39-6

The director of vocational education, subject to the board's approval, shall select personnel for the division.

§13-39-9

The director of vocational education shall "have general control and supervision" over all "vocational training and technical education" in all public and trade schools.

§13-39-10

The board of vocational education has "the power and authority" to adopt rules for the "promotion and coordination" of vocational education in the state. RULEMAKING

§13-39-10.1

The state board shall "establish rules, regulations and standards" for "efficient post-secondary" vocational educational programs, and avoid duplication of programs among the districts. RULEMAKING

§13-39-11

The director of vocational education must carry out all "policies . . . adopted by the board."

§13-39-13

The board of vocational education has the power to enter into contracts with any government agency "for the purpose of promoting vocational training" and to receive and appropriate federal funds.

§13-39-16

The board of vocational education shall "coordinate . . . the courses of vocational training . . . with the practical experience of training of apprentices in the skilled trades."

APPRENTICES

§13-39-17

In determining the type of vocational training and technical education to be offered, the board of vocational education shall consider state and national needs in "trade and industrial occupations" and "adopt . . . programs to keep pace with the changing needs of the state and the nation for trained workers."

§13-39-18

The director of vocational education shall submit courses of study to the board for approval.

§13-39-21

The director of vocational education shall "prescribe a . . . system for gathering and reporting of vocational . . . education data" for purposes of recordkeeping and for "evaluation of educational progress."

§13-39-22

The director of vocational education has the authority to "conduct research and compile statistics" on vocational training and education within the state.

§13-39-24

The director of vocational education shall report to the board on the "operation and status" of the vocational programs, and make recommendations to the board on "policies and rules . . . necessary for progress in the field of vocational training and technical education."

§13-39-25

The board of vocational education shall recommend policy and legislative changes regarding vocational training and technical education to the governor and the legislature.

§13-39-27

Any school district is authorized to establish "in cooperation with the division a vocational department, classes and facilities for vocational education."

§13-39-28

"All persons who have the ability to profit from the vocational training or technical education course to which they apply may be enrolled . . . ."

§13-39-41 - 13-39-42

Two or more school districts may combine plans for operating a "multi-district secondary occupational-vocational education center." The plan must be approved by the state board of vocational education.

§13-39-44

A "multidistrict occupation-vocational" school shall be operated by a board comprised of members from all participating districts.

§13-39-52

The multidistrict center board shall offer vocational education in "not less than five different occupational-vocational programs."

§13-39-53

A multidistrict occupational-vocational education center shall have the same powers and obligations as a school board [except to levy taxes and issue bonds].

§13-39-64

The state board of vocational education is authorized to adopt rules for the "creation, control, supervision and approval" of multidistrict occupational-vocational education centers.

RULEMAKING

REGULATIONS

§24:10:01:01

"The board [of vocational education] is charged with effectuating the responsibilities and duties assigned by the statute creating the division of vocational education and providing for the appointment of a director."

APPOINTMENT

§24:10:01:03 -- 04

Proposals for amendment, adoption or repeal of a rule must be submitted to the board of vocational education at least 45 days ahead of the meeting at which the proposer expects the board to act on the proposal. Any such proposals "must be immediately referred to all members of the board."

§24:10:01:05

Petitions seeking a declaratory ruling on the applicability of any vocational education statute or rule or order of the division of vocational education are to be handled by the director, who shall, upon receipt, "promptly set a [hearing] date" at which all interested parties may appear and testify. Ten days written notice shall be given to the petitioner and all board members.

NOTICE

"The director may, in [her/his] discretion, cause public notice of the hearing to be published in at least 3 newspapers of general circulation in . . . South Dakota at least 10 days prior to [the] . . . hearing. The director shall cause a record of the proceedings to be made, and it shall be maintained in the office of the director."

HEARING

"No provision of this plan shall be interpreted as unreasonable requirements to limit employment of any person for positions provided for in these rules."

§24:10:13:01 -- 03

"An application for a (vocational education) project or activity shall be in writing and contain:

"(1) A description of the personnel needs to be met by the project and a specification of the end-product or outcomes to be achieved at the termination of the project or activity;

"(2) A brief justification for the program with a statement describing the innovative features of the program, and a resume of the content and activities proposed for attaining the objectives of the project or activity;

"(3) A brief description of the characteristics of the personnel to be trained, and the number of persons to be trained by the project;

"(4) A brief description of the plan for evaluation, a brief description of the plan for disseminating the results of the program, a brief description of the management and administrative procedures to be followed;

"(5) The project costs for the project or activity and a justification of the costs;

"(6) A statement that the applicant must assure that no supplemental funds will be used to supplant existing monies, but will be used to meet high priority needs, not currently part of an existing program in teacher preparation or development.

"Applications will be promptly reviewed by the director and the appropriate supervisory personnel and will be either approved or disapproved.

"Written notice of the disposition of the application shall be given the applicant."

§24:10:14:01 -- 04

"Local education agencies must submit applications for special programs, services and activities to the director or appropriate state supervisor on forms to be obtained from the office of the director.

"Applications for special programs, services and activities must contain:

"(1) Identification of special program, service or activity, the level of the program, and an indication whether it is a new or continuing program;

"(2) Fiscal year salary or salaries for services and projected daily schedules of staff;

"(3) Equipment and supply lists, including costs;

"(4) Annual and long range plans, including information on population to be served and labor market statistics; and

"(5) Narrative description of the program.

"Applications must be promptly submitted by the director to the board for its consideration. Written notice of the board's decision must be given to the applicant. NOTICE

"The board in its discretion may hold hearings on the application at a time and place to be determined by the board. Notice of the time and place of the hearing must be given to the applicant." HEARING

§24:10:18:01 -- 07

"The board (of vocational education) may consider and approve applications for exemplary programs and projects, such applications to be submitted through the director.

"Applications shall be submitted to the director by an individual authorized to act for the applicant and shall contain:

"(1) A statement of the purpose of the proposed program or project;

"(2) A description of the nature of the program or project;

"(3) The proposed: duration of the program or project; date for start of program development; and start and termination of the program while students are involved;

"(4) An explanation of how the results of the program or project will be used for the improvement of the vocational education program in the local school or the state, or both; and

"(5) The number of private nonprofit school students to participate, and the degree and manner of expected participation of such students, and, the financial information specified.

"An application shall include the qualifications of the staff personnel responsible for the proposed program or project, including a listing of the staff positions necessary to carry out the program or project.

"All applications will be reviewed to assess the:

"(1) Impact on meeting the vocational education needs of disadvantaged youth, and reduction of youth unemployment and the extent to which the project promotes cooperation between public education and manpower agencies;

"(2) Relevance to priority areas in vocational education specified in the state's long range program plan and to vocational education programs, services, and activities described in the state's annual plan;

"(3) Adequacy and competence of personnel designated to carry out the program or project, and the adequacy of facilities;

"(4) Reasonableness of cost estimates and the expected potential of the proposed program or project being made a part of the regular vocational education program; and

"(5) Adequacy of the provisions for evaluating the proposed program or project with a reasonable degree of objectivity.

"Applications deemed to be complete will be referred to a review panel designated by the director for evaluation and recommendation as follows:

"(1) The review panel will either approve the application in whole or in part, disapprove the application, or defer action on the application for such reasons as lack of funds or need for further evaluation;

"(2) Any deferral or disapproval of an application will not preclude its reconsideration or resubmission. The applicant will be notified in writing of the disposition of the application;

"(3) A letter will be issued by the sate director for each grant or contract award outlining the approval budget and the grant or contract award conditions. Provisions will be made to assure continuous monitoring of the program or project and for ascertaining that the program or project is proceeding satisfactorily in full accordance with applicable state laws.

"Exemplary programs or projects for which the board makes grants shall meet these requirements:

"(1) Planning, development, and operation of programs and projects shall be done in cooperation with other agencies which might support projects similar in purpose;

"(2) Each proposal must specify the coordination procedures which shall take place and the personnel responsible for the maintenance of such coordination;

"(3) There will be genuine and meaningful participation in all exemplary programs for pupils in nonprofit private schools.

§24:10:19:01 -- 02

"The board (of vocational education), when contracting with those private schools which provide post secondary vocational education or technical education, or both, to provide such education shall provide that such education be of the same standards and quality as required by the state plan and that it be open to supervision by the state supervisory staff.

"Such contracts as the state board or local boards may make for vocational education must:

"(1) Be in writing;

"(2) Incorporate the applicable standards and requirements prescribed by the state board;

"(3) Require instruction under contract to be conducted as part of the state and local program under provision of the state board;

"(4) Constitute a reasonable and prudent use of funds;

"(5) Include assurance that funds allocated will only be used to lower the rate of or to eliminate tuition fees and other charges which would otherwise be collected; and

§24:10:20:01 -- 03; 05

"Applications for federally supported consumer and homemaker education shall be made to the board through the director and supervisor of home economics education.

"Applications submitted for funding under this chapter shall contain:

"(1) Justification in terms of meeting social and cultural conditions and the needs of persons in economically depressed and high unemployment areas;

"(2) Indication that the project or program will encourage preparation for professional leadership;

"(3) Preparation for youth and adults to enter work of the home or as homemaker and wage earner;

"(4) Provision for consumer education as an integral part of the program.

"The (state) board, through the home economics education supervisory staff will review applications on guidelines which include review of the annual program plan, long range program plan, facilities, cost estimate, staffing, supervision, evaluation, disadvantaged youth and adults, and availability of funds.
